

VACCINES

THE BIGGEST MEDICAL FRAUD IN HISTORY

ELEANOR MCBEAN

SUE MARTSON

IDA HONOROF

TRUNG NGUYEN

HISTORY OF VACCINATION

“The further I looked into it, the more shocked I became. I found that the whole vaccine business was indeed a gigantic hoax. Most doctors are convinced that they are useful, but if you **look at the proper statistics** and study the instance of these diseases, you will realise that this is not so.” —Dr. Archie Kalokerinos, MD, PhD, AMM, MBBS, FAPM, pediatrician for over 30 years

I have read, restored, and updated over 25 historical works on vaccination. I can conclusively say that vaccination is the biggest medical fraud in history. Vaccination, along with war, could be the biggest fraud in all of history. For each disease “epidemic” from 1850 to 2018 (168 years), all you need to do is replace the date and location in the article to the current date and location. You’ll come to the inescapable conclusion that the drug companies have been running the same racket repeatedly. Each generation has been burdened with vaccination since 1796. This crime of greed—the blood poisoning and killing of innocent children for money—will continue unless the people are aware of it.

There is a joke among anti-vaxxers. It goes, “When does flu season start?”

Answer, “The flu season starts when the drug companies have millions of flu vaccines waiting to be sold.”

The year is 2018. If you were alive in the last 15 years, you’ve gone through several disease “pandemics”:

- anthrax
- ebola
- measles outbreaks
- bovine influenza (cow disease),
- avian influenza (chicken disease),
- swine influenza (pig disease), and
- Zika virus (mosquito disease).

Of course, there’s the *yearly flu season* pandemics. In every single instance, they weren’t even pandemics, but much ado about nothing disease mongering to sell

vaccines. *Diseases, like wars, are manufactured for profit.*

“Our medically controlled Health Boards cook up fake epidemics, **create panics for profit**, such as the ones in the Kansas City in 1921, Pittsburgh in 1924, Philadelphia, Baltimore, Washington in 1925. An effort was also made to create a panic in New York in 1925, but due to the open fight against it by the New York Evening Graphic, the Commissioner of Health called it off.”—Dr. Herbert Shelton (1895-1985), DC

Behind the news anchors, behind the pediatricians, behind the medical doctors, behind the TV personalities, behind the corrupt bureaucrats and politicians, are the drug companies (vaccine manufacturers) directly or indirectly paying their salaries. The drug companies stand to make billions from these fabricated disease pandemics. Disease mongering has been ongoing since 1796—when the first smallpox vaccine was introduced.

Anytime you hear about a disease that is about to annihilate the human race, ask yourself these questions:

–Who benefits from disease mongering and the sale of vaccines?

–What is the chance of me contracting this disease if I don’t vaccinate versus if I do vaccinate?

—What are the risks of vaccination? (allergies, asthma, brain damage, autoimmune diseases, cancer, and death)

–What causes these diseases?

–Has there been a study demonstrating that these vaccines work? For example, 100 000 vaccinated subjects versus 100 000 unvaccinated subjects.

In every instance, without exception, you’ll find that you have a higher chance of being struck by lightning than dying from these diseases. In nearly every case, the disease was manmade, caused by industrial chemicals such as pesticides, vaccine ingredients, antibiotics, and medicines (petrochemicals). Or worse, concocted in clandestine laboratories and released onto the unsuspecting public.

Soon it will be common knowledge that health does not come from putting poisons in the body, and the pharmaceutical companies shouldn't be trusted with your health.

INTRODUCTION

“Without data, you’re just another person with an opinion.” —W. Edwards Deming, engineer, data scientist

Each book in the *History of Vaccination* series is accompanied by the same prologue. If you’ve already read the prologue, feel free to skip to the book original book. The 25 historical works I’ve restored and updated shed light on the nature of vaccination, as recorded by the most distinguished doctors and scientists of their time. Their statements are backed by historical statistics, which are presented throughout these books.

The first smallpox vaccine was conceptualized in 1796. Since that time, vaccination has been rife with controversy. Let's review what writers, doctors, and scientists have observed about vaccines across three centuries—19th, 20th, and 21st.

19TH CENTURY (1800s)

“There does not exist one single fact, in all the experiments and improvements made in science, which can support the idea of vaccination. A vaccinated people will always be a sickly people, short lived and degenerate.” —Dr. Alexander Wilder, MD, “Vaccination: A Medical Fallacy”, editor of the New York Medical Tribune, 1879

“I have seen leprosy and syphilis communicated by vaccination. Leprosy is becoming very common in Trinidad; its increase being coincident with vaccination.” —Dr. Hall Bakewell, Vaccinator General of Trinidad, 1868

“Cancer is reported to be increasing not only in England and the Continent, but in all parts of the world where vaccination is practised.” —Dr. William S. Tebb, MA, MD, DPH, “The Increase of Cancer”, 1892

“Leprosy arose with vaccination.” —Sir Ronald Martin, MD, 1868

“Syphilis has undoubtedly been transmitted by vaccination.” —Sir William Osler Bt., MD, FRS, FRCP

“To no medium of transmission is the widespread dissemination of this class of disease (syphilis) so largely indebted as to Vaccination.” —Dr. B.F. Cornell, MD, 1868

“Every intelligent person who takes the time to investigate vaccination, will find abundant evidence in the published writings and public records of the advocates of vaccination, to prove its utter worthlessness, without reading a line of anti-vaccination literature. And if we could add to this all the suppressed facts, we would have a mass of evidence before which no vaccinator would dare to hold up his head.”—Dr. Robert A. Gunn, MD, “Vaccination: Its Fallacies and Evils”,

1882

“I have no faith in vaccination, nay, I look upon it with greatest disgust, and firmly believe that it is often the medium of conveying many filthy and loathsome diseases from one child to another, and it is no protection from smallpox.” —Dr. William Collins, MD, London, 1882

“Vaccination has made murder legal. Vaccination does not protect against smallpox, but is followed by blindness and scrofula. Jennerism is the most colossal humbug which the human race has been burdened with by FRAUD and DECEIT.” —Mr. Mitchell, member of the British House of Commons

“Of these dogmas, I believe the practice known as vaccination to be the most absurd and most pernicious. I do not believe that a single person has ever been protected from smallpox by it; while I know that many serious bodily evils and even deaths, have resulted from its employment. The whole theory is founded upon assumption, contrary to common sense and entirely opposed to all known principles of physiology. Every physician of experience, has met with numerous cases of cutaneous eruptions, erysipelas and syphilis, which were directly traceable to vaccination, and if these cases could be collected and presented in one report, they would form a more terrible picture than the worst that has ever been drawn of the horrors of smallpox.” —Dr. Robert A. Gunn, MD, Dean of the United States Medical College of New York

"Vaccination is a monstrosity, a misbegotten offspring of error and ignorance; and, being such, it should have no place in either hygiene or medicine...Believe not in vaccination, it is a worldwide delusion, an unscientific practice, a fatal superstition with consequences measured today by tears and sorrow without end." —Dr. Carlo Ruta, Professor of Materia Medica at the University of Perugia, Italy, 1896

“Vaccination is a grotesque superstition.” —Dr. Charles Creighton, MD, MA

“Vaccination is a gigantic delusion. It has never saved a single life. It has been the cause of so much disease, so many deaths, such a vast amount of utterly needless and altogether undeserved suffering, that it will be classed by the coming generation among the greatest errors of an ignorant and prejudiced age,

and its penal enforcement the foulest blot.” — Alfred R. Wallace, LLD DUBL., DCL OXON., FRS, etc., 1898

20TH CENTURY (1900s)

“The great epidemics of deadly diseases, in animals and mankind, are caused by vaccination.” —Charles M. Higgins, “The Horrors of Vaccination: Exposed and Illustrated”, 1920

“I believe vaccination has been the greatest delusion that has ensnared mankind in the last three centuries. It originated in FRAUD, ignorance and error. It is unscientific and impracticable. It has been promotive of very great evil, and I cannot accredit it any good.” —Dr. R. K. Noyse, MD, Resident Surgeon of the Boston City Hospital, “Self Curability of Disease”

“The chief, if not the sole, cause of the monstrous increase in cancer has been vaccination.” —Dr. Robert Bell; Vice President, International Society for Cancer Research, British Cancer Hospital, 1922

“Vaccination is the most outrageous insult that can be offered to any pure-minded man or woman. It is the boldest and most impious attempt to mar the works of God that has been attempted for ages. The stupid blunder of doctorcraft has wrought all the evil that it ought, and it is time that free American citizens arise in their might and blot out the whole blood poisoning business.” — Dr. J.M. Peebles, MD, MA, PhD, “Vaccination: A Curse and Menace to Personal Liberty”, 1900

“Cancer was practically unknown until the cowpox vaccination began to be introduced. I have seen 200 cases of cancer, and never saw a case in an unvaccinated person.” —Dr. W.B. Clark, MD, Indiana, New York Times article, 1909

“At present, intelligent people do not have their children vaccinated, nor does the law now compel them to. The result is not, as the Jennerians prophesied, the extermination of the human race by smallpox; on the contrary more people are now killed by vaccination than by smallpox.” —George Bernard Shaw, 1944

“The English Ministry of Health omits to state that in 1872, when 85% of the infants born were vaccinated, there were 19,000 deaths from smallpox in England and Wales. While in 1925, when less than half the children born were vaccinated, there were only 6 deaths from that disease.” —Dr. Eleanor McBean, PhD, ND, “The Poisoned Needle”, 1957

“Vaccination causes miscarriage. A careful check showed that 47% of women who had been vaccinated in the second or third month of pregnancy, failed to give birth to a normal child.” — “Vaccination at Work”, The Consulting Pediatrician of Lanarkshire County Council, The Lancet (London), p.47, December 6, 1952

"My honest opinion is that vaccine is the cause of more disease and suffering than anything I could name." —Dr. Harry R. Bybee

“Vaccination, instead of being the promised blessing to the world, has proved to be a curse of such sweeping devastation that it has caused more death and disease than war, pestilence, and plague combined. There is no scourge (with the possible exception of atomic radiation) that is more destructive to our nation’s health than this monument of human deception—this slayer of the innocent—thiscrippler of body and brain—the poisoned needle.” —Dr. Eleanor McBean, PhD, ND, “The Poisoned Needle”, 1957

“The greatest LIE ever told is that vaccines are safe and effective.”—Dr. Leonard Horowitz, MPH (Master of Public Health), DMD, MA, Harvard University graduate

21ST CENTURY (2000s)

“The entire vaccine program is based on massive FRAUD.”—Dr. Russell L. Blaylock, M.D., neurosurgeon, editorial staff of Journal of American Physicians and Surgeons

"Vaccinations do not work. They don't work at all." —Dr. Lorraine Day, MD

“Vaccinations are now carried out for purely commercial reasons because they fetch huge profits for the pharmaceutical industry. There is no scientific evidence

that vaccinations are of any benefit.” —Dr. Gerhard Buchwald, MD,
“Vaccination: A business based on FEAR”

“Don’t get your flu shot.” —Dr. Raymond Francis, D.Sc., M.Sc., RNC, chemist,
MIT graduate

“My own personal view is that vaccines are unsafe and WORTHLESS. I will not
allow myself to be vaccinated again. Vaccines may be profitable but in my view,
they are neither safe nor effective.” —Dr. Vernon Coleman, MB, ChB, DSc (Hon)

"Everyone who is vaccinated is vaccine injured—whether it shows up right away
or later in life." —Dr. Shiv Chopra, B.V.S., A.H., M.Sc., PhD, Fellow of the
World Health Organization, former senior scientist at Health Canada

“The pediatrician indoctrinates your child from birth into a lifelong dependency
on medical intervention. The first stage of indoctrination is the ‘well-baby’ visit.
The well-baby visit is a cherished ritual of the pediatrician that enhances their
income and does nothing constructive for your child. It’s a worthless visit.” —
Dr. Robert Mendelsohn, MD, board certified pediatrician

“Vaccines are the backbone of the entire Pharmaceutical Industry. If they can
make these children sick from a very early age, they become customers for life.
The money isn’t really to be made in the vaccine industry. The money is made
by Big Pharma with all of the drugs that are given to treat and address all of the
illnesses that are subsequent to the side effects of vaccines.”—Dr. Sherri
Tenpenny, D.O. (osteopathic medical doctor)

“Studies are increasingly pointing to the conclusion that vaccines represent a
dangerous assault to the immune system leading to autoimmune diseases like
Multiple Sclerosis, Lupus, Juvenile Onset Diabetes, Fibromyalgia, and Cystic
Fibrosis, as well as previously rare disorders like brain cancer, SIDS (Sudden
Infant Death Syndrome), childhood leukemia, autism, and asthma.”—Dr. Zoltan
Rona, MD, “Natural Alternatives to Vaccination”

“The vaccine industry is itself a FRAUD. I spent my whole career studying
vaccines.”—Dr. Shiv Chopra, B.V.S., A.H., M.Sc., Ph.D., Fellow of the World
Health Organization, “Corrupt to the Core”

THE ONLY REASON FOR CONTINUED VACCINATION

“The greatest danger to your health is the doctor who practices modern medicine.” —Dr. Robert Mendelsohn, MD, board certified pediatrician

Follow the money. It will lead you to the truth. The primary reason for vaccination is the assumption that vaccines prevent diseases. However, if historical data demonstrates that vaccines do NOT prevent diseases, then what is the purpose of vaccination?

Moreover, you’ve probably heard stories of parents being coerced and bullied into vaccinating their children and themselves at the pediatrician and doctor’s offices. There are reasons behind the coercion and bullying.

“There is a vaccination ring in England, receiving millions of the public money. It is in their interest to favor the practice at all hazards and to falsify statistics in order to conceal its failure and its evils. There are also armies of public vaccinators in every large city all over Europe, who are supported from the public treasury, and every practitioner who does not oppose the practice, derives a considerable income from its continuance.” —Dr. Robert A. Gunn, MD, “Vaccination: Its Fallacies and Evils”, 19th century

“Drug companies are not here to bring health to the population but to SCAM them on one level for vast amounts of money.” —Sir William Osler, MD, FRS, FRCP, widely considered as the Father of Modern Medicine (1849-1919), 20th century

“Disease is more rampant because of commercial greed. When the Rockefeller-Standard Oil crowd muscled into the drug and pharmaceutical business in such a big way, ‘scientific medicine’ (if there is such a thing) was turned into a racket which shortened many American lives from ten to twenty years.” —Morris A. Beale, “The Drug Story”, 20th century

“Many doctors and some editors are making money by propagating the

vaccination curse.” —Dr. Thomas Morgan, MD, “Medical Delusions”, 20th century

“Vaccination is not scientific. Many of the world’s greatest thinkers, scientists, statesmen and even doctors have condemned vaccination as being a crime against humanity, a FRAUD promoted for private gain, an insult to the race and a blot upon the name of civilization. Yet, this treacherous practice of blood pollution, which was cradled in the lap of ignorant savage tribes, has been adopted by, supposedly, enlightened government of the present day and forced on the protesting population—for profit.” —Dr. Eleanor McBean, PhD, ND, 1957

“Vaccinations are now carried out for purely commercial reasons because they fetch huge profits for the pharmaceutical industry. There is no scientific evidence that vaccinations are of any benefit.” —Dr. Gerhard Buchwald, MD, "Vaccination: A Business Based on Fear", 21st century

“The vaccination myth is the most widespread superstition modern medicine has managed to impose, but, being by the same token the most profitable, it will prove to be also one of the most enduring, though there was never the slightest of scientific evidence upholding it.” —Hans Ruesch, "The Great Medical Fraud", 20th century

“Doctors are punished by insurance companies like Blue Cross and Blue Shield if doctors don’t get a certain percentage of their patients to comply with the vaccination schedule. If 63% are non-compliant, they don’t receive any of their bonuses.” —Robert F. Kennedy, Jr.

“Medicine is no longer a calling. It is a downright cut throat business.” — Professor Dr. Belle Monappa Hegde, MD, 21st century

"The current medical system is designed to create chronic disease. There is no money in being healthy.” —Dr. Irvin Sahni, MD, 21st century

“The bottom line is that the medical systems are controlled by financiers in order to serve financiers. Since you cannot serve people unless they get sick, the whole medical system is designed to make people sicker and sicker.” —Dr. Guylaine

Lanctot, MD, 21st century

"It is difficult to get a person to understand something, when their salary depends on them not understanding it." —Upton Sinclair, "The Jungle"

In 1986, US President Ronald Reagan passed the National Childhood Vaccine Injury Act (NCVIA). The act was drafted by the drug companies and shielded them from legal liability resulting from vaccine injuries and deaths. Basically, NCVIA prevented parents from directly suing the drug companies (vaccine makers). The parents have to file claims in the vaccine injury court that was established through the act. About \$0.75 of every vaccine sold is used to fund the vaccine injury court. From 1986 to 2018, the court paid over \$4 billion to parents with vaccine injured children. It is estimated that the court, due to budget constraints, dismisses about 66% of the cases, and some cases can take up to 8 years to settle.

Furthermore, in one report US and Human Services estimated that only about 1% of vaccine injuries are reported to VAERS (Vaccine Adverse Event Reporting System). Most parents are unaware that the most common side effects of vaccines are allergies, asthma, brain damage, autoimmune diseases, cancer, and death. In addition, from 1986 to 2017, the drug companies were fined nearly \$25 billion—these fines were unrelated to vaccines and most were for fraud, bribery, and false advertising.

"International bribery and corruption, fraud in the testing of drugs, criminal negligence in the unsafe manufacture of drugs—the pharmaceutical industry has a worse record of lawbreaking than any other industry. Data fabrication is so widespread that it is called 'making' in the Japanese pharmaceutical industry, 'graphiting' or 'dry labelling' in the United States." —Dr. John Braithwaite, MD, "Corporate Crime in the Pharmaceutical Industry"

Knowing how they operate, could you trust your child's health to the drug companies?

PROLOGUE

“Vaccination is a business based on fear.” —Dr. Gerhard Buchwald, MD

You’ve probably heard comedians, actors playing doctors and scientists, news anchors, and strangers online publicly proclaim,

–Vaccines are safe and effective.

–Vaccines prevented diseases and saved millions of lives

–Vaccines work. They’re a blessing and miracle to the human race.

Even your doctor or pediatrician might had proclaimed in private that “vaccines are safe and effective.” What some physicians state in private about vaccines, they’ll never do in public for fear of being sued for malpractice. This demonstrates that people can be brainwashed in three sentences, repeated over and over and over again by different groups, through different modes of media.

“A lie told often enough becomes the truth.” —Vladimir Lenin

Anyone who thinks vaccines are safe and effective has never read a book presenting the other side of vaccination. They believe vaccines are safe and effective through the carefully orchestrated advertising and marketing campaigns of the drug companies, who make tens of billions from vaccines each year.

If you’re busy, and don’t require a lecture on the history of vaccination, you only need to inspect the graphs and tables below. These tables and graphs, compiled from historical data, demonstrate that **there is no reason for anyone to get vaccinated.**

“Three things cannot be long hidden: the sun, the moon, and the truth.” —
Buddha

BEFORE VACCINATION

People’s chances of dying from certain infectious diseases before vaccines were introduced were extremely rare. So rare that if it weren’t for the drug industry’s

disease mongering, we wouldn't be discussing this subject.

Disease name	Year vaccine introduced	Fatality/harm (before the vaccine)	Population NOT harmed (before the vaccine)
Pertussis (whooping cough)	Late 1940s	1 in 77,000	99.9987%
Tetanus	Late 1940s	1 in 200,000	99.9995%
Diphtheria	Late 1940s	1 in 83,000	99.9988%
Polio	1955	1 in 100,000	99.999%
Measles	1963	1 in 500,000	99.9998%
Rubella	1963	1 in 1,000,000	99.9999%
Mumps	1967	1 in 2,000,000	99.99995%
Hib (Haemophilus influenzae type B)	1985	1 in 600,000	99.999833%
Hepatitis B	1991	1 in 1,400,000	99.999929%
Chickenpox	1995	1 in 2,300,000	99.999957%

Before vaccination . As you can see, the chances of anyone being harmed by these “vaccine preventable diseases” are so small that it’s not even worth worrying about. In many cases, you have a higher chance of being struck by lightning or a meteorite than harmed by these “life threatening diseases”. Source: 1) CDC Reported Deaths from Vaccine Preventable Diseases, US, 1950-2011, 2) Vital Statistics in the United States 1940-1960, US Department of Health, Education, and Welfare.

VACCINES DID NOT ERADICATE DISEASES

The graphs below show the decline of infectious diseases in the US and England BEFORE vaccines were introduced. As evident as night and day, most diseases were nearly eradicated, then the drug companies introduced vaccines and took

credit, when vaccines had no role in eradicating those diseases.

Before vaccines were introduced in the US. In the US, every “vaccine preventable disease” was nearly eradicated, then several years later the drug companies introduced vaccines and gave credit to them for what sanitation, hygiene, and nutrition achieved. Source: 1) Vital Statistics in the United States, 1940-1960, US Department of Health, Education, and Welfare, 2) Historical Statistics of the United States—Colonial Times to 1970, Part 1.

Before vaccines were introduced in England and Wales. Similar to the US, every “vaccine preventable disease” was on a sharp decline before vaccines were introduced for those diseases. Source: Record of Mortality in England and Wales for 95 years as provided by the Office of National Statistics, published 1997; Report to the Honourable Sir George Cornwall Lewis, Bart, MP Her Majesty’s Principal Secretary of State for the Home Department, June 30, 1860, p. a4, 205; Essay on Vaccination by Dr. Charles T. Pearce, MD, Member of the Royal College of Surgeons of England, Parliamentary Papers, the 62nd Annual Return of the Registrar General 1899 (1891-1898).

Figure 14.—Death Rates for Tuberculosis, All Forms: Death-registration States, 1900–32, and United States, 1933–60

(Rates per 100,000 population)

Death rates for tuberculosis in the US, 1900-1960. The Calmette-Guérin (BCG) tuberculosis vaccine was first used in 1921 in some countries. However, it was not used in the US until the late 1940s, and only used on a small scale. In the US, from 1900-1940, tuberculosis had declined dramatically without vaccination. Graph: Vital Statistics in the United States, 1940-1960, US Department of Health, Education, and Welfare

Figure 19.—Death Rates for Measles: Death-registration States, 1900–32, and United States, 1933–60

(Rates per 100,000 population).

Measles in the US, 1900-1960. Measles was mostly harmless and the death rate was extremely low in 1960, lower than being struck by lightning. In 1963, the drug companies introduced the measles vaccine and took credit for eradicating measles. It's been shown that measles is beneficial to the immune system, particularly in fighting cancer later in life. Prior to 1963, measles was considered a benign illness (not a disease); parents would encourage their children to visit friends who had measles so their children could contract measles and get it over with. Measles, due to the drug industry's disease mongering, is now a life threatening disease. Graph: Vital Statistics in the United States, 1940-1960, US Department of Health, Education, and Welfare

It wasn't vaccination that saved humanity. The things that saved humanity were,

- clean-running water (sewer systems, indoor plumbing, toilets, sinks, showers)
- sanitation (garbage collection, modern building codes),
- hygiene (soap, paper towels),
- electricity (indoor heating, refrigeration),
- and nutrition (supermarkets) that saved humanity.

DISEASES that were eradicated by nutrition: scurvy, rickets, beriberi, goitre, hypoanatemia, anemia, kwashiorkor, marasmus, etc.

DISEASES that were eradicated without vaccines: scarlet fever, rheumatic fever, typhus, cholera, tuberculosis.

DISEASES that vaccines took credit for eradicating: smallpox, diphtheria, pertussis (whooping cough), polio, measles. As the data clearly shows, these diseases were never eradicated by vaccines.

NEW DISEASES that were unheard of by the public decades ago: cervical cancer, zika, ebola, swine flu, avian flu, bovine flu. Diseases, like wars, are manufactured for profit. For example, the Zika virus (small head birth syndrome) was caused by insecticides introduced into Brazil's water system to kill mosquitos. This was widely reported by the Brazilian media and common knowledge in Brazil. However, according to the US media, Zika was caused by a virus of speculative origin. Nevertheless, the US drug companies were more than

happy to provide the Zika vaccine to people around the world.

There are over 200 infectious diseases capable of causing death. However, only the diseases with vaccines are presented to the public as life threatening and a public health risk. Moreover, in 2018, the drug companies use disease incident and mortality rates from developing and third world countries as part of their disease mongering campaigns. The more you study the history of vaccination, the more you'll conclude that it is one of the biggest frauds in history. It's certainly the biggest medical fraud in history—vaccines never saved a single life and never prevented a single disease.

AFTER VACCINATION: VACCINATED vs. UNVACCINATED

Let's examine your chances of dying from certain infectious diseases AFTER vaccines were introduced.

Vaccines (birth to 18+ years old)	Vaccine deaths	Chance of death	Natural death	Chance of death
Pneumonia	85	0.00002673%	20	0.00000629%
Polio	85	0.00002673%	0	0.00000000%
Diphtheria	74	0.00002327%	0	0.00000000%
Tetanus	74	0.00002327%	0	0.00000000%
Pertussis (whooping cough)	73	0.00002296%	14	0.00000440%

After vaccines were introduced. Data gathered and tabulated from the CDC (Centers for Disease Control and Prevention), and VAERS (Vaccine Adverse Event Reporting System), 2014. When you vaccinate, you are 6.25x (625%) more likely to die from the toxins in the vaccines than the diseases those vaccines are supposed to prevent. Vaccination is all risk and no reward.

To put the tables and graphs into perspective: In the US, more people die from falling down the stairs (about 1 000 per year) than from “vaccine preventable diseases.” They are more than 100 000 times likely to die in an automobile accident. This was *before* the vaccines were introduced for those particular

diseases (most of them are not even diseases but illnesses reclassified as diseases). The deaths from these diseases are now caused by the vaccines themselves. For example, measles is a side effect of the measles vaccine. Polio is a side effect of the polio vaccine, and so forth. The side effects are the reason you are 625% more likely to die from the vaccines than the diseases they're supposed to prevent.

“The further I looked into it, the more shocked I became. I found that the whole vaccine business was indeed a gigantic hoax. Most doctors are convinced that they are useful, but if you look at the proper statistics and study the instance of these diseases, you will realise that this is not so.” —Dr. Archie Kalokerinos, MD, PhD, AMM, MBBS, FAPM, pediatrician for over 30 years

It is through revising history, fabricating data, fear, and greed that the blood poisoning practice of vaccination continues into the 21st century.

Vaccination Is Based on Theories

“There is no evidence whatsoever of the ability of vaccines to prevent any disease.” —Dr. Viera Scheibner, PhD

In the words of the scientist Alfred R. Wallace, vaccines are “useless and dangerous.” If something is useless, it doesn't work and has no benefit. If something is dangerous, it shouldn't be used. Vaccines are useless because they never prevented a single disease. Not one. They are dangerous because they cause diseases and deaths—often the very diseases they are supposed to prevent. Through statistics across three centuries, the conclusion is resoundingly clear:

Vaccines only work in *theory*. In practice, they cause diseases and deaths.

In order for an idea to be universally accepted as a science, it must pass two stages:

- 1) Theory.
- 2) Observation.

Theoretical science and observational science are two sides of the same coin.

THE THEORETICAL SCIENCE OF VACCINES. The theory of vaccines is to inject antigens (toxins) such as poisons, viruses, and diseases into the body. In turn, these antigens (toxins) should create antibodies (disease fighting proteins) to fight pathogens (diseases) in the future. In other words, the poisons, viruses, and diseases injected into the body are meant to trigger and train the immune system. Or to prepare the immune system cells to fight diseases in the future. In theory, this is possible because the immune system cells have memory. That is the theoretical science side of vaccines. At first glance, the vaccine theory has validity.

THE OBSERVATIONAL SCIENCE. Observation on the effectiveness of a product, as reported by the end consumers, is based on statistics and real world data, not what happened in laboratories and under microscopes. Observation has clearly shown that when you inject poisons, viruses, and diseases into the body, those antigens (toxins) cause diseases and deaths, especially among infants and children.

Antigen: A toxin or other foreign substance that induces an immune response in the body, especially the production of antibodies.

Antibody: A blood protein produced in response to and counteracting a specific antigen. Antibodies combine chemically with substances that the body recognizes as alien, such as bacteria, viruses, and foreign substances in the blood. (Source: Google Dictionary)

The antigen-antibody theory is similar the lock-and-key system. When antigens (something harmful to the body) is introduced into the body, it triggers the immune system to create antibodies to fight the antigens. The antibodies fit and bind with the antigens (toxins) like a lock and key.

The indirect end users of vaccines are parents, and millions of them have reported that their children have acquired diseases such as allergies, asthma, brain damage, autoimmune diseases, and cancer after being vaccinated. Thousands of parents have also reported that their children have died after vaccination. SIDS (Sudden Death Syndrome) is actually VIDS (Vaccine Induced Death Syndrome). Babies are not born to fall asleep and die in their sleep.

These diseases and deaths reported by parents are on the VAERS (Vaccine Adverse Event Reporting System) database. What is horrifying is that the diseases and deaths reported by parents are actually listed on the vaccine inserts provided by the drug manufacturers. These product inserts are usually 10 to 30 pages long, and not the one page printout the pharmacies and doctors provide when you ask.

Furthermore, every *independent* study (those not funded by the drug companies), without exception, has shown that unvaccinated children are far healthier than vaccinated children. In addition, vaccinated people, through the *shedding* process, are disease carriers up to 60 days of being vaccinated. Thus, vaccinated people are a threat to themselves and others.

INFANT VACCINATION. It is known that infants and children succumb to more infectious diseases than other groups. The reason is that newborns only fully develop their immune system when they're 3 to 5 years old. The antibodies infants require to ward off diseases are passed to them from the mother through the placenta. The amount and type of antibodies the infant receives from the mother depends on the health of the mother herself, and the antibodies in her own immune system. At roughly 6 months old, the infant is capable of producing its own antibodies. However, again, a child's immune system is only fully developed when it is 3 to 5 years of age.

The theory of vaccination is to trigger and train the immune system. However, if the infant lacks a fully developed immune system until it's 3 to 5 years old, then vaccination is useless. Yet, babies are being vaccinated immediately after birth. As of 2018, the US has the highest infant vaccination rate, and it also happens to have the highest infant mortality rate among developed countries.

"Vaccination at its core is neither a safe nor an effective method of disease prevention...If an infant needs one vaccine that is 100% safe and effective—that would be breast milk." —Dr. Tetyana Obukhanych, PhD, immunologist, Harvard graduate

If vaccines cause a long list of diseases, how is it possible that they can prevent disease? By virtue of their antigen-antibody theory, vaccines cannot prevent disease. They never have and never will. Nor can there be a "safe" vaccine. It is only through clever advertising, marketing, and bribery that the drug companies have convinced the public that vaccines prevent diseases and save lives.

In 2017, the drug companies spent \$200 million bribing politicians, \$6.4 billion on advertising, and \$10 billion indirectly bribing doctors. Since 1796, doctors and scientists have called vaccines useless, worthless, poisonous, dangerous; a fraud, racket, and scam. And for good reasons.

“Vaccination is a theory without any basis in fact.” —J.T. Biggs, JP, sanitation engineer, “Leicester: Vaccination versus Vaccination”, 1912

Medical students thoroughly study books on germ, bacteria, pathogen, microbe, and vaccination theories. Only to have their worldview shattered when they're introduced to parents whose children have been injured and killed by vaccines. The lesson with vaccination science is that results observed in laboratories and under microscopes cannot be duplicated in the real world. The human body is indemonstrably complex due to individual biochemistry.

“In our scientific research we have now advanced one step. Vaccination is the infliction of disease... We conclude, then, that Vaccination is NOT scientific; that it cannot be accurately defined; that it is completely useless for its assumed purpose; that fortification of the body by disease is a mischievous myth, and that the sooner the practice is discontinued the better it will be for the health of the community.” —George S. Gibbs, Fellow of the Statistical Society London, “Is Vaccination Scientific?”, 1884

CANADA.—THE RECENT SMALLPOX EPIDEMIC IN MONTREAL.—VACCINATING AMERICAN-BOUND PASSENGERS ON A TRAIN OF THE GRAND TRUNK RAILWAY.
FROM SKETCHES BY JAMES MARVIN.

The practice of vaccination is to inject poisons, viruses, and diseases into the body. Although vaccines come in oral and other forms, injection is the primary delivery method. Throughout history, millions have been diseased and killed by this “grotesque superstition.” More people have been killed by vaccines than the diseases they’re supposed to prevent.

Vaccines Cause Diseases

The first smallpox vaccine was conceptualized in 1796 by Edward Jenner (1749-1823) of England. Since that time, the ingredients (antigens, toxins) used in vaccines have changed dramatically. As the vaccine ingredients changed over the centuries, the diseases caused by vaccines have also changed. In other words, as you inject different poisons into the body, the body acquires different diseases.

VACCINE INGREDIENTS IN THE 1800s. From roughly 1800 to the early 1900s, the vaccine ingredients were primary from animal and human diseases. These diseases (vaccine ingredients) included animal and human pus, cowpox, ass-pus from rabbits, horsegrease, and sheep-pox.

Pox: Any of several viral diseases producing a rash of pimples that become pus-filled and leave pockmarks on healing.

Pus: A thick yellowish or greenish opaque liquid produced in infected tissue, consisting of dead white blood cells and bacteria with tissue debris and serum. (Source: Google Dictionary).

A pus on a hand.

Cowpox. From the early 1800s to the early 1900s, cowpox was the main vaccine ingredient in the smallpox vaccine. Cowpox, a cow disease, and smallpox, a human disease, had few physiological similarities. They were similar in that the words for both diseases ended with “pox”.

L'ORIGINE DE LA VACCINE.

A Paris chez Depeuille, Rue des Mathurins Sorbonne aux deux Pilastres d'Or

Déposé à la Bi. Nat.

For centuries people believed that taking a disease from animals and inserting it into the human body prevented diseases. The vaccination theory was based on superstition.

II. List of suitable Vaccinating Instruments.*

1. THE NARROW BLADED LANCET, - - - - - Price \$0 75

2. THE SYRINGE VACCINATOR, - - - - - Price \$0 88

3. THE SYRINGE SELF VACCINATOR, - - - - - Price \$2 25

4. THE TRIDENT LANCET, - - - - - Price \$1 00

5. THE VACCINATING SCARIFICATOR, - - - - - Price \$3 50

Crude instruments. Human and animal diseases were inserted into the body by creating an incision in the body, usually the arm, with crude tools like the ones above.

When animal diseases such as pus and pox were used as vaccine ingredients, the diseases they caused were as many as they are now. The diseases caused by vaccines were recorded by J.T. Biggs, JP, sanitation engineer, in "Leicester: Vaccination versus Vaccination", 1912, chap. 96:

"While not proposing to give a complete list, I append the principal of those vaccine-induced diseases which have already been published or come to my knowledge:

Abdominal Phthisis	Diseased bones	<u>Phagedenic</u> action
Abscesses	Diseased joints	<u>Phlegmon</u>
<u>Adenitis</u>	Dyscrasia	Pityriasis
Anemia	<u>Ecthymia</u>	Plague
<u>Angeioleucitis</u>	Eczema	Pneumonia
Apnoea	Eruptions	Prurigo
Arm disease (involving amputation)	Erysipelas	Psoriasis
Axillary Bubo	Erythema	<u>Pyæmia</u>
Axillary Gland (enlargement of)	Foot-and-Mouth Disease	Pyrexia
Blindness	<u>Gangrenosa</u>	Rickets
Blood poisoning (fatal)	General Debility	Scald Head
Boils	Herpes	Scarlatina
Bronchitis	Impetigo	Scrofula
Bulla	Inflammation	Septicæmia
CANCER	Latent diseases developed	Skin Disease
Cellulitis	Leprosy	Strum intensified
Convulsions	Lichen	Syphilis
Cowpox	Marasmus	Tetanus
Diarrhea	Meningitis	Tuberculosis
	Mesenteric Disease	Ulceration Urticaria
	Oedema	Vaccinia
	Paralysis	<u>Varioloid</u>

Furthermore,

"The most distinguished names in the profession have testified to vaccination being the certain vehicle for the dissemination of leprosy. These names include Sir Erasmus Wilson (sometimes called the father of dermatologists); Dr. John D. Hillis; Dr. Liveing; Sir Ranald Martin; Professor W. T. Gairdner; Dr. Tilbury Fox; Dr. Gavin Milroy; Dr. R. Hall Bakewell, formerly Physician to the Leper Asylum, Trinidad; Dr. A.S. Black, of Trinidad; Dr. Edward Arning; Dr. Walter M. Gibson, late President of the Honolulu Board of Health; Professor H. G. Piffard, New York; Dr. A. M. Brown, London; Dr. Frances Hoggan; Dr. Blanc,

Professor of Dermatology, University of New Orleans; Dr. Bechtinger, of Rio; Professor Montgomery, of California; Dr. Sidney Bourne Swift, late Medical Director, Leper Settlement, Molokai, Hawaii; Dr. P. Hellat, St. Petersburg; Professor Henri Leloir, Lille; Dr. Mouritz; Surgeon Brunt; Dr. John Freeland, Government Medical Officer, Antigua; Dr. S. P. Impey, Superintendent Leper Asylum, Robben Island, Cape Colony; and many others. On the subject of leprosy there are no higher authorities.” —Dr. William Tebb, MD, MA, DPH, “A Century of Vaccination and What It Teaches”, 1898

Eczema from vaccination.

“When Jenner died in 1823, three kinds of smallpox vaccines were in use: 1) cowpox promoted as ‘pure lymph from the calf,’ 2) horsegrease promoted as ‘the true and genuine life-preserving fluid,’ and 3) horsegrease cowpox...Following

Jenner's death the vaccine establishment used one excuse after another to explain the failure of vaccination: the number of punctures was incorrect, or that revaccination was necessary or that the lymph was impure. The smallpox deaths of vaccinated patients in hospital were recorded as 'pustular eczema.'" —Dr. Jennifer Craig, BSN, MA, PhD, "Smallpox Vaccine: Origins of Vaccine Madness", 2010

In the 1800s, vaccination was associated with "blood poisoning."

Edward Jenner, credited with inventing vaccination, borrowed the idea from dairymaids. Therefore, vaccination was founded upon superstition. This subject is discussed in detail in the books of the "History of Vaccination" series. One of the most prominent physicians at the time did not have nice things to say about Edward Jenner.

"Now this man Jenner had never passed a medical examination in his life. He belonged to the good old times when George III was King, when medical examinations were not compulsory. Jenner looked upon the whole thing as a superfluity. It was not until twenty years after he was in practice that he thought it advisable to get a few letters after his name. Consequently he communicated with a Scotch university and obtained the degree of Doctor of Medicine for the sum of £15 and nothing more...What Jenner discovered, though hardly original in its general principle, was that it pays far better to scare 100% of the fools in the world, the vast majority, into buying vaccine than it does to treat the small minority who really get smallpox and who cannot afford to pay anything. It was indeed a very great discovery worth thousands of millions. That is why this kind of blackmail is still kept going." —Dr. Walter Hadwen, JP, MD, LRCP, MRCS, LSA

Louis Pasteur and Attenuated Vaccines

Louis Pasteur (1822-1895) co-developed the anthrax vaccine in 1881. The vaccine supposedly worked in cows, goats, and sheeps, but was not successfully tested in humans at the time. In 1885, Pasteur created the first human vaccine. This vaccine used attenuated (weakened) viruses as the primary ingredient.

Virus: An infective agent that typically consists of a nucleic acid molecule in a

protein coat, is too small to be seen by light microscopy, and is able to multiply only within the living cells of a host.

Anthrax: A notifiable bacterial disease of sheep and cattle, typically affecting the skin and lungs. It can be transmitted to humans, causing severe skin ulceration or a form of pneumonia (also called wool-sorter's disease).

Attenuate: Reduce the virulence of (a pathogenic organism or vaccine).
(Source: Google Dictionary).

Louis Pasteur (1822-1895) of France. He created the first attenuated (weakened) live virus vaccine. A few decades after his invention, cowpox, a disease from cows, would no longer be used as the main ingredient in the smallpox vaccine. Instead, weakened live viruses from animals would be used instead.

Louis Pasteur originally took a live virus from a rabbit's spinal cord and

attenuated the virus in a lab. This was the first rabies vaccine. This attenuated virus was supposedly maintained with preservatives and stabilizers such as formaldehyde and mercury, which are two of the most poisonous substances to the human body. Then the preserved attenuated live virus was later injected into the human body to “prevent” disease—inject disease into to the body to prevent disease. This defies common sense and logic.

Louis Pasteur’s theory of attenuated viruses opened the floodgates for the drug companies to create a multitude of other vaccines. Thus, began the modern era of vaccines for the drug companies. In 2018, Sanofi Pasteur was one of the largest vaccine manufacturers in the world.

MODERN VACCINE INGREDIENTS. Modern vaccines ingredients are very similar to each other. The few differences in vaccine ingredients depend on the type of vaccine. There are four main types of vaccines:

- 1) Live, attenuated vaccine.
- 2) Inactivated/killed vaccine.
- 3) Toxoid (inactivated toxin).
- 4) Subunit/conjugate.

Live, Attenuated vaccine: An attenuated vaccine is a vaccine created by reducing the virulence of a pathogen, but still keeping it viable (or "live"). Attenuation takes an infectious agent and alters it so that it becomes harmless or less virulent. These vaccines contrast to those produced by "killing" the virus (inactivated vaccine).

Inactivated vaccine: An inactivated vaccine is a vaccine consisting of virus particles, bacteria, or other pathogens that have been grown in culture and then killed using a method such as heat or formaldehyde.

Subunit/conjugate vaccine: A conjugate vaccine is created by covalently attaching a poor antigen to a strong antigen thereby

eliciting a stronger immunological response to the poor antigen. Most commonly, the poor antigen is a polysaccharide that is attached to strong protein antigen. (Source: wikipedia.org)

VACCINE TYPES AND VACCINES

Vaccine type	Vaccines
Live, attenuated	MMR (measles, mumps, rubella), Varicella (chickenpox), Influenza (nasal spray), Rotavirus, Zoster (shingles), Yellow fever
Inactivated/Killed	Polio (IPV), Hepatitis A, Rabies
Toxoid (inactivated toxin)	Diphtheria, tetanus (part of DTaP combined immunization)
Subunit/conjugate	Hepatitis B Influenza (injection) Haemophilus influenza type b (Hib) Pertussis (part of DTaP combined immunization) Pneumococcal Meningococcal Human papillomavirus (HPV)

Modern vaccine ingredients contain some of the most poisonous substances to the human body. Many of these toxins are summarized below.

MODERN VACCINE INGREDIENTS AND THEIR EFFECTS ON THE BODY

ALUMINUM. Known to cause brain damage at all doses, linked to

ALZHEIMER'S DISEASE, dementia, seizures, autoimmune issues, SIDs and cancer. This toxin accumulates in the brain and causes more damage with each dose.

BETA-PROPIOLACTONE. Known to cause CANCER. Suspected gastroin- testinal, liver, nerve and respiratory, skin and sense organ POISON.

GENTAMICIN SULPHATE & POLYMYXIN B [ANTIBIOTICS]. Allergic reactions can range from mild to life-threatening.

GENETICALLY MODIFIED YEAST, ANIMAL, BACTERIAL AND VIRAL DNA. Can be incorporated into the recipient's DNA and cause unknown GENETIC MUTATIONS.

GLUTARALDEHYDE. Poisonous if ingested. Causes BIRTH DEFECTS in animals.

FORMALDEHYDE [FORMALINE]. Known to cause CANCER in humans. Probable gastrointestinal, liver, respiratory, immune, nerve and reproductive system POISON. Banned from injectables in most European countries.

LATEX RUBBER. Can cause life-threatening allergic reactions.

HUMAN AND ANIMAL CELLS. Human DNA from aborted BABIES. Pig blood, horse blood, rabbit brains, dog kidneys, cow hearts, monkey kidneys, chick embryos, calf serum, sheep blood & more. Linked to childhood leukemia and diabetes.

MERCURY [THIMEROSAL]. One of the most toxic substances known. Even if a thermometer breaks, the building is cleared and HAZMAT is called. Tiny doses cause damage to the brain, gut, liver,

bone marrow, nervous system and/or kidneys. Linked to autoimmune disorders, and neurological disorders like AUTISM.

MONOSODIUM GLUTAMATE [MSG]. A toxic chemical that is linked to birth defects, developmental delays and infertility. Banned in Europe.

NEOMYCIN SULPHATE [ANTIBIOTIC]. Interferes with vitamin B6 absorption which can lead to epilepsy and brain damage. Allergic reactions can range from mild to life -threatening.

PHENOL/PHENOXYETHANOL [2-PE]. Used as anti-freeze. TOXIC to all cells and capable of destroying the immune system.

POLYSORBATE 80 & 20. Known to cause CANCER in animals and linked to numerous autoimmune issues and infertility.

TRI(N) BUTYLPHOSPHATE. Potentially toxic to the kidney and nervous system.

Source: www.LearnTheRisk.org

DO YOU KNOW WHAT'S IN A VACCINE?

NONE OF THESE SHOULD BE INJECTED INTO YOUR BODY

Aluminum

Known to cause brain damage at all doses, linked to ALZHEIMER'S DISEASE, dementia, seizures, autoimmune issues, SIDs and cancer. This toxin accumulates in the brain and causes more damage with each dose.

Beta-Propiolactone

Known to cause CANCER. Suspected gastrointestinal, liver, nerve and respiratory, skin and sense organ POISON.

Gentamicin Sulphate & Polymyxin B [antibiotics]

ALLERGIC reactions can range from mild to life-threatening.

Genetically Modified Yeast, Animal, Bacterial and Viral DNA

Can be incorporated into the recipient's DNA and cause unknown GENETIC MUTATIONS.

Glutaraldehyde

Poisonous if ingested. Causes BIRTH DEFECTS in animals.

Formaldehyde [formalin]

Known to cause CANCER in humans. Probable gastrointestinal, liver, respiratory, immune, nerve and reproductive system POISON. Banned from injectables in most European countries.

Latex Rubber

Can cause life-threatening allergic reactions.

Human and Animal Cells

Human DNA from aborted BABIES. Pig blood, horse blood, rabbit brains, dog kidneys, cow hearts, monkey kidneys, chick embryos, calf serum, sheep blood & more. Linked to childhood leukemia and diabetes.

Mercury [thimerosal]

One of the most toxic substances known. Even if a thermometer breaks, the building is cleared and HAZMAT is called. Tiny doses cause damage to the brain, gut, liver, bone marrow, nervous system and/or kidneys. Linked to autoimmune disorders, and neurological disorders like AUTISM.

Monosodium Glutamate [MSG]

A toxic chemical that is linked to birth defects, developmental delays and infertility. Banned in Europe.

Neomycin Sulphate [antibiotic]

Interferes with vitamin B6 absorption which can lead to epilepsy and brain damage. Allergic reactions can range from mild to life-threatening.

Phenol/Phenoxyethanol [2-PE]

Used as anti-freeze. TOXIC to all cells and capable of destroying the immune system.

Polysorbate 80 & 20

Known to cause CANCER in animals and linked to numerous autoimmune issues and infertility.

Tri(n) Butylphosphate

Potentially toxic to the kidney and nervous system.

www.LearnTheRisk.org

DISEASES CAUSED BY MODERN VACCINE INGREDIENTS

We've seen the diseases caused by vaccines when their ingredients were diseases from animals—mainly pus and pox. The diseases caused by modern vaccine ingredients are also extensive. These diseases are the side effects of many vaccines, and are listed on the product inserts provided by the drug companies. These product inserts are usually 10 to 30 pages long, and not the one page printout pharmacies and doctors provide when you ask. Furthermore, these diseases, even death, are corroborated by millions of parents who've reported their experiences with vaccines. They're listed on the VAERS (Vaccine Adverse Event Reporting System) database.

"Everyone who is vaccinated is vaccine injured—whether it shows up right away or later in life." —Dr. Shiv Chopra, B.V.S., A.H., M.Sc., PhD, Fellow of the World Health Organization, former senior scientist at Health Canada

The MMR (measles, mumps, rubella) combo vaccine product insert listing all the known side effects (adverse reactions) of the vaccine. Used under the Fair Use Clause.

In the German case-control study and US open-label safety study in which 14,971 infants received Tripedia vaccine, 13 deaths in Tripedia vaccine recipients were reported. Causes of deaths included seven SIDS, and one of each of the following: enteritis, Leigh Syndrome, adrenogenital syndrome, cardiac arrest, motor vehicle accident, and accidental drowning. All of these events occurred more than two weeks post immunization.² The rate of SIDS observed in the German case-control study was 0.4/1,000 vaccinated infants. The rate of SIDS observed in the US open-label safety study was 0.8/1,000 vaccinated infants and the reported rate of SIDS in the US from 1985-1991 was 1.5/1,000 live births.³⁴ By chance alone, some cases of SIDS can be expected to follow receipt of whole-cell pertussis DTP³⁵ or DTaP vaccines.

Additional Adverse Reactions:

- As with other aluminum-containing vaccines, a nodule may be palpable at the injection sites for several weeks. Sterile abscess formation at the site of injection has been reported.^{3,36}
- Rarely, an anaphylactic reaction (ie, hives, swelling of the mouth, difficulty breathing, hypotension, or shock) has been reported after receiving preparations containing diphtheria, tetanus, and/or pertussis antigens.³
- Arthus-type hypersensitivity reactions, characterized by severe local reactions (generally starting 2-8 hours after an injection), may follow receipt of tetanus toxoid.
- A few cases of peripheral mononeuropathy and of cranial mononeuropathy have been reported following tetanus toxoid administration, although available evidence is inadequate to accept or reject a causal relation.³⁷
- A review by the Institute of Medicine (IOM) found evidence for a causal relationship between tetanus toxoid and both brachial neuritis and Guillain-Barré syndrome.³⁷
- A few cases of demyelinating diseases of the CNS have been reported following some tetanus toxoid-containing vaccines or tetanus and diphtheria toxoid-containing vaccines, although the IOM concluded that the evidence was inadequate to accept or reject a causal relationship.³⁷

Adverse events reported during post-approval use of Tripedia vaccine include idiopathic thrombocytopenic purpura, SIDS, anaphylactic reaction, cellulitis, autism, convulsion/grand mal convulsion, encephalopathy, hypotonia, neuropathy, somnolence and apnea. Events were included in this list because of the seriousness or frequency of reporting. Because these events are reported voluntarily from a population of uncertain size, it is not always possible to reliably estimate their frequencies or to establish a causal relationship to components of Tripedia vaccine.²

Reporting of Adverse Events

The National Vaccine Injury Compensation Program, established by the National Childhood Vaccine Injury Act of 1986, requires physicians and other health-care providers who administer vaccines to maintain permanent vaccination records of the manufacturer and lot number of the vaccine administered in the vaccine recipient's permanent medical record along with the date of administration of the vaccine and the name, address and title of the person administering the vaccine. The Act (or statute) further requires the health-care professional to report to the Secretary of the US Department of Health and Human

The Dtap (diphtheria, tetanus, and whooping cough (pertussis)) vaccine insert listing all the known side effects.

Due to their similar ingredients, most modern vaccines have similar side effects. Let's look at the adverse reactions (side effects) of the MMR combo vaccine.

ADVERSE REACTIONS (SIDE EFFECTS) ON DIFFERENT BODY PARTS

BODY AS A WHOLE. Panniculitis; atypical measles; fever; syncope; headache; dizziness; malaise; irritability.

CARDIOVASCULAR SYSTEM. Vasculitis.

DIGESTIVE SYSTEM. Digestive system.

ENDOCRINE SYSTEM. Diabetes mellitus.

HENIC AND LYMPHATIC SYSTEM. Thrombocytopenia (see WARNINGS, leukocytosis.

IMMUNE SYSTEM. Anaphylaxis and anaphylactoid reactions have been reported as well as related phenomena such as angioneurotic edema (including peripheral or facial edema) and bronchial spasm in individuals with or without an allergic history.

MUSCULOSKELETAL SYSTEM. Arthritis; arthralgia; myalgia.

Arthralgia and/or arthritis (usually transient and rarely chronic), and polyneuritis are features of infection with wild-type rubella and vary in frequency and severity with age and sex, being greatest in adult females and least in prepubertal children. This type of involvement as well as myalgia and paresthesia, have also been reported following administration of MERUVAX II.

Chronic arthritis has been associated with wild-type rubella infection and has been related to persistent virus and/or viral antigen isolated from body tissues. Only rarely have vaccine recipients developed

chronic joint symptoms.

Following vaccination in children, reactions in joints are uncommon and generally of brief duration. In women, incidence rates for arthritis and arthralgia are generally higher than those seen in children (children: 0-3%; women: 12-26%),{17,56,57} and the reactions tend to be more marked and of longer duration. Symptoms may persist for a matter of months or on rare occasions for years. In adolescent girls, the reactions appear to be intermediate in incidence between those seen in children and in adult women. Even in women older than 35 years, these reactions are generally well tolerated and rarely interfere with normal activities.

NERVOUS SYSTEM. Encephalitis; encephalopathy; measles inclusion body encephalitis (MIBE) (see CONTRAINDICATIONS); subacute sclerosing panencephalitis (SSPE); Guillain-Barré Syndrome (GBS); acute disseminated encephalomyelitis (ADEM); transverse myelitis; febrile convulsions; afebrile convulsions or seizures; ataxia; polyneuritis; polyneuropathy; ocular palsies; paresthesia.

Encephalitis and encephalopathy have been reported approximately once for every 3 million doses of M-M-R II or measles-, mumps-, and rubella-containing vaccine administered since licensure of these vaccines.

The risk of serious neurological disorders following live measles virus vaccine administration remains less than the risk of encephalitis and encephalopathy following infection with wild-type measles (1 per 1000 reported cases).{58,59}

In severely immunocompromised individuals who have been inadvertently vaccinated with measles- containing vaccine; measles inclusion body encephalitis, pneumonitis, and fatal outcome as a

direct consequence of disseminated measles vaccine virus infection have been reported (see CONTRAINDICATIONS). In this population, disseminated mumps and rubella vaccine virus infection have also been reported.

There have been reports of subacute sclerosing panencephalitis (SSPE) in children who did not have a history of infection with wild-type measles but did receive measles vaccine. Some of these cases may have resulted from unrecognized measles in the first year of life or possibly from the measles vaccination. Based on estimated nationwide measles vaccine distribution, the association of SSPE cases to measles vaccination is about one case per million vaccine doses distributed. This is far less than the association with infection with wild-type measles, 6-22 cases of SSPE per million cases of measles. The results of a retrospective case-controlled study conducted by the Centers for Disease Control and Prevention suggest that the overall effect of measles vaccine has been to protect against SSPE by preventing measles with its inherent higher risk of SSPE.

{60}

Cases of aseptic meningitis have been reported to VAERS following measles, mumps, and rubella vaccination. Although a causal relationship between the Urabe strain of mumps vaccine and aseptic meningitis has been shown, there is no evidence to link Jeryl Lynn™ mumps vaccine to aseptic meningitis.

RESPIRATORY SYSTEM. Pneumonia; pneumonitis (see CONTRAINDICATIONS); sore throat; cough; rhinitis.

SKIN. Stevens-Johnson syndrome; erythema multiforme; urticaria; rash; measles-like rash; pruritis.

Local reactions including burning/stinging at injection site; wheal and

flare; redness (erythema); swelling; induration; tenderness; vesiculation at injection site; Henoch-Schönlein purpura; acute hemorrhagic edema of infancy.

SPECIAL SENSES—EAR. Nerve deafness; otitis media.

SPECIAL SENSES—EYE. Retinitis; optic neuritis; papillitis; retrobulbar neuritis; conjunctivitis.

UROGENITAL SYSTEM. Epididymitis; orchitis.

OTHER. Death from various, and in some cases unknown, causes has been reported rarely following vaccination with measles, mumps, and rubella vaccines; however, a causal relationship has not been established in healthy individuals (see **CONTRAINDICATIONS**). No deaths or permanent sequelae were reported in a published post-marketing surveillance study in Finland involving 1.5 million children and adults who were vaccinated with M-M-R II during 1982 to 1993. {61}

Under the National Childhood Vaccine Injury Act of 1986, health-care providers and manufacturers are required to record and report certain suspected adverse events occurring within specific time periods after vaccination. However, the U.S. Department of Health and Human Services (DHHS) has established a Vaccine Adverse Event Reporting System (VAERS) which will accept all reports of suspected events. {49} A VAERS report form as well as information regarding reporting requirements can be obtained by calling VAERS 1-800-822-7967.

2018 MMR vaccine insert, Merck & Co—used under the Fair Use Clause.

Vaccine adverse reactions affect every part of the body. It is estimated that only a fraction of adverse reactions are reported since pediatricians and doctors advise parents that side effects are a coincidence or are “normal”.

In their 8 to 12 years of medical education, medical doctors (MDs) and pediatricians receive only a few hours of vaccine training. They are *not* educated on vaccine ingredients or vaccine side effects. Those few hours are spent “educating” them on how to get parents to adhere to the CDC childhood vaccine schedule, which as of 2018, recommends that a child receive 74 vaccines (some are combos) by the time they’re 18 years old.

Year	CDC recommended vaccine doses	Autism rate
1962	5	1 in 5,000
1983	24	1 in 2,500
2016	72	1 in 40
2018	74	1 in 36

That’s a lot of poison in a child. As vaccine doses increased, so did the autism rate (brain damage). The heavy metals in vaccines have been implicated in causing the autism epidemic.

“I am no longer ‘trying to dig up evidence to prove’ vaccines cause autism. There is already abundant evidence. This debate is not scientific but is political.”
—Dr. David Ayoub, MD, radiologist

“The CDC is not an independent agency. It is a vaccine company. The CDC owns over 20 vaccine patents. It sells about \$4.6 billion of vaccines every year...Four scathing federal studies, including two by Congress, one by the U.S. Senate, and one by the HHS Inspector General, paint the CDC as a cesspool of corruption, mismanagement and dysfunction with alarming conflicts of interest suborning its research, regulatory and policymaking functions...Doctors are punished by insurance companies like Blue Cross and Blue Shield if doctors don’t get a certain percentage of their patients to comply with the vaccination schedule. If 63% are non-compliant, they don’t receive any of their bonuses.” —

Robert F. Kennedy, Jr.

Furthermore, medical doctors receive roughly 8 hours of nutrition training. Medical doctors and pediatricians have been indoctrinated into the medical industry. They are no longer independent healers, but merely clerks and salespeople for the drug companies.

DO VACCINES CAUSE AUTISM?

Demanding "scientific studies" to question vaccination is a method of sophistry (the use of fallacious arguments, especially with the intention of deceiving), particularly whether vaccines cause autism. Heavy metals cause brain damage. Heavy metals (aluminum, mercury derivatives) are in vaccines. Once injected into the muscles, the heavy metals are absorbed into the bloodstream and reach the brain. Children are injected with heavy metals. Children have a high rate of autism. Do vaccines cause autism? No. The heavy metals in vaccines cause autism.

Autism is a form of brain damage. Whether the drug companies reclassify or rename autism, at its root autism is still brain damage. Like polio, the drug companies may decide to reclassify or rename autism in the future. The drug industry often play a game of semantics:

- 1) Reclassify a disease by adding or removing symptoms. This gives the appearance that the disease was eradicated. Also, reclassify an illness as a disease to make it more menacing (eg, reclassify measles as a disease).
- 2) Rename a disease. This also gives the appearance that the disease was eradicated.

The most common adverse reactions of most vaccines are allergies, asthma, brain damage, cancer, autoimmune diseases, and even death. However, there are more than 100 autoimmune diseases. Some of the more common autoimmune diseases are:

Immune system disorders, Rheumatoid arthritis, lupus, Inflammatory bowel disease (IBD), Multiple sclerosis (MS), Type 1 diabetes mellitus, Guillain-Barre

syndrome (paralysis), Chronic inflammatory demyelinating polyneuropathy, Psoriasis, Graves' disease, Hashimoto's thyroiditis, Myasthenia gravis, Vasculitis.

“Vaccines are unavoidably unsafe.” —US Supreme Court, March 2011

From 1986-2017, the vaccine injury court has paid over \$3.7 billion dollars to vaccine injured parents, proving vaccines are not safe. The historical data shows vaccines were ineffective at preventing diseases. Therefore, the only rational conclusion is that vaccines are unsafe and ineffective.

HOW VACCINES CAUSE DISEASES IN DIFFERENT PARTS OF THE BODY

Vaccine ingredients are *not* injected directly into the bloodstream—they are injected *indirectly* into the bloodstream. The ingredients are injected into the muscles (intramuscular injection/intramuscularly). Then the ingredients are absorbed into the bloodstream. Through the muscular system and bloodstream (circulatory system), the toxins in vaccines reach every part of the body.

The bloodstream is part of the circulatory system. When vaccine ingredients are injected into the muscles and absorbed into the bloodstream, the toxins are capable of reaching every part of the body through the muscular and circulatory systems.

–Through the bloodstream (part of the circulatory system), the toxins can pollute the blood cells (blood poisoning), causing cancer and autoimmune diseases.

–Through the muscular system, the toxins can cause paralysis (Guillain-Barré syndrome, GBS) and other muscular abnormalities.

–Through the bloodstream, the toxins can travel to the brain and cross the blood-brain-barrier, causing brain damage.

These are the mechanics in which vaccines cause various diseases throughout the body. Vaccine ingredients have constantly changed since 1796. The only constant is the *theory* of vaccination: inject poisons, viruses, and diseases into the body to prevent disease.

As bizarre and unbelievable as it sounds, the theory of vaccination is to inject poisons, viruses, diseases into the body in order to prevent disease. How can something that causes a long list of diseases be used to prevent disease? Something intended to prevent disease shouldn't cause more diseases than it's supposed to prevent. It defies common sense and logic.

SMALLPOX, INOCULATION, VACCINATION

To understand why vaccination came about, we need to examine the most horrific and feared disease in history: smallpox.

The first vaccine was conceptualized in 1796 by Edward Jenner of England to prevent smallpox. Prior to vaccination, inoculation (very similar to vaccination) was used to prevent smallpox. Thus, smallpox, inoculation, and vaccination are intertwined.

Smallpox was the most feared disease in history because of the distinct bodily marks (pox) it left on victims. Photo: www.wikipedia.org

SMALLPOX

1) “An acute, highly contagious, febrile disease, caused by the variola virus, and characterized by a pustular eruption that often leaves permanent pits or scars: *eradicated worldwide by vaccination programs.*” —www.dictionary.com

2) An acute contagious viral disease, with fever and pustules usually leaving permanent scars. It was effectively *eradicated through vaccination by 1979.*” — Google Dictionary

3) “Thousands of years ago, variola virus (smallpox virus) emerged and began causing illness and deaths in human populations, with smallpox outbreaks occurring from time to time. *Thanks to the success of vaccination*, the last natural outbreak of smallpox in the United States occurred in 1949. In 1980, the World Health Assembly declared smallpox eradicated (eliminated), and no cases of naturally occurring smallpox have happened since...Smallpox research in the United States continues and focuses on the development of vaccines, drugs, and diagnostic tests to protect people against smallpox in the event that it is used as an agent of bioterrorism.” —www.cdc.gov

Consider this: There were roughly 200 nations on Earth when smallpox was supposedly ravaging the planet. Of those, only about 30 nations were ever vaccinated for smallpox. But it was declared eradicated by vaccination when about 170 countries never used the smallpox vaccine. If they did, it was only in the vast minority of their populations. Furthermore, smallpox was foreign to the North American Indians. The Natives lived in open spaces and managed to avoid the dreaded smallpox. Only when the Europeans arrived in the 16th century was smallpox introduced to the Americas. In the next three centuries, the Europeans used smallpox as a biological weapon to nearly wipe out the North American Indians.

As you’ll soon discover, every historical data has shown that vaccination never eradicated smallpox. In fact, vaccination increased the incidence of smallpox

wherever it was practiced.

INOCULATION

Inoculation is the practice of creating a cut in the body, usually the arm, to insert animal pus, human smallpox, or another disease into the cut. This was done in hopes of preventing disease, particularly smallpox. The ancient Hindus purportedly practiced inoculation several hundred years prior to the introduction of vaccination in 1796. Inoculation was the predecessor to vaccination, both are based on the theory of homeopathy: In small doses, like cures like. For example, rubbing small doses of smallpox into a person to prevent smallpox.

"Dhanwantari, the Vedic Father of Medicine, and the earliest known Hindu physician, who lived about 1,500 B.C., is supposed to have been the first to practice inoculation for smallpox. It is even stated that the ancient Hindus employed a vaccine, which they prepared by the transmission of the smallpox virus through a cow." —“History of Inoculation and Vaccination”, p. 6-13

Inoculation against smallpox. Taking smallpox from a diseased person and introducing it into another person through a cut in the arm.

“The practice of inoculation spread like a noxious weed, from the savage tribes of the forgotten past into the civilizations of Africa, Arabia, Tibet, India and finally into Europe and America.” —Dr. Eleanor McBean, PhD, ND, “The Poisoned Needle”, 1957

VACCINATION

The practice of introducing, often through injection, poisons, viruses, and diseases into the body to prevent disease. The first vaccine (smallpox vaccine) was conceptualized by Edward Jenner of England in 1796 and later used on the English in the early 1800s. The first smallpox vaccine primarily used cowpox, a

cow disease, to vaccinate against smallpox, a human disease.

Vaccination against smallpox. A painting of Edward Jenner applying the smallpox vaccine (cowpox in a needle) to a child.

When Louis Pasteur created the attenuated (weakened) live virus vaccine in 1885, it opened the floodgates for drug companies to manufacture all sorts of vaccines: flu (influenza), measles, chickenpox, polio, etc.

The question is, “Did vaccination prevent or eradicate smallpox?” According to official statistics, the answer is NO. Vaccination did not prevent or eradicate

smallpox.

“It is clear that the mortality from both causes fell very remarkably, and that in the case of smallpox as well as in the case of ‘other zymotics’ the decline had set in before the end of the eighteenth century—in other words before the beginning of the vaccination era.” — Dr. C. Killick Millard, M.D., D.Sc., “The Vaccination Question in the Light of Modern Experience”, 1914, chap. 2

Mortality from smallpox and other zymotic (infectious, contagious) diseases in London, 1760 to 1910. Official statistics from the Registrar General, England 1760-1910. From this historical data we know that vaccines had no role in preventing zymotic (infectious, contagious) diseases. Vaccines did not eradicate smallpox.

“Vaccination is utterly useless as a preventive against smallpox, that millions of vaccinated persons have died of smallpox.” —Dr. J.W. Hodge, MD, New York

“I know of one epidemic of smallpox comprising nine hundred and some cases

in which 95% of the infected had been vaccinated, and most of them recently. I have had in my own experience on very small epidemic comprising 33 cases, of which 29 had vaccination histories a 'good' scar, and some of them vaccinated within the last year. There was no protection there."—Dr. William Howard Hay, 1937

"Vaccination has not protected us; it could not do it, because the smallpox had already left us and the non-vaccinated world, before its introduction...Vaccination proves itself, in the history of humanity, to be the greatest crime committed in this last century!" —Dr. C. Charles Schieferdecker, MD, "The Evils of Vaccination", 1856

"Smallpox attained its maximum mortality after vaccination was introduced. The mean annual mortality for 10,000 population from 1850 to 1869 was at the rate of 2.04, whereas after compulsory vaccination, in 1871 the death rate was 10.24. In 1872 the death rate was 8.33 and this after the most laudable efforts to extend vaccination by legislative enactments." —Dr. William Farr (1807-1883), Compiler of Statistics of the Registrar General of London

A BRIEF HISTORY OF SMALLPOX

One of the medical profession's greatest boasts is that it eradicated smallpox through the use of the smallpox vaccine. I myself believed this claim for many years. But it simply isn't true." —Dr. Vernon Coleman, MB, ChB, DSc, FRSA, GP, *Anyone Who Tells You Vaccines Are Safe And Effective Is Lying. Here's The Proof*, 2011

Smallpox had been mentioned in different civilizations, from the ancient Egyptians, Aztecs, and Chinese. However, there were no smallpox epidemics recorded in ancient times that could be verified. Smallpox epidemic numbers were only accurately recorded in England from the 1700s to the 1900s. Therefore, because of the lack of official smallpox records and statistics in the English-speaking world, only the records from England are considered reliable. Anything else is, without official data, is pure speculation.

"It is a matter of pure speculation as to when the condition first appeared, but it is unlikely to have done so prior to man's establishment of large townships

coupled with poor nutrition, overcrowding, lack of sanitation and inadequate hygiene. Keeping people, such as slaves and prisoners, in disgusting and sub-human conditions may have been the necessary ingredient for the establishment of the virus but there is virtually no doubt that the aforementioned adverse conditions were responsible for the epidemics of smallpox as well as for its endemic nature in certain areas until its recent demise. It was recorded in Chinese history and was certainly prevalent in the west by the sixteenth century.”
—Dr. Michael Nightingale, Traditional Chinese Medicine

The deaths caused by smallpox were greatly exaggerated (disease mongering), even fabricated, in medical textbooks and in general. For example,

“Queen Mary II of England died of smallpox in 1694. In the century following her death 60 million persons in Europe died of smallpox.” —Howard Haggard, “Devils, Drugs, and Doctors”, 1929

However, Mr. Haggard’s assertion is refuted by Dr. Jennifer Craig (BSN, MA, PhD), “The population of Europe was 130 million in 1762 and 175 million in 1800. The death rate from smallpox in that period was 18.5%. If 60 million deaths occurred with an 18.5% death rate then it would require 319,148,936 cases of smallpox in Europe and that would be 144,148,936 more cases of smallpox than there were people living in Europe at the close of the 18th century.”

Again, vaccination is a fraud based on fear, greed, and revisionist history.

The Eradication of Diseases

In the 21st century, there should be no need for anyone in developed countries to fear catching diseases that people contracted in the 1700, 1800, and early 1900s. Back then, the living and working condition of the masses were breeding grounds for diseases. They lacked clean-running water, electricity, garbage collection, and modern buildings. They defecated and urinated in their backyards. It wasn’t vaccines that eradicated diseases but sanitation, hygiene, especially the modern amenities that we take for granted today. As examples, soap, toilet paper, paper towel, toothbrush, shampoo, washing machine, shower, and supermarket. In developed countries, all these conveniences were available

to the masses in the 1960s. These modern amenities significantly contributed to the increased standard of living and especially to the eradication of diseases.

You do not live like people used to, therefore you should not worry about contracting diseases that people used to contract.

Infectious diseases spread predominantly in overcrowded, unsanitary

conditions. People used to defecate and urinate in their backyards. They fetched dirty water from rivers for drinking and washing. They buried potatoes in the ground in winter to preserve them. Animal manure was common in the streets. They burnt wood and coal for heating and breathed in the fumes. These were the perfect breeding grounds for diseases. Disease rates in children were high because they worked in fields and unsafe factories.

Working and living conditions were inhumane and breeding grounds for diseases in the 18th and 19th centuries. Workers were known as peasants and serfs. Debtor prison and indentured servitude were common. The conditions were so horrific and unjust that communism was invented to create workers' rights.

The eradication of diseases was primary due to sanitation and hygiene. For those who think otherwise, ask them to live without clean-running water, electricity, and garbage collection. They will not do it because they cannot imagine life without them—because it was those amenities that eradicated infectious diseases.

“Sanitation did for Prussia what 35 years of compulsory vaccination was unable to accomplish. At the present time in Prussia, smallpox is almost extinct. It is not that people are being vaccinated more; they are vaccinated less.” —Dr. Walter R. Hadwen, MD, 1896, “The Case Against Vaccination”

“There is no question that perfect sanitation has almost obliterated this disease (smallpox), and sooner or later will dispose of it entirely. Of course, when that time comes, in all probability the credit will be given to vaccination.” —Dr. John Tilden (1851-1940), MD

Whooping Cough

Diphtheria

Measles

Scarlet Fever

Typhoid Fever

Polio

Sewer systems, plumbers, electricity, garbage men, architects, engineers, and advances in manufacturing technology extended lives and eradicated diseases. Graph compiled from: Australian Institute of Health and Welfare (AIHW) 2010. GRIM (General Board of Incidence of Mortality) Books; Original author Dr. Paul Jelfs, updated by Karen Bishop.

“The most widespread and lethal diseases in the last 200 years were reduced due cleaner drinking water, improved sanitation, nutrition, less overcrowded areas, and better living conditions. Vaccines were introduced at the point where every single disease was already declining. To give vaccines credit for global reductions in disease is like giving a band-aid credit for healing a wound that was already closing.” —Dr. Dave Mihalovic, ND

“The largest historical decrease in morbidity and mortality caused by infectious disease was experienced *not* with the modern antibiotic and vaccine era, but after the introduction of clean water and effective sewer systems.” —The Journal of Pediatrics, December 1999, Vol. 135, No. 6, p. 663

The modern amenities (mainly clean-running water, electricity, garbage collection, modern buildings) that eradicated diseases also extended our life expectancy. Modern medicine, despite what the drug companies claim, had no role in eradicating diseases or prolonging life. If anything, synthetic drugs and vaccines have shortened the lives of millions. Doctors and hospitals are the 3rd leading cause of death in the USA. Some have claimed that the medical system is actually the 1st leading cause of death because the vast majority of those who have died of heart attacks, cancer, and diabetes were on medication or chemotherapy—they were involved in the medical system. The reason is that the ingredients in drugs, vaccines, and chemotherapy are toxins and poisons to the body.

THE DEADLIEST DISEASES WERE ERADICATED WITHOUT VACCINES

The deadliest disease epidemic in history, the Black Death (Plague), was eradicated without vaccines. The second deadliest disease epidemic in history,

the Spanish Flu, was believed to be caused by vaccines.

Many diseases disappeared on their own, without the need for vaccines. The deadliest infectious diseases in history were eradicated through prevention, quarantine and isolation, and removing the causes. As examples, the Black Death (Plague) and Spanish Flu.

“The Black Death was one of the most devastating pandemics in human history, resulting in the deaths of an estimated 75 to 200 million people in Eurasia and peaking in Europe in the years 1346–1353...In the Late Middle Ages (1340–1400) Europe experienced the most deadly disease outbreak in history when the Black Death, the infamous pandemic of bubonic plague, hit in 1347, killing a third of the human population.” —www.wikipedia.org

THE BUBONIC PLAGUE was believed to be caused by rodents, particularly rats, transferring their diseases to humans. These rodents were moved freely between countries during wars, trades, and travels. The rodents, unknown to humans, contaminated the food and water supplies. Today, we have rodent control programs administered by public health departments and the movement of animals are strictly controlled when travelling between countries. In summary, one of the worst pandemics in history was eradicated without vaccines. Diseases are eradicated when their causes are removed.

THE 1918 INFLUENZA PANDEMIC (Spanish Influenza). There are many speculations as to what caused the 1918 flu pandemic.

“The 1918 flu pandemic (January 1918–December 1920) was an unusually deadly influenza pandemic, the first of the two pandemics involving H1N1 influenza virus. It infected 500 million people around the world, including remote Pacific islands and the Arctic, and resulted in the deaths of 50 to 100 million (three to five percent of the world's population), making it one of the deadliest natural disasters in human history.” —www.wikipedia.org

The Spanish blamed it on the French and called it the French Flu. Some say it originated in China, some say in German as a biological weapon. However, the most credible theory was that the 1918 flu pandemic was caused by vaccines, most likely the experimental typhoid or flu vaccine.

“It was a common expression during the war that ‘more soldiers were killed by vaccine shots’ than by shots from enemy guns.” —Dr. Eleanor McBean, PhD, ND, “The Poisoned Needle”

“In 1918, the US Army forced the vaccination of 3,285,376 natives in the Philippines when no epidemic was brewing, only the sporadic cases of the usual mild nature. Of the vaccinated persons, 47,369 came down with smallpox, and of these 16,477 died. In 1919 the experiment was doubled. 7,670,252 natives were vaccinated. Of these 65,180 victims came down with smallpox, and 44,408 died. In the first experiment, one-third died, and in the second, two-thirds of the infected ones died.” —Dr. William F. Koch, MD, PhD, “The Survival Factor in Neoplastic and Viral Diseases”

“The 1918 ‘Spanish Flu’ started in American military Camp Funston, Fort Riley, USA, amongst troops making ready for WWI—taking on board vaccinations, recruit training and all. It eventually killed about 40,000,000 people worldwide. That flu strain only appeared briefly once again, according to the US Atlanta CDC. This was in 1976 and again it struck at the US army camp Fort Dix, USA, amongst recently vaccinated troops (and no one else EVER); Fort Dix is known to have been a vaccine trial centre. Was the world’s greatest ‘influenza’ scourge another well-hidden vaccine disaster?” —John P. Heptonstall, Director of Morley Acupuncture Clinic and Complementary Therapy Centre, West Yorkshire

Influenza and Pneumonia death rates spiked between 1918-1920. World War I was the first war in which US service men were required to vaccinate. The high vaccination rate before the flu pandemic of 1918-1920 was the most likely cause of the flu pandemic.

“Typhoid vaccines were available by World War I, and the U.S. Army made getting those shots mandatory for all its enlisted soldiers.” —Susan Perry, “Medical lessons from World War I underscore need to keep developing antimicrobial drugs”, 2014

FIGURE 1. Incidence* of typhoid fever, by year — United States, 1920–1960

*Per 100,000 population.

U.S. DEPARTMENT OF HEALTH & HUMAN SERVICES

Typhoid fever began its sharp decline after World War I, when US soldiers were no longer vaccinated.

Despite all the evidence, one infectious-disease epidemiologist, Dr. G. Dennis Shanks, stated that typhoid vaccination “was thought to be a genuine medical success story.” Add his opinion to the Vaccination Nuttery pile.

The Spanish Flu should had been called The USA Flu. The Americans probably called it the Spanish Flu to scorn Spain for the Spanish-American War of 1898. In any case, the flu pandemic disappeared on its own without the need for vaccination (or more vaccination). Again, history has shown that when the causes are removed, diseases are eradicated. In the 21st century, people living in developed countries should have no fear of polio, smallpox, measles, whooping cough, and other infectious diseases. Vaccines are not the natural causes of

infectious diseases; therefore, they cannot prevent them. Prevention and eradication can only be attained by removing the causes.

DEATH BY MEDICINE. Healthcare (deathcare) is a business. Drug companies, hospitals, medical doctors, and pediatricians are all part of the "sick care" system. As Bill Maher commented, "There's no money in healthy people, and there's no money in dead people. The money is in the middle: people who are alive, sort of, but with one or more chronic conditions." The poisons in vaccines are remarkably efficient at creating chronic illnesses and diseases.

"Of recent years, many men and women in prime of life, have dropped dead suddenly. I am convinced that some 80% of these deaths are caused by the inoculations or vaccinations they have earlier undergone. These are well known to cause grave and permanent disease of the heart. The coroner always hushes it up as 'natural causes'. I have been trying to get these cases referred to an Independent Commission of inquiry, but so far, in vain." —Dr. Herbert Snow, MD, 25 year staff surgeon of the London Cancer Hospital, 1954

“What miserable fellows our descendants are; each of them requires more of medical attendance in one year, than I had in my whole life!” —Dr. C.G.G. Nittinger, “The Evils of Vaccination”, 1856

"Medical science has made such tremendous progress that there is hardly a healthy human left." —Aldous Huxley, 1894–1963

WHAT ABOUT POLIO?

"Polio is NOT even contagious or infectious (never proven to be). There is NO proof Polio is caused by a virus. There is NO evidence that anyone caught polio from another person in the family. There is NO evidence that any nurse or doctor caught polio from a patient." —Sheri Nakken, RN, MA

Polio is disease used to describe the effects of poisoning from manmade chemicals, especially those found in pesticides and vaccine ingredients. Therefore, polio is a manmade disease caused by pesticides and vaccines. This is how the vaccination nuttery works: the polio vaccine causes polio and the drug companies insist everyone get vaccinated with the polio vaccine to prevent polio.

But they don't tell you that the polio vaccine causes polio. Furthermore, they credit the polio vaccine for eradicating polio, when the vaccine actually caused polio.

A distinct symptom of polio is paralysis. In all of history, there has never been a case of an infant born severely paralyzed that can be verified. If you read drug company literature, it points to ancient Egyptian and Aztec paintings depicting paralyzed individuals. This is not proof that polio has been around since ancient times. There are many causes of paralysis: accidents, injuries in war, surgery, mutilation, neurotoxic chemicals, and so forth. Polio was not an infectious disease but a manmade disease.

Three polio facts:

1) Nearly all recorded polio cases between 1940 and 1970 were caused by the Salk polio vaccine, the pesticide DDT, and other pesticides. Wild polio was and is extremely rare. Polio was not an infectious disease but a manmade disease.

2) The Salk polio vaccine was discontinued in the early 1970s because it was causing polio, cancer, and death in children. Today, the drug companies insist that the Salk polio vaccine saved humanity from polio. In 1972, before a Senate Committee hearing, polio vaccine inventor Jonas Salk testified that nearly all polio outbreaks since 1961 resulted from or were caused by the oral polio vaccine.

3) There is no such thing as a polio vaccine that can prevent polio. And no such thing as a vaccine that can prevent disease. There are over 150 years of data that proves vaccines are useless and poisonous.

Nearly all recorded polio cases in history were caused by manmade chemicals and the polio vaccine. From 1940 to 1972, the surest way to contract polio was to be exposed to the pesticide DDT or get vaccinated with the polio vaccine—the Salk polio vaccine caused polio, one reason it was discontinued. DDT was made by Monsanto, the same company responsible for Agent Orange, Aspartame, RoundUp, PCBs, Saccharin, and recently GMOs.

It could be said that the drug and chemical companies (specifically Monsanto) colluded to conceal the deaths caused by DDT by using polio as a cover.

For over 150 years, common words that independent doctors and scientists have

used to describe vaccination are: useless, dangerous, scam, fraud, racket. A glaring example is polio. Polio (or the symptoms associated with polio) was not an infectious disease in the traditional sense as the vast majority are miseducated to believe. Many recorded polio cases between 1940 and 1970 were manmade, caused by the pesticide DDT (Dichloro Diphenyl Trichlorethane) and other pesticides. The remaining polio cases were caused by the polio vaccine. Wild polio was and is still rare.

Before the large scale use of DDT in the early 1940s, the word "polio" appeared 0 (zero) times in epidemiological (large population disease) studies between the 1700s to late 1800s. In other words, polio was rare in the USA until DDT's predecessor was used after 1874, then when DDT was widely used in the 1940s. After which, the polio epidemics started.

As the use of DDT significantly increased after 1940, the polio rate also increased proportionally. The largest polio epidemics in history occurred in the 1940s and 1950s. This timeline coincides with the DDT's wide scale use and the introduction of the Salk polio vaccine. DDT is a poison and a neurotoxin. It causes paralysis and brain/spinal cord disease—both are distinct symptoms of polio.

As the use of DDT decreased, the polio rate also decreased proportionally. DDT was banned in the USA in 1972 by the EPA (Environmental Protection Agency). After which, polio was reclassified—polio is magically a new disease now. Medical students are taught that the polio people had contracted in the 1940s to 1970s was an infectious disease. It wasn't.

Polio: "1789, British physician Michael Underwood provides first clinical description of the disease. 1840, Jacob Heine describes the clinical features of the disease as well as its involvement of the spinal cord."

There are many secondary causes of polio (the primary cause is the poliovirus). One secondary cause of the poliovirus was DDT and other pesticides. Another is unsanitary conditions, "Polio is usually spread via the fecal-oral route (i.e., the virus is transmitted from the stool of an infected person to the mouth of another person from contaminated hands or such objects as eating utensils). Some cases may be spread directly via an oral to oral route." Contaminated water was also

cited as a secondary cause of the poliovirus. However, up until chemical pesticides were commonly used and the introduction of the Salk polio vaccine, wild polio was extremely rare.

The predecessor to DDT was first synthesized in 1874 and was used as a pesticide. Its successor, DDT, was commercialized in 1939 when the invention was credited to Paul Muller.

The first polio outbreak in the U.S. was in 1894 in Vermont, with 132 cases. Another in New York in 1916. The polio outbreaks of 1894, 1916, 1940s, and 1950s have an eerie commonality: they occurred in the summer, when DDT and other pesticides were being sprayed, especially in apple orchards. In addition, of the nearly 200 countries in the world, only countries that used DDT had polio outbreaks. And the higher the DDT usage, the higher the polio rate.

Source: The Weston A. Price Foundation, www.westonAprice.org

“So as DDT peaked, six months later, polio peaked. DDT comes down, six months later polio comes down. DDT flatlines, polio flatlines. It follows the contour. It’s like taking the same graph and just displacing it by six months.” — Dr. Rashid Buttar, DO

Texas, USA, 1950s. DDT was used as an insecticide, mostly to kill mosquitos. The big difference in body mass between insects and humans explains the different effects of DDT on both species. DDT kills insects, which have significantly less body mass than humans. In equal doses, DDT isn't potent enough to kill humans but causes paralysis, which is a distinct symptom assigned to polio.

1953: Dr. Morton S. Biskind writes: "It was known by 1945 that DDT was stored in the body fat of mammals and appears in their milk...yet far from admitting a causal relationship between DDT and polio that is so obvious, which in any other field of biology would be instantly accepted, virtually the entire apparatus of communication, lay and scientific alike, has been devoted to denying, concealing, suppressing, distorting and attempts to convert into its opposite this overwhelming evidence. Libel, slander, and economic boycott have not been overlooked in this campaign."

DDT was banned in 1972. Coincidentally, the Salk polio vaccine was

discontinued in the same period because it was causing polio, cancer, and death in children.

The Cutter Incident, 1955. Polio vaccine manufacturer Cutter Laboratories caused 40,000 cases of polio.

“In April 1955 more than 200 000 children in five Western and mid-Western USA states received a polio vaccine in which the process of inactivating the live virus proved to be defective. Within days there were reports of paralysis and

within a month the first mass vaccination programme against polio had to be abandoned. Subsequent investigations revealed that the vaccine, manufactured by the California-based family firm of **Cutter Laboratories, had caused 40 000 cases of polio**, leaving 200 children with varying degrees of paralysis and killing 10.” —Michael Fitzpatrick, “The Cutter Incident: How America's First Polio Vaccine Led to a Growing Vaccine Crisis”, Journal of the Royal Society of Medicine, 2006

From these timelines and events, it could be concluded that polio (or the symptoms associated with polio) was a manmade disease and not an infectious disease that medical students are taught. In other words, nearly all cases of polio were caused by pesticides, specifically DDT, and the Salk polio vaccine.

The polio vaccine might had caused cancer in millions of Americans. “SV40 is a virus found in some species of monkey...SV40 was discovered in 1960. Soon afterward, the virus was found in polio vaccine...More than 98 million Americans received one or more doses of polio vaccine from 1955 to 1963 when a proportion of vaccine was contaminated with SV40; it has been estimated that *10-30 million Americans could have received an SV40 contaminated dose of vaccine...SV40 has been found in certain types of cancer in humans...*” —CDC (Centers for Disease Control and Prevention), “Simian Virus 40 (SV40), and Polio Vaccine Fact Sheet”, 2013

RE-NAMING AND RE-CLASSIFYING DISEASES TO ERADICATE THEM

If DDT and the Salk polio vaccine caused nearly all cases of polio, and they were banned in the early 1970s, why is there still polio after DDT and the Salk polio vaccine were discontinued? Polio has been given new symptoms (polio has been redefined and reclassified). It's an entirely new disease with new symptoms. Some of these symptoms include fever or severe fatigue. Drug companies often reclassify or rename diseases to give the appearance that they've been eradicated, or they're still a menace—depending which one meets their financial interest.

“The idea of re-naming a disease to suit the records is not new. Hadwen also said

in his address, that in 1886, although there were 275 cases of smallpox, only one vaccinated child died. In addition, 93 children died of chicken pox. Given the mild nature of chickenpox and the fact that few deaths from it had previously been recorded, this diagnosis is highly unlikely...Re-naming the disease did the trick. They didn't die of smallpox, they died of the re-named disease: spurious cowpox...The re-naming practice continues today.” —Dr. Jennifer Craig, BSN, Ma, PhD, “Smallpox Vaccine: Origins of Vaccine Madness”, 2010

Re-naming and re-classifying diseases is a scheme the drug companies often use to suit their needs.

–You can remove major symptoms of a disease and it's magically eradicated.

–Or you can call it a different name and it's magically eradicated.

In 2017, autism affects 1 in 36 children. Don't be surprised if the drug companies re-name or re-classify autism so it's no longer a problem to parents. At its root, autism is a form of brain damage, regardless of its name or assigned symptoms.

In the 21st century, nearly all infant and childhood illnesses and diseases can be traced back to vaccines. However, the drug companies are blaming those illnesses and diseases on genetic/congenital factors. This is an attempt to absolve the drug and chemical companies of legal and financial liabilities. Another way the drug and chemical companies attempt to absolve themselves of wrongdoing is to revise history (outright lies). These are not the people you want to trust with your children's health.

The chemical companies create diseases and the drug companies sell products that supposedly prevent those diseases. In reality, those drugs and vaccines (ingredients from chemical companies) actually cause more diseases—the left hand and right hand work together.

The Anti-Vaccination Movements

The anti-vaccination movement started when parents noticed that their children became diseased and dead after vaccination. Thus began the anti-vaccination

movement in 1853 in England—1853 was also the first year of compulsory vaccination in England (also in 1867 and 1871). Each compulsory vaccination year was followed by an outbreak of the diseases the vaccines were supposed to prevent.

Formally, The Anti-Compulsory Vaccination League was launched in England in 1867. Then The London Society for the Abolition of Compulsory Vaccination. As vaccination moved to the US and Canada, the anti-vaccination movement also followed.

“The anti-vaccinists are those who have found some motive for scrutinizing the evidence, generally the very human motive of vaccinal injuries or fatalities in their own families or in those of their neighbours. Whatever their motive, they have scrutinized the evidence to some purpose, they have mastered nearly the whole case; they have knocked the bottom out of a grotesque superstition. The public at large cannot believe that a great profession should have been so perseveringly in the wrong.” —Dr. Charles Creighton, MA, MD, “Jenner and Vaccination: A Strange Chapter of Medical History”, 1889

England, 1853. An anti-vaccination poster from the 1850s. The anti-vaccination movement began in England in 1853 and continues into the 21st century. Vaccines exist to serve the drug companies, doctors, pediatricians, and hospitals.

“The vaccination practice, pushed to the front on all occasions by the medical profession, and through political connivance made compulsory by the state, has not only become the chief menace and gravest danger to the health of the rising generation, but likewise the crowning outrage upon the personal liberty of the American citizen.” —Dr. James Martin Peebles, MD, MA, PhD, “Vaccination a

Curse and a Menace to Personal Liberty”, 1913

The USA, 1902. As vaccination spread across the Atlantic, the anti-vaccination movement also followed. In the US, it was headed by The Anti-Vaccination Society of America. In Canada, it was The Anti-Vaccination League. Prussia (part of modern day Germany) also had compulsory vaccination, and so did Austria, Japan, Philippines, and Switzerland. These countries (except for the Philippines) were among the first to undergo the Industrial Revolution, in which people congregated into cities and overcrowding was the norm. Children worked long hours in factories and fields. Factories had no ventilation and workers had to re-breathe dirty air.

The disease rates exploded for each successive year of compulsory vaccination. In other words, disease epidemics followed compulsory vaccination. Thus, every country eventually abandoned compulsory vaccination.

Enforcing the Vaccination Laws.

Photo of an abortive Sale at East Croydon, May 3rd, 1907.

The Clerk to the Croydon Magistrates stated that over two thousand Vaccination Summonses had been applied for in Croydon. During recent years, six distress sales and attempted sales have been held, involving hundreds of cases of Fines and Costs. About fifty Croydon fathers have gone to prison rather than have their children vaccinated, or pay monetary penalties imposed.

England, 1907. "About fifty Croydon fathers have gone to prison rather than have their children vaccinated or pay monetary penalties imposed."

As Dr. Jennifer Craig, BSN, MA, PhD, summarized in her article, "Smallpox Vaccine, Origins of Vaccine Madness":

"One of the worst smallpox epidemics took place in England between 1870 and 1872, nearly two decades after compulsory vaccination was introduced. Leicester, with nearly 200,000 inhabitants, boasted a 95% vaccination record but it suffered more deaths than less-vaccinated London. Faced with this obvious

evidence of the uselessness of vaccination, Leicester's citizens rejected the program in favour of cleaning up the city. Under the leadership of James Briggs, Town Councillor and Sanitary Inspector, clean streets, clean markets and dairies, efficient garbage removal, sanitary housing and pure water supply replaced vaccination scars. In 1892-3 Leicester had 19.3 cases of smallpox per 10,000 population; similar-sized Warrington, with 99.2% vaccinated, had 123.3 cases.

“In Japan, in 1885, 13 years after compulsory vaccination, a law was passed requiring revaccination every seven years. From 1886-1892, a total of 25,474,370 revaccinations were recorded. Yet during this same period, Japan had 156,175 cases of smallpox with 38,979 deaths, a case mortality of nearly 25%. Slow learners, the government passed another act requiring every resident to be vaccinated and revaccinated every 5 years. Between 1889-1908, the case mortality was 30%. Prior to vaccination the case mortality was about 10%.

“During a ruthless campaign by the US in the Philippines in 1905, the native population were forcibly vaccinated several times. In 1918-1919, with over 95% of the population vaccinated, the worst epidemic the Philippines had ever known occurred. In the Congressional Record of December 21, 1937, William Howard Hay, MD, said, ‘The Philippines suffered the worst attack of smallpox, the worst epidemic three times over, that had ever occurred in the history of the islands and it was almost three times as fatal. The death rate ran as high as 60% in certain areas where formerly it had been 10-15%.’”

Canada, 1919. STOP THE SLAUGHTER OF INNOCENTS. The anti-vaccination movement in 1919 (20th century), Toronto, Canada. In Canada, the main group was the Anti-Vaccination League. The Anti-Vaccination Society of America was the main group opposing mandatory (compulsory) vaccination in the USA. The society was founded in 1879.

The USA, early 2000s (21st century). Outspoken vaccination critics such as Jenny McCarthy, Dr. Andrew Wakefield, and other doctors and celebrities were blamed by the media for starting the anti-vaccination movement. As noted above, the movement has been around since 1853. Drug companies are one of the largest advertisers on TV, Internet, newspapers, and magazines. According to Robert F. Kennedy, Jr., the drug industry contributes up to 70% of advertising revenue to media companies. In 2017, the collective stock market capitalization of the drug companies (vaccine manufacturers) exceed \$1 trillion. As actor Jim Carrey noted, “A trillion dollars buys a lot of expert opinions. Will it buy you?”

Mainly because of these movements, the public became aware of the dangers of vaccines. The lunatic idea of transferring animal diseases to humans to prevent diseases didn't work. Compulsory vaccination was later repealed in every country because vaccines were found to be useless and poisonous. Several decades later, the drug companies began their mass advertising and marketing

campaigns to “educate” the next generation on the benefits of vaccination. Vaccination has been a menace to each generation since 1796.

Disease Theories

Most medical students are taught Louis Pasteur’s *Germ Theory of Disease*, which is partly true. We have little understanding of what germs are healthy or unhealthy for the body. We know that some germs do cause disease, in excessive amounts. However, it’s the unsanitary conditions of the environment and the unhygienic terrain of the body that create those germs—like rats are attracted to filthy places.

Germs do cause diseases, but more importantly it's the unsanitary environment and the unhygienic condition of the body that cause those germs. For example, if you don't want to get lung cancer, 1) Smoke and find a way to kill the cancer cells caused by smoking, 2) Don't smoke.

THE CELLULAR THEORY OF DISEASE (TREAT THE PERSON, NOT THE INFECTION).

“In 19th century France, while Pasteur was advocating the notion of germs as the cause of disease, another French scientist named Antoine Bechamp advocated a conflicting theory known as the ‘cellular theory’ of disease.

“Bechamp’s cellular theory is almost completely opposite to that of Pasteur’s. Bechamp noted that these germs that Pasteur was so terrified of were opportunistic in nature. They were everywhere and even existed inside of us in a symbiotic relationship. Bechamp noticed in his research that it was only when the tissue of the host became damaged or compromised that these germs began to manifest as a prevailing symptom (not cause) of disease.

“To prevent illness, Bechamp advocated not the killing of germs but the cultivation of health through diet, hygiene, and healthy lifestyle practices such as fresh air and exercise. The idea is that if the person has a strong immune system and good tissue quality (or “terrain” as Bechamp called it), the germs will not manifest in the person, and they will have good health. It is only when their health starts to decline (due to personal neglect and poor lifestyle choices) that they become victim to infections.” —www.MaroneWellness.com

Again, **THE ONLY WAY TO PREVENT DISEASE IS TO REMOVE THE CAUSES.** For example, smallpox was caused mostly by overcrowding, contaminated water, closeness to feces and urine, and food spoilage. Overcrowding has been solved by modern buildings and urban planning. Contaminated water was solved with sewer systems, plumbing, and water filtering systems. People no longer defecate or urinate in their backyards or buckets, thanks to toilets and indoor plumbing. Food spoilage was solved with electricity (refrigeration). Because of sanitation and hygiene, smallpox was eradicated in developed countries.

Louis Pasteur (1822-1895) was wrong, Antoine Bechamp (1816-1908) was right. Pasteur even admitted this in his dying days.

"Bernard was right, the germ is nothing—the milieu (the environment within) is everything." —Louis Pasteur

VACCINATION IS NOT IMMUNIZATION

Despite what the drug companies’ marketing machines claim, vaccination is NOT immunization. Immunization can only be attained when the immune system has encountered a natural infection and successfully fought it off. For example, those who had the natural measles are immune from it for life. Vaccine induced infections are vastly different than the wild infections. In infants, the

antibodies required for immunization are passed from the mother's breast milk. Vaccination destroys immunization.

There is a significant difference between theoretical science and observational science. With vaccines, observation contradicts theory. Vaccines work in controlled, sterile laboratory settings but not in the biological human body. The immune system exists for a reason. Nature is smarter than man. In vaccination, the most reliable source of observational science (data) is through the millions of parents who have vaccine injured children.

THE GREAT HOMO SAPIENS

The human body is the result of nearly 4 billion years of evolution, starting with the first prokaryotic cells (single-celled organism without a nucleus). Modern humans, *Homo sapiens*, as a distinct species have been around since 200 000 BCE. For the vast majority of that time, our ancestors had to struggle daily to obtain their physical needs: water, food, and shelter. They risked drinking contaminated water from streams, rivers, and lakes. They had to hunt and grow their own foods. Their nutritional profile was limited to what they were able to hunt and grow locally. They risked dying from exposure to the harsh weather.

For millions of years, humans and their common ancestors, struggled daily to obtain their physical needs: water, food, shelter. Since 1960 CE, those needs are

effortlessly provided for us. The amount of energy expended to obtain our physical needs is minimal, allowing us with unprecedented leisure time.

In 1960 CE, those living in developed countries risk none of the dangers of obtaining their physical needs that their ancestors did. We simply walk to the sink and turn on the faucet to get drinking water. We drive to the supermarket, or even order online, to get a variety of foods around the world. We live in heated buildings with sanitation and hygiene safeguards as part of the building code.

In other words, as a distinct species, humans have had to struggle more than 99.999999% of their existence to obtain their physical needs: water, food, and shelter. In the 21st century, due to advances in technology, the energy required to acquire our physical needs has reduced dramatically, to the point that some are dying from sedentary lifestyles and not from securing their physical needs.

The great failure of vaccination is that it fails to address the underlying causes of diseases. It has been unequivocally demonstrated that when the causes of diseases are known and removed, those diseases can be prevented and eventually eradicated. Diseases have always thrived when our physical needs are unmet, or met in a way unnatural to the body. The body does not need the toxins in vaccines.

"As a retired physician, I can honestly say that unless you are in a serious accident, your best chance of living to a ripe old age is to avoid doctors and hospitals and learn nutrition, herbal medicine and other forms of natural medicine unless you are fortunate enough to have a naturopathic physician available.

"Almost all drugs are toxic and are designed only to treat symptoms and not to cure anyone.

"Vaccines are highly dangerous, have never been adequately studied or proven to be effective, and have a poor risk/reward ratio.

"Most surgery is unnecessary and most textbooks of medicine are inaccurate and deceptive.

"Almost every disease is said to be idiopathic (without known cause) or genetic —although this is untrue.

"In short, our main stream medical system is hopelessly inept and/or corrupt. The treatment of cancer and degenerative diseases is a national scandal. The sooner you learn this, the better off you will be." –Dr. Allan Greenberg, MD, Dec. 24, 2002

DEVELOPING A NATURAL IMMUNITY TO DISEASE

The time to prepare the body so it will be able to be immune to disease, especially contagious diseases, is from “the time of conception.” When a woman realizes she is pregnant, and/or preferably before, the prospective mother should prepare herself for the oncoming event—this new addition to the household. This is done by the mother-to-be having her body clean and ready. First, she must have the bowels clean and regular movements. This is done through proper diet and a good herbal laxative. Her bloodstream should be in prime condition to deliver good food to the cells of her body and the cells of the fetus she is carrying. This same bloodstream, in good condition, will carry away waste materials from cell structure to discourage toxic buildup.

A good herbal blood purifying tea or herbal formula is very important, and there are many of them. One of the finest teas we have been recommending for nearly forty years to our “expecting” patients is red raspberry leaf tea. This tea has in it malic and citric acids, oxate of iron, pectin, calcium and potassium chloride, and sulfate. This tea should be used preferably before, but certainly during the entire nine months of pregnancy. The benefits are many, such as anti-nausea, an aid to digestion (malic and citric acids), iron for the blood, and also for body building and support. Potassium chloride, sulphates and phosphorous (from grains, etc.) are the best body builders. Potassium phosphate is one of the greatest brain and nerve foods. Potassium sulphate activates the skin and mucous membranes.

According to Dr. Shook,

“Potassium chloride is a salt very similar to sodium chloride, but very different in its chemical effects upon the various cells and tissues of the body. It is found in the blood and lymph. By its action on the collagen (which is a particular gelatinoid), it forms fibrin. This fibrin is the builder of muscular and ligamentous structures, but unless there is sufficient potassium chloride in the blood to keep it in solution, the fibrin is thrown out as a stringy, insoluble mass that forms an excess of phlegm and catarrhal mucoid matter. All forms of catarrh are caused in this way, as are fibroid tumors and adhesions.”

While taking red raspberry leaf tea, it is good to use a good calcium formula, to assist in having a strong and well built body that can resist disease. A combination of horsetail grass, comfrey root, oat straw and lobelia is one of the great herbal food combinations of all time. This formula supplies to the fetus, via that mother taking it into her body, calcium for the veins, arteries and capillaries, for an overall strong body to resist disease when it is present. The weak body will succumb to the illness, while a well nourished system will ignore the ravages of disease.

The old statement of an ounce of prevention is worth a pound of cure is the point we are trying to put over and so there should be no need for vaccinations and inoculations. From the very beginning of new life in the womb, the new little body should be kept in a non-toxic, mucus-free condition. When one has a good clean bloodstream, *who would want to defile it with an injection of serums developed from horse or cow pus and other unsavory type filth from sick animals.*

If the mother will continue to live on a good mucusless diet during lactation such as the one in Dr. Christopher's "Three Day Cleanse and Mucusless Diet", and then later instruct and teach the child to follow through with the same program, she will find that good health and the lack of allergies will be evident.

I remember many years ago when our children were small that quite a large measles epidemic broke out in our neighborhood. We had taught our children to refuse any offers of candy or soda pop from their little friends, but two of our children found this hard to do except David, who always carried around with him his little bottles of grape juice, and also had dried fruits and raisins in his pocket for candy, because he "liked" them—but grape juice was his favorite—he practically lived on it. When one by one David's friends "caught" the measles—even his brother and sister—he was heard to loudly proclaim, "Well, I'm not going to have them—I just won't!" And guess who didn't get the measles! Same thing happened when the chickenpox and mumps "made the rounds"—David never contacted any of those diseases either. Of course, if you want to catch any of those contagious "filth" diseases, be sure to drink lots of sugary soda pop, eat lots of candy, cookies, cakes and pies and the body will soon have the calcium leached out and the system will be loaded with mucus and wastes which make a perfect "breeding ground" for disease germs to thrive and grow!

Isn't the natural way the best way, instead of depending upon the popular "defiling" of the bloodstream of the child to avoid disease? (Compliments of Dr. John Christopher April 18, 1978)

PART I: Preface

PART I: THE SWINE FLU EXPOSE

Eleanor McBean, PhD, ND

1977

Restored and updated by

Trung Nguyen

Edmonton, Alberta, Canada

2018

This booklet on Swine Flu hazards and fakery is part of a larger book on vaccination, titled, **VACCINATION CONDEMNED BY COMPETENT DOCTORS**. It is about time a large and comprehensive book of the long concealed facts about vaccination is brought forth. This is the largest and most informative book on the subject ever written in America. It contains data collected from medical records, army reports, and startling findings from researchers all over the world.

The book is intended to help combat the disastrous effects of vaccine promoters and their deceptive propaganda.

I have seen cancers caused by vaccinations, on the arms of people, exactly where the vaccine was injected. I have also seen paralysis and other tragedies caused by vaccinations. All these are unnecessary and avoidable by the application of information contained in the chapters of this book.

It will be noted that there are many repetitions of certain facts all through the book. There are two reasons for this. One is that some chapters are used as separate booklets like the chapter on **SWINE FLU**. The other reason is that the wrong information about vaccination has been drilled into the people from early childhood, so it is necessary to repeat the truth many times in order to reprogram the thinking from false claims to the truth.

“Truth wears no mask, she seeks neither place nor applause, bows to no human

shrine; she only asks a hearing.”—Anon

Eleanor McBean, PhD, ND

1977

CHAPTER 1: Swine Flu: Another Medically Made Epidemic

"Take the profit out of the manufacture and administration of serums and vaccines and they would soon be condemned even by those who are now using them."—George Starr White, MD

At the present writing, October 1976, a group of medical opportunists have taken upon themselves the dictatorial authority to declare the threat of a sweeping epidemic of SWINE FLU which they said was similar to or related to the 1918 epidemic of Spanish influenza which wiped out 20,000,000 people worldwide. This declaration was supposed to scare all the people into their vaccination centers to be shot full of experimental vaccine poisons, while they, the promoters, raked in the profits. During the big polio vaccine drive, a spokesman for Parke-Davis one of the five drug houses making the vaccine stated "Our company will clear over \$10,000,000 on Salk vaccine in 1955 " Before they were through they had fleeced the people of over \$4 billion dollars on the Salk racket (See the chapter on POLIO CAUSED BY VACCINATION)

Most of the people had their eyes opened during the polio vaccine fiasco so now when the same poison pushers started to beat their drums again for swine flu vaccine customers, they were smart enough to see through the hoax and refuse the shots, even though the scare-head propaganda slogans said *swine flu is contagious and you can die if you don t get the shots.*

However, the scare techniques and perhaps other inducements, worked on (the then acting) President Ford who has since been voted out of office—and none too soon. When the high pressure sales committee, Doctors Salk Sabin, Sencer, Mathews Cooper, etc marched into Ford's office in March (76) and told him to hand over \$135,000,000 to support their private money making racket, he handed it over like a simple child without even bothering to ask them for a guarantee that their unproved vaccine would not kill the people—as it did in other vaccine drives—or that their claims were justified.

Their claims of safety, effectiveness and need have all been proved to be false during the past few weeks when the vaccine killed 113 people, nation wide, and

paralyzed 75 in California alone. We do not have the reports from all 50 states, but if it is the same as in Calif. that would add up to 3,675 cases of paralysis. Many coroners have been given orders by the doctors not to give out the swine flu casualties. So, we don't know all the facts yet, and we may never know unless we have a "Watergate" investigation.

\$5,000,000 LAW SUIT FILED AGAINST FLU PROMOTERS FOR CAUSING PARALYSIS

A radio newscast (Jan. 1977) reported that one of the paralyzed swine flu victims has filed a \$5,000,000 suit against the vaccine promoters for causing his paralysis in December of 1976. His suit is against the instigators of the flu epidemic scare, who are Dr. David Sencer of CDC (Center for Disease Control) who spearheaded the vaccine campaign, and Dr. Theodore Cooper of WHO (World Health Organization), the Health Departments which promoted the shots and the six drug houses making the swine flu vaccine. (Why not Ford also and his Congress who financed it?) His complaint was that they had put out propaganda promising that the vaccine had been thoroughly tested and was perfectly safe, and that the swine flu was contagious and people could die if they didn't get vaccinated, and that they would be protected if they had the shots, and that the side effects, if any were "inconsequential."

Dr. Edwin Kilbourne, head of the Microbiology Department at Mount Sinai Medical School (L.A. Calif.) said he thought "the cases of paralysis were only coincidence."

Paralysis is known to be a common after effect of vaccination—any kind of vaccine—and these 75 California cases were paralyzed shortly after their flu shots—and yet, this doctor says (in effect) "forget it—maybe it wasn't the vaccine that did it." If that is the kind of teaching and slipshod guesswork that our young medical students are getting it isn't surprising that the doctors come out of medical college all mixed up and unable to cure anything—not even the common cold or pimples. All they learn is how to suppress symptoms with poison drugs or mutilate the patients with unnecessary operations. 97% of the operations performed by U.S. doctors are unnecessary, according to the admission of doctors, themselves, who met to decide what operations would really be necessary in case of socialized medicine when there would be no profit

in it for them. They decided that only about 3% would be necessary.

All the flu vaccine sales promises were lies—proved later by the deaths and disasters within a few hours after the shots.

The insurance companies which had insured the doctors and vaccine makers down through the years balked at this obvious vaccine swindle game. We wonder why Ford couldn't have taken a tip from these shrewd businessmen and also turned down the whole, questionable vaccine program. We wonder what inducements prompted Ford and Congress to let themselves be talked into financing not only the vaccine but paying the damage costs which could amount to billions of dollars judging by the large number of deaths and disasters already reported, plus those which have been hushed up by the vaccine promoters.

The most common remark we hear on the streets today is, "IT'S THE BIGGEST RIPOFF OF ALL TIME."

The vaccine promoters and drug insurance companies, no doubt, remembered the multimillion dollar law suits following the devastating polio vaccine campaign of the 1950's when the Salk, Sabin, and Cutter vaccines caused thousands of cases of polio, death, and other disasters. The law suits flooded the courts and the vaccine promoters and drug houses had to pay out damages amounting to many millions of dollars.

The five pharmaceutical houses making the Salk vaccine were called the Rockefeller chain then, and it is the same ones now making the swine flu vaccine, with a few exceptions. The vaccine promoters wanted to dodge all financial loss—the cost of the vaccine and the damage suits, so they could make clear profit, while the taxpayers were saddled with both the payment of the vaccine and the damages, also. I doubt that the crime syndicate could run a more crooked racket than this government sponsored and financed caper, with all the profits siphoned off into the pockets of the medical and drug concerns.

If those smooth talking conmen had been holding a machine gun on Ford they couldn't have done a quicker and easier job of robbing this simple man who didn't even know enough to do a little investigating before dipping into the public till to finance a private money making scheme.

Ford was not the only guilty one in this conspiracy against the people. Most of the members of Congress gave their supporting vote.

Before leaving office Ford asked the taxpayers to give the Congressmen a substantial raise. We wonder if he wanted to reward them for their part in helping him support organized medical crime.

An AP news report in the Los Angeles Times (Dec. 3, 1976) with a headline: \$129 MILLION FEDERAL RAISE PROPOSED, says in part:

"...Ford will put the exact rates of pay he thinks advisable into the budget submitted next month. Unless the House or Senate kills the proposals. (Are they likely to turn down a raise?) the members of the House and Senate will receive \$57,500 annually compared to the current \$44,600."

Are they worth it? Another report told us that most of our Congressmen are corporation lawyers with an eye to serving private interests. Their vote for giving \$135,000,000 of tax money to support a private medical racket (swine flu vaccine) would indicate that they are indeed working for "outside interests", and not for the good of the people who hired them to their high positions.

The same AP report also says: "The commission (to raise salaries) made it clear that it hoped to link the raises to a commitment by the three branches of government to come up with a stricter code of conduct on outside income and financial disclosures."

Does this mean that if they are given the big raise they must promise to tell the truth about what "outside interests" paid them extra to swing the "big deals" in their favor?

Public officials like this should not be given any raise at all; they should be given a dismissal and a prison sentence, plus confiscating the bribes they have taken from "big business".

SWINE FLU VACCINE TESTS PROVE UNSAFE

At the same time the vaccine promoters were telling Ford the vaccine was "tested and perfectly safe" they were still testing it on lab. animals, soldiers and little children. The ones who can't defend themselves.

In A REPORT TO THE CONSUMER (Sept., 75) by Ida Honorof, she presents a compilation of data from the National Institute of Health—Division of Biologic Standards, Bulletin of World Health Organization, and Dr. J. Anthony Morris, former Director of a branch of FDA Virus research. Dr. Morris' findings show that the flu vaccine, when inhaled by lab. animals "tended to enhance cancerous tumors."

Pregnant women had been on the preferred list for shots until findings indicated that certain substances in flu vaccine "could pose a serious threat of fetal damage to women who might become pregnant..."

In the report she reviews an article by Aurora Reich, Director of Scientific Communications, published in Indianapolis Star, which states:

"The virus itself (flu vaccine) has toxic properties, even after it is killed, which can cause fever and convulsions, especially in children. January Journal of Pediatrics carried the research of Doctors at Atlanta and Sheffield, England working together testing a purified killed influenza vaccine. They concluded that even the purified killed vaccine is too toxic (poison) to be given to children...The study showed 69% of the infants ran high fever 6 to 12 hours after vaccinations, and one had convulsions."

Other studies showed that about 10% had convulsions, and one died. One doctor pointed out that "there are 9 million children under 3 years of age. If 10% of them had convulsions, that would be 900,000 with convulsions.. (and how many deaths?) The routine vaccination of infants and children has not been recommended by the Public Health Service."

How tragic that these helpless little children are being used to test poison drugs—like laboratory animals. I thought that was against the law. It's deplorable to even use animals for this, as practically all the tests are for things we do not need, such as poison drugs, vaccines, unnecessary operations, etc. Yes, all vaccines are dangerous drugs. (See the chapter on HOW VACCINES ARE

MADE)

Every once in a while we hear of an honest doctor who is not afraid to speak out and warn the people against vaccines. Such a man is Dr. James A. Shannon, of the National Institute of Health. He stated: "THE ONLY SAFE VACCINE IS A VACCINE THAT IS NEVER USED."

When it was proved that the vaccine was too dangerous to be used on children it should have been condemned and destroyed before it did any more harm, because if it is too dangerous for children or anyone else, it is too dangerous for all people.

Doctors who have been questioned, admit that they are not taking the shots for themselves or their own children.

The old, the ill and the other "high risk" cases are more sensitive to poisons and more readily broken down and killed by them, and yet, the doctors and vaccine promoters advised them to be the first in line to get the shots. I think they wanted to test the risky vaccine first on them to see what would happen and if it caused death and disasters the doctors could blame it on their old age or their various infirmities.

The doctors seem to consider these sick and elderly people expendable commodities of no importance. I saw an example of this when I sat in on a vaccine promotion meeting on USC campus (L.A.) recently, when the promoters were trying to drum up business and get the students to submit to the shots.

People in the audience started to ask questions of the doctor on the stand. They asked about the vaccine death that had occurred a few hours after the shots. He passed it off lightly with indifference saying that "they would have died anyway," or "They were old and probably had ailments that killed them." he made it clear that the vaccine promoters were not going to take any responsibility for their death dealing vaccines. He was one of the teachers at the medical school at USC. God protect us from the kind of doctors he would influence.

These vaccine casualties were not listed as such on the public records. The death certificates were falsified and causes were given other than the vaccine which

killed them (See the chapter on FALSIFIED MEDICAL RECORDS.)

NO SWINE FLU EPIDEMIC

The whole swine flu scare was based on the death of only one soldier at Fort Dix, New Jersey (One report said October, 1975 and another said February, 1976). There was never any real evidence that he even had swine flu. There was a wide divergence of opinion among the doctors as to the real cause of his death. Some even tried to blame it on a walk he took when he was ill. An official diagnosis pronounced his death to be from A-Victoria flu, and not swine flu. All the soldiers at the camp had been inoculated with Port Chalmers flu vaccine, which was claimed to contain antigens to protect against all strains of flu. Shortly after the shots over 500 men got sick with the flu anyway, thus proving that the flu vaccine is a total failure and does not protect from the flu or anything else. 66 more were hospitalized at Fort Knox about the same time. We do not have the report from all the army camps but, it is quite certain there were a large number of cases of serious vaccine poisoning—no doubt, called by some other name, and death certificates falsified as is usually the case with vaccination deaths. The death certificates of vaccine poisoning usually read, "died of pneumonia" or hepatitis, or meningitis or something else.

The present flu vaccine they are using on the civilian population is just as ineffective and dangerous, and yet, it is being promoted all over the country with disastrous results. No matter how many casualties they have they are determined to use it as long as they can get away with it—because it is profitable. That is its one and only purpose. Even if the swine flu had been the cause of the soldier's death, one case of a disease is not grounds to stage a nationwide epidemic. It takes at least 30 cases of the same disease in the same locality to constitute an epidemic.

The vaccine promoters have been frantically trying to find at least one case of swine flu anywhere in the world to justify their custom made vaccination campaign. But they have not found one case—even among the swine. They heard of a man named Larry Hardison in Missouri who had a cold and they rushed to him to try to get a throat sample so they could make a case out of it. But he got well before they got the throat sample. Most of the cases of flu they

check are caused by the vaccine itself.

There is no swine flu epidemic in U.S. or anywhere else in the world, and there is not going to be one either unless the vaccine promoters carry out their plan to vaccinate all the people; then there will be a full blown epidemic of vaccine poisoning—not flu.

There are already 113 recorded vaccine deaths and that is enough to be an epidemic of vaccine poisoning.

ALL VACCINES ARE POISON

Vaccines contain decomposed protein such as that which is taken from pustules on sick animals or putrefied eggs mixed with deadly drugs such as carbolic acid (phenol), mercury, formaldehyde (formalin), etc. Decomposed proteins can cause botulism, salmonella or other types of body poisoning. It's no wonder people drop dead after the shots.

All doctors who know the subject know and admit that all vaccines are highly toxic, and the after effects are unpredictable. No doctor, laboratory technician or scientist can possibly determine the reaction the vaccine will have on each individual. It is impossible to know, in advance, the toleration point for poison which each person has. Therefore it is a deadly gamble—like Russian roulette—as to whether the vaccine will cause instant death (and that sometimes happens), or paralysis a few hours later, or cancer, heart trouble or TB a few years later, or kidney disease, liver damage, insanity (post vaccinal encephalitis—inflammation of the brain caused by vaccines) or some other chronic disease somewhere along the way.

Vaccine is even worse than Russian roulette because that kills only a few and they are usually other crooks, while vaccination kills thousands of innocent and trusting people.

FORD THE PUPPET

After the vaccine promoters "took" Ford for \$135 million, they told him to be a good boy and roll up his sleeve so they could photograph him having a shot to

induce all the rest of the people to follow his example. They wanted to use him and his photo and influence as sales propaganda to sell their poison drugs. He obeyed like a puppet on a string.

No wonder the rest of the world is laughing at us. They see a fake epidemic—a mass poisoning campaign—and our national leaders dancing to the tune of the drug (vaccine) pushers.

Dr G. Nossel of the World Health Organization said:

“You Americans ought to have your heads examined—No way would we permit it...There has been no proper investigation...The vaccine has not been properly researched...There are too many unknowns.”

From as far away as Australia, there are those in authority who are shocked to see that such a fraud should be permitted—even promoted by the U.S. Government, along with the medical establishment, notorious for their money making schemes.

Dr. Archie Kalokerinos, medical superintendent of Collarenebri Hospital in Australia, called the swine flu immunization program "a plan for mass murder...If a person is susceptible, the vaccine may act as an immunological insult predisposing that person to things like pneumonia or anemia...If an individual is incubating another flu virus it can cause an immediate and severe attack of that disease...We don't know what the long term effects of this drug (swine flu vaccine) will be. It may predispose a person to cancer or other diseases..." (See the chapter on **CANCERS CAUSED BY VACCINATION.**)

The above statement is from an exclusive interview with the Glendale News Press (9/24/76) and reprinted in A report to the Consumer, by Honorof.

"Harry Nelson, Medical Editor for L.A. Times, reported on an American Cancer Society Seminar for Science Writers, and announced that microbiologists have uncovered new findings that incriminate vaccination. One of the participants was Dr. Robert M. Simpson of Rutgers University, N.J., who stressed that 'Immunization programs against flu, measles, mumps, and polio may actually be seeding humans with RNA to form proviruses which will then become latent

cells throughout the body...Some of these could be molecules in search of a disease, which under proper conditions become activated and cause a variety of diseases including rheumatoid arthritis, multiple sclerosis, lupus erythematosus, Parkinson's disease and perhaps cancer." This quote is from the Honorof Report for June, 1976.

The chapter on CANCER CAUSED BY VACCINATION shows photographs of vaccine victims with cancers on the arms where the vaccine was injected.

From the NATIONAL HEALTH FEDERATION we hear, "The risks of life and health from the high incidence of fever and other side effects of the swine flu vaccine are substantial. Public health experts estimate that approximately 15% of those inoculated will suffer disabling illness."

Our paid government health agencies who are supposed to warn us of health hazards are not doing it. It has been outsiders who have been busy spending their own time and money to find out facts and warn the people against this colossal medical fraud. One source we need to thank for this is THE NATIONAL ENQUIRER and their state-by-state probe to collect data on deaths from vaccination, cases of swine flu, if any, who started the vaccine hoax and why, etc. In their Nov. 2, 1976 article by Chuck Michelini and Dan Schwartz, they write:

"Blundering government health experts (?) are directly to blame for the trail of deaths in the swine flu program—because they failed to warn people of vaccination dangers. And the mass inoculation program is needless—because there are no cases of swine flu in the entire world.

"Those are the charges levelled by top medical experts—who say the swine flu threat was blown out of proportion, then sold to President Ford and the American public with scandalous 'horror tactics.'

"Government officials are trying to scare Americans into getting shots with totally misleading TV commercials that say swine flu is contagious—and newspaper ads saying 'you can die' if you aren't vaccinated."

Actually, swine flu is not contagious at all. Like other diseases, it is a cleansing

effort of the body to force out the accumulated poisons that have been injected or eaten, breathed or taken in in some other way. Coughing, sneezing, sweating (fever), vomiting, diarrhea, rashes, eruptions, etc. are the manifestations of the unloading program and should not be interfered with by suppressive drugs or other medical meddling. Most drugless doctors say that most diseases heal normally if the patients stay at home in bed, in a quiet airy room with no food, no medicines, and no drinks except a little warm distilled water.

In case of a cold, most medical doctors say take two aspirins and drink plenty of liquids. That's bad advice because aspirin is a drastic heart poison and should be avoided entirely in all circumstances, and "liquids"—not specific enough. The patient could take that to mean coffee, tea, alcoholics, soft drinks (all of which are poison) or soups, fruit juices, ice water, etc. all of which are harmful in illness. Reasons are given in another chapter.

Although the medical and government propaganda mills sent ads to the major newspapers warning "You can die from swine flu," authorities who were willing to stick to facts were saying just the opposite. For instance, Dr. J. Anthony Morris, one of the government's top experts on vaccines, stated:

"That's absolutely false. There's no evidence that swine flu is a killer...It is not contagious...There is no evidence that swine flu will spread. It has not been isolated anywhere since it was (allegedly) found in Feb. at Fort Dix, N.J." While addressing a meeting in Los Angeles he said, "...The swine flu vaccine is worthless. There's no evidence that it will protect you against swine flu because there's been no cases of swine flu to test it against."

He also said: "Effectiveness of flu vaccine is comparatively low. Flu vaccine made from inactivated virus particles such as now being manufactured, produces the wrong kind of immunity. It elicits systemic antibody that can be measured in the blood, but does not produce the local antibody in lungs and nose needed to protect against infection to the virus if later infected.

"There is no precise way to measure the potency of flu vaccine that will be offered Americans because the standard units do not measure the mass of virus particles in a vaccine."

Dr. Morris was fired from his job because he opposed the swine flu program and pointed out the defects which showed it could be dangerous as well as entirely ineffective.

Dr. Weidman, of the University of Florida, a recognized virologist, also agrees that the swine flu vaccine is inadequate to do any good. Doctors both here and in England found that their tests on laboratory animals were not encouraging. When the dose was potent enough to kill the virus it also killed the animals and when it was weakened enough to be safe for animals and people it was too weak to do any good, and was no protection.

"So far, only 25,000,000 Americans out of a total population of 216.2 million have had the swine flu shots. And as Dr. J. Anthony Morris puts it: 'That means 191 million Americans have failed to be taken in by the hard sell propaganda. The swine flu program is a program of incredibly high costs and questionable benefits' " (Enquirer, 12/21/76).

It seems to us that some doctors are slow learners. They should have found out by this time that they can't fight poison with poison, as their poison drugs and medicines only make matters worse in the long run. Most diseases are caused by poisons either generated within the body or imposed upon the body from without such as contaminated, devitalized foods, tobacco, alcohol, coffee, vaccines, fluoride poisoned water, all drugs, insecticides, radiation, etc. Because vaccines are all poison they do damage in 100% of the cases. The damage ranges all the way from sudden death to chronic diseases in later years.

VACCINE CAN TRIGGER HEART ATTACK

Dr. Selye of the University of Montreal, one of the world's foremost authorities on human stress, stated:

"After inoculations, elderly people and the chronically ill are particularly predisposed to have certain stress reactions such as heart failure." (Enquirer 12/21/76)

In spite of this and other similar findings, the vaccine promoters urged all the

senior citizens, the old and ill the high risk cases to be the first in line to get their shots. Because of this mad rush for profits the promoters are guilty of causing all those needless deaths of the elderly people a few hours after they had their shots. Dr. Cyril Wecht, of Allegheny, Pa. performed autopsies on several of the flu vaccine victims and said:

"People should have been advised to ask their doctor if the shots were safe for them, especially if they'd had heart attacks or high blood pressure—but this was not done."

What good would it do to ask their doctor? Most doctors don't know the dangers of vaccination, and if they did they wouldn't tell their patients, as long as it was profitable to them to keep silent about it. The individual doctors usually do what their medical hierarchy tells them to do, and when they are promoting a vaccination drive the doctors are ordered to comply.

My previous research on vaccination revealed many cases of sudden death from heart failure after vaccinations. As stated many times before, all vaccines are poison and when they are shot directly into the bloodstream they circulate throughout the body including the heart, in a matter of seconds, and continue to circulate and cause corrosion and malfunction of all the delicate tissues of the body. The heart valves are made of fragile membrane which is affected by the poisons, in such a way as to render it incapable of proper functioning, leading to heart failure. At the same time, all other vital organs are impaired by the same poisons.

Most doctors and coroners try to deny the obvious when protecting a favorite money making racket like vaccination. For instance, the Los Angeles County Coroner, Thomas Noguchi performed autopsies on people who had died within 48 hours after being inoculated with swine flu vaccine. His statement, published in Los Angeles Times, Nov. 2, 1976, savored of both whitewash and sales propaganda when he said: "We do not believe the vaccine had anything to do with their deaths...Heart disease of various types was the cause of death in each case The patient with heart disease is clearly at risk of getting flu if he or she is not protected. Therefore, under guidance of their physician, it is advisable for such high risk persons to get their shots."

If we all followed his advice and got poisoned with the vaccines we would all be

dead from vaccine induced heart failure or some other disease of blood contamination.

80% OF ALL MEDICAL DOCTORS ARE UNFIT

In a KABC radio interview, recently, Edgar Berman, M.D., consultant on medical affairs to the White House and associate professor at Johns Hopkins School of Medicine made some startling statements, a few of which are as follows:

"At least some 200,000 M.D.'s practicing medicine today are guilty of incompetence...I estimate at least 10% of these are actually fraudulent and corrupt...And an unfortunately small percentage—certainly less than 15%—are intelligent, hardworking, compassionate, and moral.

The scramble for the dollar shows up in statistics. Approximately 1,500,000 (unnecessary) tonsillectomies a year. Some 14,000 to 16,000 persons die each year because of the 2,000,000 to 3,000,000 unnecessary operations performed, and God knows how many hundreds of thousands have complications.

"Over the past 50 years doctors have been implicated in producing more infections, crippling and suffering than all the accidents caused by the combustion engine plus every illness foisted on the laborer by industry, from black lung to radiation poisoning.

"Studies at Cornell and Yale have shown that 1,250,000 hospitalizations a year are caused by prescribed drugs. And once in a hospital, you're still far from safe. Our hospitals, even the best in the land, produce over 5,000,000 cases of disease a year."

Dr. Berman wrote a book titled, *THE SOLID GOLD STETHOSCOPE*. It's a shocker. It "gives the lowdown on the high-ups" in the medical field and has the authenticity of a man—a medical doctor—who knows the story from the inside—the seamy side. It's not only informative, it's a million laughs.

There is so much bungling, guesswork, faulty diagnosis and coverup, both inside and outside of the hospitals, that the doctors conceal their manslaughter cases by calling them "Accidents." There are so many doctor caused diseases that they

have given them a name, "iatrogenic." It means doctor-caused diseases. People think they go to the hospitals to get well—to be healed, but instead, millions of them are made sicker by the treatments, and even killed by the poison drugs, operations and experiments. Most, maybe all, of the hospitals have a separate section set aside for their "iatrogenic diseases." Why are they kept separate? It is probably because the doctors don't want the visitors to see what they have done to them, and also to use them for experimentation. They justify this by claiming they must experiment to find a cure for the diseases they have caused. But they use the same deadly drugs and treatments that caused the diseases in the first place.

The famous Dr. Charles Mayo, in a radio broadcast a number of years ago was honest enough to admit that with all their latest equipment and medical training at the Mayo Clinic, they are able to get only 20% of their diagnoses and treatments right. The autopsies on the dead bodies showed them what they did wrong.

An article in Dr. Shelton's Hygienic Review (Dec. 76) quotes some interesting statements from a group of 18 internationally known scientists. The Chicago Tribune (Dec. 22/76) also carried the article by Ronald Kotulak. Here are a few of their remarks:

The shocking conclusion is that drugs are so widely misused that only 10% of the medications taken in the industrialized world are for disease related purposes.

"They point out that there is no such thing as a safe chemical, a fact that doctors tend to forget and that most people do not know...Doctors frequently prescribe drugs even though they know little about them, and the people eagerly take them. The price which the patients pay in terms of adverse side effects are horrendous.

"Studies in America and England have revealed that, out of every 20 hospital patients, one is admitted because of the harm done by drugs.

"Once in the hospital the risk increases. Up to 18% of the patients suffer from bad side effects caused by medications prescribed in the hospitals.

"The annual cost of treating this unnecessary and preventable abuse of medications is close to \$3 billion,' said this international Commission of Internal Pollution—a staggering waste of money and health.

"Who is to blame for our medicinal extravaganza? The responsibility must be shared by the drug industry, the government agencies that oversee them, the doctors and those who take the drugs.

"Another breakdown occurs when it comes to test new drugs on people. A spot check conducted by the Food and Drug Administration in 1973 disclosed that 20% of the doctors doing these clinical trials were guilty of unethical practices, including prescribing wrong doses and falsifying records."

DRUGS CANNOT CURE

All chemicals and drugs are inert, foreign substances which act as irritants when taken internally. They do not have power to act in the body or cure anything. The only reason why they seem to cause some changes which people like to believe are curative is that the internal defense system tries to eject this unwanted foreign matter, and that sets up a reverse action to remedy the harm done by the drugs or chemicals. This taxes the bodily reserves and delays healing. In the case of some drugs it makes healing impossible.

I talked to a young medical student who said that the med. schools were dominated by the drug houses which are flooding the market with so many new drugs which the students are required to learn that they didn't have time to study anatomy and the things which doctors are supposed to study. No wonder the new doctors don't seem to know anything except how to give drugs, shots and whatever the pharmaceutical houses dish up to them.

The antibody theory collapsed with scientific tests and that leaves the vaccine business without a leg to stand on. (See Chapter on Germ Theory.)

VACCINE PROMOTERS TRY TO DODGE THE BLAME

Now that the vaccine racket is being exposed, the vaccine promoters are trying to squirm out of it by making confessions or trying to lay the blame on others. The day after the scare headlines came out in the papers—"Swine flu can cause death"—and "the flu vaccine is safe and will protect you...", etc., a top virologist for the CDC (Center for Disease Control) which heads the flu program—admitted that the CDC knew the headlines were false." (Enquirer Probe, 12/21/76).

"An official working with the CDC—Dr. Elmer Spurner, director of laboratories for the Missouri Division of Health, admitted, 'Our tests were not meant to confirm that there was a swine flu outbreak. I don't know how that got into newspaper stories.' "He knows.

He and the other promoters did not issue any denials when the headlines across the country read: "Swine Flu Case is Confirmed," and "Flu Vaccine Rushed to Missouri in Crisis." (Ibid)

After the many deaths, heart attacks, paralysis and other cases of vaccine poisoning began to mount, some of the promoters were asked to justify their widely advertised claims that the vaccine "would protect 85% to 90% of those vaccinated"...and that the side effects would be few and "inconsequential." One of the favorite tricks of the guilty was to lay the blame on others. As an example, Dr. John Seal of the National Institute of Allergy and Infectious Diseases said:

"The public should be much more careful in interpreting what we mean when we make such statements." (Ibid) What did he mean?

Another man on the advisory committee admitted:

We don't know what the vaccine will do when it faces the virus." Yet, they all told the people it was "tested and perfectly safe."

In other words, they don't know what they're doing, but they tell lies to lure people into their vaccination centers, and when the deaths and disasters occur, the doctors tell us in effect—"It's your fault for being stupid enough to believe us."

"Dr. Ernest C. Harrmann, associate professor of microbiology at Peoria, Ill., School of Medicine, believes that "the time has come to ask for resignations of all those behind the swine flu vaccine rip off.' "(Enquirer Probe—12/21/76)

A FEW CONGRESSMEN BLAST THE SWINE FLU HOAX

Not all of our Congressmen are hopeless. Some are actually on our side. Congressman Ron Paul of Texas is also a doctor and is able to see both sides of the swine flu question. Most doctors have tunnel vision and see only one side—the side with the dollar mark.

Congressman Paul, in an interview with the Enquirer (Dec. 21, 76) said: "I am outraged by this program. It has been a shocking misuse of funds...and an evil political maneuver. There are people whose careers are in question because of this program. And I predict these blatant advertising efforts to panic the people into taking swine flu shots will fail.

"I think Congress has wasted more than one hundred million dollars. The swine flu program should be brought back to Congress and discontinued at once. The program should be stopped, and those who were responsible should be held morally accountable to the American public."

Congressman Larry McDonald of Georgia, also a medical doctor, said: "I think the swine flu program is a tailor made hoax that finds its roots in frightening the American people...I believe that a full investigation of those in charge should be launched...and if it turns out to be a dishonest promotion, everyone responsible should be removed from their jobs."

It's heartening to find that all our Congressmen are not corrupt. But where were they, the good ones, when the vote was being taken to endorse and finance this mass poisoning program?

HOW TO PUNISH THE CULPRITS

Removing the guilty from their jobs is not enough. A punishment should be imposed on them which they will feel, and that would be to take away all their

money—that's their real love, obviously. If we gathered up all the bribes they have taken from their outside clients, plus all the other millions they have rounded up by using their governmental influence it, would amount to a billion dollars or more—perhaps. With this backlog of funds we could establish some good non-medical schools which would teach the people what to do to take care of their own ailments—even how to avoid all illness. That is possible because many are now living the health life and have no ailments whatsoever. These schools should be kept free from medical domination and political strings.

Health doctors with the right kind of non-medical training get at least 90% more successful "cures" than do the medical doctors with drugs. This project should be carefully supervised to make sure that a lot of pseudo schools do not spring up parading under the guise of the authentic, well trained schools of natural healing. The present day medical doctors are 30 years behind the well trained health doctors. Medicine is on its way out. It is a failure method which leads the people astray.

LAW SUITS AGAINST THE VACCINE PROMOTERS

When our President and Health Departments joined bands with our mortal enemies—the poison pushers (vaccine promoters), and failed to warn the people against hazards of the oncoming poison raid, the people were left unprotected, with no use of the mass media (TV, radio, press etc.) and no help from City Councils, Mayors, Congressmen, County Supervisors, or police, because all our paid protectors had given their allegiance to the public poisoners. When the vaccine was causing death and disaster soon after the campaign was launched and the trusting unwarned, people were walking blindly into the vaccination centers, the few "do-gooders" who knew what was going on tried to reach as many as possible with WARNING leaflets and meetings. But that was not reaching enough people. It is a helpless feeling to see all our tax supported public officials working against the people and supporting a killer racket.

A few tried to go through legal channels with law suits against our derelict president and the heads of the vaccine campaign. But that is a slow and expensive procedure, and besides, these hard working "do-gooders" were not making any money at their self appointed task of warning the people of the deadly hazards of the vaccines.

Three suits were filed from California. One suit which is progressing well was filed by Lewis E. Cook Jr. of San Diego, Calif. He charges that the inserts that appear in the vaccine packages produced by Merck, Sharp and Dohme, Wyeth, and Parke-Davis (firms making the swine flu vaccine) do not state the vaccine "might be in any way effective in preventing influenza..." which is supposed to be its purpose and its only justification...

"The claims that influenza vaccine will or can prevent influenza cannot be made legitimately since there is no evidence anywhere in the world which would suggest that influenza vaccines have ever prevented even one case influenza.

"The data indicates that the entire mass immunization program is fraught with unknowns, suppositions, speculations, assumptions and little or practical and sound scientific validity—conceived and implemented in a most amateurish, haphazard and irresponsible manner, which poses a threat to the health lives of the American public...

"Antibodies (supposedly) produced by the injection of the inactivated and disrupted whole virion and subvirion flu vaccines manufactured for swine flu cannot be shown to be effective in preventing swine flu...The whole mass immunization program is fraught with dangers and risks without sound scientific data. The immediate, short, and long term adverse effects of the vaccines could not have been adequately determined during the brief period of only 3 or 4 months during which experiments on a few humans were conducted prior to publication" (of drug inserts).

It usually takes the drug companies several years to test vaccines before trying them out on people.

The third suit was filed by Ida Honorof representing People Against Political Inoculations, and of The National Health Federation. They joined forces to file suit in the U.S. District Court to stop the misuse of public funds for a vaccination campaign that has not been proven safe or effective. They assert that the mass inoculation program violated the U.S. Constitution—First Amendment. They request that the whole program be discontinued "unless and until grave doubts and hazards associated this massive vaccine program are disclosed and fully

known to the public." Honorof contends that the swine immunization program has been "a series of lies, deceptions and errors of judgment. We're asking Ford, and Education and Welfare (HEW) that they terminate the program at once. The greatest danger is not flu but vaccine itself." (Published in VANGUARD, Sept. 76)

AMERICAN MEDICAL ASSOCIATION HAS BEEN OUTLAWED

The A.M.A. was found guilty in a U.S. Court of Law for violating the Antitrust act a number of years ago. Dr. Morris Fishbine, President of the AMA, at that time, was sentenced to a prison term and the AMA was fined and admonished to cease and desist from their illegal activities. Fishbine didn't serve his prison term and the fine was not heavy enough to worry the association so they have continued to operate in violation to the law ever since then. Therefore, they are an "outlaw gang."

NEW ANTITRUST SUIT AGAINST A.M.A. FILED BY CHIROPRACTORS

On Oct. 12, 1976 an antitrust suit was filed in Chicago, U.S. District Court, against the American Medical Association. This suit was filed by a group of Chiropractors who have proof that the AMA has, for years, boycotted, libeled, and tried to destroy and eliminate the whole chiropractic profession. Details in an article in SPEARS HOSPITAL NEWS, (Denver, Dec; 1976).

The AMA has not only carried on a continuous fight against Chiropractors, but all drugless fields of healing, most, if not all of which have safer and more successful methods of healing. Some of the drugless methods are not as good as others but, at least, they don't use poison drugs and knives, so they cannot do the harm that medical methods do.

The medical profession has no safe and sure cure for any disease. I know because I have worked with medical doctors. They hired me for what I knew that they didn't know. But, in spite of their lack of ability to cure anything, they used dictatorial powers to put out of business and into prisons many drugless doctors who could "cure" what they couldn't cure.

I know several highly successful health doctors who were practicing under

Chiropractic licenses, but were sent to prison for "practicing medicine without a medical license." This was in a state where the medical dictatorship held sway, and they would not allow any other school of healing to practice there, although the drugless doctors achieved better results than they did.

Medical doctors call all other healers "quacks." A quack is one who claims to be able to cure diseases, and takes money for it, and does not "cure" the patients. Doesn't this description of "quack" fit practically all the medical doctors? They can't cure cancer; they can't cure arthritis; they can't cure colds or anything, but they treat the patients and take their money.

The better drugless doctors have "cured" all these diseases without drugs.

When President Ford rolled up his sleeve and had a shot for advertising purposes, he was making it clear that the government endorsed the vaccine program and he wanted all the people to follow his example and be vaccinated. When a person tells others to take a certain medication he is prescribing medicine. Technically speaking, Ford was practicing medicine without a license. The AMA likes to put people in prison for practicing medicine without a license. The medical associations usually pick on their business rivals, the drugless doctors. Will they put Ford in Prison for committing the same crime they have convicted others for? Or, is there one law for those who oppose the harmful medical methods and another law for those who help promote medical crimes?

2,000,000 DOSES OF DEFECTIVE SWINE FLU VACCINE CONDEMNED

The haphazard and slipshod methods used by the vaccine makers has produced vaccines that have killed and paralyzed hundreds of people already, and no one seems to be supervising them. There are no safeguards, no tests and no proof of safety and effectiveness required of the vaccine makers except what they, the manufacturers, set for themselves.

The Los Angeles Herald Examiner (June, 3/76) published an AP report stating that the experimental "vaccine ready for testing on elderly and high risk cases was found to be defective. As a result, the program would be delayed 6 weeks. The Public Health Service said that 2,000,000 doses will be held in reserve for use if the correct vaccine is in short supply."

They admit it is a bad batch—too dangerous to use—and it is condemned, yet they didn't destroy it as they should have done. They intend to use it anyway—if they can get away with it—who would know the difference, (seems to be their attitude) as long as they can sell it and make money.

Who will know which of the unlucky people will get the bad vaccine? The vaccinators are not going to tell. Were all those 113 people who died a few hours after the shots given some of the condemned vaccine? Or was it approved vaccine? They're just as dead with one or the other, as all vaccines are poison—they are purposely designed to cause illness.

The bad batch was not discovered by government inspectors or by the lab technicians making the vaccine, but by another doctor not assigned to that task. We wonder who is supervising the supervisors. Is there another "outsider" sleuthing in all the laboratories which make the vaccine, looking for mistakes that pass as safe vaccine? We think not, as there have been too many casualties for that possibility.

Mistakes are also being made in other laboratories making different vaccines. This has been going on for years. Back in the days when the polio vaccine was being high pressured on the public, the same Dr. Anthony Morris who is trying to warn us against the dangers of the swine flu vaccine, was doing the same then. He found that some of the polio vaccines were contaminated with SV 40, a virus known to cause cancer in monkeys and hamsters.

It's frightening to think that all this uncertainty, careless, unscientific guesswork with its deadly hazards passes for safe and scientific vaccination, approved by the government, the schools, the medical boards, the press and then passed on the people as something that they must not question or criticize.

The only way to be safe from these blood poisoning, money making vaccine campaigns is to refuse all shots. Prevention is better than cure; and much can be learned by reading good health books written by qualified health researchers. A few are listed in the bibliography. Don't be fooled by medical books with health titles. They have misled and mis-taught the schools and the general public, for over a century. Medicine is not health. It is a health destroyer. "Preventive"

medicine should actually "Prevent" medicines and drugs, and then it would be doing some good.

People are often fooled by, SO called "scientific findings" which are not scientific at all, but are manipulated by schemers, and then bought and paid for to be used as propaganda. The following is from an article in the Los Angeles times (11/26/76). The survey was run by Dr. Ian St. James-Roberts of London. (See page 42)

"MANY FAKE FINDINGS BY SCIENTISTS SEEN"

"Many scientists may be faking their findings, according to a report published Thursday in New Scientist magazine.

"The magazine asked scientists in a questionnaire whether they knew of cases of 'intentional bias'—faking results to make experiments appear well conceived and important.

"90% of 200 replies reported knowledge of such cases.

"University scientists proved the worst offenders. Most cheaters were discovered by other scientists trying to duplicate the experiments. But those who replied said the gains from such frauds were often nothing, but in a few cases resulted in promotion.

"Some scientists implied that drug companies encouraged them to cheat by being obsessed with getting positive results, for one forensic scientist said it was not unusual for the police to indicate the sort of forensic (legal procedure) evidence they would prefer."

We wonder what pressures, bribes or other inducements were offered the, so called, scientists to say that the swine flu vaccine was properly tested and safe. Dr. Wecht said people should have been warned that the vaccine could trigger heart attacks, "but this wasn't done."

Many people who saw through the fraud from the start tried to get warnings in the papers and on T.V. and other channels of communication, but the media turned a deaf ear.

SWINE FLU PROMOTERS TRIED TO CON THE SWINE RAISERS

In the planning stage, the vaccine promoters expected to round up a few cases of flu and stampede the whole world into the vaccination centers like they did for the 1918 flu epidemic. That would be a multibillion dollar profit, like their lucrative polio vaccine drive. But the world didn't take the bait this time, and most of the Americans didn't either. So the promoters thought they would have a ready market with the swine raisers because they had named the vaccine "swine" flu vaccine. They tried to sell 80,000,000 doses of the vaccine to the swine raisers, but they saw through the fraud and turned it down without hesitation, not that hogs don't have ailments sometimes—they do when they are fed wrong and medicated. But the hog raisers had learned through bitter experience that shots, in previous years, had disastrous effects on their herds and they lost hogs and money from it.

If the hog farmers had enough common sense to refuse the poison shots for their hogs, why couldn't our high priced President and Congress use some of that common sense and do the same? Aren't our leaders as interested in Protecting us from the commercial poisons as the farmers are in protecting their pigs?

When the opportunists see a weak president on the "throne" they plan to "use him". When they staged massive polio vaccine drive in the 1950's they worked on the smiling, affable President Eisenhower and got \$9,000,000 to start with, then kept twisting his arm until they wrenched \$63,000,000 from him (the taxpayers) to support their killer vaccine campaign.

President Franklin Roosevelt was another "touch." He even let them use him and his infirmity to advertise and sell their polio vaccine.

The same drug houses and vaccine promoters got \$100,000,000 from Nixon. After the polio vaccine drive was over the promoters bragged that they had raked in \$5 billion dollars over the several years they kept polio vaccine sales going.

PRESIDENT COOLIDGE UNSWAYED BY MEDICAL PRESSURE

We need strong, intelligent leaders. Where are they now when we need them?

President Coolidge set a good example. When the Jones-Parker Bill and the Randall Bill (bills to set up a medical dictatorship within the government, raising the head potentate to the official status and salary of the Surgeon General of the Army) were rushed through Congress in 1928, and were brought before President Calvin Coolidge, he was unmoved by the high pressure medical lobbying. He looked at the bills and stopped them with a Presidential veto. He gave as his reason for this action:

"These bills give a military status to men supposed to be engaged in scientific research."

The plot of medical establishments to set up a medical dictatorship in U.S. goes way back to the Founding Fathers when they were framing the U.S. Constitution. There were quite a number of medical doctors in Congress at that time trying to high pressure a constitutional decree to set up a medical dictatorship. But the wise opposition won. Dr. Benjamin Rush and Dr. Josiah Bartlett were the opposing forces. They convinced Congress that one branch of healing in control would be as bad as one religious sect dominating all the others. That's exactly what we were fighting against.

George Washington was also a strong President. Even that long ago in 1775 he knew more than our present day doctors do about the harmful effects of vaccination. He issued an order that no man in the Continental Army was to be inoculated. Any enlisted man or officer who submitted to that blood contaminating practice would be dishonorably discharged. He had seen the devastation of smallpox caused by the practice of arm-to-arm inoculation which was introduced from Europe. Edward Jenner and his cow pox abomination did not begin until 1791—16 years later. Both methods caused widespread disease, disability and death until compulsory vaccination was abolished all over the world except in about three backward countries and the U.S. armed services. These are the places which still have outbreaks of the same diseases they vaccinate against. And the diseases are in the vaccinated.

George Washington had enough problems without a lot of vaccine induced disease. Vaccination and inoculation was practiced by the unenlightened as far back as 1,500 years B.C. (See the chapter on HISTORY OF VACCINATION).

What is wrong with our leaders of today. Are their heads turned by bribes or can't they tell the difference between false propaganda and facts. They are being paid by us to do some home work and investigate before putting our lives and our money on the line.

The following poem sounds a clarion call:

GOD GIVE US MEN

"God give us men! A time like this demands
Strong minds, great hearts, true faith and ready hands
Men whom the lust of office does not kill;
Men whom the spoils of office cannot buy;
Men who possess opinions and a will;
Men who have honor; men who will not lie;
Men who can stand before a demagogue and damn his
treacherous flatteries without winking.
Tall men, sun-crowned, who live above the fog
In public duty and in private thinking;
For while the rabble, with their thumb-worn creeds
Their loud professions and their little deeds,
Mingle in selfish strife, Lo, Freedom weeps,
Wrong rules the world, and waiting Justice sleeps.
—Josiah Gilbert Holland

WHAT OUR LEADERS SHOULD HAVE CHECKED ON BEFORE THROWING US TO THE KILLER (VACCINE) SHARKS

1) First of all, Ford, Congress and the other leaders paid to look after our interests and safety, should have required a guarantee that the vaccine was safe—not deadly. The propaganda of the sales crew said it was safe, but they gave no proof and no guarantee. The sales crew are not authorities; so Ford should have demanded a money back guarantee from the pharmaceutical houses making the vaccine. There should have been written proof of safety and effectiveness before the \$135,000,000 was paid. But, the drug houses could not give any proof of safety because they knew it was not safe. Their lab. tests and field tests proved it killed test animals and people. This was not made public.

A number of years ago when the diphtheria toxin-anti-toxin was being promoted, some suspicious people went to the laboratory making the vaccine, and asked for a written guarantee. The lab. refused to give any statement of safety, and admitted that "all vaccines are unstable and unpredictable in their effects, and could never be declared safe."

If Ford and the rest of the government had taken care of that necessary bit of business (making a careful check) before transacting the questionable \$135,000,000 deal, then the flu vaccine would have been rejected and the taxpayers would not have been swindled out of the \$135 million. Besides that, all those people who were killed by the vaccine would still be alive and happy today.

2) The promoters said that the vaccine would prevent flu. It didn't; it caused it.

3) They said the flu was contagious and the vaccine would protect people. Flu is not contagious. It is caused by the blood poisoning effects of the vaccine itself as well as other kinds of body contamination. Viruses and germs cannot cause disease. (See the chapter on WHY GERMS CANNOT CAUSE DISEASE.)

4) The vaccine promoters said the blood samples from the man who died at Fort Dix showed viruses like the blood samples from the 1918 flu epidemic and that it could trigger a widespread, deadly epidemic like the previous one.

This is not true because there are no virus bearing blood samples from the 1918 flu epidemic. That epidemic was 58 years ago and viruses were unknown then. The first swine virus was discovered by a U.S. man in 1931. A British science team isolated the first virus in man in 1933. But, viruses have never been proved to be the cause of disease anyway, although the vaccine makers try to use them as a scare tactic, knowing that they are so small that people can't see them or prove one way or another if they have any. One dictionary definition of virus is "a morbid poison." A poison is an inert substance. It cannot move about and attack people.

If any blood samples from the 1918 flu epidemic are still on record they would be so dried up and changed in structure that they couldn't prove anything. Certainly no germs or viruses would be seen.

I have examined fresh blood samples under the microscope in college and saw how rapidly the blood changed in color and structure as it dried on the plate in just a few seconds. A sample 58 years old is a poor excuse for the vaccine promoters to try to rely upon for proof.

Viruses would not have even been mentioned in the medical or lab. reports for the 1918 period because they were unheard of. And besides, they couldn't be seen with the kind of microscopes they had then.

The flu of 1918 was caused by the conglomeration of diseases which the sinister variety of vaccines brought on. Practically everyone in the world had been propagandized into submitting to all the vaccine that were invented—the surplus stock left over from World War I which was the first war in which all the vaccines were used. The vaccinated got the flu and the unvaccinated didn't. I was one of the unvaccinated and I didn't get the flu. I didn't see an unvaccinated person who got the flu.

QUESTIONS THAT SHOULD HAVE BEEN ANSWERED BEFORE CONSIDERING ANY VACCINATION DRIVE

Ida Honorof, head of PEOPLE AGAINST POLITICAL VACCINATION, tried to get the Los Angeles Board of Supervisors and certain other officials to put pressure on David Mathews of Health, Education and Welfare, and other promoters of the vaccine to answer some important questions before they embarked on the questionable vaccination drive. Mathews was in L.A. to give a talk and his mind was already made up to promote the vaccine. Honorof, confronted him and presented him with the list of questions, but he didn't answer them and the Supervisors didn't request him to.

The questions are as follows:

- 1) Can you define any benefits derived from the swine flu vaccine? According to the law the benefits must outweigh the risks. (They don't.)
- 2) Will the swine flu vaccine prevent swine flu? (It never has.)
- 3) Is it true that if one gets the "shot" will he get an even more severe case of

flu? (Yes, and death 113 cases.)

4) Why were Dr. Morris' test animals in 4 laboratories destroyed? His test results would have shown the efficacy or hazards of the vaccine.

5) Did Health, Education and Welfare submit any testimony before the subcommittee on Health and Environment...at their scheduled hearings, relating to possible hazards of the swine flu vaccinations, names of persons submitting opposing evidence and how many witnesses were heard that opposed the program?

6) Is there any evidence that a high percentage of those who have the shots will receive no benefits?

7) Claim is made that 70% of the people who get vaccinated would be protected. Among the unvaccinated 75% would be protected. Explain these contradictions.

8) Can you give any evidence that a swine flu epidemic exists? (None)

9) It takes approximately 10 years of testing and research to approve any substance, drug or biological which is to be administered into the human body. If the same standard applies to vaccines why has not the swine flu vaccine been subject to the same tests which the FDA says are necessary before injection into human beings?

10) Even though the Pharmaceutical insert accompanying the flu vaccine cautions against "injecting intravenously," isn't it true that there is no control with the jet injector, which explodes the vaccine into the skin with 1,300 pounds pressure—into tissue space, tissue cells, directly into the arteries, veins, lymph vessels (and right to the heart) thereby producing great destruction, and eventually ending up in the blood stream?

11) Each of the vaccine manufacturers making the swine flu vaccine (Parke-Davis, Merrell, Wyeth, Merck) use a mercury derivative as a preservative. The danger of (the highly poisonous) mercury injected into the body—or inhaled or ingested, etc. is well documented.

12) Why is the printed form which is presented to persons to sign before getting their shots, read "registration," when Public Law 94-390 specifically stipulates that it be a "consent" form. This was strenuously objected to by the National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research, and they asked that said forms be destroyed and not used, since they are definitely not "consent" forms, and are gross violation of the act.

13) What is the detailed definition and description of swine flu?

14) Is there really a disease called "swine flu"?

15) Why wouldn't vaccine manufacturers produce and distribute the vaccine without indemnification from all the liability for vaccine-caused sickness, disabilities and deaths?

16) Why did the insurance companies refuse to provide such insurance?

17) Why were the people and public tax money, made responsible for all liabilities and claims resulting from the sickness, disabilities and deaths caused by the swine vaccine?

18) Who benefits from the mass vaccination of 215 million Americans?

19) Is it really necessary or advisable for everyone to get a swine flu vaccination? (No)

So far, the flu promoters have not answered the questions.

DEATH COUNT MAY NEVER BE KNOWN

Up to January 7, 1977 the death count from swine flu vaccine was 113 (people) and paralysis was 139. We have reason to believe that this is only a fraction of the actual casualties. During the polio vaccine drive in the early 1950's when the shots caused so many deaths and cases of paralysis, Dr. Dale, of the Los Angeles Epidemiology Department, said that for every case that was reported there were an estimated 15 unreported cases. Many vaccine deaths were recorded as from other causes, to conceal the hazards of the vaccine.

During my 30 years of research and writing I have uncovered facts that prove the medical records and death certificates are sometimes deliberately falsified and changed to cover up guilt of doctors and lab. technicians. (See the chapter on FALSIFIED DEATH CERTIFICATES AND MEDICAL RECORDS.)

All vaccines are poison, and therefore, cause death and disease. This is a known fact, and every vaccination campaign has brought on a large number of disasters. Those of us who knew this, tried to warn the people and ward off the vaccine drive. But the din of the well financed vaccine juggernaut drowned out our cry, and the high pressure advertising scare campaign panicked millions into the vaccination centers. We knew death and disease were inevitable—but none were announced in the papers at first.

Therefore, Ida Honorof (head of Citizens Against Political Vaccinations) decided to do what the health officials should have done; she went to the L.A. County coroner and made a check on the deaths. She found that five people there had died within 48 hours after their flu shots. Some were young and didn't have other ailments that could be blamed for their deaths. The vaccine promoters including the health departments had intended to cover up the vaccine deaths and disasters. But Honorof brought it out in the open. She contacted the National Health Federation (a non medical group which tries to protect the people from health hazards from medical, commercial and political sources. They called a public meeting in Glendale, Calif. where they aired some startling facts about the vaccination campaign and the mounting disasters caused by the poison vaccine. Some of the relatives of the flu victims were there and gave account of the state of health of those who were killed by the vaccine.

After this expose' the papers had to announce some of the deaths as it was no longer possible to conceal them. The coroner and doctors tried to gloss over it by saying that the deaths were all from heart trouble and they would have died anyway without the shots. Naturally, the heart stops when a person dies from any cause, so heart failure is an "easy out" for the coroner.

For a few days, deaths were announced in the papers until the count rose to 52. Then suddenly the death reports stopped. People got suspicious because the vaccinations were continuing and we knew that all vaccines are poison and that means that people do die from the shots.

Honorof did a little more detective work and learned that Dr. Shirley Fannin, Chief of Acute Disease Control Center of L.A. had met with the vaccine promoters and medical boards to decide what they could do to keep the people from finding out how many were being killed by the vaccine. They decided among themselves not to count as vaccine casualties those who didn't die suddenly within 48 hours after getting the shots.

This was a shocker. The idea that these poison promoters who were killing the people with wild abandon, had set themselves up to be so high and mighty that they could lay down the law as to what hour people could die, and if they happened to die 49 hours after the shots they would not be dead from their poison vaccine. Dr. Fannis then wrote a letter to the Coroner ordering him to not announce the deaths as vaccine casualties unless they died within her 48 hour time span. This gives us an idea of the tricky business they have been carrying on all through the years, and we didn't suspect a thing.

The 48 hour "cut off time" of theirs, cuts out those thousands who died a little later. It also cuts out Private David Lewis, the man who died at Fort Dix, New Jersey of what the doctors diagnosed as swine flu. He died more than six weeks after his vaccinations at camp. He was the one and only case of swine flu the doctors have found in the whole world. He was all they had to hang their whole nationwide swine flu scare on. And now, their own medical decree that it isn't swine flu unless he dies within 48 hours, knocks out their one and only case. Actually, the official diagnosis by military doctors was that Private Lewis died of A-Victoria flu (vaccine), not swine flu.

Now, without one authentic case of swine flu and without any epidemic except the epidemic of vaccine poisoning, the vaccine promoters and all the doctors who participated in giving or endorsing the shots, as well as the political heads who financed it, are all guilty of hundreds of vaccine deaths—murders. What are we going to do about it? Are there enough honest and concerned officials to prosecute them and make them pay all the damages and then put them out of circulation?

WHO POCKETS THE MONEY?

The arrangement was that the \$135,000,000 of the people's money was for

vaccine doses for all the 215 million people in this country, at 50c a shot. So many people were killed and paralyzed by the vaccine that the campaign had to be stopped before a riot broke out to kill all the doctors and vaccine promoters—and a few others. So only a few in the country were vaccinated. Even if we stretch a point and estimate that there were 50,000,000 who had shots, that would be only 25,000,000 dollars used out of the \$35,000,000. That leaves \$110,000,000 of our money which they, the promoters, still have. Do those doctors and various other crooks intend to pocket the \$110 million? It should be returned immediately to the treasury and the vaccine promoters billed for the rest of the \$25,000,000 which they took under false pretenses, because there was no epidemic and the vaccine was not safe and all their promises and claims were false.

COMPULSORY ARMY VACCINATIONS ARE UNCONSTITUTIONAL

Private David Lewis who died at Fort Dix, supposedly of swine flu, would be alive today if the Army had not violated the law by forcing the poison shots on the soldiers. Our U.S. Constitution gives us the "right to be secure in our persons." Therefore, all enforced vaccination (mass medication) is a violation of our legal rights.

According to Blackstone (the "Bible" of the lawyers): "No laws are binding upon the human subject which assault the body or violate the Conscience."

The U.S. Supreme Court ruled that:

"No right is held more sacred or is more carefully guarded by the common law, than the right of every individual to the possession and control of his own person, free from all restraint or interference of others..."

Judge Cooley stated: "The right of one's person may be said to be a right of complete immunity; to be let alone."

In the official code book of the U.S. Armed Services titled, UNION CODE OF MILITARY JUSTICE, we find that there is no compulsory vaccination law in any of the branches of our military services. Therefore, as there is compulsory

vaccination law in United States or the military establishment, the enforced vaccinations on our recruits is against their legal rights. Because vaccines are proved to be poisonous and harmful in all cases, the military forces are guilty of malpractice and subject to the laws governing that offense.

One woman I talked to has already sued the Army for \$1,000,000 for causing the death of her son as a result of shots at camp. In England, so many outraged parents sued the government for vaccine damages to their sons in the military services, that the government abolished compulsory vaccination in both the military and civilian life. (See the chapter on WHAT VACCINATIONS DID TO OUR SOLDIERS.)

HOW WILL OUR NEW PRESIDENT CARTER HANDLE THE SWINE FLU SWINDLE?

Last Spring (1976) the epidemic makers were in a frantic rush to get President Ford to give them the full payment of \$135,000,000 immediately, with no questions asked, no guarantee of safety and with no swine flu epidemic pending, not a case in the world, and they didn't even have any effective vaccine.

Why the big rush we wondered. The only obvious answer was that the November Presidential election might remove their "pigeon." They knew Ford was easy to manipulate and they wanted to "use him" while they had him on a string. A new president might take a second look and refuse to support their private money making racket.

Now, the election is over and our new President Carter .is left with the ragged ends to clean up, left from Ford's term. We are wondering how he will handle "Ford's Folly" and if he will investigate the vaccine scandal and require the guilty ones to repair their damages and return our money they took under false pretenses.

We are hoping that President Carter will not be swayed and dominated by the powerful medical and drug lobby. But one blotch on his past record makes us wonder. We heard that he let himself be controlled by the fluoride promoters and paid them to poison the entire state water system of Georgia. If he is a man for the people why didn't he investigate the other side, not just the false sales

propaganda? Chemists report that "fluoride compounds rank along with cyanide and arsenic in toxicity." Sodium fluoride or hydrofluosilicic acid is the form which is used to poison the public water supplies. Most water supplies already contain calcium fluoride which is also poisonous, but sodium fluoride is 15 times more poisonous than calcium fluoride. A few states such as Texas are working to filter out all the fluoride even the calcium fluoride because they have found by tests that all fluoride is too dangerous for them.

Sodium fluoride is a cheap byproduct of the aluminum and fertilizer companies. About the only thing it is good for is rat poison. But their promotion man conceived the idea of selling it to the politicians to dump in the public water supplies. Enough City Council members were "on the take" or weak minded enough to buy the sales propaganda and consequently quite a number of cities and a few states were fluoridated. However, hundreds of them have abandoned the program when it was found, after years of use, that the fluoride was not only expensive, it was damaging to the health and to the water pipes and all equipment that came in contact with the poisoned water.

Their main selling point is that it (fluoride) prevents cavities in children. This is false. Fluorides deteriorate the bony structure of the entire body and make the tooth enamel brittle, thus causing more dental trouble in later years.

FLUORIDATED TOOTH PASTE DANGEROUS

TV commercials saying that fluoridated tooth paste has 20 tests proving that said tooth paste prevents cavities, should be investigated. Some dental associations have been "procured" by the fluoride promoters, and they try to get all the dentists under their influence to endorse fluoridation. But those who dare to tell the truth say fluoride is damaging to the teeth and the general health. The membrane of the mouth is very porous and the poison fluoride in the tooth paste enters the blood almost immediately and causes kidney disease and all kinds of diseases of body poisoning. (See the chapter on FLUORIDATION.)

MEDICINE—ON THE WAY OUT

The study of medicine has never been a science. It creates far more illness than healing. Recovery occurs in spite of the drug treatment because of the internal

healing forces within all living organisms which struggle to survive.

Books on the newer knowledge of "nature cure", teaching the underlying fundamentals of health and healing will soon be available to the general public and they will read them and be able to follow the rules and avoid disease. Those who are already ill will be able to "cure" their ailments better than the established medical methods. This will make medicine obsolete—out of date and unpopular.

In closing this chapter I should like to state that all medical men are not guilty of the crimes exposed in this booklet. A few doctors are sincere in their efforts to help their patients. Their weakness is that they are badly trained and dominated by an organization which leads them away from their avowed purpose. There is hope for those who want to learn better ways and help the sick get well. If they don't try to catch up with the modern "health doctors" and "natural methods" of healing, their patients will outstrip them in knowledge and ability and leave them trailing in the dust.

A BETTER CAMPAIGN

The swine flu vaccine campaign was such an obvious fraud, with no epidemic, not even one authentic case of swine flu anywhere in the world, it makes us wonder about the sanity of the promoters. If they really wanted to combat a growing health disaster why don't they work against something that is killing millions, such as SMOKING? Tobacco and its smoke contains over 30 poisons, three of which are cancer causing. Over 300,000 people in the United States alone, die from the effects of poisons in tobacco. The great number of cases of tobacco heart, lung cancer, Burgher's disease (gangrene of the feet caused by smoking), and many other diseases of tobacco poisoning, make smoking the number one killer of today. Smoking kills more in one year than were killed in all our wars from the American Revolution on down to the late Vietnam war, and hardly anyone is trying to stop it. Our government subsidizes the killer tobacco industry because it brings in around \$8 billion in revenue. But the damages and disasters caused by smoking (fires, death, disease, etc.) cost this country over \$24,000,000,000 (billion) every year.

Ford and our government gave \$135 million to support a fake swine flu

epidemic which killed and paralyzed hundreds (maybe thousands if we had the "undoctored" records), so why not bring that money back from the medical swindlers and put it into a campaign to get rid of the real killer of men, women and even children. Many children die of tobacco heart because they have to breathe the poison fumes from their smoking parents; also, they learn to smoke early because they see it all the time and think it is all right because their parents smoke. (Read my book, ANSWERS FOR THE WORRIED SMOKER, which tells how to quit without the "cold turkey" method, which is harmful and not too effective. Write to E. McBean, Box 55278—L.A., Calif. \$5.00, postage and tax paid. Deluxe edition.)

More Swine Flu Boondoggle: Bureau Chief Got Wrong Shot

In its public relations blitz to promote the Swine flu mass vaccination program, the Department of Health, Education and Welfare has been circulating a photograph of Hank Meyer, chief of the Bureau of Biologics, bravely baring his arm to receive a flu shot from Dr. Ted Cooper, assistant secretary for health.

Cooper fires first flu shot against the Swine holocaust, the caption says.

But now with the Swine flu program under widespread attack as a vaccine manufacturers' boondoggle, a piquant fact has emerged: Cooper gave Meyer the wrong shot!

Meyer was photographed receiving one of the two million doses of a vaccine Parke Davis had erroneously created from a 1931 strain grown in pigs. The goof occurred when Parke Davis scientists found in their labs a virus strain marked A-Swine-1976-31. "1976," regrettably, was the pig number. "31" was the year the virus had been isolated. Meyer, trying to defend the two million wrong doses, unwittingly said in a congressional hearing that he had had a good antibody response to his flu injection. If Meyer's body was prepared to fend off any Swine invader — even a 1931 variant — why all this brouhaha about the hundreds of millions of dollars needed to produce a new strain?

**— FEDERAL TIMES
(7/19/76)**

Some people are wondering if Chicago 's famous Mayor Daily also got a wrong dose of the flu and suddenly died, the same as hundreds of others within hours after their flu shots.

If anyone knows for sure if Mayor Daily had a swine flu shot, please write and give me the such as time, place, who gave the shot, etc.

Thank you.

Eleanor McBean, PhD, ND

CHAPTER 2: The Spanish Influenza Epidemic of 1918 was Caused by Vaccinations

As has been stated before, all medical and non-medical authorities on vaccination agree that vaccines are designed to cause a mild case of the diseases they are supposed to prevent. But they also know and admit that there is no way whatsoever to predict whether the case will be mild or severe—even deadly. With this much uncertainty in dealing with the very lives of people, it is very unscientific and extremely dangerous to use such a questionable procedure as vaccination.

Many vaccines also cause other diseases besides the one for which they are given. For instance, smallpox vaccine often causes syphilis, paralysis, leprosy, and cancer. (See the chapters on smallpox and plagues.) Polio shots, diphtheria toxin-antitoxin, typhoid vaccine, as well as measles, tetanus and all other shots often cause various other stages of disease such as post-vaccinal encephalitis (inflammation of the brain,) paralysis, spinal meningitis, blindness, cancer (sometimes within two years), tuberculosis, (two to twenty years after the shot,) arthritis, kidney disease, heart disease (heart failure sometimes within minutes after the shot and sometimes several hours later.) Nerve damage and many other serious conditions also follow the injections.

When several shots are given (different vaccines) within a few days or a few weeks apart, they often trigger intensified cases of all the diseases at once, because the body cannot handle such a large amount of deadly poison being injected directly into the bloodstream. The doctors call it a new disease and proceed to suppress the symptoms. When poison is taken by the mouth, the internal defense system has a chance to quickly eject some of it by vomiting, but when the poisons are shot directly into the body, bypassing all the natural safeguards, these dangerous poisons circulate immediately throughout the entire body in a matter of seconds and keep on circulating until all the cells are poisoned.

I heard that seven men dropped dead in a doctor's office after being vaccinated. This was in an army camp, so I wrote to the Government for verification. They sent me the report of U.S. Secretary of War, Henry L. Stimson. The report not

only verified the report of the seven who dropped dead from the vaccines, but it stated that there had been 63 deaths and 28,585 cases of hepatitis as a direct result of the yellow fever vaccine during only 6 months of the war. That was only one of the 14 to 25 shots given the soldiers. We can imagine the damage that all these shots did to the men. (See the chapter on What Vaccinations Did to Our Soldiers.)

The first World War was of a short duration, so the vaccine makers were unable to use up all their vaccines. As they were (and still are) in business for profit, they decided to sell it to the rest of the population. So they drummed up the largest vaccination campaign in U.S. history. There were no epidemics to justify it so they used other tricks. Their propaganda claimed the soldiers were coming home from foreign countries with all kinds of diseases and that everyone must have all the shots on the market.

The people believed them because, first of all, they wanted to believe their doctors, and second, the returning soldiers certainly had been sick. They didn't know it was from doctor-made vaccine diseases, as the army doctors don't tell them things like that. Many of the returned soldiers were disabled for life by these drug induced diseases. Many were insane from post-vaccinal encephalitis, but the doctors called it shell shock, even though many had never left American soil.

The conglomerate disease brought on by the many poison vaccines baffled the doctors, as they never had a vaccination spree before which used so many different vaccines. The new disease they had created had symptoms of all the diseases they had injected into the man. There was the high fever, extreme weakness, abdominal rash and intestinal disturbance characteristic of typhoid. The diphtheria vaccine caused lung congestion, chills and fever, swollen, sore throat clogged with the false membrane, and the choking suffocation because of difficulty in breathing followed by gasping and death, after which the body turned black from stagnant blood that had been deprived of oxygen in the suffocation stages. In early days they called it Black Death. The other vaccines cause their own reactions—paralysis, brain damage, lockjaw, etc.

When doctors had tried to suppress the symptoms of the typhoid with a stronger vaccine, it caused a worse form of typhoid which they named paratyphoid. But

when they concocted a stronger and more dangerous vaccine to suppress that one, they created an even worse disease which they didn't have a name for. What should they call it? They didn't want to tell the people what it really was—their own Frankenstein monster which they had created with their vaccines and suppressive medicines. They wanted to direct the blame away from themselves, so they called it Spanish Influenza.

It was certainly not of Spanish origin, and the Spanish people resented the implication that the worldwide scourge of that day should be blamed on them. But the name stuck and American medical doctors and vaccine makers were not suspected of the crime of this widespread devastation—the 1918 Flu Epidemic. It is only in recent years that researchers have been digging up the facts and laying the blame where it belongs. Some of the soldiers may have been in Spain before coming home, but their diseases originated in their own home based U.S. Army Camps. Our medical men still use that same dodge. When their own vaccines (required for travel) cause vaccine diseases abroad they use this as grounds for a scare campaign to stampede people into the vaccination centers. Do you remember the Hong Kong Flu and the Asian Flu and the London Flu scares? These were all medically-made epidemics mixed with the usual common colds which people have every year.

Now (1976) we are being worked on again by the *vaccine-epidemic makers* in their effort to force another multi million dollar vaccine sale caper. Their con men have already talked President Ford into handing over \$135 million dollars to start their vaccine racket. Even the insurance companies refused to become involved with such an obviously dangerous and crooked scheme. So, again the medical and drug con men induced the appropriate government officials to guarantee insurance against the, possible billions of dollars in law suits which could be brought against the vaccine promoters if the vaccine campaign is carried out as planned. It's a good thing Ford was voted out of office. It's too bad he wasn't "dumped" before he paid the poison squad the MONEY' to poison the whole population. However, we don't yet know if President Carter will be any better. Will he be held in the grip of the medical and drug dictatorship? Or will he investigate—learn the truth—reverse the decisions and make the vaccine makers return the money taken from the taxpayers under false pretenses?

The statement of the swine flu vaccine promoters to the effect that the vaccine is

harmless, is false, and the statement that it will protect against flu is false. Fifty-six people died after the shots, some within 48 hours. There is confusion and disagreement among the doctors about all aspects of the vaccine, from the safety and effectiveness to the necessity for it, who should have it and who should be warned against it.

Their scare-head campaign cry is that the swine flu is like the 1918 flu which killed 20,000,000 people. They don't have any usable and provable blood samples from the 1918 flu epidemic to prove it. That was 58 years ago, and the doctors were just as confused and inefficient then as now. However, one thing is certain—the 1918 Spanish Influenza was a vaccine-induced disease caused by extreme body poisoning from the conglomeration of many different vaccines. The soldiers at Fort Dix who were said to have had Swine Flu had been injected with a large variety of vaccines like the vaccines which caused the 1918 flu epidemic. The flu epidemic at Fort Dix was in no way related to swine. There were no swine at camp (unless we want to sarcastically call the vaccine promoters who caused the diseases—"swine.")

To add to the confusion, the doctors tell the people that there are a lot of various kinds of flu; the one which the soldiers at Fort Dix had was A-Victoria flu, there are other strains of flu virus, and also, that the swine flu vaccine which so many people have taken already will not protect them against the many other types of flu. This will be used as an "out" in case of law suits later on when more casualties begin to show up. The doctors will say that the vaccine failed because it was the wrong kind of flu for the vaccine. Of course, no one can prove it one way or the other because viruses are illusive, invisible organisms which are unstable and unpredictable. One dictionary definition of virus is "a morbid poison." The vaccines injected into the body are poison and cause the typical poison reactions. Virus (poison) does not fly around and attack people.

Therefore, there will be no swine flu epidemic unless the vaccine promoters make one like they did in the 1918 flu epidemic. It will not kill 20,000,000 people unless the people submit to the disease producing shots. There are also, other causes of disease besides vaccines, such as bad food, which has been devitalized and contaminated with poison preservatives and artificial drug concoctions. There are many more causes of disease but no diseases are contagious(See the chapter on the germ theory).

Vaccine drives come and go as often as the vaccine promoters can cook up the slightest pretense of a reason. Back in 1957 they were trying to stir up a vaccination campaign for what they decided to call Asiatic flu. An editorial in the Herald and Express for August 29, 1957 was captioned, "Fear of Flu Propaganda." Part of the piece is as follows:

"What a tempest in a teapot has been blown up over the probability that this country will experience an epidemic of the Asiatic flu in the fall and winter months ahead.

"Even the United States Department of Health is stooge for the panic—and has issued statements which are frightening the public, rather than reassuring them by pointing out that this epidemic, while widespread, gives no indication of being any more dangerous than our usual flood of influenza-like colds when winter comes on.

"Those who read between the lines even wonder whether the whole thing might not be a bit of super salesmanship on the part of those who are making and selling the vaccines which are being prepared..."

I WAS AN ON-THE-SPOT OBSERVER OF THE 1918 INFLUENZA EPIDEMIC

All the doctors and people who were living at the time of the 1918 Spanish Influenza epidemic say it was the most terrible disease the world has ever had. Strong men, hale and hearty, one day would be dead the next. The disease had the characteristics of the black death added to typhoid, diphtheria, pneumonia, smallpox, paralysis and all the diseases the people had been vaccinated with immediately following World War 1. Practically the entire population had been injected "seeded" with a dozen or more diseases—or toxic serums. When all those doctor-made diseases started breaking out all at once it was tragic.

That pandemic dragged on for two years, kept alive with the addition of more poison drugs administered by the doctors who tried to suppress the symptoms. As far as I could find out, the flu hit only the vaccinated. Those who had refused the shots escaped the flu. My family had refused all the vaccinations so we

remained well all the time. We knew from the health teachings of Graham, Trail, Tilden and others, that people cannot contaminate the body with poisons without causing disease.

When the flu was at its peak, all the stores were closed as well as the schools, businesses—even the hospital, as the doctors and nurses had been vaccinated too and were down with the flu. No one was on the streets. It was like a ghost town. We seemed to be the only family which didn't get the flu; so my parents went from house to house doing what they could to look after the sick, as it was impossible to get a doctor then. If it were possible for germs, bacteria, virus, or bacilli to cause disease, they had plenty of opportunity to attack my parents when they were spending many hours a day in the sick rooms. But they didn't get the flu and they didn't bring any germs home to attack us children and cause anything. None of our family had the flu—not even a sniffle—and it was in the winter with deep snow on the ground.

When I see people cringe when someone near them sneezes or coughs, I wonder how long it will take them to find out that they can't catch it—whatever it is. The only way they can get a disease is to develop it themselves by wrong eating, drinking, smoking or doing some other things which cause internal poisoning and lowered vitality. All diseases are preventable and most of them are curable with the right methods, not known to medical doctors, and not all drugless doctors know them either.

It has been said that the 1918 flu epidemic killed 20,000,000 people throughout the world. But, actually, the doctors killed them with their crude and deadly treatments and drugs. This is a harsh accusation but it is nevertheless true, judging by the success of the drugless doctors in comparison with that of the medical doctors.

While the medical men and medical hospitals were losing 33% of their flu cases, the non-medical hospitals such as BATTLE CREEK, KELLOGG and MACFADDEN'S HEALTH RESTORIUM were getting almost 100% healings with their water cure, baths, enemas, etc., fasting and certain other simple healing methods, followed by carefully worked out diets of natural foods. One health doctor didn't lose a patient in eight years. The very successful health treatment of one of those drugless doctors who didn't lose any patients will be

given in the other part of this book, titled VACCINATION CONDEMNED, to be published a little later.

If the medical doctors had been as advanced as the drugless doctors, there would not have been those 20 million deaths from the medical flu treatment.

There was seven times more disease among the vaccinated soldiers than among the unvaccinated civilians, and the diseases were those they had been vaccinated against. One soldier who had returned from overseas in 1912 told me that the army hospitals were filled with cases of infantile paralysis and he wondered why grown men should have an infant disease. Now, we know that paralysis is a common after effect of vaccine poisoning. Those at home didn't get the paralysis until after the worldwide vaccination campaign in 1918.

CHAPTER 3: Anti-Typhoid Vaccine Causes a Worse Disease Which the Doctors Name Paratyphoid

Our American medical boast has been that anti-typhoid vaccine wiped out typhoid fever in the Army. When this claim was made public, the people in general accepted it without question. But those who were not satisfied without some facts or evidence of truth, decided to look up the Army records of that period, and found that just the opposite was the case.

In comparing records before and after the enforcement of Army vaccination in 1911, we find that the highest typhoid death rate prior to that time was during the Spanish American War in 1898-1899. This infamous war of aggression was fought in the tropics of Cuba where the heat and other unhealthful conditions were conducive to the development of typhoid as well as many other diseases. There was no refrigeration, so the food spoiled, except that which was loaded with poison preservatives including formaldehyde, nitrates, salt, salt-peter, etc. Decomposed protein and other poisons are the cause of ptomaine poisoning and other diseases of intestinal putrefaction, such as typhoid fever, typhus, yellow fever, malaria, cholera, etc. These diseases are not caused by germs, bites of insects, rats or any of the other things which doctors like to blame. There was no sewer system or sanitation measures, and the heavy rains, slime, mud, and noxious fumes in the swamps the soldiers had to wade in day-after-day, were ideal breeding grounds for fever diseases.

The men drank from polluted streams and were fed vermin-infested rancid foods. Therefore it was not surprising that their bodies' internal safeguards were worked to the breaking point in an effort to eliminate all this contamination. So-called disease is nothing but a remedial effort of the body to get rid of poisons, blockages, and conditions which interfere with normal functioning. These healing efforts of the body manifest in such ways as sweating (fever—to force impurities out through the skin, which is one of the channels of elimination), diarrhea (bowel cleansing when a rush job is needed to get rid of drastic poisons), vomiting, coughing and sneezing (to unload toxic waste from stomach, lungs, nose, throat, etc. Lack of appetite suggests to the patient that he refrain

from taking in more food (fasting). Weakness forces the patient to rest. All of these processes are essential to healing.

The stricken soldiers would probably all have recovered if they had avoided doctors and their poison medication and suppressive methods. Unfortunately, they were sent to the army hospitals and drugged to death by the doctors, who know nothing about the true principles of health and natural healing. The doctors, then as well as now, mistake the symptoms for the disease and give drugs to suppress the symptoms instead of letting the internal healing mechanism do its work to bring about normalcy. The doctors think they must do something to bring down the fever and give certain drugs to stop the coughing and other drugs to stop the diarrhea. All these damaging medical methods block the elimination of poison waste, and death or permanent injury is the result.

After the heavy toll of lives, when they learned that all the tricks of medical science (?) had completely failed, the Army was resourceful enough to realize that they would have to give some attention to health measures if they were to survive as a living army. So they set up a rigorous regimen of hygiene, sanitation and improved nutrition. This sensible program reduced the incidence of typhoid to less than 3 cases per 1,000. This marked decline in disease was brought about in less than 10 years, from 1899 to 1908. And this was done without one injection of anti-typhoid vaccine being administered, or any other vaccine.

In contrast to this remarkable record of disease prevention, we find that after vaccination became compulsory in the Army in 1911, not only did typhoid increase rapidly, but all other vaccinal diseases increased at an alarming rate.

I have heard some of the Army personnel argue that vaccination is not compulsory in the American armed services. But I have also talked to G.I.'s who testified that those who refused to line up for the shots were seized by military police and forcibly held while the medics injected the poison serums into them—all fourteen shots. I have also seen the records of several soldiers who were given long prison terms (seven years) at Fort Leavenworth for resisting vaccination. They may have had to fight the M.P.'s to do this, and that went against their records. Other penalties were also imposed on the soldiers, such as demotion and withholding pay, for this rejection of enforced blood poisoning (vaccination), which the military interpreted as "insubordination."

It was during World War I (we entered it in 1917) when vaccination was enforced to the fullest extent, that the death rate from typhoid rose to the highest point in history—even higher than it had been during the pre-sanitation days of the Spanish American War. This 1917-1920 death rate could not be blamed on bad sanitation or spoiled food as was the case in the tropics. The deaths occurred after the shots were given in sanitary American hospitals and well-supervised army camps in France, where sanitation had been practiced for years. There was no typhoid in the camps before vaccination, so it couldn't be blamed on contagion. The only reason for this extremely high death toll was the blood poisoning practice of vaccination.

The report of the Surgeon General of the U.S. Army shows that during 1917 there were admitted into the Army hospitals 19,608 men suffering from anti-typhoid inoculation and vaccinia. The report for 1919 covering 1918 shows the total admissions suffering from anti-typhoid vaccinations to be 23,191, and 10,830 suffering from vaccinia. (24,021 in all, from vaccine poisoning). This takes no account of those whose vaccine diseases were attributed to something else, nor of those whose sufferings, though great, were not great enough to cause them to be sent to the hospital (from VACCINE AND SERUM EVILS by Dr. H. M. Shelton).

This official Army report didn't speculate as to whether or not the diseases could have been caused by germs, viruses, contagion or other things that usually get blamed for disease; the doctors knew without any question of a doubt that all these thousands of cases of disease and death were caused by vaccination, and it was so stated in their medical reports. I doubt, however, that the grieving parents were told that their sons were killed by the poison doses administered by the doctors.

Knowing the devastation caused by vaccination, we wonder why they didn't stop the deadly practice way back in 1916 when they found out—for sure—that vaccination was a killer with no redeeming feature. But they didn't. The reasons are given in another chapter, "The Money Motive."

Under the most antiseptic conditions in hospitals all over the world, diseases develop, such as typhoid, polio, pneumonia, virus X, paratyphoid, flu, etc., when

there is no other case in town for the victim to "catch it from." The patients have already received shots to "protect" them from the diseases. Doctors cannot blame it on invading viruses, germs or bacteria, because their germicides and antiseptic precautions in hospitals have been used to kill the germs. Why cannot the doctors understand what many other people already know, that it is not germs and viruses which cause the diseases, but the body poisoning from medication, vaccines, processed foods, etc., which cause the sickness?

When Walter D. McCaw, Chief of Army Medical Staff, saw the shocking increase of typhoid among his well vaccinated "protected" (?) troops, he tried to lay the blame on laxity in sanitary precautions, such as unsterile needles, etc. He should have known that nothing on the needle could ever do as much harm as the poison vaccines inside the needle. Their reliance upon vaccination gave them a false sense of security which blocked any effort toward looking in the right direction for the real causes of the disease.

McCaw said that "75% of the men in the Chateau Thierry offensive (France) were afflicted with typhoid," and that at one time in the Argonne sector "there were more than 300 cases of typhoid." He referred to "a unit of 248 men from Camp Cody, New Mexico, which arrived in England in July, 1918 with 98 cases of typhoid, of whom 8 died." He spoke of another contingent which lost 10% of their typhoid cases. All these men had been vaccinated in the Army, and all had been healthy when inducted.

Sir William Osler, the famous British physician wrote an article in the "Lancet" (renowned British medical journal) on this subject. (Nov. 28, 1914) An excerpt is as follows:

"Perhaps the best chapter in British sanitation is that which deals with sanitation and typhoid fever...It has been well said that enteric fever is the sanitary index of a country; and that today our camps are not hotbeds of the disease is a result of more than half a century of intelligent and efficient sanitation."

We notice that he did not say that it was vaccination which wiped out typhoid and other diseases of intestinal putrefaction such as typhoid (enteric fever). He knew for a fact that it was not vaccination that brought about the improvement; it was the reforms in sanitation and better nutrition and other healthful measures

which prevent body poisoning in the first place. It is the poisoning that causes disease.

England had learned by the bitter experience of over century of vaccination, that it does not prevent nor cure disease of any kind. They knew that if they were to control widespread disease they must attack the real causes, the main ones of which were vaccines and bad living conditions. After these reforms were made there was a rapid decline in the disease rate. (Details given in a later chapter.)

England already knew this when our men were suffering and dying in the swamps of the tropics and the battlefields of France. But I'm quite sure our needle doctors would not listen to any warnings of vaccine hazards from the British—at that time. However, as stated previously, our military doctors finally did turn to sanitation and nutrition reforms and reduced their disease rate without the vaccinations, in the Spanish American War.

According to British Army records, "In 1938 there was not a single case of any form of enteric fever (typhoid) among the unvaccinated soldiers, while in the vaccinated 'protected' class there were 37 cases and 5 deaths." Compulsory vaccination has been abolished in the British Army. However, it is available for those who want it, and a few unenlightened people still want it, in spite of all the evidence against it.

Another news item says: "Hundreds of inoculated soldiers in India have contracted typhoid or paratyphoid and the Army Medical Department reports record at least 200 deaths among inoculated men."

"THE JOURNAL OF THE AMERICAN MEDICAL ASSOCIATION," July 28, 1917 (Vol. 69, p. 267) under the heading "Vaccination in War," states:

"Bernard and Peref, in an analytic study, reported in 1915 a great preponderance of paratyphoid infection in the anti-typhoid vaccinated over those in the non-vaccinated, presenting the remarkable figures shown in Table 2.

"Table 2: Preponderance of Paratyphoid Infections over Typhoid			
	Cases	Vaccinated	Non-Vaccinated
Typhoid (Eberth Bacifius)	77	45	32
Paratyphoid	248	222	26

"Table 3: "

Paratyphoid	150	120	40
--------------------	-----	-----	----

According to General Goodwin, the British Army had 7,423 cases of typhoid, with 266 deaths, up to 1918. Compulsory vaccination was in force in the British Army at that time.

In the book MEDICAL VOODOO by A.R. Hale, the author states on page 185: "In World War I, in the French Army alone, there were 113,165 cases of typhoid with 12,380 deaths up to Oct. 1916. Anti-typhoid inoculations were made compulsory in the French Army in March, 1918."

A.R. Hale, researcher for the U.S. Congress, said:

From one Congressman I learned that he was at the very moment pleading the cause of three ex-service men before the Veterans' Bureau, two of whom had been made totally blind by army vaccinations against smallpox, and the third had been driven insane by an anti-typhoid vaccination followed by a spinal puncture. He said the Bureau was fighting the compensation claims of these disabled men, because it was unwilling to admit their disabilities were caused by the army-camp treatments, although the evidence in all three cases was clear and inescapable."

TYPHOID IS NOT CONTAGIOUS

One of the outstanding authorities on the real cause and cure of disease is the late Dr. Russell T. Trall (a reformed M.D.) whose teachings are still 100 years in advance of our present day medical methods. Regarding typhoid fever, Dr. Trall wrote:

"Typhoid fever is not essentially a dangerous disease. It may be severe—without being at all dangerous. Nor is pneumonia a dangerous disease. Left to itself, it would seldom terminate fatally. We have known physicians of extensive practice treat this disease for many years without losing a patient. But in those cases very little medicine was given, and that of the simplest kind. The medicines were not (the usual poisons such as calomel, whiskey, opium, antimony, blisters (perhaps this means mustard plasters)).

"These diseases (typhoid and pneumonia) are nothing more nor less than a cleansing process—a struggle of the vital powers to relieve the system of its accumulated impurities. The causes of the diseases are constipating foods, contaminated water, atmospheric miasmas, and whatever clogs up the system or befouls the blood. And the day is not far distant when a physician who shall undertake to aid and assist (suppress) Nature in her efforts to expel impurities, by the administration of poisons (drugs, medicines, shots, radiation, etc.) will be regarded as an insane idiot. But now this practice is called medical science."

Dr. John Tilden, another reformed physician, said, "You cannot have a very severe round of typhoid fever unless you have a "first class" physician to give it strength to down you."

THE SOLDIERS WERE KILLED BY THE TREATMENT

It was a common expression during the war that "more soldiers were killed by vaccine shots than by shots from enemy guns." The vaccines, in addition to the poison drugs given in the hospitals, made healing impossible in too many cases. If the men had not been young and healthy to begin with, they would all have succumbed to the mass poisoning in the Army.

The following are just a few of the case histories which show us how the soldiers were drugged to death in the military hospitals (from BASIC PRINCIPLES OF

NATURAL HYGIENE by Dr. H.M. Shelton, p. 532:

"CASE No. 4—S.P., a private, age 32. Admitted January 16th. Medication: Quinine and whiskey with capsicum were administered in 'free doses.' Brandy and turpentine given in enema. The next day the patient was worse (not surprising.) But the treatment was continued; sinapisms (mustard plasters) were applied to the back of the neck, chest, abdomen and calves of the legs. In the evening he was growing worse. "But the same treatment was continued until he died on January 18th, at 7:00A.M." (two days after treatment began.)

"CASE No. 7—O.W.W., a private, age 22, was admitted into the hospital Monday the 13th. He was taken sick two days previously. Treatment : Wine once every two hours, quinine every three hours, 15 grains of calomel to be followed in three hours with 6 grains of carbonate of ammonia. All symptoms became rapidly aggravated. The patient died on the 22nd." He was younger and survived the poisoning program for nine days before he died.

"CASE No. 8—D.N., a private, 18 years of age. His treatment included spirits of nitre, acetate of ammonia, camphor, castor oil, chloroform, spirits of turpentine, sulphuric acid, sugar of lead, opium, ipecac and white wine. He died after 29 days."

Although he was young and strong to start with, even he could not survive this onslaught of poisons, experimentation and malpractice by the physicians. The report states that the condition of the patients got progressively worse every day, but the treatments were continued anyway. We wonder what was the matter with the doctors.

Dr. Trall said that most patients would recover if they were not doctored at all. He Stated: "I have not lost a case in 15 years (including typhoid and pneumonia), and I have treated hundreds. Fatality is attributable to the medication."

"TYPHOID MARY" WAS NEVER A CARRIER

Because the average doctor does not understand the cause nor the cure of disease, he flounders around in a confusion of guesswork. Lacking facts, the various medical associations and medical schools base their beliefs on many false concepts with no basis in fact. The germ theory of disease is a graphic

example. These dangerous concepts lead the doctors and the people astray—that is, all but the few who think for themselves and seek out proof for their beliefs.

It is bad enough for the doctors to blame the diseases on germs, viruses and bacteria, but when they pick on healthy people who do not "catch diseases" when they are exposed, and claim they are "carriers" and can infect others, this is the height of the ridiculous. See the chapter titled, Why Germs Cannot Cause Disease.

As disease is just a transition period from a contaminated body to a normal, healthy body, it stands to reason that no one can "catch" a disease any more than he can catch a dirty neck. Therefore, if a person is in the company of an ill person and does or does not get the same disease, it does not make him a "carrier" of that disease. Yet some of our medical men promote that theory. On the strength of this unsupported, unproved medical opinion of physicians and Health Departments, people have actually been sent to prison, merely because they were too healthy to get sick when the doctors thought they ought to.

Who has not heard of the sad case of "Typhoid Mary?" A fascinating book titled MEDICAL VOODOO, by Annie Riley Hale tells the story on page 337. The account reads: "Mary, a maidservant of the better class in New York City, in the summer of 1907 was working where several cases of typhoid developed. Because Mary did not fall ill with the fever, though in contact with the patients, the only explanation that 'medical science' could offer for such a phenomenon, was that the woman was a 'typhoid carrier.' There was absolutely no evidence or proof of it except the health officer's wild guess. Much contrary evidence was offered by Mary and her friends, but she was arrested, charged with 'a menace to the public health,' branded 'Typhoid Mary' in the newspapers, and imprisoned in the isolation hospital on North Brothers Island." She remained there for 30 years in solitary confinement until she died. She had committed no crime. She was a victim of medical stupidity and ignorance. The whole medical case rested on the fact that she was healthy and didn't get the diseases which several others had developed.

In the same affluent household where Mary worked, there were, undoubtedly, other members of the family who did not develop the disease, but of course, they were not sentenced to life imprisonment for being healthy. There are no

"Typhoid Rockefellers" nor "Diphtheria Morgans", are there? Neither are there any "typhoid carriers" anywhere in the world, except in the weird imaginations of certain backward doctors.

When we think of all the millions of mothers who care for their children who develop all kinds of diseases, and the mothers do not "catch it", it is a frightening thought to consider that some doctors could haul them off to prison for life because they managed to stay well in the presence of illness.

In the Middle Ages, before Pasteur conjured up his fallacious germ theory, there were some equally strange and dangerous theories of disease. One of them was the belief that diseases were caused by devils, that somehow got inside the body of the patient and caused the illness: The doctors then bored a hole in the head of the sick person to let the evil spirit out. If the patient died of the operation, which I suppose was usually the case, the doctors would naturally claim that the patient came too late and the devil did it. This is not to infer that evil spirits cannot possess a susceptible person; maybe they can, (The Bible says so) but if they got in they can get out the same way they got in, without the dangerous—often fatal—practice of boring a hole in the patient's skull.

As we look back on these crude and barbaric medical procedures, we hope we have advanced beyond that stage of primitive medical practice; but, have we? The "Typhoid Mary" case was of recent times. She died only a few years ago in prison. But our present day medical men have not advanced out of the Dark Ages yet; they still chase down healthy, innocent people who do not develop typhoid after being near typhoid cases. These cases are even now, branded as "carriers" and hounded by medical men driven by medical ignorance. This is borne out by no less a medical authority than Roy O. Gilbert, M.D. (L.A County Health Officer.) In the Los Angeles News Herald, 1954, Dr. Gilbert wrote an article titled "Spread of Typhoid Stopped by Apprehension of Carrier." In this article he states:

"Typhoid carriers are individuals who act as symptom free portable reservoirs for the germs of the disease and many of them are unaware that they may transmit the infection...Whether the disease is mild or otherwise, it is estimated that between three and 4% of the individuals who have had it become carriers. About one fifth of all carriers have never had the disease in a recognizable form.

"All known carriers are kept under strict surveillance by the Public Health Officials and are visited at least twice yearly. Annual booster shots are given as an additional precaution."

Dr. Gilbert also states: "Typhoid fever, among the last of the pestilential fevers modern science learned to prevent and keep under control in the Western World is caused by a bacillus called Salmonella-typhosa. The ways in which it may be transmitted are understood and its control readily possible. Nevertheless, an average of 26 cases has been reported in Los Angeles County for the last five-year period."

If medical science (or confusion) knows how to control the disease, why do we have it every year? On checking the news items on Typhoid outbreaks over the past years, we find that the cases are among the guests of a wedding party, a camp meeting, a picnic, or some other gathering where food was served without refrigeration and sanitary supervision. Foods containing milk, meat and eggs are highly putrefactive out of refrigeration, and can generate toxins which cause vomiting, fever, intestinal disturbance and other symptoms of food poisoning, Whether or not the doctors find typhoid bacilli in the patients does not prove a thing, because all kinds of germs are found in sick people. The germs do not cause the disease; they evolve out of the dying cells and do a useful, remedial work.

The doctors have not been able to control the diseases because they are forever looking in the wrong direction for the causes. The cause is usually some form of body poisoning.

They give their so-called carriers a shot of poison vaccine every year, thus weakening their natural powers of defense against invasion of poisons. Vaccines always contaminate the body and weaken the whole physical organism and make one more susceptible to disease. This was proved by the high death rate and disease rate among the 100% vaccinated soldiers in all our wars from 1917 up to the present time. See chapter on "What vaccination did to our soldiers."

CHAPTER 4: Medically Made Epidemics— Court Cases

Drug sales are big business, whether it is marijuana, heroin, tobacco, vaccines, or the misnamed "miracle" drugs, antibiotics, etc. They all cause cell destruction and eventual death—delayed reaction in most cases—although some deaths are sudden, as in penicillin and vaccines which often cause death within 20 minutes.

Vaccine campaigns have been carried on periodically for many years, and it is one of the most lucrative of drug sales, and not illegal such as for heroin and marijuana. The sales propaganda is so deceptive that most of the people believe it, and the medical and drug businesses have enough control over the news media to conceal or distort the reports of deaths and disasters from vaccines to keep the people in the dark as to the hazards of their popularized poisons. The Better Business Bureau is better for business but not for the people. That agency is instructed (by the medical and drug concerns) to forbid the newspapers from selling any advertising space to writers of anti-medical books and articles. I wouldn't make this statement unless I had proof and legal papers to back it. (This is discussed in more detail in another chapter.) It is a form of medical dictatorship—and that is against the law.

Most of the medically-made epidemics get by without being exposed and prosecuted, but a few occurred in cities which had some alert and concerned health groups which took the vaccine promoters to court and got convictions. Two of these court cases are briefly outlined below:

COURT CASES OF SMALLPOX EPIDEMICS DECLARED WHEN THERE WAS NO SMALLPOX

(Report from THE ADVERTISER'S PROTECTIVE BUREAU of Kansas City). In the fall of 1921 the health of the city was unusually good, but dull for the doctors. So the Jackson Medical Society met and resolved to make an epidemic in the city. According to the record:

"MOTION WAS MADE AND SECONDED THAT A RECOMMENDATION BE MADE BY THE COMMITTEE TO THE BOARD OF HEALTH THAT AN

EPIDEMIC OF SMALLPOX BE DECLARED TO EXIST IN THE CITY AT THE PRESENT TIME.

"MOVED AND SECONDED THAT A DAY BE SET ASIDE TO BE TERMED VACCINATION DAY, ON WHICH PHYSICIANS WILL BE STATIONED AT ALL SCHOOLS, CLINICS, PUBLIC BUILDINGS AND HOSPITALS...TO VACCINATE, FREE OF CHARGE. (No shots are free. The taxpayers are charged for them.)

"It is further recommended that wide publicity be given, stating that vaccination is a preventative of smallpox and urging the absolute necessity of vaccination for every man, woman and child in the city. Those who investigated this fake, doctor-made epidemic searched for cases of smallpox to justify this vaccination drive, but could not find one case in the city.

"The scare-head vaccination propaganda showed a picture of a child covered with sores (probably from impetigo, psoriasis or congenital syphilis), and called it smallpox. People are easily frightened when public officials tell them a disease is contagious and is in their midst. The fear vanishes when people learn the truth. Smallpox is not contagious, and compulsory vaccination is illegal. (See the chapter on smallpox for information on tests which proved smallpox and other diseases are not contagious, and can be avoided with the right knowledge and application of that knowledge, given in the big book, "VACCINATION CONDEMNED BY COMPETENT DOCTORS."

Most people do not question the decision of their doctors and public officials so they trustingly put their lives and the lives of their children into the hands of the unprincipled drug vendors. The results were disastrous for the people but good for the doctors. The hospitals were soon filled with vaccine poisoned people and the doctors had business all winter.

According to the record, the doctors made \$500,000 from that Kansas City vaccination spree, not counting the millions of dollars from the hospital cases.

ANOTHER MEDICALLY-MADE EPIDEMIC IN PITTSBURGH IN 1924

The same procedure was carried out as for Kansas. The doctors called a meeting

and moved and seconded that an epidemic be declared in the city. As usual, they spread their scare propaganda far-and-wide and herded the people into the vaccination centers.

When the vaccination campaign was at its height, the report showed the death rate rose 22% in three months, from July 1 to Sept. 30. These deaths were all among the recently vaccinated. Were the doctors and pharmaceutical companies charged with murder and given the death sentence? No. They "got by with murder;" they usually do.

This doctor-made epidemic never would have been brought to public attention if it had not been for an active, and well informed group of non-medical, health-minded citizens known as THE PITTSBURGH HEALTH CLUB. They, and their legal aid investigated this manufactured epidemic and brought the instigators to trial.

According to the Health Club's attorney:

"THE DIRECT MONEY LOSS TO THE CITY OF PITTSBURGH IN THIS VACCINATION RAID in 1924 was \$3,096,616 of which the doctors took \$2,000,000.

"This does not represent the indirect losses such as deaths, permanent injury, business loss from work, etc."

Every city and town today should have an active, capable, and well prepared NON-MEDICAL health group such as those in Pittsburgh and Kansas City to warn the people against the many questionable practices of the medical doctors, because they continue to stage deadly vaccination campaigns, both large and small in all cities across the country every year, but most of them are not investigated or questioned.

We are in the middle of one of these medically-made epidemics right now. It is the SWINE FLU VACCINE epidemic. There was not a certified case of swine flu in the world when they planned it in 1976, but this multimillion dollar vaccine campaign was foisted on the people anyway, and now three months after it started there are 113 reported deaths and many more cases of paralysis from the shots. All these "murders" forced the public officials to halt the vaccinations.

However, the doctors and vaccine makers have stated in the papers that they will try to lift the ban and continue the vaccinations—poisoning and killing more people and refusing to take the blame, because it is profitable.

That is why this book has been rushed into production—unfinished—to warn the people and prevent more disasters from the vaccines. The chapter on swine flu and a few others are included in this advance edition, and the rest will be available later, for those who send for them.

POLIO VACCINE EXPOSE' BLOCKED BY AMA

After reading of the above court cases in Pittsburgh and Kansas City people may say, "That happened way back in 1921 and 1924; that couldn't apply to us now in 1977." Oh, yes it can; it's being done right now again with the swine flu racket. They—the vaccine promoters—should be investigated, prosecuted and stopped permanently.

In 1954 when the vaccine promoters were building up their nationwide polio vaccine campaign, I wrote a book of facts trying to warn the people against the Salk, Sabin, and Cutter vaccines which were bound to cause widespread death, paralysis and financial loss to the taxpayers. The Better Business Bureau—arm of the medical and drug trusts—blocked me from getting any advertising notices in the papers, radio, TV, etc. But I got some of the books out to as many people as I could anyway. But the "medical dictatorship" decided they were not going to let me tell any more people about things they had kept suppressed, including the court cases. You didn't read of those investigated and prosecuted medical rackets in the papers did you? I had to "dig" for that information. In order to stop my book and put it out of circulation, they had it barred from the mails—without any legal grounds. I had taken it (the manuscript before printing) to a lawyer and had him examine it to see if it was legal. He said, "It is all in order—nothing against the law—but it is dynamite."

I then took it to the Post Office in Los Angeles and had them go over it to see if anything was against their regulations. They said, "It is all in order and not against our rules, not libellous, not obscene, not anti-American, not fraudulent."

So, I had it printed and distributed until the medical "dictatorship" issued orders to the Post Office to bar the book from the mails. This they did, although they had told me it was all in order and legal for the mails.

It's hard to believe that one branch of the business (medical) in this country is so powerful that they can force the Post Office to break the law and bar a book they have approved—a book which is designed to save lives.

In the hearing, the opposition said they barred my book from the mails because it disagreed with accepted medical opinion.

It seems I was the only one with a "fighting book" out to condemn the polio vaccinations, so when it was eliminated and I was threatened if I sold it, distributed it, or even gave it away, the medical poisoners had a clear field to sell their poison vaccines without hindrance. So they continued selling polio vaccine and are still at it, even though it has killed and paralyzed thousands. Many law suits were filed against the vaccine makers and won, and they, the vaccine promoters, had to pay millions of dollars in damages, but they make more in sales than they have to pay out in damage suits so they consider it a good business venture anyway. (See the chapter on POLIO).

This is the reason why people rarely hear anything against vaccination: those who raise a voice against it are silenced.

CHAPTER 5: Falsified Death Certificates and Medical Records

Vaccination, which is entirely lacking in value to the human race, has been sustained by falsity. Records of the enormous number of deaths from vaccination have either been completely concealed or twisted to appear favorable to the people. The medical records, unfortunately, have been in the hands of the doctors who profit from the sale of vaccines and drugs and who, (by their own admission,) are more interested in their own financial gains than in the well being of the public.

Lawsuits and government investigations have been made from time to time, which brought some of the medical confessions into public view, just enough to show us that there is a great deal yet to be uncovered in this sordid game of murder for money. Dr. Henry May, a medical officer of health, wrote in the Birmingham Medical Review (Vol. 3. pp. 34 & 35,) the following statement which was obviously intended for doctors only:

"In death certificates given by us voluntarily, and to which the public have access, it is scarcely to be expected that a medical man will give opinions which may tell against or reflect upon himself in anyway....In such cases he will most likely tell the truth, but not the whole truth, and assign some prominent symptom of disease as the cause of death. As instances of cases which may tell against the medical man himself, I will mention erysipelas from vaccination, and puerperal fever. A death from the first cause (vaccination) occurred not long ago in my practice, and although I had not vaccinated the child, yet, in my desire to preserve vaccination from reproach, I omitted all mention of it from my certificate of death."

As Dr. May was one of the medical heads, he set the pattern for other doctors to follow. If their bungling practices and poisons were deadly enough to kill the patients, it was made clear to them that they must not tell the truth on the death certificates. A number of convenient names of other diseases were suggested by Dr. May to cover their guilt. Dr. Maclean stated that "very few deaths from cowpox (vaccination) appear in the Bills of Mortality, (death records,) owing to the means which have been used to suppress a knowledge of them...not because

they did not happen, but because some practitioners were interested in not seeing them, and others who did see them were afraid of announcing what they knew."

In the report of the Royal Commission (England) Vol. IV, pages 194 to 478, we find a number of cases of vaccinal deaths that were not reported as such. For example: Mr. Payne gave evidence that he had a child who died of vaccination. The doctor told him that he had not the slightest doubt that the illness was the result of vaccination, but that he dared not put it on the certificate of death.

In the same section we read: "Local Government Board inquiry into six deaths at Misterton, Lincolnshire, found all to have resulted from vaccination; and in all the cases, vaccination was not mentioned on the certificate of death. Local Government Board inquiry into four deaths from vaccination at Norwich, found that in three of these cases vaccination was not mentioned."

Although these few findings are from England, England is by no means the only country to conceal and falsify death certificates. The same type of lawlessness exists in all countries that use vaccination as a source of revenue for the doctors, the government or the serum factories, or all three. The United States is one of the worst offenders in this respect. For instance:

Dr. R.A. Gunn, surgeon and medical editor, had the courage to uncover and expose some of the underhanded practices of the Board of Health in New York. Among other things he stated:

"I personally investigated over 70 cases of smallpox in this city, that had been reported by the Board of Health as unvaccinated, and found 64 of the number had been vaccinated, and many of them revaccinated."

"I challenge the health officials of New York and Brooklyn, to publish a full list of smallpox cases with addresses. and I will undertake to prove that 80% of them have been vaccinated."

The city officials and the Board of Health refused to supply the names. Many requests for an investigation have been made, but these tax supported servants of the people dodge the issue from year to year, not only in New York, but in all American cities, thus suppressing critical information on life and death issues

that the people have a right to know.

HONEST MEDICAL REPORTS REJECTED

"Charles W. Smith, of Woodbine St., Brooklyn, N.Y. died from the results of vaccination. Dr. Costello, who attended him, gave the cause as vaccination followed by acute rheumatism, and secondary cause hemorrhages."

The City Health Commissioner (strong arm of the medical trust) said he would not let that certificate pass. Dr. Costello, who knew the patient died of vaccination, refused to change the certificate to suit the commissioner. The commissioner then dismissed Dr. Costello and called in another physician, Dr. E.H. Wilson, who knew nothing about the case, and had him assign the cause of death as nephritis (degeneration of the kidneys.) The story of the case in the New York Times was headed: "Death of Charles W. Smith not due to Vaccination."

James Connor, age seven, of Evanston, Illinois, died three minutes after being given anti-scarlet fever serum. The doctor who killed the boy told the coroner's jury that the serum couldn't possibly have killed him. Therefore the jury officially decided the boy had died of shock What shocked him—deadly poison injection?

A DOCTOR'S ANSWER TO A SERUM DEATH

Dr. John Tilden in his Health Review (p. 570) wrote: "John Begasiren, a child of four years, helpless and taken by his father to the Bellview hospital for treatment for infantile paralysis, is dead. Unofficially his death is recorded as due to a 'serum accident.'"

"The staff physician at the institution passed off the tragedy casually saying, 'It wasn't the serum that killed the boy; it was the child's susceptibility that made him unable to stand the shock of the poison virus that was injected into his veins.'

"Digest this gem of logic, if you can. Tap yourself over the head with a hammer; and if it hurts, blame your head for not being more resistant to shock. The blow

with the hammer could not possibly be to blame—now could it? Just ask your doctor."

In the May 1931 issue of Health Review (p. 257) Dr. Tilden again comments on vaccination by saying: "The vaccine and serum business insinuates a little poison in the body. If the victim is not too vulnerable from other poisoning and infection, the effects may pass and not show up for several years. But should the victim be unduly susceptible, the vaccine may precipitate a case of tuberculosis, rheumatism, heart trouble or some other type of symptom complex which may end life prematurely."

Willit Nagengast developed lockjaw soon after vaccination with the so-called, pure glycerinated calf lymph, but the Cleveland Leader reported the case as "Not due to Vaccination."

Julia Burggruff of New York (address withheld by request) died as a result of vaccination, but the New York World reported the cause as lockjaw. Lockjaw is a common after effect of vaccination.

HEALTH BOARDS ACCUSED

Thomas Morgan, in his MEDICAL DELUSIONS, page 54, comments on this situation by saying:

"These conditions exist more or less all over the country, and the so-called boards of health are in reality boards for propagating disease, mutilating human bodies, and destroying human life. They stand accused by medical men in the very highest ranks of the profession. Thousands of instances might be given of willful and deliberate lying in compiling statistics to favor vaccination and thereby save it from its deserved reproach."

RELUCTANT ADMISSION BY DOCTOR

Dr. Lund admits: "As I myself contracted smallpox after being vaccinated three times, I took the trouble to go into all statistics, which I found very few medical men have. Against vaccination there is, of course, to be weighed the fact that it occasionally causes death."

This death element in regard to vaccination is glossed over, slighted or lied about all through medical literature. In VACCINATION AND THE MEDICAL PROFESSION (p.35,) W.L. Furnival asked Dr. Lund these pointed questions:

Why do medical men use such extraordinary endeavors to keep the word vaccination off their death certificates? And why has the column of 'Other Effects of Vaccination' been deleted from the Registrar General's Returns? Is there any other word in the English language they are so feverishly concerned about on such occasions?" The questions remained unanswered.

There were 923 medically reported deaths due to vaccination in a period of only 19 years, and yet Dr. Lund said "vaccination occasionally causes death."

Alfred Milns, statistician, stated that if the officially admitted deaths were multiplied by 12, it would come much nearer representing the actual number of deaths resulting from vaccination. If we multiplied the above 923 official vaccinal deaths by 12 we would see that there were 11,176 deaths from vaccination which is considerably more than the smallpox deaths.

"Dr. Charles Fox, of Cardiff, published 56 personally investigated cases of vaccinal casualties with 17 deaths, and in only two of these, where he himself gave the certificate, was vaccination mentioned." From the Royal Commission Report we read:

"Dr. Buchanan reported six deaths from smallpox, stating them to be unvaccinated. An inquiry was organized, under the orders of the Local Government Board and it was found that all had been vaccinated but one. One of the death cases had been vaccinated by Dr. Buchanan himself. Dr. Buchanan acknowledged his error and said that the cases were of confluent smallpox (so bad that the vesicles were run together) and he couldn't see the vaccination marks." (Report of the Royal Commission, England, Vol. II, p.219.)

Professor Alfred Russel Wallace, after doing some extensive research on vaccination, gave a list of 785 deaths traceable to vaccination, yet which were officially reported as deaths from erysipelas. He states:

"I am acquainted with a physician in a northern town, one who holds a government position. I have a letter from him in which he says, 'while in practice in London I frequently filled out death certificates of children naming the disease as marasmus (wasting away,) debility, etc., when I felt perfectly certain that such cases of wasting and debility had been induced by vaccination.'

DOCTORS ORDERED TO FALSIFY SMALLPOX RECORDS

The following notarized, eyewitnessed accounts of deliberate falsification and misuse of the law give us an idea of the corruption that exists in this country which allows an unscrupulous medical dictatorship to wield power over the people. The following statements are from the private files of V.E. Rowton, Investigator:

Denver, Colorado
January 4, 1923

To whom it may concern:

This is to certify that the undersigned was at one time a patient at the Sand Creek Hospital for smallpox under the regime of Dr. Sharpley.

That while there I was present at the questioning of a group of smallpox patients who had just arrived and that I saw the answers made by said patients, written down, by the Superintendent in charge, upon the blanks provided for this purpose.

That two of the five patients answered "yes" to the question whether they had been successfully vaccinated within the preceding three years.

That I saw the Superintendent write down the word "no" instead of "yes" that the patient answered to this question.

That afterwards, immediately I called the attention of the Superintendent to this mistake.

That the Superintendent told me that he had done this deliberately and that he

had orders to write "no" in this space regardless of what answer the patient made to the question and that such orders came from the office of the City Physician.

Signed—Ernest B. Safford

NOTARIZED STATEMENT:

Denver, Colorado

March 14, 1923

I the undersigned, Alice G. Vincent, being duly sworn on oath to make this statement:

In December, 1921, I went to the office of Dr. Sharpley and asked to see the records of the smallpox deaths (which should be open to the public) and he refused to allow me to see them. I went to the Mayor's office, and the Mayor's secretary asked if Dr. Sharpley had refused me and I said he had. Then she said I could not see them, that Dr. Sharpley was supreme. I went to the City Attorney's office and asked him by what authority Dr. Sharpley refused to show me the records. I was told that they did not know, but if he had refused I would have to bring suit in order to see them, and if I did it would be the business of the City Attorney to defend Dr. Sharpley.

Signed—Alice G. Vincent

Subscribed and sworn to before me this

14th day of March, A.D. 1923

Signed—Jean Raber

Notary Public

Not only are doctors given verbal instructions to disregard the truth, but the written instructions in medical journals and texts also make it clear that lies are preferred and expected in order to protect the financial "racket" of vaccination. For instance, an article titled "Smallpox—Its Differential Diagnosis," by Archibald L. Hoyne, M.D., which was read before the Chicago Medical Society and published in the Illinois Medical Journal, June 1923, states:

"In examining a case of suspected smallpox, close observation is of the utmost importance. If the patient shows evidence of a typical vaccination scar of comparatively recent date, variola (smallpox) may be almost absolutely ruled

out."

From the Journal of the Michigan State Medical Society (March, 1927) we read: "The following points are important aids in the diagnosis of smallpox. The absence of any history of having had smallpox or a successful vaccination within the past five years."

Even in "Modern Medicine" by the famous Dr. William Osler (Vol. 1, p.853) instructions are given the physicians to report cases of smallpox as chickenpox if there is a vaccination mark. The first differential point in the diagnosis of chickenpox and smallpox is pointed out as "the vaccinal condition of the patient."

It does not matter how serious and certain the smallpox may be, the vaccinated cases are diagnosed as chickenpox, syphilis or something else, and when the records are compiled, the Health (?) Departments announce to the people that there is no smallpox among the persons successfully vaccinated.

CAN MEDICAL STATISTICS BE RELIED ON?

W.R. Hadwen, M.D., one of the most prominent vaccination authorities in England, was asked the following question in a public lecture:

"Can you give the death rate of smallpox under ten years of age, in the recent London outbreak of smallpox, differentiating between the vaccinated and the unvaccinated?"

To this he answered: "Unfortunately, the authorities won't give us the particulars. We have sent for them three times. We have quoted the act of 1898, which states that every Sanitary Authority shall supply the names and addresses of those who are attacked by smallpox, on payment of a certain fee. We have offered them the fee but they have refused to supply the names...They won't allow us to test their figures; they apparently are afraid we might trace them down and learn the truth. Moreover, the Medical Officer said in writing to our secretary that his figures were not the same as those of the registrar, they don't tally. And the consequence is that we are not even to take what the registrar says for granted. He says: 'I don't fill in my statistics until the cases are complete.'

"When we consider the cases, as at Middlesborough (where, after a canvas of smallpox deaths, we found that out of something like 200 so-called 'unvaccinated' cases, 98 of them had been vaccinated and revaccinated, and some had been revaccinated three or four times, and they died of smallpox, it will give us an idea how much official statistics are to be relied upon. In the same town, the Medical Officer tabulated his cases of children under ten years in much the same style as the authorities of the Metropolitan Asylums Board are doing now, as follows:

THE MEDICALLY MANIPULATED FIGURES

- Vaccinated cases: 45. Deaths: 0
- Unvaccinated cases: 62. Deaths: 29
- Unvaccinated fatality 47%

"When the names and addresses of these patients were obtained from the Town Council and a careful, independent investigation was made, this is how the facts turned out:

- Vaccinated cases: 61. Deaths:16
- Unvaccinated cases: 46. Deaths: 13
- Fatality 28%

"In the epidemic of 1870-72 the Metropolitan Asylum Board records 195 cases of smallpox in vaccinated children under five years of age, with 38 deaths; a fatality of 19.5% and 786 cases from five to ten years with 60 deaths, a fatality of 6.6%. This shows that the nearer they were to the date of the vaccination, the worse they suffered. In the same pandemic in Berlin, 2,240 successfully vaccinated children under ten developed smallpox, of whom 736 died; that is a fatality of nearly 33%." (from THE VACCINATION DELUSION by Dr. W.R. Hadwen, p. 30.)

Professor Alfred Russel Wallace commented on this situation in his WONDERFUL CENTURY (p. 232) as follows:

"The facts and figures of the medical profession and of government officials, in

regard to the question of vaccination, must never be accepted without verification. And when we consider that these misstatements and concealments and denials of injury, have been going on throughout the whole of the century, that penal legislation has been founded on them, that homes have been broken up, that thousands have been barred by police and have been imprisoned and treated as felons, and that at the rate now officially admitted, a thousand children have been certainly killed by vaccination during the past 20 years, and an unknown but probably much larger number injured for life, we are driven to the conclusion that those responsible for these reckless misstatements and their terrible results have, thoughtlessly and ignorantly, but nonetheless certainly, been guilty of a crime—a terrible crime—against liberty, against health, and against humanity, which before many years have passed, must be universally held to be of the foulest blots on the civilization of the nineteenth and twentieth centuries."

FALSIFYING DEATH CERTIFICATES—A PRISON OFFENSE

Since falsifying death certificates is associated with murder and deliberate concealment of guilt, there was at one time a uniform law making it a prison offense, but the pressure of the medical trust on the various state legislatures has reduced or eliminated the penalty from many of the statute books, leaving the physicians free to kill and cover their guilt without any questions being asked. Most states have a law against destroying evidence such as the following one from the PENAL CODE OF CALIFORNIA (1949, p. 33-135.)

DESTROYING EVIDENCE

"Every person who knowing that any paper, record, book, instrument in writing, or other matter or thing, is about to be produced in evidence upon any trial inquiry, or investigation whatever, authorized by law, willfully destroys or conceals the same, with the intent thereby to prevent it from being produced, is guilty of a misdemeanor."

PUNISHMENT FOR FELONY

A felony is a crime which is punishable by death or by imprisonment in the state prison. Every other crime is a misdemeanor and is punishable by law, according to the decision of court.

Is there any other reason for falsifying death certificates except for covering up guilt? Falsification to protect a lucrative killer racket such as vaccination, is part of the guilty offense and the doctors involved should be held accountable. Whether a person is killed by a shot in the arm by a doctor, or a shot in the back by a gangster, the result is the same; the victim is just as dead, and the "punishment should fit the crime."

Pickering, in his "SANITATION AND VACCINATION" (p. 165) sums up the situation tersely when he says:

"When I know that the deaths from atrophy and debility, diarrhea, and convulsions, a total of 54,344 deaths annually, are wrongly certified; that they are symptomatic, not causative, I am justified in saying that the whole system of registration and certification requires to be remodelled and reformed. Medicine will never reform itself. Certification should be in the hands of an independent authority."

This statement is not only true but critically urgent, providing that independent authority is accurate, honest and dependable.

Mr. Baxter, an editor of an independent newspaper is to be commended for these fearless words:

"I am reminded of the statement, 'no evil is ever corrected by those who profit from it.' As long as the powerful monopolistic Rockefeller dominated drug trust, through its political influence and mutual understanding with the union that controls medical practice, makes billions of dollars each year from drugs, including sales to the armed forces, we can expect to see laws continually on the books forcing people to be vaccinated. We can expect to see the drug trust's watchdogs in our public schools seeing to it that not one child escapes indoctrination with the vaccination hoax.

"Perhaps some good union man or apologist for compulsory vaccination will give me a statement that vaccines positively will prevent the diseases which they are supposed to prevent. If any doctor will give me such a statement I'll be glad to publish it. Thus far I have not found one doctor in the entire United States

who will make such a statement or will stake his reputation that vaccines and serums will prevent disease.

"Undoubtedly, there are many instances which justify the use of certain drugs and surgery, and the need for the training and skill of the physician should not be underestimated. When the body is torn and maimed by unnatural forces, as on the battlefield or in serious accidents, the use of unnatural methods (anesthetics, surgery, etc.) in the emergency is not only justified but entirely sensible."

The purpose of this chapter is not to condemn doctors as a whole; it is only their harmful practices that we object to and their continuance and justification of their crimes by false certification to conceal the truth.

CHAPTER 6: Let's Stop the Fluoride Poisoners

On September 11, 1974, which could be called BLACK WEDNESDAY, ten of our 15 Los Angeles city councilmen voted to poison the city water supply with sodium fluoride (Hydrofluosilicic acid is the form of fluoride which is usually dumped into the water systems. It is highly poisonous) the well known rat and roach killer.

I sat in on the hearings and was shocked to see how the majority of our elected officers allowed themselves to be swayed, conned, brainwashed, hoodwinked and steamrollered into voting for mass poisoning. They were sold a "bill of goods" by professional con men who were hired by the aluminum companies to go from city to city pressuring the sale of their sodium fluoride, which is a dangerous and almost worthless byproduct of aluminum, steel and fertilizer manufacture.

These poison factories were having problems disposing of their deadly byproduct (fluoride.) If they dumped it in the streams, it killed the fish; and if they dumped it on the ground, the wind blew it around and killed the livestock and destroyed vegetation, and brought on lawsuits.

So they shopped around and found a tricky man who said, for a price, he could work out a scheme to get rid of the poison at a profit. His name was G.J. Cox, a chemist from the Mellon institute of Pittsburgh. His plan was to launch a massive worldwide sales campaign to sell it to cities to dump into their public drinking water, and get them to believe it was good for them. They probably learned from psychologists that the average person has the mentality of a 12-year-old and "can be taken."

The plan was to "tell them anything to sell the stuff. Tell them it will prevent cavities, and save them millions in dental bills, and will do no harm, etc." Cox had no medical background and made no clinical studies as to the effect of fluoride poisons on living tissue—body and brain. But that was of no concern to him or the aluminum companies. They started their propaganda wheels rolling for the largest, most deceptive and dangerous racket ever foisted on this country. They even took it to other countries, but most of them were too alert to be

fooled, and turned it down.

In order to put over a fraud of such proportions, they figured they would need government support. This was done in the usual way with big corporations and the government. (A high percent of our government officials are corporation lawyers.) The Aluminum Company of America had a sharp lawyer named Oscar Ewing who was promptly manipulated into a high position in the government, which was no less than that of director of the Federal Security Administration. From there he proceeded to influence Surgeon General Scheele and other big names who would help promote the fluoridation scheme.

With his new influence and power he asked for and got \$2,000,000 of the taxpayers' money just for fluoride propaganda. He also had at his disposal millions of dollars to buy support from dental and medical associations by way of grants to their schools, with strings attached, of course. These associations have become so involved with this shady business that "the good" doctors and dentists who are opposed to fluoridation are restrained from speaking out against it because of these "under-the-table" deals by their associations.

Ewing was later head of the U.S. Public Health Service. With all this power and money and a battery of trained con men he was able to influence state and local governments across the country and sell millions of dollars worth of fluoride, and mass poison multitudes of innocent, unsuspecting people who trust their public officials and depend on their water departments to provide safe drinking water.

The purveyors of poison have boasted openly that they have foisted other poisons on the public, so the promoters could make profit, so why should the public resist this new poison. They have more planned if they can get away with it.

One of the poison programs they have made fortunes from is chlorine for the public water supply. They said it would purify the water. Many water companies and communities rejected it, so I guess it is not necessary, or they have something safer like charcoal or lime to do the job. Another dangerous poison they popularized for profit is penicillin. They concealed the sudden deaths from it and the allergies and side effects. Then there is the tubercular testing of cows.

This disease producing injection has wiped out whole herds and does harm to all cows. They try to control the damage with penicillin, but the cows cannot be normal again and the milk is contaminated. They get away with it because it is profitable. Lawsuits have been fought and won by the cattle men, but the practice goes on, and the news of the suits is suppressed.

Another poison program is vaccination and immunization. The injection of poison pus and drugs into the bloodstream cannot prevent or cure disease, but they get away with it because it is big business for the doctors and drug houses. Only recently have the people begun to wake up and protest. Because of the protests the smallpox vaccine is now obsolete; it was proved to be causing more deaths than the disease itself. Only false promises and flagrant lies have kept the polio vaccine and other shots in use. It is to be hoped that the whole vaccine racket will soon be investigated and stopped before too much damage is done.

FALSE CLAIMS OF THE FLUORIDATIONISTS

The fluoride promoters gamble on the proposition that there are enough politicians running the local governments who are dishonest enough to be bribed, or stupid enough to believe their false propaganda, and vote for their poison program. In the training class for the fluoride salesmen (mostly dentists lacking integrity,) they are told to make their sales pitch behind closed doors in the city council chambers without the public, without debate, without contest by anti-flouridationists because the latter's cold facts cannot be refuted. They are told to promise what the council wants to hear " and it doesn't necessarily have to be true," they said. They are told to keep it from going to a public vote, because too many people know it is rat poison and would vote against it.

"If the people come into the council hail and demand a voice, intimidate them, ridicule and insult them; use all the dirty tricks you know to get the vote of the council and make the sale." One of the days I sat in on the hearings in Los Angeles, there was a dentist there who had some patients suffering with fluoride poisoning, but he was not given a chance to speak. A researcher was there also, with some important findings but she was not allowed to give it, as it was against fluoridation. However, the proponents had all the time they wanted to spread their false propaganda. If it came to an issue, the council would claim that both sides had equal advantage, but it just was not so. The fluoride salesmen and our

ten less astute councilmen made many false claims for fluoridation, but the following are the most questionable and they will be refuted briefly in the next few pages:

THEY SAID:

- 1) that children up to 12 years would have 65% less cavities;
- 2) that fluoride is not poison and is perfectly harmless in .8 ppm concentration.
- 3) that fluoride is a nutrient and is beneficial to the health;
- 4) that because certain medical groups endorse it, it has to be good for all;
- 5) that the cost to the people "is too cheap."
- 6) that fluoride does not damage water pipes;
- 7) that public fluoridation would equalize the dosage, especially to blacks;
- 8) that the doctors, dentists, PTA and people want it;
- 9) that the people should not be allowed to vote on the issue;
- 10) that because some cities have accepted it, all must do likewise;
- 11) that fluoride makes beautiful teeth.

The above claims are unproved and without foundation in fact. Our five better councilmen were able to see through the fraud, and we wonder why the other ten could not muster enough integrity and clear thinking to see what millions of others can see—that it is a multimillion dollar con game which robs the people of money and health.

In the early days of this country, if a man was caught poisoning the water hole of a rival rancher he was shot on the spot or hanged at sunrise. Today, the water poisoners are protected by the government and applauded by certain dental and

medical groups—even the PTA, whose children are being exploited. All this is done in the name of "profit making," the so-called, American Way. Let's change it!

FALSE CLAIMS REFUTED

No pretense is made here to give all the proof against fluoridation, as that would take volumes, but a few scientific findings will be presented for each false claim.

1) The Fluoride Proponents Claim That Dental Caries Would be Reduced 65% in Children Under 12 years.

THE FACT IS:

A report in the American Journal of Clinical Nutrition (June 1969,) stated:

"Fifteen years of fluoridation discloses that dental caries are rampant and increasingly frequent with age...pregnant and lactating (nursing) woman showing the highest prevalence of decay...Dental fluorosis (fluoride poisoning) was particularly prevalent in school children. Sixty-four percent of the cases observed belonging to the ten to 14 year age group."

Other symptoms in this 15-year-study were dental malocclusions (buck teeth) from fluoride poisoning, permanent brown spots on teeth, goiter, bow legs, (fluoride leeches calcium out of bones and weakens them,) kidney disease, enlarged parotid gland, inflammation of the tongue, 39% anemia among infants, 50% anemia among expectant mothers, and up to 10% of this blood disease among children from one to nine years.

A report published in the Yearbook of Agriculture (1939, p. 212 & 213,) deals with a survey of a number of fluoridated cities in which it was found that:

"...*Fluoride interferes with the normal calcification of the teeth during the process of their formation, so that affected teeth, in addition to being usually discolored and ugly in appearance, are structurally weak and deteriorate early in life. For this reason, it is especially important that fluoride be avoided during the period of tooth formation, that is from birth to the age of 14 years.*" (emphasis

supplied)

So here we have the truth of the matter. Careful, scientific research proves that fluorides are especially damaging to the teeth and health of children up to 14 years of age, and even worse to the mothers and the unborn.

No one, not even the fluoride sellers claimed that fluoride was good for adults. Their main selling point is that it reduces cavities in teeth of children. They were willing to wreck the health of the entire adult population on the flimsy promise that it would be good for children. They had no proof for these claims—just baseless promises.

So here we have sound and substantial evidence that fluoride will not prevent cavities in anyone, but will actually increase them and cause many serious diseases at the same time. And the children will be the hardest hit.

Any poison that is potent enough to damage teeth (which are the hardest tissue of the body) will do even greater harm to the rest of the body all along the way, such as the soft tissues of the eyes, nerves, glands, organs, cells, and hair.

THE CHALLENGE

The fluoride promoters and our ten water poisoning councilmen have been asked if they will back up their claim and promises of safety and benefit (of fluoridation) with a money guarantee. But not one of them believes in fluoridation enough to back it with even a dime. So they can expect numerous lawsuits for damage done if fluoridation is enforced. I read of a woman in New Haven who has already filed a \$100,000 damage suit for sodium fluoride poisoning. She is filing against a health commissioner, a doctor, a supervisor and the city water department which is committed by law to furnish safe, pure drinking water for the people. Instead, they poisoned it.

There are thousands of people in Los Angeles County who are now suffering from kidney disease, diabetes, and other ailments especially sensitive to fluoride poisons. They would be immediately hurt or killed by the addition of fluoride to the drinking water. Others would be broken down later on, after years of slow poisoning.

2) They Said That Fluoride is Not Poison and is Harmless at .8 ppm. Eight tenths parts per million is the amount they prescribed for Los Angeles water.

THE FACT IS:

Accurate and scientific tests in many laboratories and public water works show that 0.8ppm is a dangerous dose. Even much smaller amounts have been found to cause cancer in test animals The University of Texas found that it took only 0.4 1/2ppm of sodium fluoride to cause cancer in their laboratory experiments It also shortened the lifespan considerably.

The University of Arizona has been experimenting with powdered bones to get the fluoride out of their water They said, "We have plenty of evidence that 1 ppm is too much for universal acceptance " Doctors Clark and Mann of the University of New Mexico have made similar adverse discoveries about 1. ppm fluoride.

Texas, Arizona, New Mexico and California have higher than average natural calcium fluoride; Texas and New Mexico are doing something about it and trying to get rid of it. But in Los Angeles our bungling, inept ten fluoride promoting councilmen are busy trying to increase the amount in our already over—poisoned water. The main part of Los Angeles had .6ppm while the east part of town (Negro and Mexican section) have .2 and .3ppm, which is a safer amount; but they are complaining that they are deprived and want more. (I have learned from researchers that these percentages are not correct, but are made up and used by the fluoride promoters to influence the thinking.)

IS NATURAL FLUORIDE SAFE?

Some people are of the opinion that what is already in the water is safe and non-poisonous because it is calcium fluoride. This is not true. All fluorine compounds are poison. However, sodium fluoride is 65 times more poisonous than calcium fluoride. It is this highly toxic sodium fluoride that our public enemies have voted to put in our water. And they have agreed to take from \$5,000,000 to \$12,000,000 or whatever the fluoride salesmen ask, to pay for it, that is, take it out of the taxpayers' pockets, without our consent.

According to researcher G.F. Knight, "Sodium fluoride in a solution 15 times weaker than 1.ppm reduces some enzyme activity by 50%." Bakers and brewers know this because their yeast will not rise in fluoridated water.

FLUORIDATION IS ILLEGAL in Norway and Denmark and has been rejected in Italy, France, Holland, West Germany and Sweden*(Fluoridation has also, been rejected by 23 other countries not named.) Over 2,500 communities in the U.S. have rejected fluoridation. England rejected it after seeing the American Experiment. They said they don't want "Texas teeth" with dingy brown spots from fluoridation. These dark spots can never be removed.

FINDINGS LINKING CANCER TO FLUORIDATION CREATE IMPACT IN GREAT BRITAIN

"Thanks to the damning information on cancer deaths resulting from fluoridation of public drinking water, further fluoridation has been effectively and probably permanently ended in two countries abroad.

Dr. Dean Burk, former chief of the cytology section at the National Cancer Institute, has received word from England that the Water Authority has advised each Area Water Authority that the water supply may not be fluoridated without specific legislation by Parliament...

"The decision to halt further fluoridation there was precipitated, says Dr. Burk, by information contained in a report showing that between 25,000 and 30,000 cancer deaths per year in the United States are attributable to fluoridation of drinking water.

"The same information, televised in a seven minute program in Holland, February 8, 1976, and viewed by hundreds of thousands of citizens as well as government officials, was responsible for the Parliamentary vote to defer fluoridation there for ten years. In that case, the Minister of Health, as well as the nation's dentists, had fully expected Parliament to order nation wide fluoridation —inevitable until the nation became aware the cancer fluoridation correlation."

THE EXPERIMENT

The first massive water poisoning experiment started in 1945 when Alcoa, the aluminum company, used people of Newburgh, New York, as human guinea pigs and poisoned their water system with sodium fluoride, just to see what would happen, and to sell a ten year supply of fluoride plus the expensive equipment. The city of Kingston nearby was left un-fluoridated, to serve as a comparison control city.

After this ten-year stretch of public poisoning the Bureau of Health Services of New York reported, "...50% more dental defects in fluoridated Newburgh than in un-fluoridated Kingston."

K.K. Paleuv, an electrical engineer, had carefully studied the figures of this experiment and pointed out that "fluoride only postponed tooth decay for about two years then at the end of ten years it was destroying the kids' teeth wholesale. This is the greatest con game of all time."

This two-year delay in decay gave the fluoride men a chance to jump to conclusions and advertise that fluoride was preventing decay, when it was actually slowly undermining the dental structure and causing widespread damage later on.

The fluoride pushers get so "grabby" to make a million dollar sale that they sometimes trip over their propaganda. For example:

In Mason City, Iowa, the fluoridationists were pushing for the kill, (we saw how they did it in Los Angeles,) with a lineup of warped doctors, dentists, PTA, radio, newspaper and a public officials endorsing it. "Local doctors and dentists (bought or preconditioned) testified that the tooth decay rate was something terrible and that all they needed to do was to vote fluoridation and dental decay would be reduced 65% and millions of dollars would be saved in dental bills. All they needed was 1.ppm fluoride," they said.

But Mason City had one alert councilman who was not satisfied with merely listening to promises and propaganda; he went out and did some checking and found that the city already had water than contained 1.24ppm. That was more than the magic amount that was promised to do the miracle. All that fluoride was probably the cause of much of the terrible tooth decay, not the cure.

In Los Angeles, we already have .6ppm and that has not helped the problem of decay, so how can we expect a miracle with two more parts? The fluoride proponents promise that .8ppm is the "magic amount." Ridiculous!

3) They Said That Fluoride is a Nutrient and is Beneficial to Health.
THE FACT IS:

The Food and Drug Administration says, "Fluoride is a drug and not a mineral nutrient."

The National Institute of Dental Research, Bethesda, Maryland, quotes Dr. F.J. McClure as saying, "fluorine has not been proved to be an essential for the proper functioning of either osseous (bones) or dental tissue, or for any other body tissue or body function."

At the 1954 Congressional hearing, the word from the Massachusetts Institute of Technology was: "Fluoride is not necessary for healthy tooth formation. Many healthy teeth do not contain fluoride."

From the Forsythe Dental Infirmary for children at Boston, is the report: "There is no disagreement about the fact that fluoride is a protoplasmic and enzymatic poison."

The U.S. Dispensatory (24th Edition) states: "Fluorides are violent poisons to all living tissue because of their precipitation of calcium (leech calcium from bones) and make them porous and brittle...The fluorides cause respiratory failure and general paralysis..."

Research in Italy and India indicates that fluoride hardens arteries.

4) They Said That Because Certain Medical and Dental Groups Endorse it, we should accept it.

THE FACT IS:

The proponents of fluoridation use a smattering of impressive big names to

pressure the city councils into thinking that it is the only right thing to do. They gave the AMA end endorsement, but when we trace it down we find that the American Medical Association never did give their endorsement. A letter from the AMA Law Department (Sept 7, 1961) states: "...The A.M.A. does not engage in the approval, endorsement, guarantee, or acceptance of fluoridated water or of un-fluoridated water." The letter was signed by their director, Bernard D. Hirsh.

A previous statement from the AMA had said that they were of the opinion that fluoride was safe." An opinion is not an endorsement. But the fluoride pushers used it in such a way as to sell many people on the idea that it was safe. The AMA admits it has never made any scientific tests that prove fluoride is safe.

Another big name the fluoridationists use is that of the U.S. Public Health Service. We have a letter from them dated May 10, 1966 which states: "The U.S. Public Health Service does not say that sodium fluoride is an essential mineral nutrient."

There have been no factual, scientific studies which have ever proved that fluorides are safe or effective in drinking water.

Dr. Miller studied 3,000 of these reports and states, "All clinical tests that have been completed show the fluoride to be unsafe and dangerous."

1. They Said That the Cost to the People is "Too Cheap."

THE FACT IS:

The fluoride sellers are in the business for profit and that's all. While they were wooing the council for their vote they pretended it would not cost much—only a few thousand, while they promised the cities they would save millions of dollars in dental bills. After they got the "yes" vote from enough of the confused councilmen, then it came out that it would cost between \$5,000,000 and \$12,000,000 to fluoridate Los Angeles. The fluoride producers will sell the worthless poison at a high price and the machinery at a higher price. Los Angeles will have to buy new land and build new buildings for the 13 treatment locations, and the taxpayers who have not been consulted and who do not want it, will be forced to pay for it, and be poisoned besides.

In the private meeting behind closed doors, where they give their con men their instructions (I have a written transcript of the meeting) they said the cost would be \$1.00 to \$1.50 per head. We have about 8,000,000 people in Los Angeles County, so that would be either \$8,000,000 or \$12,000,000 for the taxpayers to give them for this mass poisoning caper. Even Al Capone didn't try to get away with such a gigantic crime.

Our ten councilmen who voted for this shocking people poisoning scheme were asked by a reporter why they voted for it, and they said they thought it would help the children's teeth. If they really thought this poison would help the teeth they could have bought fluoride at 8 cents a year for each person who wanted it. We wonder what kind of weak minded thinking was behind this \$8,000,000 outlay of taxpayers' money when they could get all the fluoride they wanted for about \$50.00 for the few who wanted it. It's doubtful that anyone would want fluoride when they learned the truth about it.

Council members of such questionable ability do not belong in the government of such a large and important city as Los Angeles. They should resign before they are ousted.

THE WATER POISONERS OF LOS ANGELES

Here are the names of those ten council members who voted to poison the people with sodium fluoride:

Edmund Edleman
Dave Cunningham
Emani Bernardi
John Ferraro
Joel Wachs
Pat Russell
John Gibson
Marvin Braude
Robert Wilkinson
Robert Farrell

They should be investigated—or bow out before it is necessary to probe.
Mayor Tom Bradley voted for fluoridation in 1966 when he was a councilman.

This time (September, 1974) he was mayor and couldn't vote but he could have vetoed the measure if he had the interest of the people at heart. He did not veto it. He arranged to be out of town on a vacation when the fluoridation vote was taken, so he would have an excuse not to veto it. He left Gibson in charge knowing that Gibson would vote for fluoridation and would not veto the measure. So Bradley is just as guilty as the other guilty ten who cast their vote to poison the water supply.

We had five good men on the council who stood their ground against the onslaught of the con men who used every underhanded trick in the book to sell fluoride. These five men could see through the fraud, as could millions of others who made any effort to be informed. There is plenty of factual evidence which condemns fluoride poisoning of the public water. These five reliable councilmen deserve a vote of thanks.

They are:

Arthur K. Snyder

Gilbert W. Lindsey

Robert J. Stevenson

Donald D. Lorenzen

Louis R. Nowell

These men knew it would be wasteful and senseless to pay \$12,000,000 to dope all the water when only .1% would be used by children, even if it was good, which it isn't. The rest of the \$12,000,000 doctored water would be wasted for washing cars, laundry, squirting on forest fires, flushing toilets, taking showers watering the garden (fluoride is bad for plants) etc. We wonder why those ten men voted for such an obviously crooked deal. Were they bribed or just lacking normal intelligence? Either of these things would disqualify them for the important work of the city council.

6) They Said Fluoride Does Not Damage Water Pipes.

THE FACT IS:

Fluorine is known as one of the most dangerous and corrosive substances. Chemists have difficulty in getting any metal to contain it without destruction.

Sodium fluoride is a fluorine compound and also is corrosive and poisonous. It ranks along with cyanide and arsenic in toxicity. Many fluoridated cities have had frequent breakdowns in their water systems. Three large water pumps were almost destroyed by fluoride corrosion in North Hampton, Massachusetts. In Newburgh, people reported that their water heaters squirted water like "rotten rubber hoses." Concord, New Hampshire had to pay over \$200,000 to replace their fluoride damaged city water system. Other cities, including San Francisco, reported similar difficulties.

If fluoride will do that to the hardest steel fixtures and pipes, what will it do to the delicate internal organs and soft tissues? No wonder there are so many diseases traced to fluoride poisoning. Fluoride is not eliminated like waste food, it accumulates in the body and causes deterioration.

Dr. Charles Dillon, researcher on fluoride wrote in THE CHEMISTRY OF FLUORIDES, "In severe and crippling fluorosis no toxic effects at all may be observed...before the crippling effects become obvious."

Dr. C.A. Bruschi, director of Bruschi Medical Center, Cambridge, Massachusetts states:

"Fluorides are protoplasmic poisons and have never been medically approved."

Dr. C.I. Betts of Toledo, Ohio investigated fluoridation for ten years and found that Bright's disease (fatal kidney disease) increased 50% in fluoridated areas. There was also a 50% increase in brain damage and much mongoloidism. Diabetes more than doubled where fluoridated water was used regularly.

7) They Said That Fluoridation Would Equalize the Dosage.

THE FACT IS:

Even the fluoride sellers admit it is an impossibility to so mix the fluoride at the water works in such a way as to get a uniform, (exact amount planned on,) coming out of the kitchen faucet.

It has been established by experts that we do not need any poison in the drinking water. But we already have .6 ppm. The poisoners say we should have .8 ppm. So, they are going to try to get .2 ppm mixed into a reservoir holding millions of

gallons. They are not going to test it at every faucet every day to see that it does not exceed the deadly amount. Fluoride is an unpredictable chemical which accumulates and lodges in many places in pipes and fixtures. Researchers have found as high as 500. ppm in some pipes where there was supposed to be only 1. ppm No one can control it, or keep track of what is happening. Fluoride is a colorless, odorless, tasteless poison, so people would not be able to detect a deadly dose in the water. The government should throw these reckless poisoners in prison for life.

In order to get only .8 ppm per day, people would be restricted to only 4 glasses of water a day. If they drank diluted juices, soft drinks, coffee, tea (tea is extra high in fluoride) etc. they would get extra poison. If they cooked soups, vegetables, meats etc. in water, the water would boil down and double the fluoride, because fluoride does not evaporate with the water. People would be getting a dangerous dose every day. Those who drink more than 4 glasses of water a day, especially in hot weather, would be getting dangerous doses of poison.

In the council meeting when people complained about having to drink the poisoned water, the fluoride promoters merely said, "then buy bottled water." We wonder if the aluminum companies which sell the fluorides also own the bottled water companies. We should not have to be forced to buy bottled water when we are already paying high taxes for our public water system.

8) They Said That the People and the Doctors, Dentists and PTA Want it.

THE FACT IS:

The people don't want it. A straw vote was taken which showed that the people are overwhelmingly against it. The Herald—Examiner poll showed 40 to 1 against fluoridation.

Many dentists and doctors want fluoridation because it increases their business. Some reports show as high as 50% increase in cavities in fluoridated areas. The doctors find an increase in kidney trouble, diabetes, fractures, goiter, paralysis, mental diseases and several other diseases in fluoridated areas.

Why the PTA approves fluoridation I don't know. They have everything to lose and nothing to gain. Poisoned water is 100% harmful, and the damage done costs them money. They should know better. The children suffer the most, and the PTA is partly to blame.

9) The Fluoride Promoters Told the City Council Not to Let it go to a Public Vote.

This was because they knew the people have too much sense to want to be taxed millions of dollars just to be poisoned and then pay for the doctor bill besides. The fluoridationists figure that they can control the city councils because they are only politicians and sometimes not very bright. But there are too many intelligent people among the voters, and they cannot control their minds. The fluoridationists lose when it comes to a vote.

10) They Said That Because Other Cities Accepted Fluoride, We Should. They also said that Los Angeles was the only large city left that wasn't fluoridated, and that we were backward because of it.

THE FACT IS:

More than 2,500 communities across the country have rejected fluoridation and many more are discontinuing it after wasting thousands of dollars trying to make it work, only to find it caused more tooth decay and illness and expense than they could handle. Over 100 cities have rejected it after the bitter experience of paying for it and trying to live with it.

Just because some cities succumb to the high pressured sales pitch of the poison squad does not prove that fluoride is good.

11) They Said That Fluoride Makes Beautiful Teeth.

THE FACT IS:

Fluoride makes ugly, mottled, decayed teeth. Even the fluoride toothpaste causes ulcers of the mouth, gums and lips in many people. Fluoride is poison no matter how it is used. Rat and roach poison and flux is all it is good for.

In a class where fluoride salesmen (mostly dentists) were being trained, the question was asked what to do when the matter of fluoride damaged teeth came up when they were giving their sales speech in the council chambers. The instructor said to "use all the tricks necessary to make the sale, ignore the question, insult the questioner, ridicule him, change the subject or just hold up a picture of beautiful teeth (not fluoridated of course) and say that fluoride is harmless and makes the most beautiful teeth you can imagine; some will believe it."

SHOULD OUR POLITICIANS PRESCRIBE MEDICINE FOR THE PUBLIC?

Medical doctrine states that "It is unlawful for a doctor or anyone else to prescribe or treat another person who is in full possession of his mental faculties, who objects to and refuses such treatment."

Sodium fluoride is a prescription drug.

The ten city council members who voted to add fluoride to the city water supply have illegally prescribed, and intend to force dangerous medication (a proved poison) on all 3,000,000 citizens in this city. (8,000,000 in Los Angeles County.) This long term drug program has been initiated without diagnosis and without consideration for the individual differences and weaknesses, allergies or inability to handle this dangerous, even deadly poison, they have prescribed. They have not asked permission of the people to prescribe and treat them, and they do not have a medical license to prescribe and treat. I know of many qualified drugless doctors who were sent to prison for helping people recover, with health diets and with no drugs or harmful substances. They did not have a medical license to treat, so they were sent to jail. These ten councilmen are dealing with a dangerous drug. When will they be sentenced, fined and imprisoned?

They have violated our constitutional rights which guarantees protection of person and property; and they have violated the medical statues of prescribing, treating and practicing medicine without a license. They are lawbreakers subject to the penalty fitting a crime of such enormity.

TABLE 3. GASTROINTESTINAL TRACT CANCER DEATH RATE.

CANCER DEATH RATE DUE TO CANCER OF THE:	Cancer Death Rate (per 100,000).			% INCREASE FLUORIDATED CITIES NONFLUORIDATED CITIES
	NATIONAL AVERAGE	NONFLUORIDATED CITIES	FLUORIDATED CITIES	
Tongue and mouth	4.21	5.26	7.59	44%
Esophagus	4.10	4.18	7.19	72%
Stomach	15.22	12.61	18.39	45%
Large Intestine	16.54	15.30	21.43	40%
Rectum	7.65	6.09	10.98	80%
TOTAL (Gastro- intestinal Tract)	47.72	43.44	65.58	51%

Table 3 shows that most (about 65%) of the increase in cancer death rate from fluoridation is due to an increase in gastrointestinal cancer death rate.

HIGHER CANCER RATE IN FLUORIDATED CITIES

Extensive research has been done showing the link between the increased cancer death rate in cities where the water has been fluoridated over a period of years. This data may be obtained in more detail from THE NATIONAL HEALTH FEDERATION—P.O. Box 688—Monrovia, Calif. 91016.

The same information was published in a WHEN MAGAZINE dealing with world health and ecology, Vol. 6:7—page 8—(35c), P.O. Box #1, Palm Springs, Calif. 92262.

The article is titled DEFINITE LINK BETWEEN FLUORIDE AND CANCER DEATHS, by Dr. Yiamouyiannis. It contains five charts of official data similar to the chart reproduced on the preceding page. After studying these charts and the other information in the article, we can readily see that there should be no doubt whatsoever, that fluoride is a drastic poison and those who poison the public water supplies with it are killers and must be dealt with the same as any other willful murderers.

CHAPTER 7: The Vaccination Connection

PART II

Sue Marston

Foreword by Dr. Emil Levine, MD

1993

The People for Reason in Science and Medicine

www.PeopleForReason.org

Written by renowned expert on vaccinations, Sue Marston, the basic facts in this book are as relevant now as when it was written in 1993. Times and politics may change but the pressure to vaccinate hasn't; in fact, the pressure has grown more intense every year, and the damage caused by increased doses of vaccines will only get worse unless we all fight back against Big Pharma lies and greed and choose health over fear and intimidation.

FOREWORD

The first time I heard Sue Marston speak about vaccines I was impressed. She has a remarkable grasp of the issue and has investigated the subject more thoroughly than most doctors ever will. It isn't the job of the physician to investigate the effectiveness or danger of a vaccine. If it gets by the Food and Drug Administration, most doctors will administer it.

The researcher whose job it is to determine the safety or efficacy of a drug cannot draw a correct conclusion until it has been tested on thousands of people. Even then, the effects of the vaccines and other drugs may not present themselves immediately, perhaps not showing up until the next decade or the next generation. Therefore it is your responsibility, as the recipients of these potentially lethal substances, to investigate them for your own sake and for the sake of your children. Ms. Marston has done an excellent job of gathering the facts, with references which can be verified.

The author of this booklet has two important credentials which entitle her to

write it. First, she is not a doctor. The fact that she is a lay person is what qualifies her. Whether intentional or not, the attitudes of some physicians who speak publicly intimidate the lay person into believing that only a doctor can know or recommend anything about health. As one of the most powerful lobbies in the country, doctors have succeeded in making it illegal, or at least very risky, for anyone other than a doctor of allopathic medicine (treatment of symptoms) to make recommendations regarding your health. Other oppressive laws are pending as of this writing. Yet doctors don't study health; they study disease. With the exception of very minor references to food in their courses of study, doctors are not even required to study nutrition. It is the responsibility and the right of each individual to make informed decisions regarding his or her own health. You have probably heard one side of the vaccination issue. In this booklet you have the opportunity to read the other.

Ms. Marston's second qualification for writing this booklet is her ability to discern fact from popular fiction. She obviously has invested, too, the hard work and dedication required to locate and interpret the essential reference materials.

Anyone with an open and inquisitive mind can pick up *The Wall Street Journal* and read between the lines when a headline states that an inherited genetic mutation can cause cancer, while another sentence in the same article states that the mutation is believed to have been caused by an environmental agent or diet. What environmental agent? Could it be something in our air, in our water—in our vaccines? It is in the best interests of the pharmaceutical companies, their sister industries and offspring charities, to convince the trusting public that they need to find a cure for a mutant gene or that they need to conduct expensive tests to find these genes. It is more profitable for them to build more high tech facilities for conducting these tests than it is for them to clean up the "environmental agent" or admit that our polluted ecosystem, the deleterious effects of vaccines and other petrochemical products, and lack of knowledge about diet are causing the majority of our ills. It is more profitable to convince new parents that their babies need to be injected with blood, sera, bacteria from diseased animals, formaldehyde, and other known poisons, than to encourage them to enhance their babies' immune systems by feeding them natural and chemical free whole foods.

Those who benefit from maintaining the status quo will try to convince you that

the reason the death rate is so high for children in Third World countries (as well as poverty stricken children in this country) is that they are not vaccinated. They fail to inform you that many of these children live in unsanitary conditions which increase their risk of infection and decrease their bodies' defenses against diseases. Many of them are undernourished. In El Salvador, for example, where people are often forced to drink the same water in which their clothes are washed, the number one cause of death in children is diarrhea.

The old era of submitting to the judgment of doctors under the government of the AMA, ADA, NIH, CDC, WHO, HEW, and FDA* is coming to an end. Many people are beginning to realize that their illnesses are products of manmade external and internal pollution fostered by a profit motive.

*American Medical Association; American Dental Association; National Institutes of Health; Centers for Disease Control; World Health Organization; Health, Education, and Welfare; and Food and Drug Administration.

The information contained in this booklet introduces a gateway to the new era of individual thought, investigation, and freedom of attaining and maintaining good health.

Emil Levine, M.D.
Los Angeles, California

CHAPTER 8: Preface

Epidemics of infectious diseases have always come and gone, wherever the conditions existed for disease to flourish, throughout recorded history. Despite a belief (one that we have all been carefully trained to accept) that vaccinations "prevent" infectious diseases and epidemics, the facts retrieved from public health records and medical journals indicate otherwise.

It is undeniably true that there has been deliberate suppression of information and fabrication of data to protect a multibillion dollar per year industry: the pharmaceutical/chemical/agribusiness/oil/biomedical research conglomerate. It is readily acknowledged by the author that this conditioning of public opinion has been so successful that some individuals are unable to accept information which contradicts conditioned beliefs about vaccination.

This booklet contains a synopsis of factual data regarding infectious diseases, vaccines, their effects, the reasons why vaccines are heavily promoted, and other vital information that is withheld from the public.

Some say, "But I've been vaccinated and I'm healthy." That, of course, depends on your definition of health and the state of health you are accustomed to. There are various factors involved in maintaining good health. If you live a relatively unstressed existence with reasonably good nutrition, or you are blessed with a particularly hardy immune system and a strong constitution, you may be one of the lucky ones whose only vaccination initiated healing crises* have included colds, ear and throat infections, flu, allergies, etc. But there are many more serious dangers to health which have been shown to be caused by vaccination.

****NOTE:** A healing crisis occurs when the body is dealing with toxins injected, inhaled or ingested, and is using the immune system to try to eliminate the toxins, resulting in symptoms ranging from coughs to cancer. Yes, even cancer is a symptom of the body's efforts to eliminate toxins!

Not everyone who lives in an area sprayed with pesticides feels ill or exhibits symptoms at the time of the spraying or for a long time afterwards, nor does everyone who lives near a chemical dumpsite develop cancer, leukemia, or other

symptoms of an impaired immune system. But damage is done. The same is true of vaccination.

Some also ask, "Why, if vaccinations are so harmful, and not beneficial, do doctors recommend them and defend them, often vehemently?"

We must remember that doctors in medical school are indoctrinated into a belief in vaccination more intensely than the public at large. And the medical schools teaching drug and vaccine "therapy" are generously funded by the petrochemical/pharmaceutical industry.

In addition, doctors who dare question the practice or advise patients against it risk the loss of their medical licenses and their livelihood for having the temerity to "buck the system" set up by the not-so-ethical ruling powers in medicine and politics today. Most people in any profession find it easier to keep their mouths shut and toe the party line, and doctors are only human, too.

ACKNOWLEDGEMENTS

Thanks to the proofreaders and the technical "proof writers," especially Francis J. Kovac and Edit Abbott, and to Terrance Sullivan, ND, who initiated this publication.

A very special thank you to medical editor and historian Hans Ruesch, whose books *Slaughter of the Innocent* and *Naked Empress* inspired the writer to further investigate the information unearthed in those books, which have been suppressed in nearly every country in the world, including our own "Freedom of Speech" USA.

CHAPTER 9: Vaccine and Today's Health Problems

Most people have not yet made the connection between illnesses and vaccination because this information has not been shared with the public, and sometimes the effects lie dormant and are manifested at a later time (as explained further in this publication). Some of these health hazards from vaccination include cancer, leukemia, multiple sclerosis, autism, lupus, mental retardation, blindness, asthma, epilepsy, cerebral palsy, encephalitis, paralysis, tuberculosis, Sudden Infant Death Syndrome (SIDS), damage to and/or failure of kidneys, liver, heart and other organs of the body (including the pancreas, now linked by some investigators to juvenile type diabetes), arthritis, meningitis, allergies, hyperactivity, mild to severe chronic ear infections, learning disabilities, and various other health problems.

Vaccines contain a cross section of the following ingredients: decayed animal or animal embryo proteins, pus, blood, diseased mucous, urine, feces, formaldehyde, acetone, mercury derivatives, aluminum, carbolic acid, and glycerin.

The term “immunization” suggests that immunity to disease is produced by the practice of vaccinating. This is not true, so the word “immunization” is not used in this booklet, except in quotations included from outside sources.

CHAPTER 10: Vaccines and the Media: Myth vs. Reality

Here are some recent examples of what is reported to the public vs. the facts.

WHAT IS REPORTED TO US:

The news releases which are approved for the public's eyes and ears claim that measles outbreaks occur because not enough people are vaccinating their children, and are ever urging the public to vaccinate more and more, younger and younger.

FACT:

The headline of an article in the *New England Journal of Medicine* reads:

“Measles Outbreak in a Fully Immunized Secondary School Population,” and while the article attempts to explain how fully immunized children could be contracting measles, the conclusion drawn is that “outbreaks of measles can occur in secondary schools even when more than 99% of the students have been vaccinated.” (1)

WHAT IS REPORTED TO US:

A national major news release in the *Sunday Parade Magazine* section of major newspapers across the country stated the following: “The pneumonia vaccine (officially known as polysaccharide pneumococcal provides immunity against the 23 types of pneumococcal responsible for about 90% of all pneumococcal disease. Older people are particularly vulnerable to these 23 strains. In fact, the vaccine is recommended for everyone 65 and older by the Immunization Practices Advisory Committee of the U.S. Public Health Service, as well as for 20 million other Americans considered to be at risk. These include people with chronic illness such as diabetes, heart disease, emphysema and other lung diseases.” (2)

These news releases urging everyone (high risk individuals in particular) to be

vaccinated with the pneumococcal vaccine persist to this day.

FACT:

Only three days before the release of the "Parade" magazine article, another report in the *New England Journal of Medicine* told of a "trial test" conducted with the pneumonia vaccine on 2,295 "high risk patient (with one or more of the following: age 55 years, and the presence of chronic cardiac, pulmonary, renal or hepatic disease, alcoholism or diabetes mellitus." The experiment consisted of half the subjects receiving the vaccine and the other half receiving a placebo. The result indicated that more of the vaccine recipients contracted pneumonia or bronchitis and secondary infections than the placebo group. The conclusion drawn by the experimenters was: "We were unable to demonstrate any efficacy of the pneumococcal vaccine in preventing pneumonia or bronchitis in this population. Our data suggest that chronically ill patients who are most susceptible to infection may have an impaired immune response to the pneumococcal vaccine." (3)

Megan Gresh, Colorado Springs, Colorado, suffered permanent brain damage after receiving a third DPT shot September 4, 1987.

WHAT IS REPORTED TO US:

Because of public alarm over the damages caused by the DPT vaccine, we have been seeing news releases over the past couple of years declaring that studies show the vaccine does *not* cause SIDS (Sudden Infant Death Syndrome) or brain damage, but on the contrary, the vaccine helps “prevent” SIDS and brain damage.

FACT:

The book *DPT: A Shot in the Dark* by Harris Coulter and Barbara Loe Fisher deals specifically with the deaths and damages caused by the diphtheria, pertussis, tetanus (DPT) vaccine. Parents have carried their healthy babies into the doctor’s office and then noticed a distinct difference in the child’s health and behavior after the shot, often even before leaving the doctor’s office. The infant’s behavior in these cases remained different until death or permanent mental and/or physical damage occurred. (4)

From the *Health Freedom News*, February, 1989: “A study reported in the *American Journal of Public Health* last year demonstrates that there is a 7.3-fold increase in cases of Sudden Infant Death Syndrome in the interval between zero to 3 days after vaccinating with the DPT vaccine.” (5)

A news item published in 1987 declared that Lederle Laboratories appealed a court case in which they were being sued for paralysis caused to an infant by their DPT vaccine, because, they contended, the DPT vaccine is “unavoidably unsafe.” (6)

It was recently revealed in an article in the *Los Angeles Times* that several doctors responsible for such news items “dismissing the likelihood of neurological illness from pertussis vaccines” are “consultants” to manufacturers of the DPT vaccine and have received hundreds of thousands of dollars worth of research grants from Lederle Laboratory and other firms. (7)

The preceding examples are, unfortunately, not exceptions from the time vaccination became a financially lucrative enterprise, what the public has been

told by the mainstream media sources has often directly contradicted the information contained in government health records and private medical reports.

If vaccination merely failed to prevent disease, then its promoters would be guilty only of making huge profits on an equally huge hoax. But the damages from vaccination are numerous and sometimes devastating. As previously mentioned, most people are not even aware of the link between vaccination and various disabilities and autoimmune diseases.*

Let's take a look at the facts regarding the epidemics we have been led to believe were wiped out by vaccines

* Autoimmune disease occurs when the immune system attacks the cells of one's own body.

CHAPTER 11: Vaccines and Epidemics: The Real Story

"Smallpox, typhus, and other fevers, occur on common conditions of foul air, stagnant putrefaction, bad house drainage, sewers of deposit, excrement-sodden sites, filthy street surfaces, impure water, and overcrowding. The entire removal of such conditions is the effectual preventive of disease of these species, whether in ordinary or extraordinary visitations." —Sir Edwin Chadwick, CB

SMALLPOX

Although Edward Jenner is credited with the discovery of this vaccine, he was not the first to use it, but merely the first to garner acclaim for it because he was an astute businessman and public relations artist. Jenner claimed his "cowpox" vaccinations would give lifetime immunity, but this was quickly disproved as people contracted smallpox and often died after vaccination. Thus was born the popular excuse that people must be revaccinated, not just to cover for the vaccination's failure to protect, but also to cover for the fact that the vaccine often provoked the disease in previously healthy individuals.

The decline of smallpox, as with many other infectious diseases, including diphtheria and scarlet fever, coincided with the sanitation reforms which were instituted in the late 1880s. Where obtainable, government health records from around the world showed that during the periods of the most intense and widespread vaccination, the incidence of and death rates from smallpox were highest. For instance, in Kansas City and Pittsburgh during the 1920s, lawsuits were initiated, and won, against doctors and medical societies for declaring smallpox epidemics when there were none, and for creating epidemics with their vaccination drives.

Before 1903, smallpox was almost unknown in the Philippines, with occurrences in less than 3% of the population, and that in a mild form. The U.S. military went in and began vaccinating, and by 1905 the Philippines had its first major epidemic. Vaccination was made compulsory in 1910. From 1905 to 1923, the mortality rate ranged from 25-75%, depending on the count from the various islands. "The mortality rate was the highest in the cities where vaccination was

most intense.” Dr. W.W. Keen reported 130,264 cases and 74,369 deaths from smallpox in 1921.

Japan adopted compulsory vaccinations in 1872 when they had only a few cases of smallpox. By 1892 they had the largest smallpox epidemic in their history with 165,774 cases and 29,979 deaths.

Australia banned the smallpox vaccine after some children were killed by it, and in the following 15 years in unvaccinated Australia there were only 3 cases of smallpox. (8)

The smallpox vaccine was discontinued in the United States after Dr. Henry Kempe reported to Congress in 1966 that fewer people were dying from the disease than from vaccination. (9)

Mona Stevenson vaccinated for smallpox shortly after the turn of the century. Vaccinated when five weeks old. Photograph taken five weeks later. Death from “Generalized Vaccinia.”

DIPHTHERIA AND PERTUSSIS

According to a 1971 report presented at the Presidential Address of the British Association for the Advancement of Sciences, deaths from diphtheria, whooping cough (pertussis), scarlet fever and measles declined from their peak in 1860 by 90%, *before* the common use of DPT (diphtheria, pertussis, tetanus) shots, circa 1940, and antitoxin just prior to that time. (1)

After French children were inoculated in 1941, diphtheria rates rose dramatically to 13,795 by the end of the year. By 1943, cases of diphtheria had increased to 46,750. At the beginning of World War II, when Germany made vaccination compulsory, the rate of diphtheria reached an all time high of 150,000 cases, while in unvaccinated Norway there were only 50 cases. (11)

The book *Vaccination Condemned*, published in 1981, reports that the "U.S. Public Health Service announced, The number of cases of diphtheria so far this year of 10,335 was not so alarming, but it is 2,500 above the recent norm, and this after the most intense and widespread vaccination with DPT vaccine over the past 45 years." (12)

An article in *East/West* magazine (November, 1988) reports that of 795 cases of pertussis in infants ages 3 to 6 months, 49% of them had been vaccinated. That constitutes a nearly 50/50 ratio, which computes to zero protection. (13)

Dr. Robert Mendelsohn, pediatrician, reported in his newsletter, *The People's Doctor*:

"When DPT vaccine (in Europe) was widely used, doctors were extremely reluctant to officially report cases of whooping cough (because of the work involved with reporting it to the Health Department). Of course the same underreporting tends to take place in other diseases—measles, mumps, polio, German measles, etc., *for which vaccines are available*. On the other hand, if a vaccine is abandoned, as in the case of the pertussis vaccine in England and other countries, then doctors, frustrated and enraged at public rejection, strike back with an epidemic of over-diagnosis. Thus, while earlier real cases of whooping cough were not reported, now every cough is labeled a "whooping cough." (14)

So England reported a higher incidence of whooping cough after the pertussis vaccine lost favor, yet researchers at London's Epidemiological Research Laboratory reported in 1977: "Since the decline in pertussis immunization, hospital admission and death rates from whooping cough have fallen unexpectedly." (15)

But why did the pertussis vaccine become unpopular in England and other

European countries? Because of the damages it causes, including Sudden Infant Death Syndrome (SIDS), retardation, autism, seizures, and paralysis, just to name a few of the immediate and violent reactions.

In his book *The Case Against Immunizations*, Dr. Richard Moskowitz reports the case of a 5-year old boy with chronic lymphatic leukemia. The boy's doctor confided to Dr. Moskowitz (but not to the parents) that the leukemia had first appeared following a DPT vaccination and that, although he had treated the child successfully with natural remedies on two previous occasions, with shrinking of the liver and spleen to approximately normal size and dramatic improvement in the blood picture, full relapse had occurred soon after each successive DPT booster. (16)

According to Dr. Robert Sharpe, in his book *The Cruel Deception*, the diphtheria death rate was well over 1,000 per million children in 1860, but had sharply fallen between 1861 and 1870 to 400, before a vaccine or even an antitoxin were developed." (17)

Some adults who received diphtheria vaccine as children are now coming down with diphtheria. They are being advised by public media to get revaccinated.

Among the "reactions" that admittedly may be caused by pertussis vaccine in the Vaccine Injury Compensation Act of 1984 (H.R. 5810), which was instituted to take the burden of financial compensation off the shoulders of the vaccine manufacturers and put it squarely on the shoulders of the taxpayers, are:

"Hemolytic anemia
Infantile spasms
Aseptic meningitis
Juvenile diabetes
Hypsarrhythmia
Reyes syndrome
Peripheral mononeuropathy
Sudden Infant Death Syndrome (SIDS)

and such other illnesses and conditions as the Secretary may choose to review or as the Commission under section 2108 recommends for inclusion in such

review."

POLIO

The statistics and public health records once again refute the claims and extensive media promotion surrounding polio vaccine. According to surgeon and medical historian Dr. M. Beddow Bayley (who also photographed children in hospital who had died of vaccine poisoning from diphtheria shots), the rate of paralytic polio in 1942 was 39 per 100,000 people, and decreased to 15 cases per 100,000 people by 1952, prior to the introduction of the Salk vaccine. (18)

In a program shown on PBS TV, ironically, designed to praise and propagandize the polio vaccine, it was admitted that when the vaccination program was instituted, some of the children received a placebo, apparently without their parents' knowledge, thus "constituting the greatest experiment of the 20th Century." (19)

Of course, what the people were being told at the time was not that their children would be part of a mass experiment. They were told that the polio vaccine would protect their children from polio. The introduction of the vaccine was preceded by a very carefully planned, funded and executed public relations campaign and news media blitz designed to fulfill the real goal of the polio vaccine: profits. (See further details in *The Poisoned Needle*, originally written during the polio vaccine trials in the mid-1950s.)

What effect did the Salk vaccine have on the polio epidemic? Listed below are public health statistics (U.S. Public Health Reports) from the four states which adopted compulsory vaccination, and the figures from Los Angeles, California (similar results in other states available from books listed at the back of this booklet):

TENNESSEE

1958: 119 cases of polio before compulsory shots

1959: 386 cases of polio after compulsory shots

OHIO

1958: 17 cases of polio before compulsory shots

1959: 52 cases of polio after compulsory shots

CONNECTICUT

1958: 45 cases of polio before compulsory shots

1959: 123 cases of polio after compulsory shots

NORTH CAROLINA

1958: 78 cases of polio before compulsory shots

1959: 313 cases of polio after compulsory shots

LOS ANGELES

1958: 89 cases of polio before shots

1959: 190 cases of polio after shots (20)

As a result, the Salk vaccine was replaced by the Sabin oral vaccine. Because the epidemic itself had been on the downswing for many years (it continued its steady decline in areas where no vaccination centers were set up), and because the Sabin vaccine went through the normal routes of the body instead of directly into the bloodstream, the fiasco which had been created by the Salk vaccine subsided. However, in yet another pro-polio vaccine article (designed to promote a return to the use of the Salk vaccine), The *Los Angeles Times* spilled the beans when it announced that the only cases of polio occurring in the U.S. at the present time (June, 1985) were being caused by the Sabin oral vaccine. (21)

In addition, the Salk and Sabin vaccines had been "cultured" in monkeys, and macerated monkey kidneys constituted an ingredient of the vaccines.

Consequently, cancerous brain tumors containing genetic material from the SV-40 monkey virus have been discovered in people who were vaccinated with the polio vaccines and in children born to mothers who had received polio vaccine during pregnancy. (22)

In October, 1988, a news item reporting a new polio outbreak in Jerusalem stated: "Dr. Walter A. Orenstein, director of the immunization division at the Centers for Disease Control in Atlanta, and member of a team of experts in Jerusalem to advise the Israelis, said, 'We're seeing a number of cases in people who had oral polio vaccine in the past.'" (23)

So-called "health experts" recommended boosters for everyone under 40 years of

age. Over 40 years ago there were no Salk or Sabin polio vaccines. They seem to be admitting that previously vaccinated people are more susceptible to contracting polio than unvaccinated people!

MEASLES

Vaccination Condemned reports that after the largest nationwide measles campaign was staged, "Measles has increased to the worst epidemic in history, with the disease occurring mainly among the vaccinated." (24) It was not surprising when learned from public health records that in 1979 those states with the most rigid compulsory vaccination laws were the ones with the highest percentage of measles, such as Virginia, with 100% vaccination of children and a measles count of 21,424. In 1961, before the measles vaccination, the measles count for the entire country was only 4,283 cases. The 1962 national measles count was even less, with only 3,938 cases. But the measles vaccine, licensed in 1963, increased the measles count to 57,380 by 1980, according to the "Morbidity and Mortality Weekly Report" of the Centers for Disease Control (CDC). (25)

The Measles vaccine also causes post-vaccinal encephalitis, resulting in brain damage and blindness, plus the other illnesses ALL vaccines cause by impairing the immune system. *Vaccination Condemned* also reports that "a new and critical disease developed out of the measles vaccine, which the doctors named 'atypical' measles...so now we find that the nationwide use of the measles vaccine is causing a worse disease...this atypical measles is usually accompanied by a high fever (105-107 degrees), cough, chills, sore throat, diarrhea, headache, convulsions, rash, swelling of glands, cerebella ataxia, encephalitis, and sometimes death." (26)

Measles after vaccination is a worse disease, overall, than measles in unvaccinated children. Its symptoms are generally much more severe, and it is more frequently fatal.

Because many vaccinated children are getting the measles, and some of them are dying, the new battle cry for the "measles epidemic" is, "One shot is not enough!" (27)

The Federal Government Morbidity and Mortality Weekly Report, June 6, 1986, revealed that out of 1,984 non-preventable cases of measles, 80% had been vaccinated on or after their first birthday. In the first half of 1989, measles cases increased to 7,335 (over 1,529 cases during the same period in 1988) after vaccinations had been intensified. Once again, over 80% of the affected school children had been “appropriately vaccinated.” (28)

TETANUS

In the 1920s a direct cause of "lockjaw" was tetanus vaccination. Dr. Mendelsohn confided that in his clinical experience he had seen no cases of tetanus from rusty nails, and that the few cases he did see occurred in malnourished derelicts who had not stepped on rusty nails. He also reported that the finding that those annual (or even more frequent) tetanus shots were counterproductive and could even decrease one's immunity, and that finding led to official recommendations that tetanus boosters not be given more often than once every ten years. He also revealed that the tetanus vaccine has been progressively weakened over the decades in order to reduce the "considerable reaction" caused by it. (29)

An article in the Archives of Neurology (1972) describes cases of brachial plexus neuropathy resulting from tetanus toxoid (shots). Four patients who received only tetanus toxoid noticed onset of limb weakness from 6 to 21 days after the inoculation. (30)

Dr. Mendelsohn also reported that an article published in the *Journal of the American Medical Association* tells about the case of a 23 year old medical student who received an injection of tetanus into his right hand. He later suffered from complete motor and sensory paralysis over the distribution of the right radial nerve. (31)

Dr. H.K. Bourns reported in the British Medical journal (August, 1964) that tetanus antitoxin is unnecessary. (32)

Dr. J.J.L. Albett of Leeds reported in the British Medical journal, April 12, 1971, that tetanus toxoid does not protect, and has a high mortality rate. (33)

Dr. Mendelsohn also shared the following cases: "In Israel a preschool aged child suffered anaphylactic shock due to tetanus toxoid, and another anaphylactic reaction following tetanus 'immunization' was reported in Germany. In West Germany a report appeared of nerve damage to the inner ear by tetanus toxoid. In Poland, researchers reported that 13 of 17 children who were given DT 'immunization' (diphtheria, tetanus) showed significant changes in their electroencephalograms; the main finding was the appearance of seizure activity for the first time or intensification of previously present seizure activity. In Switzerland, tetanus toxoid given during pregnancy was shown to cause a significant increase in incidence of jaundice in the newborn. And in the United States a report was published of recurrent abscess formation associated with hypersensitivity to tetanus toxoid." (34)

Dr. Herbert M. Shelton, who vigorously opposed vaccination on the grounds that it is a blood poisoning procedure, advised that proper cleansing is the most important factor in dealing with cuts or puncture wounds. (35)

RABIES

As pointed out by Marilyn Gavran (who has conducted extensive research on the subject of rabies and rabies vaccine), "Rabies virus lives in harmony in the throats of wildlife in the same way as the strep germ lives in the throats of people until stress upsets the equilibrium and 'causes' disease." There has never been substantial proof provided that the rabies vaccine prevents rabies. (36)

The Humane Education Committee of New Jersey, Inc., stated that those who submit to the Pasteur treatment for rabies often die from the treatment. (37) There are also cases on file of dogs and cats contracting rabies after receiving rabies shots, without having been bitten by another animal.

Mrs. Gavran collected the case histories of rabies on file between the years 1979-1985. In the majority of cases, the person had no known history of a bite. In other cases people were bitten by fully vaccinated dogs, and in one case the afflicted woman had been taking so-called protective rabies prophylaxis over a period of months prior to contracting the disease. She adds, "You might note there have been apparent human-to-human transmissions of 'rabies' as a result of corneal transplants." (38)

As for laboratories being able to diagnose what is and isn't rabies, the CDC (Centers for Disease Control) reports that "*antemortem* [before death] diagnosis of rabies is difficult and often unreliable." (39)

The Pasteur treatment was hailed as a life saving miracle after he supposedly "cured" Joseph Meister with it. However, carefully omitted from most mainstream literature on the subject is the fact that others were bitten by the same dog on the same day that Meister was bitten. They did not receive the Pasteur treatment and they did not get rabies. (40)

In his book *Pasteur: Plagiarist, Imposter*, R. B. Pearson reports that in England three thousand people died after being bitten by dogs and then taking the Pasteur treatment. In 1902 a British commission investigated those results, and consequently the Pasteur Institutes were abolished. Subsequently, 2,668 persons bitten by dogs were treated for the bites without Pasteur shots, and none of them developed hydrophobia. (41)

Gavran writes, "The best way to take care of a bite wound is through washing with soap and water. Add C internally and, voila, no rabies." (42)

Since 1937 it has been known that Vitamin C inactivates rabies virus. It was reconfirmed in 1975 and again in 1984 at the CDC. (43)

Dogs and cats have suffered hair loss, skin rashes, paralysis, blindness, convulsions, bloat, rabies, autoimmune diseases, collapse, and death from rabies shots. The ever increasing number of cancer, leukemia, kidney, liver and heart damage cases in companion animals are related to the increased use of vaccines, drugs, pesticides (flea dips, sprays, collars), and to the denatured commercial foods they are consuming.

The author's father, James W. Marston, Ventura, California, developed a near fatal illness after a yellow fever shot administered by the US military in 1942.

FLU

Flu, like other so-called "infectious diseases," is a symptom of the body's efforts to cleanse itself of toxins. The author has spoken with literally dozens of people who have contracted the flu after receiving flu shots (and other types of shots), and this is not surprising, since all vaccines contain highly toxic materials. Those who don't experience symptoms after the shots should be even more concerned than those who do, because if the body does not mount an effort to eliminate the toxins, then it is harboring those toxins for more serious diseases such as cancer.

Dr. L.C. Appel wrote, "The fact that vaccination is either,

a) adding disease to a body already weighted with disease, or else,

b) the giving of a disease to a perfectly healthy body, is the medical reason why

some of us (medical doctors) oppose vaccination and urge its abolition. A perfectly healthy body is proof against natural disease. A diseased or unhealthy body can never be rendered healthy by inoculation or vaccination." (44)

Vaccination Condemned reports that some of the after effects or reactions from the shots are: "Fever, malaise, toxicity, tenderness and redness at site of the injection, wheals (large, spreading swollen spots), respiratory problems, collapse, paralysis which may occur within a few hours after the vaccinations, although many cases do not begin until several weeks or months." (45)

In an issue of "CFIDS Chronicle" Physicians Forum under "general recommendations" is this advice: "Do not take an annual flu shot. Current theory suggests the risk of adverse reactions may outweigh any benefits." (46)

It was because of the damage claims filed after the swine flu vaccination program in 1977 (amounting to over 3 billion dollars) that we now have a law mandating that the government (i.e., the taxpayers) pay off the damage claims for all vaccine related deaths and disabilities, while the pharmaceutical industry continues to pocket the profits.

TUBERCULOSIS

The TB "skin test" implants tuberculosis in otherwise healthy people. The scratch on the skin with some tuberculosis applied does allow the disease causing agent to enter the bloodstream, causing reactions from mild to severe (including death). (47)

In the Spring, 1992, PRISM newsletter there appears a personal testimony of a victim of the TB test. His "reaction" involved great difficulty in breathing, which progressed to a collapsed lung and hospitalization. (48)

In the absence of the dangerous and often inaccurate TB test, how may people determine if they are infected with tuberculosis? There are usually outward signs if there is an unhealthy condition of the body. An examination by a *competent* doctor is more reliable than a test which can cause disease and also give false readings. (49)

HEB (Hemophilus Influenzae Type B Disease)

Perhaps you have seen the recent recommendations to vaccinate newborn babies with the HIB vaccine. In a 1986 report in *The New England Journal of Medicine*, the results of a "field trial" conducted in Finland showed that the vaccine "had no efficacy in children younger than 18 months, and uncertain efficacy in children 18 to 23 months old." (50) The main topic of the report, however, was an American study of fifty five children between the ages of 18 to 47 months who had been vaccinated with HIB and who developed HIB disease. It was reported that ten additional cases of HIB disease occurring in vaccinated children were excluded from the study because they came down with the disease within three weeks of being vaccinated and "there may not have been sufficient time for the production of protective levels of serum antibodies." (51)

One of the inoculated was an African-American child already infected with sickle cell disease, and the article admitted "he was known to have a host factor that would have predisposed him to invasive bacteria disease." Why, then, did they inject him with an infectious agent? Two other children "who had shunts from the central nervous system to the peritoneal cavity may also have predisposed to bacterial meningitis. One of the children with a shunt had been born prematurely and had a history of bronchopulmonary dysplasia and recurrent pneumonia." (52)

Thirty-nine of these fifty-five vaccinated children developed meningitis, "three of whom died, and six had neurologic sequelae, epiglottis occurred in nine, cellulitis in two, bacteremia without focus in two, osteomyelitis, septic arthritis and pneumonia in one each."

The report uses the terms "no efficacy" and, especially, "vaccine failure" numerous times, with never an admission or indication that introducing toxic chemicals, viruses and/or bacteria into the bloodstreams of little children can actually *cause* disease to occur.

RUBELLA

Readers may have seen the episode of ABC's "20/20" featuring women, most of whom were doctors or nurses, who had developed serious side effects from

rubella shots, with symptoms ranging from arthritis to chronic fatigue, and including various other autoimmune disorders. In the course of the program, however, it was recommended that in order to avoid the crippling side effects experienced by adults, the shots should be administered in early childhood. Apparently the producers of the show were not familiar with studies which showed damage caused to children by rubella shots, including the Health, Education, and Welfare report from early 1970, which shared the fact that "as much as 26% of children receiving rubella vaccination in national testing programs developed arthralgia and arthritis." (54)

But is the vaccine effective? Do the so-called "benefits" outweigh the risks?

In October 1972, a seminar on rubella was held at the Department of Pathology, University Department, Austin Hospital in Melbourne, Australia. Dr. Beverly Allen, a medical virologist, gave an overwhelming evidence against the effectiveness of the vaccine. So stunned was she with her investigations that it caused her, like a growing number of scientists, to question the whole area related to herd immunizations. Dr. Allen described two trials, the first trial concerned army recruits who were selected because of their lack of immunity as determined by blood tests. These men were given Cendevax, an attenuated rubella virus that is supposed to protect. They were then sent to a camp which usually has an annual epidemic of rubella. This occurred three to four months after they were vaccinated, and 80% of the so-called immune recruits became infected with rubella virus.

A further trial shortly after this took place at an institution for mentally retarded people with similar effects. Additional disturbing evidence was sent to us by a Melbourne GP who was in the United Kingdom at the time that Chief Health Officer Sir Henry Yellowlees, had released a press statement (February 26, 1976) informing doctors that, in spite of high vaccination figures, there had been no detectable reduction in the number of babies born with birth defects. (55)

"This misleading immunity from rubella vaccine must be emphasized because of the occurrences of congenital rubella syndrome in infants born of mothers believed to be protected from rubella due to the presence of rubella vaccine-induced antibody as described in "Congenital Rubella after Successful Vaccination" (*The Medical Journal of Australia*, June 12, 1982, p. 514)." (56)

CHOLERA

The cause of cholera is known, and the only real cure for cholera is to remove the cause. We have heard and read a lot of media propaganda in favor of every type of vaccine imaginable, and cholera vaccine receives its share of adulation in print. The Orange County Register carried an article entitled "New Cholera Vaccine Going to South America." In between the praise and promises, however, was this little addition: "Jan Holmgren, who helped develop the vaccine, said he doubted that it would be able to stop the disease in Latin America," and the article's concluding paragraph confirms, "...contaminated water and food transmit cholera." (57)

We should be learning, at least from the experiences of Drs. Kalokerinos and Dettman in Australia, p. 19, that introducing toxic substances into the body is far from the ideal or realistic way to prevent or halt an epidemic of disease that already results from toxemia.

CHAPTER 12: Vaccines and School Admission

Concerning vaccinations you may ask: "Isn't it true that my child will not be admitted into school without vaccinations?" The answer depends on what state you live in.

There are currently 21 states in the U.S. which allow exemption from vaccination on philosophical grounds. This means one does not need a medical exemption or a religious exemption (required in some other states). The purpose of including such an exemption clause is not altruism on the part of the vaccinators. On the contrary, before the law recently passed that made the taxpayers responsible for their own vaccine damages, the personal beliefs exemption clause proved to be a handy bit of small print which absolved the vaccine labs and the schools from damage suits, for it makes the decision to vaccinate the child the parents' responsibility. They just don't tell you it's there, so if you fail to read the fine print, that's your fault. And never mind that they lie to us constantly on radio, T.V., and in the printed news media, telling us that children must, by law, be vaccinated in order to be enrolled in public school.

The 21 states that, as of this writing, allow exemption from vaccination for "personal beliefs" are: California, Washington, Idaho, Utah, Arizona, Montana, Colorado, North Dakota, Nebraska, Minnesota, Oklahoma, Missouri, Louisiana, Wisconsin, Michigan, Indiana, Ohio, Maine, Vermont, Rhode Island and Delaware. (The laws pertaining to California are listed on the following page.)

Now that the law absolving vaccine manufacturers of liability in damage cases has appeared, *be on the lookout for efforts by the pharmaceutical industry to have personal exemption waivers rescinded.*

CHAPTER 13: Your Rights Concerning Vaccines

For parents in California who wish to file a personal beliefs exemption with their school board, the waiver is in Section 6051 under Article 3 of Title 17 of the Regulations of California School Admissions. State Senate Bill 942 also ensures that children may be enrolled in public or private school with exemption from vaccination. Elben also reports in *Vaccination Condemned* that for those who want to travel without vaccinations, the International Sanitary Regulations of the World Health Organization provides for an exemption in Article 83 of Chapter IV. (58)

For those who live in states which do not have a personal beliefs exemption and for some reason cannot obtain a religious or medical exemption, Elben (*Vaccination Condemned*) recommends demanding a "Vaccination Guarantee," in writing, from the school board and the doctor or nurse administering the shots. This guarantee would hold them financially liable for damages caused by the vaccination.

If this can be drawn up on a paper with a law firm letterhead and signed by an attorney, all the better. Elben cited the case of a lawyer who submitted such a letter, stating the vaccinator (s) and the school district would be responsible for medical costs and punitive damages if his child developed adverse reactions or died after vaccination, and was able to have his child admitted into school without being vaccinated, in a state which did not have a personal beliefs waiver.

Attorney Thomas G. Finn has written that "Officials who advocate compulsory 'immunizations are, in effect, advocating the taking of one of our basic freedoms from us; that is, the freedom of choice referred to in the Declaration of Independence as the right to life, liberty and the pursuit of happiness."

He also advises parents to remember that the relationship between parents and the pediatrician is contractual, and if the doctor attempts to intimidate you on the subject, you have the option to discharge him or her as your child's doctor. He suggests that doctors may be found on physicians lists obtained from groups like LaMaze, Laleche, NAPSAC, the Seventh Day Adventist Church, and midwives,

and that the doctor should be interviewed "as any other servant" to determine if he or she will conform to your wishes regarding what type of medical treatment your children will and will not receive. (59)

CHAPTER 14: The Real Solution: Natural Health

People also often ask how they can protect their children from diseases if they don't vaccinate them.

First of all, they are being misled by the deceptive publicity which tells them vaccination prevents disease. But there are ways to build strong immune systems and maintain good health, and they are all *natural*.

Information on health promoting diet is contained in books such as *Vegan Nutrition. Pure and Simple and Pregnancy, Children, and the Vegan Diet* by Michael Klaper, M.D. In addition, properly purified water is vital to good health.

It is also of great importance to promote a healthy, positive mental attitude, a clean environment and good stress management.

In countries where the death rates are very high from so-called "infectious diseases," we find that there are corresponding rates of malnutrition and poor living conditions. Wherever the "care" charities go with their food supplies and equipment for improving the living conditions, they are now accustomed to including vaccines in their kits without question.

In his book *Every Second Child*, Dr. Archie Kalokerinos describes the deaths of Aboriginal babies, which he attributes to malnutritional/vaccination interactions: "A health team would sweep into an area, line up all the Aboriginal babies and infants and 'immunize' them...Most infants would have colds. No wonder they died. Some would die within hours of acute vitamin C deficiency precipitated by the immunization. Others would die later from pneumonia, gastroenteritis, or malnutrition. If some babies and infants survived, they would be lined up again in a month for another immunization. If some managed to survive even this, they would be lined up again. Then there would be booster shots, shots for measles, polio and even T.B. Little wonder they died. The wonder is that any survived.

"I almost shook with horror at the thought of what had been, and still was going on. We were actually killing infants through lack of understanding...I have no

doubt that some so-called 'cot-deaths' are in fact acute vitamin C deficiencies, and these can occur even if the diet is adequate...First, there is an increased utilization of vitamin C (after vaccination)...This deficiency lowers immunity, and the immunizing agent adds to this temporary lowering. An infection such as pneumonia or gastroenteritis is likely...thus an infant may die a few days or a few weeks after being immunized." (60)

Proper diet and improved living conditions are necessary to better health. But it seems we cannot render this type of aid to depressed countries without the pharmaceutical industry getting in on the act to sell more vaccines, actually interfering with the good efforts being made to help malnourished and diseased populations.

CHAPTER 15: Resistance to Natural Health: The Illness Industries

New information on the subject of proper nutrition has been coming to the forefront, although it has been contradicted and denied by the meat, dairy and sugar lobbies. Although this type of information has always been in existence, it was suppressed, and derided where it couldn't be suppressed, because there is not a great deal of money to be made by the medical industry, drug industry, and several other large corporations if people know and practice the "secret" of good health.

It is only after the information leaks out (usually by word of mouth) to such an extent that it would be an extreme embarrassment not to acknowledge it, that medical associations and charities not only jump on the bandwagon, but turn around and take credit for the "discovery" that proper nutrition leads to natural good health.

The pharmaceutical/chemical/agribusiness/oil/biomedical "research" conglomerate creates a formidable coalition of influence in the media, politics and business, to shape America's (and the world's) eating habits. Thus, while we have children's hospitals for the "treatment" of cancer, leukemia, and other autoimmune diseases (caused by various forms of pollution, poor nutrition and vaccination), these same children's hospitals are setting up burger joints on their premises so the sick children can eat chemical and antibiotic laden meat (poisonous in itself, as putrefying flesh always is), and drink sugar and chemical laden colas. In fact, one well known burger franchise, which is destroying the environment by cutting down rainforests for grazing land and marketing toxic food, has their own children's hospital for children with cancer

It is important to keep in mind that there is currently a plan in motion within the Medical Establishment to take away our freedom to refuse invasive procedures—vaccination in particular. The first testing ground appears to be welfare mothers, as recent news articles have reported that mothers receiving welfare might be refused aid if they don't have their children "immunized." (61)

CHAPTER 16: Observations on Vaccinations and the Medical Profession

It is hard to resist or ignore the constant headlines and warnings in the media about dire consequences if one is not vaccinated. We hardly ever hear about the damages (until too many people who are suffering damages have compared notes), and when that information is publicized, it is accompanied by assurances that "the benefits outweigh the risks" and that it's still better to be vaccinated than not vaccinated. Perhaps some of the following revelations will help foster an understanding of why the American public is continuously lied to about the safety and efficacy of vaccination:

"I have been on the staff of the New Jersey State Department of Health, and was in complete charge of the Monmouth County Cerebral Palsy Treatment Center. For the past three years I have been director of the Homestead Rehabilitation Institute (and still am as of this writing). My experiences have enabled me to observe from within the workings of official medicine. At first I could not believe what I saw...Were the truth concerning medical treatment and so-called prevention ever to leak out, the stench of it would obliterate the public confidence in the medical profession and put an end to the fantastic drug profits." (62) —Dr. Milton Fried, D.C., 1956

"The Rockefeller interests own controlling stock in 80% of the drug industry. The drug industry controls 90% of advertising media. Rockefeller Foundation endows medical schools, and 'he who pays the piper calls the tune.' Drug interests control the American Medical Journal through advertising. Rockefeller controls every medical health related agency—Food and Drug Administration (FDA), U.S. Public Health Services (PHS), Health, Education and Welfare (HEW), Center for Disease Control (CDC), and the World Health Organization (WHO)." (63) —The Voice of Liberty, Decatur, GA., 1955

"No other profession has anything like the large and well organized membership and corresponding political power and influence of the medical profession in the body politic." (64) —Dr. Eleanor McBean, PhD, ND, 1981

"This item concerns payments made to U.S. Lawmakers by organizations

interested in keeping the present fraudulent medical system going. I have reported that American special interest groups 'showered a record 22.6 million on candidates in 1976 and that the top donors were the medical associations with \$1,790,879." (65) —Hans Ruesch, medical editor and historian, 1978

"The public press of today is largely governed by the orthodox rulers in the medical profession." (66) —Dr. Walter Hadwen

"Even the most independent newspapers are dependent on their press associations for their national news. And there is no reason for a news editor to suspect that a story cooking over the wires of the Associated Press, the United Press or the International News Service, is censored when it concerns health matters. Yet this is what happens constantly...The Journal of the American Medical Association (JAMA), the organ of the Medical Syndicate in the U.S., had bragged as far back as January 20, 1940, that the United Press had been induced to issue a directive requiring all articles on cures and human health to "be cleared through its New York bureau and 'science editors.'" (67) —Hans Ruesch, 1982

CHAPTER 17: Quotations from Doctors and Scientists about Vaccinations

Vicki Hood, Roseburg, Oregon, developed symptoms within ten days of a gamma globulin inoculation: Diagnosed as multiple sclerosis.

"Vaccines have never had the proclaimed preventive effect on infections. The regression of infectious diseases started over 200 years ago, which means long before the introduction of vaccination, and it was due to the improved social conditions of the population: nutrition and hygiene. Contrary to general belief, the vaccinations have had a negative influence on the decrease of the infective maladies and mortality. Statistics started off at a period when the infectious diseases were already on the downgrade. Careful studies over a period of many

years have revealed that each introduction of a mass vaccination has obtained only one result: the immediate recrudescence of the malady that the vaccine should have prevented, but which has solicited instead. The temporary but immediate isolation of infected patients has each time proved sufficient to prevent an epidemic...Vaccines don't protect, but do harm. A scientific proof of their usefulness has never existed, whereas the severe, sometimes fatal, damages they cause are a proven fact." (68) —Dr. Gerhard Buchwald, MD

"The vaccination modifies the terrain of the vaccinated, driving it towards the acidic and oxidized terrain—the terrain of cancer. The fact can no longer be denied." (69) —*Revue de Pathologie Generale al de Physiologie Clinique*

"It is necessary only to read on the dials of a physical measuring apparatus the ratings of the 3 characteristics of the blood. The pH, the rH2 and the electric resistance. The findings are that all vaccination has the effect of directing the three values of the blood into or toward the zone characteristics of cancer and leukemia...Vaccines do predispose to cancer and leukemia." —Prof. L. C. Vincent, founder of Bioelectronics

"I am thoroughly convinced that the increase of cancer is due to vaccination." (71) —Dr. Forbes Laurie, Medical Director of the Metropolitan Cancer Hospital, London, "Vaccination the Silent Killer"

"...But suppose we included in our propaganda a candid account of the various untoward 'accidents' which have accompanied the procedure (vaccination): If we boldly told the whole truth, it is doubtful whether the public would submit to inoculation." (71) —Dr. D.C. Okell, *The Lancet Medical Journal*

"Besides diseases of an acute nature, chronic degenerative diseases have also been reported to follow vaccination. Stovieck (1959), Paffy and Merai (1961), McAlpine (1964), and numerous German authors described the occurrence of multiple sclerosis following the administration of vaccines against smallpox, typhoid fever, paratyphoid fever, tetanus, poliomyelitis, tuberculosis and influenza, and after injection of anti-diphtheria serum and gamma globulins. Zintchenko (1965) reported twelve patients in whom M.S. first became evident after a course of anti-rabies vaccinations." (73) —Dr. Henry Miller, MD

"Although the body generally will not make antibodies against its own tissues, it appears that slight modification of antigenic character of tissues (via vaccination) may cause it to appear foreign to the immune system and thus a fair target for antibody production resulting in autoimmune diseases." —Peterson and Good

Some M.D.'s and D.V.M.'s declare live virus vaccines as the culprit, and recommend killed virus vaccines. The author agrees with veterinarian Dr. John Saxon that the difference between live and killed virus vaccines is "rather like asking a man about to be hanged whether he would prefer to be dropped six or eight feet!" (75)

Dr. Robert Mendelsohn warned us to beware of "new, improved" vaccines. History has shown us that "new, improved" vaccines have been just as dangerous and lethal as their predecessors.

CHAPTER 18: Vaccines and Animals

Allopathic (pharmaceutical, viral, chemical) vaccines are poison. Vaccines for animals are harmful, even deadly, to them, as well. The major causes of disease are stress, unhealthy diet, and exposure to pollutants.

The author has known of many vaccinated, as well as unvaccinated, domestic animals which came down with diseases such as parvo, distemper and feline leukemia. She has also observed the high resistance to disease in animals fed a pure, natural diet, given clean, purified water, and kept away from pesticides and vaccines.

There is also a renewed and growing interest in homeopathy and homeopathic nosodes, which are much closer to the public's concept of what vaccinations are and should do. Homeopathic immunizations boost the immune system and have never been known to cause any disease or side effects. They have also been used to fight off the toxic effects of the pharmaceutical vaccines.

In a report titled "Current Issues on Vaccine Safety and Efficacy," Dr. W. Jean Dodds relates that immune mediated hematologic disease and transient bone marrow failure and leukemias-lymphomas in dogs have been caused increasingly by vaccination with modified live parvovirus and other vaccines. She adds, "Adverse reactions to vaccination have also recently been reported with increasing frequency in cats, especially kittens."

Honey Bear, companion cat to Mary Abbey, Santa Paula, California. Received 3-in-1 kitten shot in 1987 and subsequently experienced convulsions open sores at the site of the injection, permanent hair loss at the vaccination site and neurological damage.

An article titled "Damage Following Immunization" tells us that bloat, stained teeth, ulcers, chronic gastroenteritis and seizures are also being attributed to vaccination, and that "there is an awakening recognition among veterinarians of the connection between immunizations and various illnesses." (77)

After conducting controlled studies of the effects of both vaccination and homeopathic immunizations for kennel cough in dogs, Dr. C.E.I. Day concluded: "Vaccination against kennel cough is not an advantage to the dog, but, on the contrary, appears to constitute a health risk." (78)

Sophie, Afghan Hound, Ventura County, California. Received rabies shot May 24, 1991. By June 2, 1991, she was completely blind, No previous history of vision problems.

Pamphlet number three of the Florida League for Humane Progress, St. Petersburg, Florida, quoting the Delson Chemical Company, states, "The compulsory inoculation of your dog is unconstitutional, unnecessary, troublesome, expensive, very dangerous, and many dogs develop paralysis, blindness, convulsions, and frequently die...We have had the opportunity of making careful observations of inoculations in canine diseases, and we have been forced to the conclusions that not only are inoculations entirely unreliable, but are exceedingly dangerous." (79)

Dr. J.E.R. McDonough, FCRS, in the June/July, 1981, issue of Outrage magazine, wrote, "Immunization with an attenuated virus cannot prevent distemper. The author has treated many dogs which have developed distemper despite two or three injections of the preventative agent. He is of the opinion that

fits, chorea hystera, etc., in dogs have become more frequent since the use of distemper vaccine. Successful prevention will never be achieved by inoculation."
(80)

ADDENDA

Vaccines for Animals

A news item titled "Firms Seeking an AIDS Vaccine Ask Protection," subtitled "If serum is discovered, they say, threat of lawsuits could block distribution" appeared in the November 29, 1988, Los Angeles Times. The article deals with the fact that the companies producing the swine flu vaccine in 1976 demanded and received impunity from the deaths and damages caused by their vaccine. They apparently knew these deaths and damages would occur because they applied for exemption from liability before the vaccine was distributed. Now prospective manufacturers of an AIDS vaccine have been seeking the same protection against financial liability. And remember, when such protection is granted by the government it is we, the taxpayers, who incur the expenses of the damage suits while the drug companies reap the profits.

Cartoon courtesy of CIVIS

An article dated April 14, 1991, in Los Angeles' Daily News, headlined "Three Volunteers in AIDS Vaccine Experiment Died." In the text we find: "At least three of 19 volunteers who took part in a controversial AIDS research project have died, apparently from the effects of the vaccine-like preparation with which they were inoculated. The three deaths...occurred last year in Paris. But they have never been reported in medical journals. When the French and American scientists collaborating in the experiment published an account of their research last year, they reported that there had been no deaths among the subjects. At the time the article appeared, two of the subjects had died." The report goes on to tell us that the patients had died of "necrotizing vaccinia" and that "the preparation used in the experiments was made from vaccinia, a virus that causes cowpox in cows, into which a piece of the "AIDS virus" had been genetically inserted by scientists at the National Institutes of Health (NIH) in Bethesda, Maryland.

"Vaccinia disease is an extremely rare, and when untreated usually fatal relative of smallpox that eats away skin and tissue and causes necrotic lesions."

A front page article in the *London Times*, May 11, 1987, headlined, "Smallpox Vaccine Triggered AIDS Virus," reported the spread of AIDS through intensive vaccination promoted by the World "Health" Organization in Africa and Brazil. Upon reaching the Associated Press, United States Press International, and Reuters in the U.S., the report never reached the American public.

In 1978, the hepatitis B vaccine was given to thousands of homosexual men in major cities throughout the United States. According to Dr. William Campbell Douglass, the hepatitis B vaccine "exhibits the exact epidemiology of AIDS" and that, "homosexual males between the ages of 20 and 40 years, who were not monogamous" were targeted for vaccination.

A PBS TV documentary (designed to laud the vaccination project) revealed that homosexuals were actively solicited to participate in the experiment by being told that this vaccine would protect them from hepatitis B. Each vaccine recipient was issued a secret number. The PBS program stated that some of the recipients had received a placebo, so it was obviously an experiment, although the vaccine recipients were not told that they were being used for experimental purposes.

(NOTE: There are other types of "vaccinia besides "necrotizing vaccinia and, therefore, vaccinia disease is more common than the article suggests. In addition, it is this author's understanding that necrotizing vaccinia is not treatable. If it were, then the volunteers who died, having been under doctors care, should have been treated and survived.)

Dr. William Campell Douglass has written, "The Centers for Disease Control reported in 1981 that 4% of those receiving the hepatitis vaccine were AIDS infected. In 1984 they admitted to 60%. Now they refuse to give out figures at all."

In the PBS program, the hepatitis B vaccine was referred to as a human blood product, obtained from homosexuals suffering from hepatitis B. The program

narrative also stated that this blood product was so virulent that if the truck transporting it had gotten into an accident, and the blood product spilled, it would present a most dangerous contamination to the general public.

The smallpox vaccine has always been produced using "calf lymph" or "fetal calf serum." The calves used for producing the vaccine can very often harbor "bovine leukemia virus," which isn't ordinarily communicable to people, but, according to Dr. Robert Strecker, can be when it is attenuated in human tissues to make a vaccine. A book written in 1933, titled "The Golden Calf" (by Charles W. Forward; John M. Watkins, Publisher), contains photographs of people dying of a "wasting" disease after having received their smallpox vaccinations, as well as photographs and descriptions of people having contracted "sleeping sickness" from smallpox vaccinations. Sleeping sickness is now also reported to be at epidemic proportions in Africa.

As covered in the section on polio, the SV-40 monkey viruses have caused cancerous brain tumors in recipients of polio vaccine, and documented reports of different types of cancer and leukemia have followed in the wake of vaccinations of all kinds.

Consider this June 26, 1991, report headline from the New York Times News Service: "Child Cancer Rates Climb, Study Finds," subtitled, "Cause of rising malignancies unknown." And how about the October 17, 1990 Associated Press headline: "Increase in Brain Cancer Alarming." Not a hint of the many toxic causes of disease in our outer and inner environments, including vaccination, in either of these articles.

A news release headlined in the Orange County Register, "50's Polio Vaccine Could Be Source of AIDS, Scientist Says," and dated March 5, 1992, reported that a researcher named Robert Bohanon discovered "some stocks of polio vaccines used in Chicago in the mid-1950s have tested positive for the monkey virus." He adds, "Prominent polio researchers such as Jonas Salk and Albert Sabin confirm that the vaccines administered to millions of people around the world were later found to be contaminated with numerous monkey viruses. Bohanon reported last November while doing research at Baylor College of Medicine that he found the monkey virus in the tumor of an AIDS patient who had no known contact with monkeys."

A report by Daniel Q. Haney, Associated Press, appeared in the Los Angeles Times October 25, 1987. Its headline read, "Both Cause and Cure of Multiple Sclerosis Still Elude Scientists." Yet the British Medical Journal reported on April 22, 1967, more than 20 years earlier, "Chronic diseases of an acute nature, chronic degenerative diseases have also been reported to follow vaccination. Stovicek (1959), Paffy and Merei (1961), McAlpine (1964), Morris, and numerous German authors described the occurrence of multiple sclerosis following administration of vaccines against smallpox, typhoid fever, paratyphoid fever, tetanus, poliomyelitis, tuberculosis and influenza, and after injection of anti-diphtheria serum and gamma globulins. Zintchenko (1965) reported twelve patients in whom MS first became evident after a course of anti-rabies vaccinations."

Dr. William Campbell Douglass' weekly newsletter, AIDS FAXx, had this to say in the June 16, 1989, issue:

"Researchers have discovered that the blood of people with multiple sclerosis (MS) contains a virus previously associated only with leukemia: HIV-I, or bovine leukemia virus. This cattle virus causes T-cell leukemia in man and also tropical sclerosis, and also tropical spastic paraparesis (TSP), a rapidly degenerative neurological disease similar to multiple sclerosis, except faster in its progression. The source of these HTLV-I infections, and possibly the cause of their multiple sclerosis, is obvious from the scientific literature, but most scientists are reluctant to discuss it because it's a terrible indictment of all immunizations.

"It is clear from the scientific literature that fetal calf serum, and other animal sera and animal tissues used to make vaccines, are heavily contaminated with animal viruses. The one of most importance in the case of multiple sclerosis is the bovine leukemia virus...a high percentage of calf sera used for making vaccines have been found to be contaminated with this cancer causing and MS-causing virus. Of equal importance is the contamination of these sera, used for vaccinations, by the AIDS virus itself. The AIDS virus, which is bovine visna virus (BWV) has been shown to be present in a large percentage of the fetal calf serums used for cell cultures.

“HTLV-I, BWV, and possibly other of these pathogenic viruses, cause various neurological symptoms. If six out of six patients suffering from MS in the Lund study were found to be positive for HTLV-I, then one can assume that the patients multiple sclerosis came from this viral contaminant.”

Dr. Richard Moskowitz has written, "Since routine vaccination introduces live viruses and other highly antigenic material into the blood of virtually every living person, it is difficult to escape the conclusion that a significant harvest of autoimmune diseases must automatically result."

In August of 1992, the media reported that U.S. troops had returned from the Persian Gulf with strange symptoms suggestive of autoimmune disease. The excuses for these symptoms focused originally on oil fires in the gulf, and by October, 1992, laid the blame on sand flies (Joseph Albright, "1,000 Gulf Vets May Have Parasite Causing Ailments Decades in Future," Pasadena Star News, October 10, 1992). Only once did the author hear a military doctor (interviewed on late night/early morning television news, never to be repeated during prime time) state that one of the causes "might be the immunizations they received."

The troops sent to the Persian Gulf received not only the standard immunosuppressive shots given by the military, but also a new experimental "biological warfare" vaccine (*Orange County Register*, January 4, 1991, page A26, by Gina Kolata of the New York Times).

Explosion of enthusiasm in a research laboratory at the discovery of a new funding. Cartoon courtesy of CIVIS.

The article, "Troops in Persian Gulf to get Experimental Botulism. Vaccine," states, "On Dec. 21, 1990, the Department of Defense obtained a special waiver needed to require troops to take experimental drugs and vaccines, in case of combat or "threat of combat." Although troops must accept standard medical treatments, until now they have not had to accept experimental ones without signing an informed consent agreement."

"Modern science is just beginning to investigate and in some measure to document genetic transcriptions resulting from vaccinations. Dr. Robert W. Simpson of Rutgers University has suggested that immunization programs against influenza, measles, mumps, and polio may actually be seeding humans with proviruses which will then become latent in cells throughout the body. Of diseases that could be caused in this manner, according to Simpson, the chief possibilities are rheumatoid arthritis, multiple sclerosis, lupus erythematosus, Parkinson's disease and cancer.

"American virologists have shown the RNA virus (in vaccines), although not containing DNA material within their structure, are able to form DNA and become integrated with the cells that they infect" (from The Dangers of

Immunization, The Humanitarian Society, Quakertown, PA, 1979).

"In point of fact, we already practice biological engineering on a rather large scale by use of live viruses in mass immunization campaigns" (Joshua Lederberg, Department of Genetics, to Science magazine, October 20, 1967, page 313).

But for researchers receiving government grants to continue experimenting in the alleged attempt to find the causes and cures of autoimmune diseases, for the big business industries which profit from "treatments" for disease, and from products which create disease, two plus two must always be translated into infinitely more complicated equations in order for confusion to continue to surround the issues. If answers were made evident, the funding would stop.

This booklet is intended to give only a brief cross-section of information. For more detailed information, you may want to send for the books listed at the back of this publication.

CHAPTER 3: Vaccination—The Silent Killer

PART 3: VACCINATION: THE SILENT KILLER

A Clear and Present Danger

Dr. Eleanor McBean, PhD, ND

Ida Honorof, consumer activist

FOREWORD

I feel most honored that I have been asked to write this foreword and I am most pleased to do it.

The authors have taken on a mammoth task—that of attempting to convince the intelligent members of the public that they have been so consistently lied to and brainwashed by the government and medical practice that they actually believe the myths and fantasies which are endlessly spewing forth from these two 'authoritarian' institutions. I put “authoritarian” in quotations since the only authority they actually have with respect to health and disease is what they have concocted for themselves—totally counterfeit authority, and all based on lies, superstitions, barbaric sterile theories, and their lust for personal wealth and power.

The public only believes what it does because no one has been strong enough to reveal the truth by publicly challenging the charlatans with questions and facts which thoroughly refute their claims. Whenever such challenges have been made, they have been squelched by a conspiracy which includes government medical practice, and even the news media and the courts, as we found to our dismay in the 1976 swine flu hoax which we publicly exposed long before the massacre began.

In order to preserve their authoritarian status and simultaneously fill their already overstuffed pockets with more of the victimized public's money, the following claims have been made by medical practice and supported by money-hungry, power-hungry and ignorant members of the government in the Executive branch, the Congress, the courts, and state and local agencies:

1. Germs, or bacteria, cause disease.
2. Viruses cause disease.
3. Cures for cancer and other diseases are imminent if enough public money is forthcoming.
4. Vaccines can prevent diseases and have virtually wiped out smallpox, polio, measles and others.

These are only a few of the wild claims made by the medicine men, and gullibly swallowed by the public. But I assure the reader, these are all lies and no solid evidence can be produced to support them, while there is abundant evidence to prove them wrong. The claims that drugs, chemotherapy, radiation, or surgery can 'cure' diseases are absolute lies, as may be witnessed by their absolute failure and incessant changing, over the years. The medicine men will violently argue to the contrary for their own self-preservation, but they cannot produce any legitimate support for their argument. There is abundant evidence to prove them wrong.

My space is limited here, so I will use it primarily to present information which should make intelligent people think those with preconceived opinions, beliefs and prejudices are generally too weak and ignorant to think for themselves and blindly accept what the 'doctor' tells them, so this is not for ignorant un thinking people.

First I want to say that there is not, and never has been, even a shred of evidence to prove that germs and viruses can or do cause diseases. The world is literally saturated with bacteria, and if they really 'attacked' people the earth's population would have been extinct millions of years ago. The same thing is true of viruses. The medicine men had the public convinced as recently as 100 years ago, and for

many centuries before that, that the sole cause of all disease was 'evil spirits'—something which couldn't be seen but which "invaded" and 'attacked' a person's body. When public skepticism became strong, along came Pasteur with his germs, so the medicine men immediately abandoned the 'evil spirits' they had held on to for so long and quickly adopted the 'germ theory' (a fairy story of all diseases, and convinced the public that it was tiny invisible germs which caused all diseases, by "invading" and attacking a person's body.

In the early part of the 20th century there was growing public skepticism about the germ theory since intelligent people began to realize that germs were everywhere in abundance, and yet the public survived, plus the fact that, in spite of the medical 'attacks' on germs, all the old diseases continued to exist with many new diseases arising as well—the numerous iatrogenic diseases caused by the medicine men and their witches' bags of drugs, medicine, vaccines, etc. With this growing skepticism the medicine men were desperate and, fortunately for them, about that time they discovered viruses—tiny submicroscopic non-living immotile bits of DNA or RNA packaged in a coat of protein. Viruses became the villains. Viruses are a necessary element of life, as germs and bacteria are, and appear in all living organisms in abundance. If they “attacked,” life could not exist.

As extremely small non-living particles without the ability of self-movement (the same as vitamins, hormones, enzymes, minerals, etc.), there is no way for viruses to deliberately harm a living cell or a big collection of cells such as a human body, but the medicine men concocted an unproved and unprovable fairy story that these invisible particles were vicious and malicious and deliberately 'attacked' healthy cells to cause most of the diseases which just a few years ago they blamed on germs or bacteria—and remember, just before that the culprits were 'evil spirits.' WHY they “attack” and HOW they 'attack' have never been explained.

Vaccines (poisons) were concocted to “fight” harmless bacteria without success—the only result being the poisoning of the patients (victims) with severe disruption of normal body functions and processes, leading to more severe diseases than that which were being 'fought.' Then more vaccines were concocted to 'fight' harmless viruses with success—the only result again being the production of worse effects than the normal natural beneficial acute symptoms they were trying to prevent.

The public is thoroughly brainwashed in the virus theory, to the extent that the common excuse for an ailment is that “I've caught a virus” or “I've come down with a virus.” But now, since all of their 'attacks' on innocent viruses have failed, the medicine men are looking for other villains to blame for disease. They are now toying around with the idea of possession by 'evil spirits' again since they cannot find any other culprit.

They claim psychosomatic causes. They are experimenting with acupuncture, used for thousands of years by the Chinese. They are experimenting with herbs, used for thousands of years by the Chinese. They are experimenting with new chemicals and drugs, concocted by the pharmaceutical empire since all of the old ones are absolute failures. They are experimenting with vaccines. And the gullible public furnishes all of the guinea pigs for their experiments.

The medicine men and the public refuse to examine that only diet, habits and environment (rarely hereditary) can disrupt the normal health of a person—a matter of unwitting, ignorant, pure self-abuse and medical abuse. To admit this would put an end to medical practice forever, And those who would reveal these facts to the world are condemned by the powerful medical association—and the people who resist any idea that they are causing their own illnesses by their foolish

diets, habits and environmental pollution, since they are addicted to their way of life and don't want to change it.

Diseases of all names are the invention of men, designed to confuse and frighten the public and set up the medicine men as 'authorities,' to whom the people must look for help. A particular disease is not an entity as medicine men want you to believe, but the combination of a certain number of specific, simple symptoms acute diseases), or particular structural effects of persistent abuse of one's body (chronic diseases).

An example of medical hocus-pocus is inflammation. All '-itises' are the same except that they occur in various parts of the body and are given the name of the part that is affected, i.e. bronch-itis, neur-itis, appendic-itis, nephr-itis, arthritis, dermat-itis, burs-itis, colitis, conjunctivitis, polio myel-itis, etc.—all of them being simply inflammation of a specific part of the body. The inflammation (symptom) is the same, but many diseases have been invented to frighten the public. The same has been done with words such as '-osis.' You, the public, have been thus frightened, deceived, victimized and conned by the medicine men. There are many '-itis' diseases, they are all simple inflammation, and the inflammation is a consequence of an irritation. It is only necessary to remove the irritation, the cause, and the inflammation or -itis will disappear as if by magic. But the medicine men drug people, adding poisons and contaminants to their already polluted bodies in a purported attempt to compensate for the inflammation without ever knowing or seeking to find out the cause or source of the irritation. This weakens the patient and, even though the inflammation may ultimately vanish as a result of the body's self-healing processes (not because of the drugs but in spite of them), assures more potential business for the medicine men as the result of the damages inflicted by the drugs along with their claims (lies) that the drugs healed the patient.

Among the greatest hoaxes ever perpetrated on the American people, and perhaps more devastating than the short-lived swine flu hoax of 1976, is the polio hoax. Polio is a collection of mild symptoms experienced by people throughout the world without ever knowing that they had 'polio.' On rare occasions, when a person became paralyzed, it was called polio, and was highly publicized by the medicine men in order to frighten the public. Parents were (and still are) panicked into a fear that their child would be paralyzed—a condition which might ultimately develop whether in connection with the symptoms of polio or not.

One self-serving charlatan by the name of Jonas Salk produced what he called a vaccine to prevent polio, and the pharmaceutical empire joined with him to flood the country with the vaccine in an attempt to have all children vaccinated, Great fame and profits were in prospect for all involved in this swindle. Government bureaucrats, the lackeys of the powerful medical association and the pharmaceutical empire were quick to jump on the bandwagon. Medical and government propaganda flooded the country and frightened the wits out of parents everywhere who gullibly believed the lie that polio presented a serious threat to their children. Mass 'immunization' of children took place, making millions of dollars for the medicine men and the pharmaceutical industry, with great fame for Jonas Salk. This hoax still continues and produces more illness and more patients and more money for the charlatans every time a child is vaccinated.

The facts are that polio vaccine never prevented anything except good health for the people who were contaminated with the vaccine poisoning. Medical propaganda and counterfeit statistics prepared by the medical men attempt to convince the gullible public that polio has been virtually wiped out by the vaccination and that all children should continue to be vaccinated—all lies. Other statistics are

concealed, principally the fact that with or without vaccinations, all people experience polio symptoms—but the medical men call this the flu, a common cold, or something else, not polio.

The truth is, as I said before, that you and probably everyone else in the world has had “polio” one or more times and has not even known it. Kids, today, still get polio whether or not they have been vaccinated, and they recover without ill effects, and without knowing that they had polio. Those who have been vaccinated have had their bodies polluted by the vaccine and must look forward to a severe acute illness as their bodies eliminate the vaccine poisons or, as the only alternative, they must look forward to chronic illness resulting from permanent damage done by the vaccine poisons.

Usual polio symptoms are fever, headache, nausea, vomiting, irritability, mild muscular pain or stiffness, and sore throat. It may be seen that these same symptoms are also present in influenza, encephalitis, measles, common cold and many other so-called diseases. The public relies on the medicine men to tell them which "disease" they have, although one charlatan may call their symptoms by one name while another charlatan may call them by a different name. If polio is being publicized, the medicine man will call the symptoms polio. If influenza is being publicized he will call the illness influenza. It is all a great hoax and will continue to perpetrate on the gullible public. Remember, polio symptoms never hurt anyone, polio vaccine has maimed millions.

Epidemics are artificially produced by the medicine men with the unwitting but invaluable help of the news media whose people are just as ignorant as the general public, concerning health, disease, and all else pertaining to the human body. When a few people in the same area exhibit similar symptoms, the medicine men 'proclaim' an epidemic, which is carried by the news media so that everyone knows about it.

From the publicized moment on, the epidemic grows wildly. People are panicked, or psyched, into similar illnesses. Every illness is diagnosed by the medicine men as that of the epidemic disease, whereas normally there would be a large variety of diverse diseases diagnosed. And deaths resulting from all causes are attributed to the 'epidemic' disease.

The medicine men recommend vaccinations or other bogus treatment, the public desperately complies with great gullibility, and becomes sicker through the medical poisoning; a true epidemic of medical poisoning follows, with many deaths and other adverse effects, which the medicine men falsely blame on the 'epidemic' disease. The medicine men are very busy and make lots of money together with their pharmaceutical gurus and, the massacre continues for a brief period until people's bodies naturally throw off the medical poisons and return to normal, while many sustain permanent damage.

This was exactly the course planned by the government medicine men in the 1976 swine flu hoax. There was never a single case of the bogus swine flu anywhere—the disease itself being the figment of someone's imagination. Other illnesses were proclaimed as swine flu, and deaths were even attributed to it. The medicine men conned other super ignorant public officials into supporting the hoax, including the Secretary of Health, Education and Welfare, members of Congress and President Gerald Ford. The news media fell into line as usual, But this time there were a few, very few, skeptics and outspoken people who knew the true nature of such hoaxes, myself included.

Fortunately, there was no mass illness of any kind in 1976 except among those who received a swine flu vaccination; otherwise, had there been a preponderance of flu-like illnesses, the hoax may have succeeded. Unfortunately for the victims, but fortunately for the millions of people who refused the vaccine, there were many deaths and cases of paralysis resulting from the vaccine (not from swine flu),

and the pressures from lawsuits, mainly mine and the author's, and publicity concerning the fate of the victims forced the termination of the mass vaccination plan before a truly massive disaster occurred.

In the long sordid history of medicine, the medicine men have never produced even a single cure of any disease, nor prevented any disease through their barbaric practices, in spite of all medical claims (lies) to the contrary. A case in point is that of the bubonic plague which was widespread in the dark ages, killing millions of people and spreading fear throughout the rest of the population. This plague arose spontaneously as a result of poor living conditions, physical abuses, dietary abuses, filthy environmental conditions, predominance of destructive habits such as alcohol drinking, and the unbelievable barbarism of the medicine men at the time. The medicine men were admittedly helpless to prevent the spread of plague even though they tried all manner of witchcraft potions, surgery, etc., which actually contributed to the disaster.

But, without any medical help, the disease finally subsided by itself as the normal and natural physiological purging of the people was completed, together with improved environmental conditions. This is the case with all acute diseases, rising and subsiding spontaneously in cycles which are determined by the living conditions of the affected group of people. If the medicine men had had a vaccine in those days they would have taken credit for the elimination of the plague even though it ended of itself; and they were not sophisticated enough at that time to con the public into believing they were responsible for ending the plague.

Today's medicine men are more sophisticated in conning the people, and are quick to take credit for anything that may benefit them, even though they may not be involved in any way. They are also shrewd enough and organized enough to convince the public that they are not

responsible for adverse events which they actually produce with their modern witchcraft. This can be documented by the thousands, or millions, of drug, medicine, radiation, and surgical deaths and disabilities each year—deliberate murder in many cases—which the medicine men are responsible for, but which they have conned the public to believe was not their fault. The point I am trying to make is that environmental conditions, dietary and other habits, hygiene, the general way of life of the people, and bad medical abuses are the major contributing factors in disease. If the people's physical condition deteriorates from unhealthy practices, diseases will occur. These diseases will be somewhat different but with similar symptoms from year to year and from place to place, depending on the way of life of particular groups of people, as the natural purging and self-healing processes of human bodies function according to nature.

Flu-like, polio-like, measles-like, cold-like, and other diseases rise and fall in cycles. All the medicine men in the world cannot prevent these occurrences in spite of all of their vaccines and other barbaric things in their witchcraft bag of tricks. These acute illnesses will, and must occur periodically as part of nature's cleansing processes when people's bodies become severely contaminated...The medicine men's interference with these symptoms through introduction of more poisons into one's body in the form of vaccines or other drugs and medicines, only postpones the inevitable and, if persisted in, leads to ultimate chronic conditions such as cancer, heart disease, arthritis and others, as the body deteriorates as a result of this medical interference, and abuse which prevents the normal cleansing and self-healing processes from proceeding naturally.

Left alone, without any medical interference, the mild cleansing cycles of acute symptoms such as flu, polio, cold, measles, etc. would proceed normally and fatal chronic diseases such as cancer and heart disease would diminish to insignificance. The blame for all chronic

diseases and many acute diseases can be placed squarely on medical practices of today. Paradoxically, those who purport to cure diseases are the actual ones who produce them. As the medicine men modify their practices, so does the state of the world's health deteriorate. Any intelligent person can determine this for himself by just looking at the medical record and the world health record of the past few hundred years with particular emphasis on the past 100 years.

The facts remain for anyone who is interested enough and intelligent enough to examine them:

2. Evil spirits, germs and viruses do not cause disease—there is not one shred of evidence to implicate any of them in spite of medical unproved lies to the contrary.

2. Diet, habits, environment and medical practices are the only major contributing factors to a person's health or illness—health or disease is self-induced.

3. There is no way that drugs, medicines, chemicals, radiation, vaccines or surgery can prevent or cure diseases.

4. The medical claims that such diseases as smallpox, measles, and polio have been eliminated, are unproved lies using false statistics specifically designed to deceive the public.

5. All symptoms are *natural*, albeit anomalous, responses of a human organism to abuses—either self-induced or medically-induced abuses.

6. To prevent a symptom or interfere with it, is the same as preventing urination, bowel movements, perspiration and breathing. All of these physiological processes, including symptoms, are simply designed to eliminate wastes, toxins and contaminants from a living organism.

I wish the authors great success with their endeavor and hope that millions of people will awaken to the truth as the result of this book.

—Lewis E. Cook, Jr.

PREFACE

The inspiration for this book came to us after we appeared at the Los Angeles County Board of Supervisors on May 31, and presented them with facts and figures to which they refused to listen.

VACCINATION—THE SILENT KILLER was rushed into production in an effort to stave off another polio vaccination disaster which is now being planned.

Experience and public records prove conclusively that vaccines, being highly toxic, often increases disease of the most severe nature—more often in people who already are sick, but often in healthy persons (the recent swine flu fiasco is a shining example). Trusting people suffered paralysis, blindness, post-vaccinal encephalitis (brain damage), impotence, skin diseases, and even death, shortly after injection of the toxins. Delayed reactions lay the groundwork for cancer, heart disease, kidney disease, tuberculosis and others. All of this has been documented many times.

Vaccines have been popularized, and the vaccine makers hailed as "public benefactors." Dr. Jonas Salk, the man responsible for causing disease and death, recently was given one of the highest honors in the land, by our confused and misguided President Carter.

Against centuries of false propaganda, favoring vaccinations, with this

book we hope to stem the tide of shocking facts with documentation gathered from world sources of medical records, findings of dedicated researchers, congressional hearings and public health reports.

THE PEOPLE HAVE THE RIGHT TO KNOW THE TRUE HAZARDS ABOUT VACCINES, which has not been taught in schools, in the medical field (literature), in the news media, churches, or in public libraries. The people should be reminded that a normal healthy organism is naturally "immune." The body can never be made immune from its own accumulated toxins and poisoning by adding more poison and abuse to the already overburdened body. Only charlatans could conceive such *humbug*, and *unthinking minds could accept it. This is medical witchcraft at its worst. Would you deliberately add more smog to Los Angeles' already contaminated environment in order to "clean up the smog?" Would that "purify" our environment?*

A well documented book on vaccine dangers was presented to the Los Angeles Public Library in the mid '50's and they rejected it saying they could not place it on the shelves because it was "against the accepted medical beliefs." Would the Medical Industrial Complex ever endorse any book that condemned their practices, and deprived them of more yachts, Cadillacs, Rolls Royce's, minks and sables?

This timely expose, VACCINATION—THE SILENT KILLER, is a vital life and death matter! If the people want truth, the people must help support it!

Lewis Cook is the publisher and co-author of one of the most comprehensive and broad spectrum philosophical texts, GOLDOT, a large volume of 7 books, encompassing all facets of human life, which includes a 493 page book titled *Physical Man*, highly condensed but comprehensive discourse on all facets of physical life

examined from the very fundamental level of cellular life, organization, specialization and function with a brief but thorough study of basic anatomy and biology and an extensive detailed study and revelation of the cause and cure of all diseases with specific dissertations on the cause, cure and prevention of cancer, heart disease, arthritis, influenza and 56 other major maladies of humans.

Cook conducted extensive scientific research in the field of health and the cause, cure and prevention of diseases in many countries with a comprehensive study of the modes and methods of medical practice and health care of wide ranging diversity. He lectured on health and the cause, cure and prevention of diseases at Miami-Dade Community College, Miami, Fla., and at numerous other groups and public and private assemblages. He has been an active health counsellor in the prevention of diseases, applied nutrition, physiological purification and the tried and proven cure of a wide variety of acute and chronic diseases ranging from the common cold to cancer, including influenza.

GOLDOT is dedicated to all fellow humans on this planet with the sincere, deep and heartfelt prayer that from his text you will derive lasting benefits in your quest for physical, mental and spiritual perfection, and this work will be instrumental in helping you to find physical health, mental purity and spiritual illumination with a life of love, peace, harmony, health, happiness and prosperity in a world of peace and unity. (Lewis E. Cook, P.O. Box 787, Oceanside, Ca. 92054)

CHAPTER 20: Help Ban the Silent Killer: Vaccination

Dr. Eleanor McBean, PhD, ND

ANOTHER DEADLY, MEDICALLY-MADE POLIO. EPIDEMICS NOW BEING PLANNED BY OUR PUBLIC OFFICIALS.

Although the people of this country have not even recovered from the last government sponsored and medically directed polio epidemic of the 1950's, in which thousands were killed and disabled by the polio vaccines (Salk and Sabin), the vaccine promoters are at it again. HOW DARE THEY? Perhaps they think the vaccine victims are all dead and won't talk, and there is an entirely new generation among us, who are unaware of that previous doctor-made disaster. Many of the vaccine deaths were falsified on the records to give the polio vaccine a good appearance to the public. But there were other public records not tampered with, which showed that polio increased over 300 percent in some of the states which had compulsory polio vaccination—all vaccinated. (See page 54 for figures.)

Even if polio vaccine were a deterrent to polio—which it is not—there is no polio epidemic now, and none on the way, to justify this expensive, disease producing vaccine drive, which is an outrage against the health of the people.

That previous polio vaccine campaign caused such widespread disease and debilitation that it sparked the largest polio epidemic of all time. Not one case was caused by viruses or germs or any other organisms which the doctors like to blame their mistakes on. No doctor or scientist has ever been able to prove that germs and viruses cause disease. Even Pasteur admitted this on his deathbed. (More about this

later. It is the poisoning effect of the vaccines themselves, which cause disease; that is their admitted purpose.

NOTE: Whenever the word vaccination is used, it also includes inoculation and immunization.

This is not to claim that vaccines are the only cause of disease. All types of body poisoning cause malfunction and disease. A few of the common and popular poisons are INSECTICIDE sprays on our garden produce, PRESERVATIVES (poison) in our packaged foods, SYNTHETIC, coal tar products (poison) in food color and flavors, FLUORIDE and chlorine (poisons) in drinking water, MEDICINES (all drugs are poison, including aspirin and penicillin), devitalized, PROCESSED FOODS which unbalance our chemistry, STRESS, which generates toxins, COFFEE, TEA, COLA, ALCOHOL, SOFT DRINKS, TOBACCO, NARCOTICS etc., as all are loaded with poisons. Ordinary white SUGAR, which looks so harmless, is one of the worst enemies of health, and plays a prominent part in the cause of polio, heart disease and many other diseases.

Polio is not contagious, and therefore, cannot be controlled by vaccines. If the above, poison—spiked foods and drugs (including vaccines) are avoided, there is no need to fear "catching" polio, no matter how many others have it.

Our national health has declined down almost to the bottom of the list in comparison to other countries. Unless we reverse the trend away from commercial "foodless foods", and get back to a safe and sensible health program, we will soon be past the point of no return.

Putting it simply, we can avoid disease by avoiding the causes of disease, which are certainly not germs and contagion. The body has its own internal healing system. The right understanding and use of this

knowledge can restore our individual and national health in record time. If anyone doubts this, why not try it out and see? It would not cost much and would be safe.

The doctors know the vaccines are dangerous, and that is why they refuse to give any guarantees. When people drop dead from the shots, some doctors merely shrug it off by saying, "So what, we kill a few and save a few." But the gruesome fact is that they do not save anyone with vaccines. Shooting poison into the body in no way protects us from disease nor builds health. Poisons can only poison, and the disastrous after effects of serum poisoning continues on for years. Many are still suffering from shots they had in childhood.

The fact that some survive the shots and do not get the disease, does not prove that the shots saved them; it merely means that they had enough internal resistance to counteract the poisons. They didn't get the disease because diseases are nothing but cleansing efforts of the body to rid itself of excess food and toxins. Some of the poisons are violently ejected by vomiting, diarrhea, coughing, sneezing, etc. while other poisons are forced out by severs and sweating, eruptions on the skin such as smallpox, chickenpox, measles, boils, lumps, etc.

If a person has a clean and healthy body (not overfed) he will have no need for a cleansing (called disease, by doctors), therefore, he will not "catch" any disease from others, because disease is no more catching than a dirty neck.

Will our health and public authorities adopt a simple and sensible healing program? They are not about to, because vaccinations and all the popular medical programs are highly profitable to the promoters, and that is just what will be forced down our throats, unless we rise up and assert our rights. More and more public funds are being requested to promote more medical programs, to build more hospitals, subsidize

more medical schools, to drug the population and keep them tranquilized while they sink into uselessness with increasing ailments.

Even before the other vaccine victims are cold in their graves, the vaccine promoters are plotting another, larger vaccine onslaught, and the people have not been given any say in the matter—the same as always. Have we ever been allowed to vote on whether or not we are willing to spend millions of our tax dollars for drastic poisons to be forced on the people, including our helpless children and the protesting soldiers? (For more details, see the topic headings, **MEDICALLY MADE EPIDEMICS**, and **HOW MASS POISONING PROGRAMS ARE PLANNED**.)

The medicine men have always had their way when they are out to foist another money making vaccine scheme on the public. It is always the people who do the suffering and the paying for it.

WHO IS GOING TO STOP THEM? Up to now, no one has dared to stand up and confront them with the cold facts and shocking evidence about the hazards of vaccines. No one officially, had demanded that the whole sordid vaccine business be investigated, exposed, and the vaccine promoters stopped from their exploitation of the unsuspecting people.

We plan to acquaint our public officials throughout the country, with the pertinent facts regarding the hazards of vaccinations and inoculations, so they will not have any excuse for claiming that they didn't know the facts when they supported the vaccine program. We invite the help of all who read this book and want to take part in this life saving project. (See page 51 for details).

IT IS IMPERATIVE THAT ALL EXPENDITURES OF PUBLIC FUNDS BE STOPPED IMMEDIATELY, COMPLETELY AND

PERMANENTLY.

If anyone who is so backward and uninformed as to want a shot, he should certainly have the right to go to a doctor and personally pay for it. But, no more public funds, and no more high pressure advertising of vaccination should be tolerated, knowing that shots are damaging in 100% of the cases.

So far, it has been so easy for the vaccine promoters to get vast sums of money for their vaccine sprees. They needed but to ask, and millions were handed to them by our medically dominated government officials, and no guarantees were ever asked or given, that the vaccines be safe and effective. A typical example of this reckless waste of public money, is that \$135,000,000 which Pres. Ford handed over to the swine flu vaccine promoters, for which they killed and paralyzed thousands of people, and “billed” us for the \$1,300,000,000 (billion) damage suits to pay for them. This misdirected waste of public funds must be stopped and reparations made by the guilty for the damage done. (An inept Congress and Pres. Ford agreed to pay for their damage suits, with taxpayer's money.)

NO GUARANTEES GIVEN

If vaccines were safe and effective, the promoters should not hesitate to give us a guarantee of that fact. We would not buy a car, TV, watch, etc., if we were not guaranteed that it would work for a certain period of time. Our health is even more important than our mechanical possessions, so why shouldn't we expect, and be given a guarantee that the medication be safe and effective? Yet, no doctor or laboratory will give any guarantee that the vaccines will not kill the people or cause paralysis or some other common after effect of vaccinations. They not only will not give any guarantee of safety, but they will not even give a guarantee that the vaccine will protect people from the

disease it is supposed to. They know by their own voluminous records that all vaccines cause more disease than what the people would have had normally, without the shots.

Who are these vaccine promoters who make wild, unsupported promises, not backed by any proof or guarantees? They are:

- CDC (Center for Disease Control)
- HEW (Health, Education and Welfare)
- PHS (Public Health Service)
- FDA (Food & Drug Administration)
- AMA (American Medical Association)
- WHO(World Health Organization)

In addition to the above named organizations, we should also include the laboratories making the vaccines, the doctors and nurses giving the shots, the health departments in every state, city and town, the school boards, the news media, and the government officials who finance and support the vaccine programs.

DIRTY TRICKS AND UNDERHANDED SCHEMES

It is hard to believe that people in positions of trust and authority, deliberately meet together and work out schemes to trick, deceive and injure the people, just to make money for them selves, but it is true, and they usually get by with it without being caught in the act, and exposed. Even when caught, they live plausible excuses which convince some of the people. Only a few cases are discovered and reported. The following are two cases of medical treachery which were exposed:

MEDICALLY-MADE EPIDEMICS

In my recent book SWINE FLU EXPOSE, (page 63) reported two medically-made epidemics, in Pittsburgh and Kansas City. As unbelievable as it may seem, the doctors, deliberately plotted a crime which disabled hundreds of people.

At that time, the health of the people was good, but business was dull for the doctors, so they worked out a scheme to make some quick and easy money for themselves. They called a meeting for doctors only) behind closed doors, and actually moved and seconded that a smallpox epidemic be declared in the city, so they could stage an all-out vaccination drive to force the entire population into their vaccination centers.

In an emergency, real or imaginary, the doctors assume dictatorial powers to control the people to suit their purposes. In these cases they used all these powers to the fullest extent, in terrorizing the public with all the fear tactics characteristic of racketeers. They created the necessary panic and fear of smallpox to stampede everyone into their offices for the shots. As usual, in all these vaccination campaigns, they told the people that smallpox was contagious and deadly (which was not true) and that the shots would protect them from the disease (which it didn't and that the shots were 'free' (which was not true either. Vaccinations are never free, because profit is the name of the game. Those 'free shots are always fully paid for by the taxpayers,

There was no smallpox epidemic until after the vaccine poisoning created one, and there certainly was no emergency to justify the vaccination campaign, but the people didn't know it, so the scheme worked, and the doctors raked in millions of dollars from the shots, and even more from the diseases caused by vaccine poisoning, so the doctors filled their hospitals and had business to last all winter.

This public poisoning onslaught never would have been brought to light if it had not been for an alert and dedicated little health group who suspected fraud, because there were no epidemics in the area before the vaccination campaign. Therefore, they hired a lawyer and had an investigation. The doctors were brought to trial, along with their books and records in question. When their subpoenaed books were read in court it revealed that the doctors were criminally involved in deliberately creating disease and suffering merely for monetary gain, with no consideration for the pain, cost, disability and permanent damage to the people.

If we took a poll of doctor popularity at this time, we would find that most people like and trust their doctors, and want to believe that they can do no wrong, so they would rather not believe this shocking report of doctor-made epidemics. But, it is not a matter of choice to believe or not to believe; it is a fact; these are court cases which can be verified.

We would like to believe that these two cases were isolated and rare, but they are not. Medically made, vaccine induced epidemics are carried out every year in every city and town. There is not always a large outbreak of the disease after each vaccination drive, but there are always many cases of vaccine poisoning which are usually hushed up and kept out of sight in the hospitals. All vaccination campaigns are for the sole purpose of making money for the promoters, because there is never any other benefit from them. Vaccines cannot prevent or control diseases except to exchange a simple, harmless cleansing disease for a chronic killer disease later on. When the childhood diseases are suppressed with vaccines and other drugs, the poisons are retained inside the body where they corrode vital tissue and cause chronic diseases a few years later. Cancer, which was unknown among children until after vaccinations, is now the number one killer

of children under 15 years of age.

Doctors say the cause of cancer is unknown. If they cannot see the obvious, it is because they don't want to see.

If medically-made epidemics are carried on every year, why don't we find out about it? It is simply because there are very few dedicated health minded people, these days, who are capable and financially able to have an investigation and bring the culprits to trial. Court cases are expensive, and the doctors and drug houses have a battery of lawyers and multimillion dollar "slush funds" to spend fighting the opponents of the vaccine pushers.

An important life-and-death matter such as this, should not be left up to the few struggling do-gooders (like Ida and me). Our government officials should be the ones to stand the costs of the investigation and legal fees. If they are not interested or capable of finding out what's going on in the way of medical skullduggery, they should pay salaries to those who are, or finance their work.

All compulsory vaccination programs in the schools, military, businesses, hospitals, ports of entry, and wherever they have been entrenched, should be abolished at once, because vaccines have never and can never give any immunity from disease. The only immunity there is is that which the clean and healthy body generates within itself by the action of its own internal healing system. On the other hand, the toxic vaccines destroy that natural immunity.

HOW MASS POISONING VACCINE PROGRAMS ARE PLANNED

Up to this time, I had only read about a few medically made

epidemics, but I had never witnessed one, first hand, actually being planned and steamrolled into operation by our tax supported, public officials. According to those court cases mentioned above (of medically-made epidemics), the doctors used to plan their skullduggery behind closed doors, with only their own handpicked backroom boys' or medical gang, but now, they are so brazen that they do it out in the open. I sat in one of their recent people—poisoning schemes being engineered, right in the Public Hearing Room of the Los Angeles County Board of Supervisors, (May 31, 1977) when they laid out their plans for a massive polio vaccine drive to take place immediately. Supervisor Pete Schabarum (no doubt prodded by the medico-drug combine, to make the “pitch”) said,

“In order to step up our efforts to increase polio immunization levels, we need a greater commitment of federal and state funds. I therefore, move that the Dept. of Health Services be instructed to request substantial increases in federal and state fundings, and that efforts be undertaken immediately to plan a COUNTY WIDE POLIO IMMUNIZATION PROGRAM.”

Absolutely no proof, guarantees or evidence was given to prove that the vaccine would not kill the people, and none was given that it had ever prevented polio. Only unsupported claims and guesswork were given. Yet, all the supervisors voted for the motion, and already (as of the present writing—August 12, 1977) the wheels are set in motion, and the polio drive is in operation. Unsuspecting people are being rushed into the vaccination centers, not knowing that the toxic serums have always resulted in many cases of paralysis and other dread diseases, as well as numerous deaths. Over a billion dollars in vaccine damage suits prove this.

I was appalled at the way the Supervisors allowed the vaccine promoters to con them into supporting this money funding, massive

polio vaccine scheme, without one shred of proof that the vaccine was not a killer, or that it was needed, or that there was any threat of an epidemic, or that the vaccine could control it if there was, or that the exorbitant sum of money filched from the taxpayers would be used for anything good for the people.

If I had not seen it with my own eyes, I would not have believed that the Supervisors would have allowed the vaccine propagandists to bombard them with such false and dangerous lies, and unproved claims, with no factual evidence to support their claims. Every Board member accepted those fallacious medical opinions (no facts), and voted unanimously in favor of the increased funding and the massive vaccination drive.

BOARD OF SUPERVISORS REJECTED LIFE SAVING EVIDENCE

In such a life-and-death issue as this, you would think they would have enough compassion and public concern to at least, take a few days to consider the other side of the question, and then do some checking to find out the facts. I was there with my 30 years of research on hazards of vaccination, I had documentary evidence to prove that the propaganda which the vaccine promoters had given was false, but they did not want to hear the other side of the case, Ida was there with her vital research data, but we were allowed only a few minutes, not a fraction of the time which a matter of such grave importance deserves,

The previous polio vaccination drive of 1954 - 1955 was a disaster. Public Health Records revealed that thousands of previously healthy people were killed or paralyzed by the vaccines (Salk and Sabin). Millions of dollars in damages were paid to the victims of that polio

vaccine campaign, but most of the cases were hushed up, 'whitewashed' by calling them by some other name or disease, or the victims were paid off to curtail lawsuits.

Obviously, none of the Board members had bothered to do any research on the matter before voting on that quick-and-easy money making scheme of the vaccine promoters. If the Board had checked on facts, or allowed Ida or me to present them, they would have been more cautious about supporting such a dangerous racket.

The Board did not publicize their intent to stage another killer polio vaccine drive and rob the people to pay for it, or a record crowd would have been down to the Board Room to protest.

Fortunately, Ida Honorof, (Consumer Activist and medical researcher) had learned ahead of time, that the Supervisors were intending to slip another deadly polio vaccine scheme over on the unsuspecting people without their finding out about it until it was too late. So she phoned and asked me to join her in a protest to the Board on May 31, 1977, in an effort to block this new manmade vaccine disaster. She had read some of my books on the hazards of vaccinations and knew I had done wide research and writing on the subject and had an abundance of documentary evidence proving that all vaccines are dangerous and have never done any good—except to the promoters—as a money making venture.

Before the Board meeting convened, on that fateful day, we held our press conference (which was very well represented), to alert the news media about the planned vaccine onslaught. Most of the newspapers, TV and radio reporters learned for the first time in their careers, that there was another side to the vaccination question, and that they had been given a lot of false propaganda all down through the years.

We had notified the Board, ahead of time, that we wanted to speak, so we would be on the agenda. We both had prepared statements to present, and typed copies to leave with the Board so that our message would be on record. My speech will be given in full on page 52, and Ida's will be given on page 59, because the Board didn't give us the time to present our entire message. Their minds were already made up before the meeting, and they didn't want to "be confused with the facts."

I'm quite sure the vaccine propagandists had worked on them before the meeting, and flooded them with many pages of slanted, false and misleading data, enough to crystallize their thinking in one track, so they didn't want a clear and fair discussion of the other side—the right side. I was not allowed one word of rebuttal, after Schabarum and Chamberlin tried to discount my statements. This vital subject which involves the very lives and future of the entire population, should be discussed.

When I reached the point in my talk where I stated, "Polio vaccine, not only did not wipe out polio, as the proponents had claimed, but it actually increased it over 300 percent in some of the states which had compulsory polio vaccination, and the polio was in the vaccinated..." At this point, Chairman Ed Edelman, cut me off in a hurry, in the middle of a sentence to say, "Your time is up. You can't talk any more."

I think he was afraid I was going to counteract every claim of the promoters and upset the whole medical scheme to stage another massive moneymaking drive. The Board had set no time limit on our talks—until after they found out we disagreed with accepted medical belief. This is why it is so hard to get many needed reforms. There are the vested interests who use the public officials in just this manner, to suit their own purposes.

Edelman did the same thing when Ida started to talk. He cut her off just when she was starting to 'hit where it hurt.' I was that same Edelman who as a City Councilman in 1974, introduced the motion to poison the entire Los Angeles water supply with sodium fluoride. However, Edelman and his dangerous plan were soundly defeated at the polls on May 27, 1975. We hope we can, somehow, do what is necessary to stop the present plan to poison the population with the proposed polio vaccination campaign.

The vaccine promoters, Pete Schabarum and Morrison Chamberlin (director of the L.A. County Health Services) did not give any evidence or proof, whatsoever, that polio vaccine is either safe or effective in preventing polio. They made unfounded statements such as, "Polio vaccine wiped out polio", but gave no proof, because there isn't any. No authentic records were given to support any of their statements. There is plenty of proof to the contrary, proving that the vaccine caused polio and other disabilities in a high percentage of cases. In spite of the weakness of their argument, the motion was voted into operation without one dissenting vote.

After the vote was taken and the seal of approval given for an expensive killer vaccine drive, a strange thing happened, even the thoroughly brainwashed Board of Supervisors could see that the arguments of the promoters lacked substance, proof, evidence, and value. So Supervisor Baxter Ward, a reasonable man, requested that Mr. Chamberlin bring in some documentation. This seemed strange to me, that the documentation and proof or some need for the vaccine program, should not have been requested and given before the decision was made to squander all that money and stampede the people into the poison chambers, for shots. I think they could all see there was no proof given or substantial grounds, for a polio vaccine drive, or the requested expenditure of public funds for this useless and

dangerous project.

If the promoters had any proof, they would, surely have had it with them to present in their sales talk. Chamberlin gave the Board one short page of the same kind of false sales propaganda, with no proof or evidence that vaccine is either safe or effective. That is not surprising, as they would have presented it at the Board meeting if they had any. There is no proof that polio vaccines are safe, because the law suits prove otherwise, and there is no proof that it prevents polio because the authentic records prove just the opposite. That involves the Board in the guilt of the promoters,

During the previous polio vaccination disaster of 1954 to 1960, Morris A. Beale, a publisher and writer, offered \$30,000 to anyone who could prove that polio vaccine was not a killer and a fraud. This was a standing offer for five years, and there were no takers. If there had been any proof that polio vaccine was ever safe and effective, someone would have collected that \$30,000. It would have been worth a try. The numerous law suits for polio vaccine damages prove that it was deadly from the start. This cannot be glossed over by making cold statements that polio vaccine wiped out polio. It didn't and there is court proof to support that. As there was a marked increase in polio among the vaccinated as compared to the unvaccinated, we know, by public records, that the vaccine did not wipe out polio; it did just the opposite. In my speech I listed the states which had compulsory vaccination, and their records showed the tremendous increase in polio among the vaccinated. But Edelman would not let me read those records to prove my statement. The whole Board preferred to vote their prearranged decision without any proof, rather than hear any proof to the contrary.

As they have already voted for the dangerous program and it was started immediately (it is now in full swing, as proved by the public

announcements). Will Chamberlin's lack of proof make any difference to the Board after their hasty vote in favor of this vaccine racket? Will they cancel their commitment to support the vaccine drive? How can they? It is already under way, poisoning the school children. They could say they were deceived by the vaccine promoters, the Public Health Services and other henchmen of the racket, but what good would it do now? The money is already being spent, and people are already being poisoned. Their premature approval of a measure which they did not bother to research, and which they refused to give time to authorities to present, reflects unfavorably on the reliability of the Board of Supervisors.

Supervisor Baxter Ward had the graciousness to commend Ida for alerting people to the hazards of the swine flu vaccine last year (1976). It turned out that she was right, as everyone can see by this time (See Swine Flu Expose). If they (The Board of Supervisors) had listened to her then, and stopped the flu vaccination program, a great many people would be alive today who were killed by the flu shots, many of them just a few hours after they were vaccinated. The thousands who were paralyzed by the swine flu vaccine would be walking around today, and we would not have been billed in advance, for the \$1,300,000,000 (billion) damage suits (claims) for the swine flu casualties, which should be paid by the promoters. But our manipulated public officials allowed the vaccine racketeers to dump them on the backs of the taxpayers.

Baxter Ward, also surprised us with the startling statement that his own doctor had to retire from practice because he had been paralyzed by his swine flu shot, last winter. This should have told the Supervisors something. We wonder why they cannot see the connection between the disasters caused by previous vaccination drives and the disasters which are certain to follow their presently planned polio vaccine drive. There is no epidemic now, but they will

surely make one as soon as the poison vaccine takes effect.

VIRUSES ARE NOT THE CAUSE

Public records show that ALL vaccines cause paralysis and death in many cases, not just the polio vaccine, Vaccines are all made from decomposed protein, which in itself can cause quick blood poisoning. That is bad enough, but the vaccine makers then add several other drastic poison drugs to the concoction. How anyone could be induced to believe that this toxic mass of filth could be shot into the body without doing serious damage, is hard to believe. The corrosive poisonous substance deteriorates the delicate nerves, spinal cord, brain and all bodily tissue and causes various types of malfunction, disease and death.

No viruses, germs or bacteria cause any disease. These organisms are useful parts of each cell, and take part in the building of the cell, and later in the disintegration of the cell when its life cycle is completed. The fact that they are seen under the microscope of the lab men when they are examining diseased tissue, does not prove that they caused the disease. The medical and drug fields are at least 30 years behind times. Their faulty theories are the cause of much disabling illness. Practically all diseases are caused by body poisoning, as stated before. Vaccines, drugs, tobacco, and poison food additives are among the worst of the poisoners. Vaccines do not build antibodies to fight germs. That whole concept is false and leads people and doctors away from the real cause of disease, which is body poisoning. (For more details, see my forthcoming book, Vaccination Condemned).

All vaccines, whether for smallpox, polio, measles, diphtheria, yellow fever, flu or anything else, cause diseases of all kinds, such as

paralysis, brain damage, or post-vaccinal encephalitis, cancer, blindness, heart disease, impotence, hepatitis, etc. Many multimillion dollar damage suits have proved that all these diseases have resulted, directly from their vaccine shots.

Secretary of War, Henry L. Stimson, reported 63 deaths and 28,585 cases of hepatitis as a direct result of the shots the G.I.'s had at boot camp during the first six months of service. 391 deaths were reported among the soldiers in England, following their smallpox shots. 3,953 cases of smallpox were reported as a direct result of smallpox shots at camp. It was reports such as these, which brought about the lawsuits in England which finally caused that government to abolish compulsory vaccination in the military. The numerous vaccine disasters had already legislated the abolishment of compulsory vaccination before that, in civilian life.

Some of our worst epidemics have been sparked by the blood poisoning effects of vaccination campaigns. The injected poisons circulate throughout the body every 30 seconds or so, and continue to circulate and poison every cell.

THE 1918 INFLUENZA EPIDEMIC WAS A VACCINE-CAUSED DISEASE

Very few people realize that the worst epidemic ever to hit America, the Spanish influenza of 1918 was the after effect of the massive nationwide vaccine campaign. The doctors told the people that the disease was caused by germs, Viruses were not known at that time or they would have been blamed. Germs, bacteria and viruses, along with bacilli and a few other invisible organisms are the scapegoats which the doctors like to blame for the things they do not understand. If the doctor makes a wrong diagnosis and treatment, and kills the

patient, he can always blame it on the germs, and say the patient didn't get an early diagnosis and come to him in time.

If we check back in history to that 1918 flu period, we will see that it suddenly struck just after the end of World War I when our soldiers were returning home from overseas. That was the first war in which all the known vaccines were forced on all the servicemen. This mishmash of poison drugs and putrid protein of which the vaccines were composed, caused such widespread disease and death among the soldiers that it was the common talk of the day, that more of our men were being killed by medical shots than by enemy shots from guns. Thousands were invalided home or to military hospitals, as hopeless wrecks, before they ever saw a day of battle. The death and disease rate among the vaccinated soldiers was four times higher than among the unvaccinated civilians. But this did not stop the vaccine promoters. Vaccine has always been big business, and so it was continued doggedly.

It was a shorter war than the vaccine makers had planned on, only about a year for us, so the vaccine promoters had a lot of unused, spoiling vaccines left over which they wanted to sell at a good profit. So they did what they usually do, they called a meeting behind closed doors, and plotted the whole sordid program, a nationwide (worldwide) vaccination drive using all their vaccines, and telling the people that the soldiers were coming home with many dread diseases contracted in foreign countries and that it was the patriotic duty of every man, woman and child to get 'protected' by rushing down to the vaccination centers and having all the shots.

Most people believe their doctors and government officials, and do what they say. The result was, that almost the entire population submitted to the shots without question, and it was only a matter of hours until people began dropping dead in agony, while many others

collapsed with a disease of such virulence that no one had ever seen anything like it before. They had all the characteristics of the diseases they had been vaccinated against, the high fever, chills, pain, cramps, diarrhea, etc. of typhoid, and the pneumonia like lung and throat congestion of diphtheria and the vomiting, headache, weakness and misery of hepatitis from the jungle fever shots, and the outbreak of sores on the skin from the smallpox shots, along with paralysis from all the shots, etc.

The doctors were baffled, and claimed they didn't know what caused the strange and deadly disease, and they certainly had no cure. They should have known the underlying cause was the vaccinations, because the same thing happened to the soldiers after they had their shots at camp. The typhoid fever shots caused a worse form of the disease which they called para-typhoid. Then they tried to suppress the symptoms of that one with a stronger vaccine which caused a still more serious disease which killed and disabled a great many men. The combination of all the poison vaccines fermenting together in the body, caused such violent reactions that they could not cope with the situation. Disaster ran rampant in the camps. Some of the military hospitals were filled with nothing but paralyzed soldiers, and they were called war casualties, even before they left American soil. I talked to some of the survivors of that vaccine onslaught when they returned home after the war, and they told of the horrors, not of the war itself, and battles, but of the sickness at camp.

The doctors didn't want this massive vaccine disease to reflect on them, so they, agreed among themselves to call it Spanish Influenza. Spain was a far away place and some of the soldiers had been there, so the idea of calling it Spanish Influenza seemed to be a good way to lay the blame on someone else. The Spanish resented having us name the world scourge on them. They knew the flu didn't originate in their country,

20,000,000 died of that flu epidemic, worldwide, and it seemed to be almost universal— or as far away as the vaccinations reached. Greece and a few other countries which did not accept the vaccines were the only ones which were not hit by the flu. Doesn't that prove something?

At home in the U.S.) the situation was the same; the only ones who escaped the influenza were those who had refused the vaccinations. My family and I were among the few who persisted in refusing the high pressure sales propaganda and none of us had the flu—not even a sniffle, in spite of the fact that it was all around us, and in the bitter cold of winter. Everyone seemed to have it. The whole town was down sick and dying. The hospitals were closed because the doctors and nurses were down with the flu. Everything was closed, schools, businesses, post office—everything. No one was on the streets. It was like a ghost town. There were no doctors to care for the sick, so my parents went from house to house doing what they could to help the stricken in any way they could. They spent all day and part of the night for weeks, in the sick rooms, and came home only to eat and sleep.

If germs or viruses, bacteria, or any other little organisms were the cause of that disease, they had plenty of opportunity to latch on to my parents and “lay them low” with the disease which had prostrated the world. But germs were not the cause of that or any other disease, so they didn't “catch” it, I have talked to a few other people since that time, who said they escaped the 1918 flu, so I asked if they had the shots, and in every case, they said they had never believed in shots and had never had any of them. Common sense tells us that all those toxic vaccines, all mixed up together in people, could not help but cause extreme body poisoning—and poisoning of some kind or another is usually the cause of disease.

Whenever a person coughs or sneezes, most people cringe, thinking that the germs are being spread around in the air and will attack people. There is no need to fear those germs any more, because that is not the way colds are developed. Germs can't live apart from the cells (host) and can't do harm anyway, even if they wanted to. They have no teeth to bite anyone, no poison pouches like snakes, mosquitoes or bees, and do not multiply, except in decomposed substances, so they are helpless to harm. As stated before, their purpose is useful, not destructive.

ONLY THE DRUGLESS METHODS WORKED

The 1918 flu was the most devastating disease we ever had, and it brought forth all the medical bag of tricks to quell it, but those added drugs, all of which are poisons, only intensified the over-poisoned condition of the people, so the treatments actually killed more than the vaccines did, as bad as they were. In my SWINE FLU EXPOSE I relate the day-by-day and hour-by-hour administration of medication given to soldiers in the army, in treating flu cases, and how the drugs killed them in a matter of hours. If they had had penicillin and other antibodies at that time, they would have used them also, and killed even more people, trying to suppress the symptoms of disease instead of removing the cause—or eliminating the poisons. Those 20,000,000 people would not have died if the medical doctors had known the simple fundamentals of cause and cure of disease. This statement can be proved by the fact that the drug less doctors who used the right methods were getting 100% cures while the medical hospitals were losing 30 to 50% of their influenza cases.

The Spanish Influenza had nothing to do with germs flying around or contagion, because some of the drug less sanitariums were located close to the medical hospitals and a large number of the medically

treated cases were dying, while the drug less treated cases were recovering completely in record time, with simple cleansing and healing methods, to eliminate toxins and restore normalcy. Some of those successful drug less institutions of that day, were Battle Creek Sanitarium, Kellogg, MacFadden Health Restorium, Lindlar, and many private drugless doctors who understood the nature of normal recovery, These life saving treatments and many others will be used in the new NATURAL, HEALING CENTER which we are proposing to replace the decadent medical system which has brought our national health down to the all-time low of 92% 'under part condition of our people, with killer diseases and uncontrolled ailments on the increase.

Another typical case of the difference between the medical and non-medical approach to healing is that of THE POLIO POSTER GIRL for the March of Dimes.

Little Winifred Gardella, had been treated for polio by medical doctors for two and a half years, and the best they could do was to release her as a hopeless cripple wearing crutches and leg braces—with no hope for the rest of her life. Her picture was used on the March of Dimes posters to jerk more donations from people, to carry on more of this failure system of medical mixup and mess.

POLIO POSTER GIRL CURED

Above:

BEFORE (*After 2½ years of medical treatment*)

"March of Dimes" said there was no hope. Little Wini would always have to use crutches and braces.

After she left the medical hospital, her mother took her to a drug less doctor, Dr. Lewis Robertson (Chiropractor), who treated her with special drug less methods and had her well and walking in less than six months. (See photographs, Fig. 1 and 2).

These are just two (flu and polio) of the thousands of better and more

successful treatments which the qualified drug less doctors have, which should be used, instead of the damaging medical methods. (More about this later.)

Fig. 2

AFTER (*After 6 months of drugless treatment*)

TOP OFFICIAL ALSO FOOLED. Not only were our Supervisors misled by false propaganda to the point where they supported a costly and hazardous vaccination program, but even the top man in our government, President Carter, was hoodwinked and “snowed” into believing that the Salk vaccine had done some good, for he just awarded Dr. Jonas Salk one of the highest honors in the land, for making a vaccine, which has proved (by millions of dollars worth of court cases) to have killed and paralyzed thousands of innocent and trusting people.

Both Salk and Sabin have been caught in public fights, each accusing the other of making a deadly vaccine. It's a case of the pot calling the kettle black. They are both guilty and are exposing each other. But they each want the limelight and all the glory, because it's profitable—boosts their business—even though it kills more people.

SALK VACCINE REJECTED. The Salk vaccine is so obviously dangerous that it isn't even being considered for use in the new polio vaccine drive in Los Angeles. Four of five vaccine labs (were called the Rockefeller chain) which made the vaccine for polio programs of the 1950's have dropped out of the game this time around. Was the court evidence against it too damaging and the court costs too high, or was this high risk vaccine too chancy to make the kind of profits they were aiming at? We heard they had a \$5,000,000,000 (billion) "take" before, Carter ignores all these glaring facts when he plays into the hands of the promoters. We wonder if this award is part of an advertising gimmick and promotional scheme to popularize another nationwide polio campaign, which has already been spearheaded from Los Angeles.

ANOTHER HIGH OFFICIAL TAKES PART IN FRAUD. Some of the men in the highest positions in the land are either as willfully treacherous as the vaccine promoters or they have been deceived and

misused by the medico-drug combine to carry out their plans.

Perhaps the worst example of this mismanagement of public office for supporting a medical racket, was Pres. Ford. He allowed the vaccine con artists to use him to support one of the deadliest and most costly vaccine rackets of all time. When the swine flu vaccine promoters told him to hand over \$135,000,000 of the taxpayer's money in advance for some questionable vaccine for a non-existent disease, he did so without even bothering to ask for a guarantee that it would not kill people, or that it was in any way justified. There was not one authentic case of swine flu in the whole world to base it on. The one case they cited, the soldier who died at Fort Dix, did not even have swine flu. His case was diagnosed by the Army doctors, as A-Victoria Flu. Even if they could have found a case of swine flu, it is not contagious and could not have started an epidemic, and therefore the vaccine could not have controlled it, even if they had an effective vaccine—which they didn't have.

No one explained why they called it swine flu; the swine didn't have it. People all over the country started dropping dead a few hours after the shots, and when the vaccine was considered a disaster, and the people rejected it, the vaccine promoters tried to sell 80,000,000 doses to the swine raisers, but the swine farmers were smart enough to see through the fraud and turned it down in a hurry. They had been conned into buying shots for their hogs before, with disastrous results.

We wonder why Pres. Ford and Congress could not have been as alert and concerned about our health as the swine farmers were about their swine.

Dr. Anthony Morris, a noted vaccine experimentalist, said that there was never an authentic swine flu vaccine made, because they had never had any swine flu to test it on. All that the laboratories had was

an assortment of various flu vaccines which had never been successful, safe, or effective. But they had a large supply of it on hand which they wanted to sell at a high price, Therefore, they told the people the vaccine was tested and safe, and was a must, to protect them from swine flu—we know the rest,

We wonder if Pres. Ford had some inside information, because of a printed statement to the effect that he said there would probably be up to \$25,000,000,000 (billion) in legal costs from the shots. Who was he working for anyway? The only ones to benefit from the swine flu vaccine program were the vaccine promoters (doctors and drug houses) the lawyers and undertakers. The lawyers say the litigation will continue for another five years.

SHOULD THE PEOPLE PAY THE DAMAGE SUITS FOR DOCTOR'S MISTAKES. Whether we should or not, or want to or not, is immaterial to our public officials, who are dominated by the medico-drug combine. We were not consulted in the matter; the governing heads have already forced the people (all taxpayers) to pay for the multimillion dollar damage suits which the poison swine flu vaccine has brought down on us. Not only that, but doctors all over the country are trying to demand that the government also, pay their malpractice suits. Malpractice means the doctors have violated the law and made serious mistakes which killed or injured the patients. They should be punished, jailed and fined and lose their licenses, but the government inefficiency is considering protecting them in their crimes, subsidizing their dangerous inefficiency and paying their damage suits. This would encourage more deadly medication and unnecessary operations (87% are known to be unnecessary), and dangerous guess work. Is this what we are willing to tolerate This irresponsibility on the part of our government, and the incompetence on the part of our medical hierarchy is costing us billions of dollars, of which we get nothing in return.

Should we pay for this inexcusable ignorance, mistakes and recklessness of our leaders and doctors, or should they have to pay for their own mistakes? Since we are paying their salaries, we want all the decisions to be made in our favor, not that of the crime gangs, such as vaccine promoters. Perhaps we should withhold their salaries by refusing to pay taxes, until they fulfill their sworn duties—to uphold the Constitution, etc. Vaccination violates our legal rights. We are guaranteed 'security in our persons,' not public poisoning.

Let us make our wants known. To begin with: WE, THE PEOPLE WANT AND DEMAND THAT ALL THE MALPRACTICE SUITS AND VACCINE DAMAGE SUITS BE PAID ENTIRELY BY THE DOCTORS, VACCINE PROMOTERS, AND ALL THOSE INVOLVED IN THIS PUBLIC FRAUD, AND NONE OF SAID COSTS TO BE LEVIED AGAINST THE TAXPAYERS. APPROPRIATE PENALTIES SHOULD BE METED OUT TO THOSE GUILTY OF THESE CRIMES AGAINST THE PEOPLE.

We know there is no law on the statute books which says the guilty can escape punishment by dumping their debts on the innocent. Yet, that is what Pres. Ford and his Congress voted for and now, Carter is upholding. That makes them all accomplices to the crime, and subject to penalties, along with the other culprits.

We heard that there were a few Congressmen on our side, last year, who refused to vote for Ford's vaccine racket, and the conspiracy to make the taxpayers carry the burden of indemnification. Where are these honest Congressmen now, when we need them? There must be some way whereby they can get the decision reversed, so that the guilty (vaccine promoters) have to pay for their own crimes, the damage suits, and pay back the entire \$135,000,000 which they took from the taxpayers under false pretenses. They promised that the

vaccine was safe; it wasn't: they said the shots were free; they weren't. They cost us \$135,000,000. Only \$25,000,000 worth of shots were actually given, and the promoters pocketed the rest—which is \$110,000,000. We want it back.

DO WE NEED A MEDICAL “WATERGATE”. If it takes that to uncover all the medical fraud which is dragging this whole country down to destruction, then let's have it. It may be that the doctors and vaccine makers will be willing to pay-up and shapeup without it. We'll wait a little while and see.

U.S. HAS NO HEALTH PROTECTION. It may come as a surprise to some, to learn that our country (the U.S.) has no real health protection at the present time. Some may ask, 'What about FDA, CDC, PHS, HEW and the Federal, State and County health departments, etc. Don't they protect us? No, they certainly are not protecting us from vaccine poisoning and medical racketeering, although they are paid high salaries to warn and protect us from these hazards. FDA (Food and Drug Administration) has no laboratories to test vaccines and if they did, they probably would not be any more honest or competent than CDC (Center for Disease Control), which does have laboratories and facilities for testing vaccines, but they are staffed mainly with medically oriented employees and doctors who are there to maintain the status quo, promoting and profiting by the sale of vaccines. All the public health agencies take the word of the vaccine makers who say the vaccines are safe, when they never are. If there are any competent and honest officials in the health departments who know the dangers of vaccines, they have done nothing to stop this deadly racket.

Our country has all kinds of laws to protect consumers from cheating and fraudulent business practices, so shouldn't it be even more important and urgent to have some protective regulations and punishments for those in the medical field who prey upon the sick and

helpless for their profits?

What is more shameful and cruel than to force poison vaccine shots into the clean and tender bodies of helpless infants and school children—or anyone else? This blood contamination weakens them and leaves them vulnerable to all kinds of diseases, a little later on, even cancer, brain damage, rheumatic fever, and blindness. Paralysis and death are too often the *immediate* after effects of vaccinations. The corrosive toxins in the vaccine begins to deteriorate their entire cell structure and undermine their health from the very first day of the injection. Many die of vaccine related diseases before their first birthday.

VACCINATIONS MUST GO. We know by this time, that the vaccine evil must be eradicated, but who can we depend on to do this important public service. Our leaders, our government, and our health officials are in the vaccine business for profit, or supporting those who are. We can hardly expect those in the business to investigate, expose and prosecute themselves, can we? They know the fraud and the hazards hazards of the vaccine racket and have not done anything to abolish it, so they do not intend to. So we will have to figure out another way to protect ourselves, our children and our public funds.

One way to do this would be to first get rid of all the poisoners themselves. When we say, 'we must get rid of we do not mean they must be killed, although vaccine promoters have killed more people in one vaccination campaign than Al Capone killed in all his entire life of crime. We do not ask the death penalty for all these white collar criminals; however, they should be taken out of their present positions where they can't harm others. Their licenses should be revoked and they should be required to pay for all damages they have done, including their malpractice suits and all their damage suits which they have cleverly dumped on the backs of the taxpayers.

WHO ARE THE GUILTY? The vaccine promoters know who they are. They are the ones who promote and make or sell vaccines. They include, CDC, FDA, PHS, HEW, doctors, nurses, health departments, government officials and news media who have promoted vaccinations, schools, businesses, (which require vaccinations), hospitals, and the military establishment which is the most ruthless enforcer of manpower sabotage, by way of poison shots.

WHY ARMY SHOTS SHOULD BE ABOLISHED. I heard that seven men dropped dead on the floor of the doctors' office after their shots at Boot Camp at Birmingham, Alabama. I wrote for details and the officer in charge, said they were not releasing that information. So I wrote to the Federal Government at Washington, D.C. and got verification from the War Dept., Secretary of War, Henry L. Stimson's own report of that incident, not only showed records of those seven vaccination deaths, but also 63 more deaths and 28,585 cases of hepatitis, as a direct result of the yellow fever vaccine, in only six months of one year. The G.I.'s were given a large number of shots, and each had its lethal after effects. He did not send me all the casualties, just those I asked for. The report didn't try to hide the fact that the *vaccines were killing and disabling the men*. Yet, they continued giving them. I have already mentioned the enormous number of vaccine casualties after the vaccinations during World War I. World War II was the same, deaths and disability for vaccines blamed on the rigors of war.

I talked to a G.I. who had just returned from the South Pacific Sector, and he said there were 300 insane G.I.'s on the ship he came home on. He said there were only three who were sane, and they were the ones who had 'ditched' their yellow fever pills. These three hundred men were never mentioned in the papers, I wonder how many other hundreds or thousands were disabled, and no mention of it to the

public. The military officers said it was due to the stress of battle. The enemy (Japanese) were under the same stress, but no insanity, They did not have the advantages (") of modern American medical science (?) and all the synthetic, poison pills and the large variety of shots.

One of the servicemen I talked to after the war, said he could believe me when I say men were instantly killed by the shots at camp because he was one of the orderlies on detail to carry out the stiffs' after they dropped dead from the vaccines.

After World War I hundreds (maybe thousands) came home added (brain damaged) by what the doctors called 'shell shock' but who had never left camp stateside, and had never heard a bomb. Many had never even heard a gun except in training practice.

There is a large organization of disabled veterans and paraplegics—wheel chair cases. We wonder how many were disabled by medical shots and not by battle wounds. If there are any in those organizations who have this information, or if your own disability was caused by shots, write us. We are trying to help you and others who go into the military with high hopes of serving their country and are cut down in their prime, with vaccine shots and poison medicines.

Every military camp in the U.S. has its outbreak of paralysis after the shots, but they are usually hushed up. The military can easily do this by claiming that there is an epidemic, and no visitors are allowed. Diseases and epidemics are not contagious, but if the military doctors say they are they might as well be; they'll make one.

There was the usual outbreak of paralysis after the shots at Fort Ord (1964) in California, and before the officers could clamp the lid on the news, and keep visitors out, the parents of one victim were already there and saw the situation. The news got out and spread, but the

doctors laid the blame on viruses, so they and their 'poisoned needles' would not be suspect. Fourteen young, healthy men died needlessly from that vaccine onslaught, and 85 were paralyzed in that camp. This goes on every year, but the news is kept out of the papers. There were 250 cases of meningitis at Fort Ord alone in three years, and 409 cases in one year in just the California camps. It happens in all camps in peacetime as well as war. I talked to one mother of a recruit who was killed at camp by the vaccine shots, and she was suing for \$1,000,000. Everyone should rise up and demand that the government and the military stop this slaughter of the innocents for profit.

MEDICAL TREACHERY IN U.S. ARMY CAMPS. Compulsory vaccination is not only dangerous, sometimes deadly, and completely useless, but it is also illegal and unconstitutional. (See statements from legal authority on the outside back cover.)

So many volunteers and inductees have contacted me to ask how they could avoid the compulsory vaccinations at Boot Camp, that I did some checking, to see on what grounds, if any, the military base their enforced vaccinations. I had written to General Eisenhower years before, when I was writing another book on hazards of vaccination, and asked him if there was a law on the military code books which declared that vaccinations were compulsory. He said he did not know of any such law.

I knew that enforced medication of any kind, without consent of the person was illegal, and if the skin was punctured and poison injected without a signed consent form, it constitutes malpractice, I had an abundance of evidence proving that injected vaccines caused death and disease in thousands of previously healthy people. Therefore, I phoned March Field (a California military camp) and asked the officer in charge, if there was any compulsory vaccination law on their military code books. He said he didn't know of any, but they all have

to have their shots anyway. I said, "Compulsory vaccination is against the Constitution and the Bill of Rights, and it is not a law of the land and is not even on the code books of any branch of the U.S. military service, so they have no right to force the poison vaccines on the Innen under their command."

He merely said, "You may be right, lady, but they have to have their shots anyway." This is blind obedience to an illegal military regulation made by crooks who do it for profit. What can the soldiers do for protection from their own military medical treachery? The inductees are young and stand in awe of their superior officers. They are almost helpless in their military compound, which is like a concentration camp in that they are not allowed any say in rejecting vaccine poisons.

These young 'captives' in our military need help. I talked to a lawyer at the American Civil Liberties Union, to see what rights the soldiers had in the Army (all military services) when they do not want the vaccine shots. He said for the boys to go to the JUDGE ADVOCATE GENERAL and tell him they don't want the shots, and that there is no law in the land or the military code which requires it. I also contacted the CENTER FOR VETERANS RIGHTS, and they looked up the vaccination regulations in the official code book titled, UNIFORM CODE OF MILITARY JUSTICE, and found that *there is no compulsory vaccination law in any branch of the military establishment.*

The families of servicemen injured by military medicine can sue for damages. In fact, so many British families sued their government for deaths, paralysis and other disasters caused by the vaccinations, that the government abolished compulsory vaccination completely. They are ahead of us on that score. Why is this country so backward in this matter? Military law gives too much authority to the commanding

officers and the military doctors. They override the law of the land, the U.S. Constitution, the Bill of Rights, and all health consideration when they give vaccinations. They assume the role of absolute dictators in this respect and their power should be curtailed when it comes to the health of the men under their command.

WE DECLARE THAT ALL VACCINATIONS IN THE MILITARY ARE ILLEGAL, AND THEREFORE, MUST BE ABOLISHED AT ONCE, THOSE, IN AUTHORITY, WHO VIOLATE THIS LAW OF THE LAND SHOULD BE SUBJECT TO COURT MARTIAL.

The military officials take no blame or responsibility for these killings. They merely pass it off by saying it was caused by viruses. Viruses have never caused any disease, and I challenge any doctor, scientist or anyone else to prove that they do. Thousands of dollars and centuries of time have been spent by medical opportunists, trying to prove that germs, microbes or viruses cause disease, so they, the doctors will not have to take the blame for their errors.

PASTEUR ADMITTED HE WAS WRONG. Louis Pasteur is the false god whom the medical men have been following, to prop up their germ theory. They were all led astray, because the theory was wrong in the first place, and was never proved to have any scientific stability. Pasteur should have known better, because the most reliable and factual evidence of the falsity of the germ theory was scientifically proved in tests and numerous foolproof experiments by the renowned microbiologist, Dr. Antoine Bechamp, who lived in Pasteur's time. Bechamp was the foremost authority on the subject of bacteria, germs, microbes and other such organisms, and he learned, by factual proof, that these organisms do not and cannot cause disease. They help decompose dead tissue, but never attack or destroy healthy, living substance.

Pasteur had tried to prove Bechamp was wrong, but after a lifetime of experiments in this direction he was totally unsuccessful. On his deathbed, he admitted to his assistant, that his life was wasted going in the wrong direction, and that he knew that microbes are not the cause of disease. Yet the entire medical field bases its whole structure of practice on Pasteur's admittedly false germ theory. (For more details of Bechamp's remarkable work, read BECHAMP OR PASTER by E. Douglas Hume, a British publication, but which may be purchased from The Natural Hygiene Press, 1920 Irving Park Road, Chicago, IL 60613. If they are out of stock, try The Shangri-la Natural Hygiene Institute, Highway 41 and Kentucky St., Bonita Springs, Florida 33923.)

WHAT THE DOCTORS DON'T TELL THE PEOPLE. The vials of vaccines which come from the laboratories all have package inserts which tell the doctors, in printed form, of all the poison drugs and other dangerous substances contained in the vaccine. This is merely for protection of the labs in case of lawsuits. It is not to warn the people, getting the shots, because this information is not given to the public. The doctors and their medical groups know the hazards, but conceal it from the vaccine customers. If people knew what was being shot into their children (and themselves) they would avoid all shots like the plague.

When the vaccine promoters tell the people on TV, radio, press, etc. that their vaccines have been tested, they do not admit that it is only the laboratory tests which they are talking about. Their tests are made to fit their sales propaganda. That's like putting the foxes in to tend the chickens. They don't tell the people that the FDA has never tested any vaccine, and neither has any other reliable testing firm.

The FDA nor any other government agency requires the vaccine makers to guarantee that the vaccine will be effective in preventing

any disease.

The vaccine promoters are not required to tell the people that the diseases caused by the vaccines are often more serious and deadly than the diseases the vaccines are supposed to prevent. These and other *iatrogenic* (doctor caused) diseases are carefully concealed from view as long as possible.

We pay high salaries to FDA to protect us, but they are not protecting us from vaccine or many other hazards. When we want to learn the truth about this life-and-death matter, we have to spend our own time, money, and work searching for it ourselves, while the health departments make the job harder for us by hiding certain vital records from us—records which are supposed to be public property. It is this urgency, the misuse of public funds, the in efficiency of the public health departments and the deception regarding the hazards of vaccines, which has brought this book into being at this time. When our public protectors have failed us, we know we must do something about it to make the necessary adjustments—with or without their help.

WARNING—DEMAND A GUARANTEE OF VACCINE SAFETY. This book is written to warn of the extreme dangers of vaccinations. We have found out that we cannot depend on the government to protect and warn us of these hazards. They are in the camp of the enemy—giving medals to the killers, and giving money to the poison makers. We cannot depend on our highly paid health departments because they are staffed by medically oriented people who are geared to promoting vaccinations and other poison drugs and harmful treatments, which contribute to the degeneration of the health of the people. Therefore, until we can replace our decadent medical system with a more efficient drug less healing program, we will need to do our best to protect ourselves without their interference.

In states where our constitutional rights have been violated by compulsory vaccinations being written into the law, the least we can do is to hold out for a written guarantee from those giving the shots. The people ordered to get the shots should have a guarantee written out for the doctor to sign, along with his address and hospital, and the date the shots are given. The guarantee should state that the doctor guarantees to pay (the one to be vaccinated—give name) the sum of \$1,000,000 (or your price) in case the vaccination causes paralysis, blindness, post-vaccinal encephalitis (brain damage), hepatitis, or any other physical or mental damage. Also, the doctor must guarantee that the vaccine will be effective in **preventing** the disease for which it is given. If the disease occurs, the doctor pays the stipulated sum guaranteed. If a nurse is giving the shots, require her to guarantee the \$1,000,000 also, if the vaccine fails to do what it is claimed to do. If she refuses to sign the guarantee, then you refuse to have any shots without a guarantee. That is your legal right.

As stated before, injected poisons cannot protect anyone from disease, and any such law forcing the people to submit to blood poisoning is an unjust law. "A bad law should be broken openly and often, Lawmakers who make laws which harm the people should be impeached and replaced with people who can serve the needs of the majority, not just a few medical opportunists.

THE INJECTION OF POISON INTO THE BODY CONSTITUTES MALPRACTICE.

States and military establishments, or any other organization which have compulsory vaccination are legalizing malpractice and all those involved should be prosecuted for the crime for which they are guilty.

HOW TO AVOD THE COMPULSORY SHOTS FOR

SCHOOL. HOW TO AVOID THE COMPULSORY SHOTS FOR SCHOOL

The following is an example of the advertising propaganda for vaccination which is being circulated in the papers all over the city, even as I am writing this book. Although compulsory vaccination is illegal (see back page), the people are told that the California state law requires it. They, the health (?) departments, want all the children to be thoroughly poisoned with the vaccines toxic drugs and decomposed protein for the following diseases: diphtheria, whooping cough (pertussis), tetanus lockjaw), or DPT—five shots each, three shots of polio and a measles shot. As previously stated, and admitted by the doctors, the vaccines *all* introduce the diseases into the body. What could be more insane and barbaric? In my new book *Vaccination Condemned*. I show photographs of people who developed cancers on the arm exactly where the vaccines were injected, and cases of blindness and paralysis from the shots. Parents must PROTEST against the manipulated law which says children must be deliberately poisoned. Read the *Escape Clause* of that unjust law, on page 53 to learn how you can avoid these shots.

Ignore the following public notice for shots.

Ignore the following public notice for shots.

Green Sheet — Bulletin-News, Star-Review, Sentinel, News-Herald & Journal — Sat., Aug. 6, 1977

Immunization clinics due for children

The final series of immunization clinics before the start of the fall school semester will be held beginning Aug. 18 at the Northeast Health Clinic, 2032 Marengo St. in the Lincoln Heights area.

California law requires children entering school to be immunized according to the state health guidelines. Students must show proof of five DPT shots it under six years old. three polio im-

munizations and a 10-day measles inoculation.

Persons living in the Northeast area who have waited until the last part of the summer vacation to fulfill the state requirements can expect waits of up to two hours at the local clinic, a spokesperson said. Regular immunization hours begin at 8 a.m. Monday, Wednesday and Friday and at 4 p.m. on Tuesdays. There are no clinic hours on Thursdays.

Special back-to-school clinics will be held Sept. 12-15 and 19 and 20 from 4-6 p.m. to help the expected last minute rush. Service can usually only be provided to the first 75 families during a two-hour clinic session, according to Dr. Bruce Alexander, senior health educator

MEDICAL DOCTORS HAVE NO SURE CURE FOR ANY DISEASE. Drugs can mask symptoms, but they cannot cure anything, and because drugs are the mainstay of medical practice, they are dangerous and worthless props. They have no healing ability. Those who survive medical (drug) treatments, do so in spite of the medication, not because of it. The body is a self healing mechanism and will struggle to eliminate enough of the medicine to stay alive. Healing would be faster and more complete without any drugs.

Medical doctors can't cure anything, not even their own ulcers (at least 50 to of them have ulcers). They have no cure for arthritis, cancer, heart trouble, diabetes, pimples or even the common cold. I used to work for medical doctors and I know what they know and do not know.

They used to think they had a cure for syphilis, in penicillin, but they have recently found out that it does not cure it; it only masks the symptoms and lets the patient think he is cured, so he can go out and infect others. They are frantically looking for a cure, but they will never find it in the direction they are looking which is toward more drugs.

Certain, well qualified drug less doctors, have successful 'cures' for all these diseases which baffle the medical men, and they don't use any drugs or harmful methods. These are the treatments we expect to use in our NATURAL, HEALING CENTERS (discussed later).

DEATHS DECLINED DURING THE DOCTOR STRIKES

During the various doctor strikes over the past few years, in Los Angeles, San Francisco, Israel, etc., the newspapers announced that there was a marked decrease in the death rate during the strikes. The lowered death rate was especially noted and bemoaned by the undertakers. This shows us that we are safer and live longer without

medical doctors. There are only a few situations where skilled doctors would be needed, such as surgery from accident injuries, and setting broken bones.

Most ailments could be taken care of by the people at home, with the right knowledge and training. We expect to have a natural method training center in our new drug less health center.

MALPRACTICE SUITS ARE DRIVING DOCTORS OUT OF BUSINESS. Much has been said in the newspapers about the doctors' threat to go out of business unless the government (taxpayers) agree to pay their malpractice suits. I have reports from **medical** doctors who say that about 85% of the doctors are incompetent. The famous Dr. Charles Mayo (of the Mayo Clinic) said in a radio talk, a number of years ago, that with all their latest equipment and methods they get only about 20% of their diagnoses right. The autopsies on the dead bodies show them what their mistakes were. That means, even the best doctors do about 80% wrong guesswork.

With a little common sense and good (drug less) health training, the home folks could do better guesswork than that, and safer treatments because they would not be using any poison drugs and other harmful methods.

If we agreed to pay their malpractice suits, that would be paying them to kill people. They didn't promise to stop their careless, reckless, dangerous treatments. They intend to continue as they are doing, only without any responsibility for the damages. They want to make their fabulous profits with no losses.

If they intended to quit their bad practices (killing, maiming, etc.) they would do it now, and then there would be no malpractice suits to deal with. But, they either can't reform or won't; so let them go out of

business. We don't need them, Maybe they could find an honest job somewhere—digging ditches perhaps.

They have been literally getting by with murder, and now that they have been found out, they are miffed to find that we are objecting to it.

80% OF ALL MEDICAL DOCTORS ARE UNFIT

In a KABC radio interview, recently, Edgar Berman, M.D., consultant on medical affairs to the White House and associate professor at Johns Hopkins School of Medicine made some startling statements, a few of which are as follows:

"At least some 200,000 M.D.'s practicing medicine today are guilty of incompetence...I estimate at least 10% of these are actually fraudulent and corrupt...And an unfortunately small percentage—certainly less than 15%—are intelligent, hardworking, compassionate, and moral. The scramble for the dollar shows up in statistics Approximately 1,500,000 (unnecessary) tonsillectomies a year...Some 14,000 to 16,000 persons die each year because of the 2,000,000 to 3,000,000 unnecessary operations performed, and God knows how many hundreds of thousands have complications.

"Over the past 50 years doctors have been implicated in producing more infections, crippling and suffering than all the accidents caused by the combustion engine plus every illness foisted on the laborer by industry, from black lung to radiation poisoning.

"Studies at Cornell and Yale have shown that 1,250,000 hospitalizations a year are caused by prescribed drugs. And once in a hospital, you're still far from safe. Our hospitals, even the best in the land, produce over 5,000,000 cases of disease a year."

Dr. wrote a book titled, THE SOLID GOLD STETHOSCOPE, It's a shocker. It "gives the lowdown on the high-ups" in the medical field and has the authenticity of a man—a medical doctor—who knows the story from the inside the seamy side. It's not only informative, it's a million laughs.

—From SWINE FLU EXPOSE

THE NEW DRUGLESS HEALING CENTRE. Our very survival depends on doing something to save our own lives and restore the declining state of our national health. The medical field has been given free rein for over 200 years in this matter, and they have bungled the job. We are desperately in need of help, and even the medical doctors need help. We are not here to speculate on finding a better way. We already have it. A few in the drug less health field have the needed information and the successful curative treatments which can stabilize the health of our people in a relatively short time. If the people are interested and ready for this project, they must make their wants known. The money which is now being wasted on public poisoning vaccination programs and new hospitals for doctor-made diseases (iatrogenic diseases), and grants to medical schools to train more inefficient, incapable doctors, should be withdrawn from those sinkholes of destruction, and rerouted to our new NATURAL HEALING CENTER. This health project must be kept free from any medical domination or supervision.

All the drug less doctors who want to practice in the centers would be tested for learning and capability in the natural healing field, and those who qualified would form the nucleus of the project. Others would be trained in the most successful methods of treating all illnesses.

If our public authorities wanted a test of our drug less superiority over

the present medical methods, we would arrange a testing program using our methods, and with the medical doctors treating the same kinds of diseases with their methods. The outcome would prove which is the system most worthy of public support.

In getting started we need a name to distinguish it from the many other health centers, so for the present we will call it ELBEN NATURAL HEALING CENTER.

More details will be presented as the project progresses.

HOW YOU CAN HELP If you like the idea of a self help health plan which will bring you better health in less time and minimal cost, let us know, by mailing the enclosed coupon. If enough people are interested, we will contact you and ask you to write your Congressman and certain others for financing to carry on the work.

Mail this coupon to:

STATEMENT of Eleanor McBean, Ph.D., N.D. to the Los Angeles
Board of Supervisors on May 31, 1977.

(This is the speech I intended to give, in an attempt to block the
massive polio vaccination drive which the Supervisors were planning
to launch on that day. See page 20 for direct quote. They had their
minds made up to carry out their prearranged plan, so they refused to
allow me to give my entire message, which, they knew was in
opposition to their plan.)

That is why, Ida and I decided to write this book. If the Supervisors
would not let us warn and help the public from that level (local
government), we would go directly to the people, and tell them the

long suppressed facts which they need to know, in order to help themselves.

THIS STATEMENT IS TO COUNTERACT THE MOTION BY SUPERVISOR SCHABARUM which is intended to promote a polio vaccine drive and ask for an increase in public funding.

In his printed and circulated MOTION as of May 31, 1977 Supervisor Schabarum made three false and misleading statements which I have public medical records to refute.

FALSE STATEMENT #1. He said that immunization is mandated by state law and is the responsibility of the Health Services and schools to carry out the responsibility.

For over 100 years the vaccine promoters have been trying to get compulsory vaccination in United States just as they did for a time in other countries, but most of the people know enough to refuse this mass poisoning. All vaccines are made of decomposed rotten) protein and poison drugs. This has always increased disease and has never prevented it.

In 1961, the vaccine promoters (AMA, drug houses and their lobby) managed to manipulate the California lawmakers into passing the compulsory vaccination law number A.B. 1940. This would require (force) every teacher and every pupil to submit to blood poisoning by way of the vaccinator's poisoned needle.

NO VACCINE LAB AND NO DOCTOR HAS EVER BEEN WILLING OR ABLE TO GIVE A GUARANTEE THAT ANY VACCINE IS SAFE AND WILL NOT KILL OR INJURE THE VACCINATED.

Some concerned citizens rose up and gave enough contrary scientific evidence to prove the vaccines were dangerous and not effective, so **THEY GOT THE LAW MODIFIED, TO FREE EVERY CHILD, TEACHER AND OTHERS FROM VACCINATIONS**, if they write a note to the proper authorities and say they refuse the shots.

On Aug. 23, 1961—No. 61/28, the old bill A.B. 1940 (Polio #20760) was changed to 3384 which is as follows: **EXEMPTION FROM VACCINATION ALLOWED:**

"3384, Immunization of a person shall not be required for admission to a public or private elementary or secondary school if the parent or guardian in the case of a minor), or the person seeking admission if an adult), files with the governing board of the school district of the governing authority of the private school, as the case may be, a letter stating that such immunization is contrary to his or her beliefs. However, when ever there is good cause to believe that a person is suffering from poliomyelitis, the person may be temporarily excluded from the school until the governing board of the school district of the governing authority of the private school is satisfied that the disease does not exist."

This language would require a statement that the immunization is contrary to "his or her belief."

It does not limit the belief to a religious belief. Common sense would be reason enough to know that shooting poison into the body will not produce health. The antibody theory has been proved false, so vaccination hasn't a leg to stand on.

FALSE STATEMENT #2. Your vaccine proponent Mr. Schabarum (claims or strongly intimates) that immunizations are a means of controlling communicable diseases. This statement in his **MOTION**

indicates that he has never done any investigation of the cold facts or he would have learned that just the opposite was true. For instance:

In the Illinois Medical Journal (Aug. 1960, pp 84-93) a statement by Dr. Langmuir (in charge of Polio Surveillance of U.S. Public Health Service) after the nationwide polio drive of 1954 and 1955, was 'I predict that by 1957 there will be less than 100 cases of paralytic polio in the United States.'

Four years later, the public records for 1959 showed 5,694 cases of paralytic polio in the U.S. during that time period. 1,000 of these had three shots or more. The highest incidence of polio was in the four states which had been induced to adopt compulsory polio shots.

These are the figures for 1958 and 1959. INCREASE IN POLIO IN STATES WHERE POLIO. VACCINE IS COMPULSORY:

1. North Carolina—78 cases in 1958 before compulsory shots. 313 cases in 1959 after compulsory shots.
2. Connecticut—45 cases in 1958 before compulsory shots. 123 cases in 1959 after compulsory shots.
3. Tennessee—119 cases in 1958 before compulsory shots. 386 cases in 1959 after compulsory shots.
4. Ohio—17 cases in 1958 before compulsory shots. 52 cases in 1959 after compulsory shots. Ohio had an 'escape clause' thus, fewer casualties.
5. Los Angeles—89 (?) cases in 1958 before the compulsory shots. 190 cases in 1959 after the compulsory shots.

In 1961 California legislated the 'escape clause.' Besides the official public records, we have statements from such medical authorities as Dr. James A. Shannon of the National Institute of Health, who stated that “THE ONLY SAFE VACCINE IS A VACCINE THAT IS NEVER USED.”

The eminent scientist and physician, Dr. Wm. F. Koch, M.D., Ph.D. said, “THE INJECTION OF ANY SERUM, VACCINE, OR EVEN PENICILLIN HAS SHOWN A VERY MARKED INCREASE IN THE INCIDENCE OF POLIO—AT LEAST 400%. STATISTICS ON THIS ARE SO CONCLUSIVE, NO ONE CAN DENY IT.”

Surgeon General Leonard Scheele, who was overseeing the country's largest polio vaccine drive told an AMA convention in 1955 that, "NO BATCH OF VACCINE CAN BE PROVED SAFE BEFORE IT IS GIVEN TO CHILDREN." Dr. Salk, in his vaccination sales talks to the public said, “It has been tested and proved to be safe. It can't be safer than safe.” But, when he talked to a convention of doctors, he admitted that “**no reliable test of the safety of the vaccine is known.**” Yet, these men continued to promote the vaccinations which killed and paralyzed thousands.

The Sabin (mouth) vaccine has had its casualties also There were 11 cases of paralysis from Sabin Vaccine in Syracuse, N.Y., reported Sept. 15, 1961. Many of these cases were proved in court, and the vaccine promoters had to pay millions of dollars in damages for casualties.

The failure of the vaccine and the lawsuits caused four of the five Salk vaccine companies to drop out of the polio vaccine racket. Lederle is the only one now making it, and they will not give any guarantee of its safety or effectiveness. For that matter, no vaccine lab, or doctor will give any kind of a guarantee of the safety or usefulness for any

vaccine. The only ones who are benefited by the vaccine business are the drug houses, doctors, undertakers and lawyers.

We must remember, compulsory vaccination is unconstitutional.

ALL VACCINES ARE DANGEROUS. The vaccine promoters claim that vaccine wiped out smallpox, polio, diphtheria, typhoid and other, so called, contagious diseases. This is not true. *It was the introduction of sanitation (sewers etc.) and improved nutrition which reduced disease.* When we read of the many epidemics that swept over Europe in the eighteenth century, we have been taught to believe that they were controlled by vaccination. But, when we check the records, we learn that many of those epidemics were actually **caused** by vaccinations.

Let's look at a few of the medical reports of that period. Japan started compulsory vaccination in 1872 and continued it for over 100 years with disastrous results. It didn't wipe out smallpox as they had hoped; it increased it every year. By 1892 their records showed 165,774 cases of smallpox with 29,979 deaths—all vaccinated. In Australia where they had no compulsory vaccination they had only 3 deaths from smallpox in 15 years.

In Germany at the beginning of World War II (1939) vaccination was made compulsory, and the diphtheria rate soared up to 150,000 cases. All had been vaccinated against it. At the same time in unvaccinated Norway there were only 50 cases.

In the Netherlands (1920-1929) there were 129 cases of post-vaccinal encephalitis (inflammation of the brain from vaccine poisoning) and 40 deaths from it.

In 1717 arm-to-arm vaccination was introduced into England and

Europe, and in 1796 Edward Jenner started his cowpox vaccination craze which increased the smallpox epidemics to such an extent that the disease became endemic, and in 1837 to 1839 there was the sweeping epidemic which killed 22,081 people. In spite of this absolute proof of the deadly effects of vaccination, the vaccine promoters managed to get a compulsory vaccination law passed in England in 1853. The epidemics then increased to such an extent that by 1870 to 1872 there was the worst smallpox epidemic of all time, which killed 44,840 people. The English people fought the vaccination promoters until they were able to abolish compulsory vaccination in England in 1948. They have had no epidemics since then.

Our U.S. Government staged a compulsory vaccination campaign in the Philippines which brought on the largest smallpox epidemic in the history of that country with 162,503 cases, and 71,453 deaths, all vaccinated. That was between 1917 and 1919.

FALSE STATEMENT #3, of Scharbarum's motion. He said we need to increase the public funding for more vaccinations. We do not need any funding at all for vaccination. Instead, we need to abolish this killer racket entirely. Vaccination has proved to be dangerous, expensive and without merit. I propose that we replace it with a natural-method-drugless healing program, not dominated by the medical field, I am willing to work out a more successful plan than we have now.

Dear Reader:

Since writing this speech, and being disappointed that the Board of Supervisors gave it no consideration (neither of our speeches), I decided not to give up on this life-and death issue, but to get the message to the people in another way. This book, although not

complete in all the information which I have, is, nevertheless, an effort to give enough of the message to point the way toward a safer and more useful way to live.

Little was said about proper nutrition and other health practices because they are big subjects and require more time and space. All these important health matters will be taught in our health Schools in the ELBEN NATURAL, HEALING CENTER.

HEALTH STUDENTS and DRUGLESS DOCTORS are invited to write and express their opinions in this formative stage of progress.

—E. McBean
Box 55278
L.A. Cal. 90055

AN INVITATION TO DRUGLESS DOCTORS

If you are in favor of the DRUGLESS NATURAL HEALING CENTER (ELBEN HEALTH CENTER—for short), you are invited to write and give your opinion so we can work out the details.

I think it is a much needed and overdue step in the right direction toward solving our national and personal health problems. I have never seen a doctor, whether medical or non-medical, who knew all there was to know about health and healing. Therefore, if we pool our special skills and techniques, we can catalogue them at the center and direct the patients to those doctors who have the best and most successful abilities and methods. In that way we can help more drugless doctors and more people.

If you are already established with a successful practice, or have your own health center, this does not mean you need to move to the

ELBEN HEALTH CENTER. We need health centres all over the country, so you could certainly stay where you could do the most good. But you could add to your skills and abilities by using the pooled information and training we expect to accumulate in the Elben Health Center.

Many drug less doctors have certain special diagnostic techniques which are much more accurate than the accepted' medical methods. As I stated before, Dr. Charles Mayo, one of the most prominent medical doctors, publicly stated that the present medical methods of diagnosis (x-ray, etc.) are 80% inaccurate. That isn't good enough for US, is it? All drugless doctors do not know or use some of the successful techniques of others, so they could benefit by the pooled data of the CENTER.

This book and my other books on hazards of vaccination, tell people that vaccinations will not and cannot protect them or their children from diseases, but we don't want to leave them wondering what to do for protection. The ELBEN NATURAL, HEALING CENTER would give them the *best* in health protection.

PETITION TO THE PRESIDENT

Request to the President as Commander-in-Chief to abolish Compulsory Vaccination in Army and Navy, and to pardon all men condemned by Court Martial for refusing coercive vaccination.

Compulsory vaccination is a serious danger to health and life, a grave medical malpractice and a gross violation of medical ethics, and of the American principles of Inherent Natural Rights guaranteed in the Declaration and the Constitution, and should be abolished.

CHAPTER 21: Vaccination: A Clear and Present Danger

VACCINATION: A CLEAR AND PRESENT DANGER

Ida Honorof

”Predatory medicine on the loose, the greed of a national charity racket, and thousands of little white coffins...” —Morris Beale, *Super Drug Story*

This is my testimony which the L.A. County Board of Supervisors wouldn't listen to.

How often must it be repeated before it sinks in? “*The polio vaccine is the predominant cause of polio in the United States today.*” Yet, despite the lessons learned from Ford's Flu Folly, the new administration now proposes another immunization campaign to “*vaccinate 20 million children in the United States to reduce the threat of a return of such epidemics as polio!*” —Joseph Califano, Secretary of Health Education and Welfare (HEW).

To add insult to injury, on July 4, 1977, President Jimmy Carter awarded the Medal of Freedom Medal of Honor (!) to Dr. Jonas Salk for his work in developing the (infamous) Salk vaccine. “...for improving the American way of life...” This medal should rightfully be called the Medal of Horror—and in place of medals, Salk, Sabin, and other “scientists” (who are responsible for deaths, paralysis, brain damage, blindness and other diseases caused by their concoctions) should be placed behind bars for the rest of their natural lives, to pay for the damage inflicted on human beings and experimental animals!

Obviously Carter is oblivious of the hundreds of thousands of lives

that were wasted by Salk's (and Sabin's) vaccines. He seems to be unaware of the October 1976 Senate Committee testimony proving that the polio vaccine had caused all of the “*reported cases of polio in the U.S. since 1961...that the vaccine may be riskier than no vaccine at all.*” Even the Center for Disease Control (CDC) admitted that over one-half of the polio cases in the United States (since 1973) were vaccine associated.

Many medicos admit that vaccinations are dangerous. Seven years prior to the Swine Flu Fiasco, *The International Medical Journal* (July 1969) advised that “the profession must reevaluate the principles, purposes, and hazards of immunization.”

SEEDING HUMANS WITH CANCER

Addressing the American Cancer Society Seminar for Science Writers, Dr. Robert W. Simpson (Rutger's University, New Jersey) stressed that “*immunization programs against flu, measles, mumps and polio may actually be seeding humans with RNA to form proviruses which will then become latent cells throughout the body...some of these later proviruses could be ‘molecules in search of diseases’ which under proper conditions become activated and cause a variety of diseases...(including rheumatoid arthritis, multiple sclerosis, lupus erythematosus, Parkinson's disease and perhaps cancer.*” (Report to the Consumer, June 1976, No. 127).

This is what Dr. Eleanor McBean warned about in *The Poisoned Needle*, and she was hounded by government authorities, including the U.S. Post Office, who issued a “fraud order” and refused her mail delivery. The Better Business instructed newspapers [*L.A. Times* and *Herald Examiner*] not to sell her advertising space, and they obeyed, without due process of law, or proof of guilt!

I wrote to Dr. Simpson asking his opinion on the proposed swine flu vaccine, and much to my astonishment he replied "...While the occurrence of swine flu next year as a major pandemic strain is highly questionable—public health authorities have been placed in a position whereby they have no other recourse but to proceed with a large scale immunization.' So what if it causes cancer, multiple sclerosis, etc., etc. Ford handed down the edict and the Medical Industrial Complex snapped to attention. **Will the real Dr. Simpson please stand up and identify himself!**

PREVENTATIVE MEDICINE PREVENTS HEALTH

It matters little whether the polio vaccine is Sabin's "attenuated' or Salk's 'killed virus.'" They are both equally perilous. The vaccine consists of 3 types of polio viruses which have been propagated in (diseased, putrid) monkey kidney tissue culture, plus (decomposed) calves serum, plus antibiotics streptomycin, neomycin, nystatin, and sorbitol is used as a stabilizer, (according to the Lederle insert) all shot into your body under the guise of 'Preventive Medicine.'

Any time you allow these toxic substances (decayed, putrid animal matter, plus toxic drugs) to be shot into your body, or even taken orally, you invite additional disease. These toxins are compounded in our bodies with other inharmonious substances including refined sugar, refined flour, devitalized grains, sodium chloride (common table salt), MSG, convenience foods, T.V. dinners, Tang, Kool Aid, hocus pocus ice cream, Coca Cola (and other addictive soft drinks), pesticide-riddled fruits, vegetables and grains! *You invite danger by adding more toxins to your weak undernourished, already over-polluted body, You will be the first to suffer because you have neglected yourself, by eating processed, devitalized food less 'food,' as*

experienced by the gullible persons who fell for the 'slick shtick' Operation Oink.

“POLIO VACCINE DREAM TURNS INTO A NIGHTMARE”

In his statement submitted to the House of Representatives Subcommittee on Health and The Environment, 94th Congress, Dr. Thomas E. Baynes (Assistant Professor of Law at the Nova University Law Center, Fort Lauderdale, Fla., under a contract with HEW, CDC, No. 39204) reported to our elected officials that “...In 1949, a polio vaccine was only a dream...*now that dream has turned into a nightmare.* The extent of litigation involving vaccine injuries in humans had been minimal until the advent of the Salk and Sabin polio vaccines. Resultant litigation from vaccine injuries will require a reevaluation of current efforts to immunize vast numbers of people from communicable diseases.”

In the *Gottsdanker v. Cutter Labs*, litigation, there were 63 separate cases filed against Cutter Labs. relative to *one mass immunization program* involving the distribution of Salk polio vaccine. Approximately 400,000 persons, primarily grade school children, had been inoculated with Cutter vaccine during a 10-day period of mid-April, 1955. Over the ensuing 2 months 94 cases of poliomyelitis among Cutter vaccines were reported...Evidence showed some 6 lots of Salk vaccine had amounts of live poliomyelitis, (which caused numerous people to contract the dread disease. The vaccine used in L.A. County is live' vaccine.) Cutter was found liable without fault—strictly liable. Cutter was not one of those protected by the 'Rockefeller umbrella' and became the prime patsy for the medical cartel.

In 1962 the bulk of the polio cases were settled following an unsuccessful appeal in the *Gottsdanker* case. At that time 54 suits with

a total of almost \$12 million were settled for just over \$3 million. Since 1962 there have been 8 claims settled for a total of \$200,500. One additional polio claim remains pending. Gottsdanker was a case involving strictly liability (i.e. breach of warranty stripped of its contractual trappings), it also was a case where the product was defective, although it appears that Cutter had no way of knowing its safety tests had 'fundamental weaknesses.' (HEW's entire immunization program is fraught with disaster—not just 'fundamental weaknesses'!)

In 1965, plaintiff alleged he had contracted Type 1 poliomyelitis is after taking American Cyanamid's (Lederle). Orimune Vaccine at a physician's office in Tennessee. Even though the Federal District Court dismissed the suit on the pleadings, the U.S. Court of Appeals reversed and remanded. The case was ultimately settled for \$10,000. *(It is interesting to note here that Lederle, the sole manufacturer of the polio vaccine, has asked hat or government carry the indemnification — based on precedent set by the swine flu venture. It remains to be seen whether the public will stand for another ripoff—a lavish gift to the pharmaceutical companies!)*

In 2 cases of similar facts (*Stromsodt v. Parke-Davis* and *Tinnerholz v. Parke-Davis* involving the administration of Parke-Davis' Quadrigen—the company was held liable-the product was found to be defective. The poliomyelitis component in conjunction with the preservatives caused the vaccine to become unstable. In Nov. 1962 the company halted all production and marketing of Quadrigen. (Why weren't the people informed of the hazards?)

In the Stromsodt case, a 3 month old child received the vaccine from a private physician, "Uncontroverted medical testimony disclosed that the child had suffered damage to the brain and central nervous system. The action against Parke-Davis alleged both breach of implied

warranty and negligence. The federal trial court found that Parke-Davis had breached its liability for negligence. The danger must be reasonably foreseeable and the injury must be proximately caused by the failure to warn. The defendant knew or should have known that Quadrigen might cause Encephalopathies in some users, and to warn of the danger.' The court supported its findings because Parke-Davis received information of patients having severe reactions to Quadrigen, but the company made no effort to determine the cause of these incidents or to warn the consumer or inform the governmental agencies.

(HISTORY REPEATS ITSELF—OUR OWN GOVERNMENT IS GUILTY OF THIS SAME DANGEROUS PRACTICE—Swine flu vaccine is an outstanding example. The sudden death of 53 persons after getting their swine flu shot, didn't deter our government from continuing their deadly inoculations, until their own 'advisors' detected a positive link with Guillain-Barre (paralysis) and the swine flu vaccine.)

As to negligence, the Court of Appeals ruled that the lower court was justified in finding Parke-Davis negligent because of the company's inadequate warning of possible dangers. As to knowledge of the instability of the drug, the courts stated ' . when this information came to the attention of Parke-Davis, it should have taken steps to warn the medical fraternity of the facts, even though the adverse effect involved only a statistically small percentage of those upon whom it was used. The warning Parke-Davis had given was held to be insufficient to convey the known dangers to the majority of the medical profession. ' In the cases *Nelson v. American Cyanamid*, *Givens v. American Cyanamid*, and *Otte v. C. Pfizer*, the respective parents of polio vaccinated infants had contracted polio by merely handling the 'child's diaper which contained the polio-vaccine contaminated feces. The vaccine is mighty powerful and deadly!

SALK AND SABIN VACCINE EQUALLY DANGEROUS. In March, 1963, a mass immunization program was begun by the Idaho Falls Medical Society. A suit was brought against Wyeth (Davis v. Wyeth Labs) by Plaintiff who had received Wyeth's Type 3, Sabin Polio vaccine. Within a month Plaintiff was diagnosed as having Type 3 poliomyelitis. Davis brought action against Wyeth alleging negligence, breach of warranty, and strict liability. The jury found in favor of Wyeth, but the Federal Appellate Court reversed. The plaintiff brought action against the drug company for the negligent manufacture of the drug, its negligent failure to warn of the dangers of the drug strict liability, and breach of implied warranty of fitness. Also the duty to warn on the part of Wyeth arose when the company was aware, from the Surgeon General's report of the susceptibility of adults to unfavorable reactions from the administration of Type 3 poliomyelitis vaccine. This would have been 6 months before Davis participated in the mass immunization program.

While the court admitted that there are circumstances where the risk is so minor that a warning would be unnecessary, it rejected **Wyeth's contention that the one-in-one million possibility of a reaction from the vaccine was so minor as not to create a duty to warn.** (HEW must have been aware of the paper published in 1966 which proved that Guillain-Barre paralysis was caused by vaccinations, not just the influenza vaccine but other vaccines as well. The other paper published in 1969 proved that blindness and brain damage was associated with inoculations. Arch Intern Med. —Aug. 1966, Epid, Aspects of Immunization—1969). Yet, people were coerced into signing a phony "Registration Form instead of the legally required 'Consent Form," and they weren't informed that the swine flu vaccine could cause paralysis, nerve damage, blindness, impotency and death! They released misleading information to pregnant women, jeopardizing not only the women's health, but the unborn child's as

well. More on page 109.

“When in a particular case, the risk qualitatively (e.g. of death or of major disability) as well as quantitatively on balance with the end sort to be achieved, to such as to call true choice judgment medical or personal, the warning must be given. The package insert contained the warning—it accompanied each via of vaccine. The company gave a warning to the medical society. Both were found to be insufficient as meeting the duty imposed by statement 402A of the Restatement...Here was a mass immunization and no attending physician who could have ascertained and balanced the risks.”

During my many personal visits to the various inoculation clinics in Los Angeles County (dressed in my handmade sandwich sign warning people of the known and unknown hazards) most of the clinics had NO doctors in attendance, and the few that did knew less than the patients! Those I asked whether they knew what to do for heart attack or other potentially fatal reactions suffered after inoculation, were completely dumbfounded.

“In such cases then it is the responsibility of the manufacturer to see that warnings reach the consumer, either by giving warning itself or by obligating the purchaser to give warning Wyeth knew that the warnings were not reaching the consumer.” (In the case of the swine flu program, the pharmaceutical as well as the insurance companies knew how hazardous their vaccine was. They conspired (with the blessings of many people in Congress) for the taxpayers to shoulder the entire indemnification load. Four drug companies split \$100 million, and now, according to the General Accounting Office's “Report to Congress” (June 27, 1977). “The insurance companies will profit to the tune of \$8.65 million.”

The flu shot was one hell-of-a lucrative shot in the arm for the

doctors, the pharmaceutical industry and the insurance companies!
ALL GRAVY—WITH OUR TAX MONEY AND OUR LIFE!

There are two decisions decided between Davis and Reyes cases, which involved human vaccine injuries, *Grinnel v. C. Pfizer*; and *Stahlheber v. American Cyanamid* (Lederle). Grinnel involved two adults who contracted poliomyelitis after taking Pfizer's Type 1 polio vaccine at a mass immunization program. The Court found the company had breached its expressed warranty, found in the vaccine's package insert (which read), "There are no known contraindications to oral polio virus vaccine." This was the same package insert Wyeth Labs had claimed set forth adequate warning. The Stahlheber decision was tried on the 'failure of the drug company to warn of the possible dangers in taking the polio vaccine.' The court determined that Pfizer's duty to warn arose when the company became aware of the Surgeon General's Report on the susceptibility of certain adults to injury from polio vaccine.

In the recent decision of *Reyes v. Wyeth Labs*, 'an 8month old child contracted poliomyelitis after receiving Wyeth's trivalent polio vaccine during a mass immunization program in a rural Texas community. The jury determined Wyeth was strictly liable for the injury notwithstanding the fact (that) there was a polio epidemic in progress at the time of immunization. Wyeth's vaccine was classified as an "Unavoidably Unsafe Product" (WHICH ALL VACCINES ARE).

The Court established "Whether the product is so unsafe that marketing it at all is 'unreasonably dangerous per se,' and if not, 'whether the vaccine had been introduced into the stream of commerce without sufficient safeguards and is thereby unreasonably dangerous as marketed. Wyeth accepted the court's classification which was 'an admission that the vaccine was dangerous, which in turn also

established Wyeth's duty to warn. The court held Wyeth's failure to warn the Reyes family of the known dangers of polio vaccine caused the vaccine to be considered defective and therefore 'unreasonably dangerous as marketed.'”

The court held that "In the case of a prescription drug which is unavoidably unsafe, and to which there is a certain though small risk throughout the population, there must be either a warning—meaningful and complete—or an individualized medical judgment that the treatment for medication is necessary and desirable for the patient...Where the danger is known, notwithstanding the pureness of the prescription drug, the drug company will be held liable unless he warns of the known dangers.”

The court equated the "unavoidable unsafe” products as being “dangerous” and the failure to warn created defective ness and made the vaccine “unreasonably dangerous as marketed.” Normally, the warning need only go to the physician, but in mass immunization programs, the warning need only go to the ultimate consumer unless it appears there is a physician present during the administration of the drug, who can make an "individualized medical judgment' that the treatment or medication is necessary and desirable for the patient.”

According to the limited 'mentality' of the medicine men, there was NO swine flu problem—THEN WHY SHOOT MILLIONS OF PERSONS with this UNSAFE AND POISONOUS SUBSTANCE, TESTED ON HIGH RISK SENIOR CITIZENS (who should not have gotten the vaccine in the first place), on the ARMED FORCES, who have long been used as guinea pigs. The Military are routinely pumped full of toxic vaccines, but the casualty lists are kept “top secret” and/or the death certificates are falsified. (See pages 27, 39, 40 of Part I and page 100 of Part II.)

(The swine flu vaccine is formulated with a variety of toxic poisonous substances including alien viral protein particles, formaldehyde, residues of egg and chick embryo substances, sucrose, thimerosal (a mercury derivative, Polysorbate 80 and other extraneous contaminating poisonous substances, and water.)

Lederle Labs (American Cyan mid) the one and only company who manufactures the “Live, Oral Trivalent Orimune, Polio virus Vaccine admits that Paralytic disease following the ingestion of live polio virus vaccines has been reported in individuals receiving the vaccine, and in some instances in persons who were in close contact with subjects who had been given live oral polio virus vaccine...It is believed by some that at least some of the cases were caused by the vaccine.”

(Rarely ever does the vaccine recipient see the package insert. That information is considered “top secret” making it that much easier to deliberately mislead people) very few doctors bother to read the inserts.

The insert does warn that Orimune is to be administered orally under the supervision of a physician. “Under no circumstances should this vaccine be administered parentally.”

WHY NO GUARANTEE? After learning that Supervisor Schabarum (L.A. County Board of Supervisors) was going to introduce a motion asking the federal and state government for additional funds so that the County could initiate a countywide mass polio immunization program. I phoned Lederle's office in Pearl River, N.Y. (914-7355000) and talked with Mr. Vallencourt, requesting a guarantee from him in writing, that after taking the vaccine person would suffer no adverse reactions (paralysis, brain damage, blindness or death). He would give me no such guarantee 'It was simply impossible for Lederle to do so.'" Vallencourt informed me of the HEW hearings that were held

primarily to discuss the liability system as it stands today 'It's a mess...

The most satisfactory solution would be for the government to initiate an indemnification program for all biologicals.' (Congressman Henry Waxman had warned that if our government takes over the indemnification of the swine flu program it would set a dangerous precedent." The manufacturer should be relieved of all of the problems associated with liability—relieved of the kind of problems such as the Reyes incident...The corporations want to know why they should continue putting their necks out..." No he could not give me any letter guaranteeing absolute no risk with the polio vaccine. The Drug Companies have our government over a barrel. They simply will not carry the insurance. The grim reaper mowed down thousands of innocents, and crippled thousands—earning glory, fame and fortune for scientists like Salk and Sabin and glory and profits for the serum trust...and the dynasty that is growing fatter and fatter with HEW, with a swollen annual budget of \$140 billion—and what accomplishments' can they show for it, except additional fluoridation of public drinking water and mass immunization programs' both leading to more disease all over the U.S.

There is a continuous feud raging between Salk and Sabin, the “Two Polio Boys— Tweedledee and Tweedledum,” and if you recall, Public Health Services switched to the Sabin vaccine following “excessive deaths and paralysis” among children who had gotten the Salk polio vaccine. Salk is determined to get back into the good graces of HEW...and little by little the truth seeps out.

In an article in Science (March 4, 1977) Jonas Salk and Darrell Salk let the cat out of the bag. “Live virus vaccines against influenza and paralytic poliomyelitis may in each instance produce the disease it intended to prevent...the live virus vaccine against measles and mumps may produce such side effects as encephalitis (brain damage),

and the killed virus vaccines against measles and the respiratory syncytial virus have caused undesirable hypersensitivity reactions in individuals subsequently exposed to natural infections.” (We don't recall Salk complaining to either FDA or HEW when Dr. Anthony Morris was fired by Comm. Alexander Schmidt. Dr. Morris had proved the above, and many other hazards associated with inoculations which FDA, HEW, and CDC didn't want to hear. (See p. 103)

In the November 1976 Current Prescribing, Roberta G. Marks quotes Salk's testimony before the Senate Subcommittee on Health (9/23/76) “more than 140 cases of paralytic polio (are) linked to use of the live virus vaccine since 1961 the last several years the oral vaccine has been the principal cause of domestically arising cases of polio...At the very least, Dr. Salk says, and Senator Kennedy agrees—physicians and parents should have the option of choosing which vaccine a child should receive, Kennedy said he believed every parent should be informed that the live virus carries a 1-in-300,000 risk of causing polio...He couldn't imagine a parent so informed choosing the risks of the live virus vaccine if a zero-risk product were available as an alternative.”

(It is obvious that Sen. Kennedy doesn't read Hearing transcripts, or he would know that there is *NO SUCH THING as a safe vaccine*. We are mailing a copy of our book to Kennedy, so that he can also study the incidents proceeding the 9/23/1976 Hearing).

Ms. Marks writes, "Those who remember the killed virus vaccines period in the U.S. will remember also that there were cases of polio in children who had received what was then considered a full immunizing course.” She concludes with, "So who's left to pay this negligible price? Apparently, the Government. If the government wants vaccination programs it will have to protect participants from

financial liability.” (This means taxpayers money will pay the bill at the same time that we take all the risk with HEW's insane inoculation programs)

BAD ADVICE FROM THE EXPERTS

Testifying before 95th Congress—House of Representatives (6/14/77), Dr. Irwin D.J. Bross (Director of Biostatistics, Roswell Park Memorial Institute, Buffalo, N.Y. 14263) supported by a grant CA-11531 awarded by the National Cancer Institute, DHEW) lashed out at the bad advice our government gets from “experts.”

"...The general public and its elected representatives have been getting consistently bad advice from the so-called experts on the scientific, medical, and other technical issues that are so important to the public health and welfare. Sometimes Congress gets good advice from experts but it comes too late as, for example, the retrospective advice about the Swine Flu program. Dr. Sabin wrote an excellent piece in The Sciences on the scientific mistakes that were made in the Swine Flu program...pointing out that the current programs for influenza immunization of high risk groups are making the same mistakes.

Unfortunately, Dr. Sabin's advice is a bit too late to avoid the big furor, the waste of money, and the deaths and disabilities that were produced by the ill-advised Swine Fu program.

CANCER PROGRAM BOONDOGGLE

"Congress can now get plenty of advice from experts, even from virologists, that the 'cancer vaccine" program of the NCI was a fiasco—a waste of time, effort and hundreds of millions of taxpayers dollars. In this instance, a number of people, myself included, had pointed out before this program started that the public was being sold

a bill of goods, that there was virtually no prospect of a 'Cancer Vaccine.' No one was listening then. But now, 5 years and more than \$500 million later, the only thing that this program has accomplished is to show conclusively that it had no chance of success. Although the 'cancer vaccine' program now stands out as a particularly obvious example of the incredibly bad management that has plagued the "Conquest of Cancer program from the start, it is by no means the only (or even the worst) example. The overall panorama of programs that have been set up in the past 5 years is one of a vast wasteland with a few fertile Oases spotted here and there. Much of the money that Congress has appropriated for the 'Conquest of Cancer' has been wasted on Scientific boondoggles such as the dangerous Breast Cancer Detection Demonstration Programs.

Dr. Bross emphatically states "DON'T LET TECHNOLOGISTS MAKE THE DECISIONS: "One of the worst of the mistakes is to let technologists have the say about the uses of their technologies. It was a mistake to let the Center for Disease Control and its virologists dictate the shape of a public health program for mass immunization against Swine Flu...it was in this area that the worst mistakes were made. It was foolish to expect virologists to give an honest and accurate assessment...and tell the truth about practical prospects for 'genetic manipulation.'" (Report to the Consumer #155)

Perhaps we can all be a little more optimistic to know that there are a few honest scientists around who refuse to do the bidding of the Medical and Petrochemical Industrial Complex. Dr. Theodor Sterling challenged Dow's faked experiment results...Dr. Melvin Reuber did the same with other laboratory findings...and Dr. Bross, despite the fact that he was under an NCI contract, dared to tell them the truth!

THE RELATIONSHIP BETWEEN REFINED SUGAR AND POLIO

During the previous iatrogenic (doctor caused) polio epidemic, Dr. Sandler, nutrition expert at the U.S. Veteran's Hospital in Oteen, N.C. realized that one of the puzzling characteristics of polio was its prevalence in hot weather, when children consume gobs of artificially sweetened products, hocus pocus commercial additive-laden) ice cream, Coca Cola, etc. This increased consumption of sugar produces a lowering of blood sugar and thereby a reduction of the body's resistance to polio and other diseases. Dr. Sandler issued a warning to the people of North Carolina, which was reported in his hometown newspaper The Asheville Citizen. He urged all parents not to allow their children to eat any refined sugar, including candy, ice cream or soft drinks, especially during the hot weather. The people heeded his warning and cut out a least 90% of the above contraband foodless “foods”, and polio in North Carolina dropped 90% in 1949, compared with the 1948 season! (Their State Board of Health had reported 2,498 cases of polio in the Terheel Commonwealth during 1948). By taking Dr. Sandler literally and heeding his warning, the polio cases dropped down to 229 in 1949.

Then the Milk Trust, the Drug, Steel, Aluminum and Auto gang got together. The Drug Trust instructed the Health Officers that “no campaign to wipe out polio must ever be started if it concerned itself with reducing the consumption of ice cream, Coca Cola, soft drinks, etc...” No way, if it would cut into their profits. As a result the incidence of polio in North Carolina increased 200% in 1950—over 1949, and “everything was back to NORMAL.” This experience in prevention is a very valuable lesson.

MORE LITTLE WHITE COFFINS

The polio vaccine (as well as all other vaccines) is a deadly killer. The undertakers, the medicine men, and Lederle Labs., will be the only real beneficiaries. Six drug houses were originally licensed by

USPHS to manufacture and market the polio vaccine. Allied Labs (Pittman-Moore Div.); Eli Lilly; Merck & Co. (Merck, Sharpe & Dohme); Parke-Davis; American Home Products (Wyeth), and Cutter Labs. (Cutter was the only drug firm the Rockefellers didn't own stock in.) They were all prepared to go to market with the same 'juice' from the kidneys of diseased monkeys.

Then a laboratory technician with National Institute of Health (NIH) reported to NIH officials that the vaccine had no value as a preventive, and that it was a deadly killer. NIH officials refused to let their own children be vaccinated with this vaccine.

In one of Walter Winchell's broadcasts, he predicted that the vaccine would be a killer—one of the best predictions he ever made. Juan Miller, a blood chemist in Coral Gables (Fla.) protested against the injecting of pus of diseased monkeys into the bloodstreams of helpless children. He also predicted that wholesale deaths would occur and mailed out thousands of postcards all over the United States, graphically illustrating his point with a long row of little white coffins. The National Foundation of infantile Paralysis (NFP) framed him on a trumped up charge of 'violating the postal laws.'

On June 19, 1955, James Spaulding (staff writer for the Milwaukee Journal), covering the A.M.A. convention in Atlantic City reported that the 'NFIP was supplying money to scientists and exerting pressures to continue the program, even after the vaccine was found dangerous. If the truth ever got out it would jeopardize the investment of the pharmaceutical firms who were participating in the vaccine program. The Paralysis Foundation suppressed the fact that live virus had been detected in 4 out of the 6 supposedly finished 'safe' lots of vaccine. The only hint doctors had was Walter Winchell's report, after he had been tipped off by a scientist, that the vaccine would be a killer. The public wasn't advised, and the mass polio immunization

campaign produced more little white coffins than any other plague in the world's history!

I wasn't allowed to give very much of my prepared testimony, most of my testimony consisted of "questions and answers." I started by telling the Board members of Jonas Salk's statement last year that "anywhere from 55 to 60% of the polio that's around today has been caused by the polio vaccine." At which point Supervisor Kenneth Hahn interrupted me with "What did he mean by that, Ida?"

Honorof: "That these people are paralyzed—their paralysis was caused by the vaccine. As a matter of fact, I've asked Dick Carmen if he would do a survey among the Polio Victims in L.A. County, whether they got polio, after they got their shot. This is what Salk was saying..."

Hahn: "By saying that, are you inferring—if they didn't get the vaccine that they wouldn't have—that thousands of people would have been paralyzed...?"

Honorof: "In all probability the shot caused the paralysis. All diseases run a level, and then they equalize—and taper down. If we weren't injecting these toxic putrid substances, and here we're talking about the diseased monkey gland, plus—I have here the Lederle insert showing the composition of the vaccine (and I submitted that to the Board.) Now if you recall during the swine flu program, I warned the Board not to go ahead with the program until they knew positively, what the true hazards were. It was because I became so involved in exposing the Swine Flu Fiasco, and did research, I received this book which is a Senate Hearing transcript—and that's what my testimony consists of today. This is information that appears in the Congressional transcripts.

“What I am asking is that rather than Schabarum's motion asking more State and Federal money in order to start another mass vaccination campaign, I would suggest that as long as you're asking for State and Federal money, ask for money to start an educational campaign—teaching these same people how to live—teach them about proper nutrition...

There was a Dr. Sandler in North Carolina" (then Supervisor/Chairman Edelman asked that I "wrap up my testimony...take a minute of two of two.

Honorof: "Yes, I will, and this is all very important, because there are students in the audience (there were about 100 students in the Auditorium) who will be given this polio vaccine and they will be told that there's nothing hazardous about it. when the truth is just the opposite." I related the experience of Dr. Sandler, and how by eliminating sugar products he was able to eliminate most of the polio in North Carolina...

Hahn: "Because of your dedication in this, particularly in the field of nutrition, would you be against, like polio, like smallpox—just give me a yes or no."

Honorof: “It can't be answered with a yes or no. I will only say that I was a fool when I was raising my children, and my 4 children were vaccinated, and one child got deathly sick, lucky they weren't all paralyzed from the shots. I trusted in the medical establishment—I wrongly placed doctors on a pedestal, because I had been brainwashed into thinking they were 'God.' I was a fool, and I regret it to this day, for allowing my children to be shot full of toxins. I can't undo it, but what I can do is warn people. Teach Other people about the hazards. These vaccines are toxic poisons. Kenny, look around you—take a look at the sky, which isn't visible, look around at the environment

with all of that cruddy smog. Would you deliberately add more smog, in order to clean up the smog?”

Hahn: “Then you wouldn't be for this, would you?”

Honorof: “Absolutely not-not after all the research I've done on the subject of vaccinations. I tell you, I was a fool, but I no longer am, the swine flu fiasco opened my eyes—and they're wide open now—Ford's flu folly did that for me. This Senate Hearing Transcript substantiates, corroborates every word we've said—from our own Congress. I challenged Dr. Shirley Fannin to debate, and I have her response here.”

“Dear Mrs. Honorof, in answer to your request to public debate on the issue of immunization, no thank you.' The question of immunization cannot withstand the light of public scrutiny.

Baxter Ward: "With regard to the flu vaccine, it is quite possible that Mrs. Honorof is correct, and I think that her appearances here provided some comment that proved prophetic. I got a note in the mail the other day from my own doctor, who said he was going to have to give up his practice, as a result of a recent illness that he suffered, and the recent illness was a reaction to the swine flu shot, that sent him to the hospital...His nurse gave him his shot, he suffered a paralysis, or something, and now he's having to give up his practice. That's, I think, a unique case, however. '

There is absolutely nothing 'unique' about people becoming paralyzed after getting a vaccination—(Swine Flu, Polio, or any other), Baxter. The 200 persons that filed claims with USPHS, charging that the swine flu vaccine had caused their paralysis (Guillain-Barre) will attest to that. USPHS/HEW now also admits it. According to the new and revised "Consent Form," issued on Feb. 1977, “People who are

vaccinated are approximately 10 times more likely to get Guillain-Barre (paralysis) than those who are not vaccinated...Recent statistics indicate however, that in about 5% of the cases the patient dies, and in about 10% of the cases some muscles will be weak for a long time or permanently...For elderly and chronically ill persons, the risk of death from Guillain-Barre is much greater!”

That information was available in 1966, which proved that vaccination would cause paralysis, but our government ignored the warning. In changing the form from “Registration” to “Consent,” and in now warning people (after all the damage has been done), HEW admits their GUILT. The form used originally was illegal!

In February 1977, HEW Secretary Joseph Califano stated that “The swine flu vaccine cannot be given legally, unless those receiving sign a ‘consent’ form.” How much more do we need to nail them to the wall? Every person who took the swine flu shot did so under false pretenses—they weren't advised that they were accepting the risk of becoming paralyzed, blind, impotent, suffer nerve damage, or even die, because Ford was attempting to steamroller himself back into office—using this high pressure vaccine program as a stepping stone toward re-election. The entire program was conducted illegally. The indemnification was illegal—the 'registration' form people signed was illegal subterfuge to con them into getting their shot, to save them from an imaginary epidemic!

Business Week (3-14-1977) reports that “Events of recent months have shown that the fears of the insurance companies were valid, however vaguely they were understood and however vaguely they were defined.” The National Immunization work Group (March 15, 1977) carried that information in their report, "The Justice Department requests authority to hire 28 more staff members to handle the influx of swine flu claims, which are expected to hit the 10,000 mark.

Sources at Justice say that as many as 60% of the claims will wind up in court with claimants seeking sizeable awards..."

It wasn't only the average 'John Q. Public' that fell for the slick shtick propaganda—even doctors (who are supposed to know better (?) fell for the President's and H.E. W.'s pitch. I have obtained information that there were 4 doctors in the San Fernando Valley who suffered adversely, and am attempting to document that information.

I asked Supervisor Ward for his doctor's name (paralyzed after receiving his swine flu shot, but he refused to reveal it, Being a respected, prize winning investigative reporter, I went to work and learned that one of the doctors who suffered adversely from Operation Oink is Dr. Yule Penzell (a member of the L.A. County Medical Association, a staff physician at Northridge Hospital, with private practice at 74.07 Reseda, in Reseda, Calif. He has since sold his practice to Dr. Chin-Lon Yin). It is irrelevant whether Penzell was Ward's doctor—what is important is that Dr. Penzell survived to tell the story. There are literally hundreds of thousands of vaccination victims (including those cut down by Ford's Flu Folly) who will never be able to acknowledge that the shooting of putrid toxic substances will never bring them health—it will only shorten their life! These toxins attack the weakest organ (heart, brain, eyes, muscles, genitals, etc., etc.). The proof claims filed with USPH on the latest vaccination debacle.

The only way to restore health is to live in Accordance with Natural Law—avoid all processed devitalized products which parade as 'foods.' Avoid refined sugar, refined flour, commercial table salt (use sea salt with moderation). Eat a balanced natural food diet, whole grains, vegetables, beans, seaweed, fruits sparingly—only in season—organically grown whenever possible. That's one of the ways to regain our health.

My thanks to Morris Beale, the author of *The Super Drug Story*, for his excellent expose on the last polio vaccination fraud—which wasted hundreds of children's lives. Those that didn't die immediately are confined to wheelchairs—'living proof of the hazards of MEDICAL INSANITY ON THE LOOSE! This information and the information Eleanor McBean had researched is what the Supervisors didn't want to listen to. They were more concerned to hear Morrison Chamberlin (Director of L.A. County Health Services) do his 'Hearts and Flowers' routine, and justify the program by any means at his command.

“Mr. Chairman—Members of the Board: The efficacy of the immunization program worldwide, has been demonstrated for many decades. Those who are opposed to immunization programs would want to turn back to the dark ages when plagues and epidemics ravaged the world. The motion by Supervisor Schabarum today is certainly one that the department welcomes—one that we have recognized the need for...

‘Preventive’ programs, and are pursuing with diligence. We have had our people in Atlanta, meeting with Community Disease Center (sic) to address not only polio, but the whole broad subject of immunization. We have committees that will focus not only within the Department of Health Services, but within the private sector, including schools, to develop appropriate immunization programs, and the education of parents and communities, in the importance of this preventive effort. To focus on the Swine Flu Program (sic) (Chamberlin seemed nervous) and to hold it up as a bad problem, therefore, that no other immunization program should be undertaken, is totally wrong, and I think that there are National and International authorities in the field that have dedicated themselves to that research who speak very clearly for the appropriateness of those programs. It

would be our recommendations, the Department of Health Services, that we undertake this. and other immunization programs...”

That was the extent of Chamberlin's testimony, and the Board voted unanimously, despite the fact that they hadn't wanted to listen to our documentation and proof showing the vaccine was hazardous and deadly, Supervisor Baxter Ward added the following to the motion: 'I believe that Mr. Chamberlin would solve the problem with regard to polio, if you would simply provide the Board, and the public, with the statistics of the effectiveness of the vaccine. The number of cases, prior to the development of the vaccine, through the 30s and 40s and then I think the vaccine was introduced in 52 or 53, and there was a dramatic reduction in polio cases, and that reduction has been maintained ever since. So, while Mrs. Honorof could be correct that some vaccines might be hastily or improperly prepared, the effectiveness of the important vaccines such as polio has been demonstrated for at least 2 decades and Mr. Schabarum's motion should be supported..."

AND THE VOTE WAS UNANIMOUS—WITHOUT EVEN WAITING TO SEE WHAT KIND OF 'GEM' CHAMBERLIN WOULD PRODUCE.

I must add here that Baxter Ward and Kenneth Hahn are two of the more intelligent Supervisors. They are also understanding and sensitive to people's needs. It was Kenneth Hahn who introduced the unprecedented motion (although a bit too late) asking H.E.W. to explain the TRUE HAZARDS of the swine flu vaccine. Neither Ward nor Hahn allowed the swine flu vaccine to enter their own bodies—but they still believe in medicine men.

Due to my continued insistence, on Oct. 21, 1976, the L.A. County Board of Supervisors, “acting on a petition filed by Consumer Activist

Ida Honorof,” wrote to H.E.W. Secretary David Mathews, requesting full disclosure of all the hazards associated with the swine flu inoculation. That same month, the Los Angeles City Council passed a motion presented by John Ferraro (president) requesting the same information, H.E.W. didn't even bother to reply to either communication. There was no way H.E.W. would admit that the vaccine was hazardous—could cause death, paralysis, blindness, impotency, brain damage—that would kill their entire immunization program forever.

NEWS MEDIA PLAYS A MAJOR ROLE—GENERALLY ON THE SIDE OF THE VACCINE POISONERS

At the Second National Immunization Conference held in Bethesda, Md., April 4, 1977, Dr. Gene H. Stollerman stressed that the media must also play its role for public acceptance of the vaccination/immunization programs.

“Although public education and publicity has its own work group, we feel that we need to comment specifically. The high visibility afforded immunization and the often controversial nature of the subject matter which must be handled by the communications media underscore the need for public (mis)education and the need for expert public relations concerning this emotionally charged subject...communication difficulty arises from the fact that all immunization decisions are founded on an assessment of benefit vs. risk (we take the risk while the Pharmaceutical industry and the doctors collect the benefits)—both of which are always finite—and the public is generally unfamiliar with the benefit/risk ways of thinking about their individual health concerns (poor dumb public!). It will require a coherent coordinated response from a coalition of socially responsible forces with high credibility. (Would People Against Political Vaccinations IPAPV be considered socially responsible) to offset

public insecurity and confusion about immunization."

And so the seed for a National Immunization Commission was planted. Will our group—PEOPLE AGAINST POLITICAL VACCINATIONS, or THE NATIONAL HEALTH FEDERATION (the largest Consumer Health Organization in the U.S.) be invited to be on this elite and prestigious' handpicked group, or will it be handled in the same manner that HEW's first Immunization Conference was last November. Theodore Cooper handpicked his own "lickin' good" cronies and paid with our tax money for their transportation and hotel expenses,

In his discussion at the same conference, Dr. Weisbuch felt that 'a public media individual should be representative on the National Commission (they need a person who can be manipulated, in the same manner they insidiously controlled most of the news media during Operation Oink the swine flu catastrophe). The purpose behind that was not to co-opt the media, (not much) if you will, but rather recognizing the importance of the demand side of the equation when you are talking about the distribution, delivery and ultimately—well, the delivery of a product (to brainwash the public).

"The demand side of the equation requires that people who are to receive this product and parents who encourage their children to receive this product must understand the importance and the value, not in terms of cost/benefit/risk ration, but in terms of the general value of that particular project for themselves or for their children..."

ROBOT FOR HIRE. Dr. Conner, also present at the Immunization Conference, wasn't so happy with the media...There has been some press involvement, and I worked on several committees recently where having the press present was not an entirely salubrious experience because some of the members of the press wished to make

headlines and were not entirely responsible about the weight they put on things that they reported.” Obviously Dr. Conner didn't want objective reporting, he wanted robots and “yes men” so they could be manipulated to do the bidding of the poison pushers!

PHS, HEW, CDC has yet to prove that there ever was any benefit derived from vaccines. The only ones who benefited were the drug companies and those bureaucrats within government agencies who knock out large salaries, plus “fringe benefits.”

When this big push started last year to inoculate “every man, woman and child” in the U.S., immediately called most of the news media in Southern California (radio, television and editors of newspapers) requesting rebuttal time so that the public would at least have “a balanced account” and learn the true hazards. I was ignored (as if I didn't exist—as if I was hallucinating) despite the fact that on many occasions I had proven my worth as an investigative reporter and had won the Associated Press first prize for investigative reporting—I had established my credibility time and time again.

I received a phone call from Fran Lee, a Consumer Advocate in New York City, suggesting that I send a letter to the Federal Communications Commission, and a copy to all of the media, which I immediately did. Fran had been in Los Angeles, had appeared on the Regis Philbin Show (Channel 9) last May, and had creamed Dr. Shirley Fannin (L.A. county Chief of Communicable Disease). Since then Fannin has refused to appear anywhere with anyone who opposes the 'establishment' point of view. Eleanor McBean and I challenged her to debate the question of 'measles immunization' and the only reply received was "No thanks."

THE IMMUNIZATION PROGRAM CANNOT WITHSTAND THE LIGHT OF PUBLIC SCRUTINY

I must pause here to pay tribute to Fran Lee, for her untiring efforts to protect people—for her successful appearances on TV throughout the East, New York, Washington. When we couldn't break through the “vaccine curtain” in Los Angeles, Fran Lee did. Fran was successful in arranging interviews and debates between Dr. Anthony Morris (wrongly fired by FDA Commissioner Alexander Schmidt for opposing the swine flu vaccination program, Attorney Jim Turner (author of “The Chemical Feast”, currently Dr. Morris' attorney, and fighting to have him reinstated), against the establishment doctors who favored Ford's vaccination program. In a letter to me dated 9-2-1976, Fran writes: “Jim Turner, Toni and I were on WTOP in Washington for a half-hour, and then 3 apologists for the government came on, and the host of the show voiced some strong opinions about drug companies. They phoned the head of the station—luckily we were on live so it all went out over the airwaves. The show was to have been repeated on Saturday, but they cancelled it.

It was Fran Lee (founder of Children. Before Dogs, famous for alerting the world to the dread disease, Toxocariasis (that is spread by contact with dog feces) who first interviewed Dr. G. Nossal of World Health Organization. When asked for his opinion on the swine flu program, his reply was 'You Americans ought to have your heads examined—no way would we permit it—there are too many unknowns.' My hat's off to Fran Lee for the splendid work she's doing to protect people's health.

After listening to Dr. Fannin sell her soul to the devil (aptly following in the footsteps of Ford, Mathews, Cooper, Sencer, Salk, Donald Millar and company) on KDAY-Radio, requested rebuttal time and news director Roger Aldy allowed me time on the air. During and after the interview he criticized my position. He was actually convinced that there was a swine flu problem, and that there was nothing wrong with the swine flu program—until people started

dropping dead—and paralysis set in from the shots. He phoned me to apologize and admitted that was correct in warning people not to take the shot.

I should mention here that on my own radio show (KCSN-FM, National Public Radio Station at California State University, Northridge), I did a number of special programs devoted to this mass killer vaccine, and each week I would devote at least 5 minutes of the broadcast to an update of the swine flu fiasco, warning people not to take the shot until HEW advised them of the hazards, KPFK-FM, listener sponsored radio in Southern California (my alma mater), did a number of interviews after we filed our suit to halt the swine flu program...And Channel 7 sent Sandy Hill (one of their top notch women reporters, who is now on Good Morning America), to interview me at a Jewish Temple in Encino, where I was parading around, distributing literature, dressed in my sandwich sign, warning people of the hazards of the swine flu shot.

The sign had bold 4” and 5” lettering printed on both sides (there's 2 sides to every question).

I know I was effective, because dozens of people would phone me at home, thanking me for awakening them—I practically lived in this 3-foot by 4-foot sandwich sign, and then when the deaths started with vengeance, and the paralysis set in—then the callers would thank me for 'saving' their life! Nobody saved their life—their brains were finally working!

My letter to the Federal Communications Commission was sent on October 30, 1976, with a copy to every major and minor TV and Radio Station. Copies were sent to newspapers, large and small, as well as to magazines throughout the country. The only one to respond was Channel 5 in Los Angeles (KTLA). They "would keep my request on file." My letter follows:

Mr. Richard E. Wiley, Chairman
Federal Communications Commission
Washington, D.C. 20554
Re: Rebuttal time on the Swine Flu Inoculation Program

Dear Mr. Wiley:

The Department of Health, Education and Welfare has embarked on a nationwide mass immunization program to inoculate 'every American with a swine flu vaccine, and they will be using radio and television, as well as newspapers and magazines, in their 'Roll up your sleeves America' campaign, attempting to get people to take the swine flu injections, at the same time that they have failed to alert people to the dangers of said program. Inasmuch as the inoculation program is highly controversial, and since there has been absolutely no evidence of swine flu anywhere else in the world (not even in Philadelphia) and since many doctors and scientists throughout the world are against the program, I, a consumer activist and award winning investigative reporter and medical researcher, am asking for Rebuttal Time so that the public has a balanced account and learns of the hazards associated with the swine flu vaccine, before they expose themselves to this hazardous inoculation. The public must be made aware of:

- 1) The true hazards of the Swine Flu vaccine, which our government has refused to reveal;
- 2) The fact that children convulsed when given the vaccine;
- 3) The true reason that the insurance companies would not and could not issue indemnification coverage;
- 4) The Fact that Dr. Martin Goldfield, New Jersey Health Officer, is

opposed to the program.

5) That Dr. Albert Sabin, who originally backed the program, has retracted his position and refused to back said program;

6) That Dr. A. Chanin of Los Angeles advises people against taking the vaccine, and especially children, stressing that the American Academy of Pediatrics has never routinely recommended flu shots for children.

7) That the eminent Dr. Nossal of Australia (with World Health Organization) in no uncertain terms has labeled this program as “ill advised”;

8) The firing of Dr. Anthony Morris (Director of the FDA’s Slow, Latent and Temperate Virus Branch) with the department for 35 years or more, for refusing to go along with the program, and warning of its hazards.

I have been advised by a number of attorneys to go on record with all stations, and newspapers, etc., and with the Federal Communications Commission, requesting rebuttal time. We hope it will not be necessary to take any further steps guaranteeing us rebuttal time, whenever the proponents of the program receive time on the media.

Sincerely,

Ida Honorof

PEOPLE AGAINST POLITICAL VACCINATIONS

(I never heard from the FCC—they were part of the unholy alliance.)

The July/August 1977 Journalism Review carries an excellent article by David Rubin, “SWINE FLU, the Media as a Mirror of Confusion—Remember Swine Flu?” Rubin refers to the “\$135 million gamble that failed—the illegitimate birth of a clumsy public relations effort of the Ford administration designed to aid the reelection of the incumbent. Some blame the medical community for misreading data and bending to extraordinary financial and political pressures. Some are convinced that the press sensationalized the story, distorted the facts and led a scare campaign that convinced much of the public that the program was dangerous and ill conceived (The press in Los Angeles painted the program as perfectly safe! The press has also been condemned as the handmaiden of the medial establishment in selling the program to the public.” He took the words right out of my mouth.)

Rubin says he analyzed stories in daily newspapers and TV coverage and it was “neither sensational nor inaccurate—on the contrary—it faithfully reflected the confusion among public officials at the Center for Disease Control (CDC) Department of Health, Education and Welfare (HEW) and in local public health units. Few dissenters to the program were quoted, and spokesmen for the government viewpoint had a virtual monopoly of the airwaves and news columns.” The media focused on numbers of dead rather than causes of death and on the defenses of the public health establishment, rather than on the underlying logic of the entire program. None raised such obvious questions as 'What is flu vaccine? Or “What is a vaccine?” “What are the risks of inoculation?’

“CBS provided what may have been the biggest boost for the beleaguered program when Walter Cronkite interviewed President Ford and provided him a platform to advise all 215 million Americans to get the shot. This was contrary to the advice of Ford's own advisors, but Cronkite did not correct the President's error...It was a sad

performance by the medium on which 36 percent of Americans say they rely exclusively for their news...”

Despite the many hundreds of experts who might have been asked by the press for comments on the deaths (after taking the Swine flu shot), the same group of government authorities who were hook, line and sinker in favor of the program, Dr. David Sencer and Dr. Donald Millar of C.D.C., President Ford's personal physician, and Ron Nessen, Ford's press secretary, etc.) was quoted to the virtual exclusion of everyone else.

Rubin explains that the reason the emphasis was placed on such a small group, despite the fact that the area was potentially volatile was "because an uncertain reporter is comfortable dealing with official sources—it is the safe approach, because no editor would second guess a reporter who solicited a comment from an official of the CDC, or the local head of the public health program—and information obtained from anyone outside that sphere would be difficult to evaluate and potentially troublesome. Only reporters with a grasp of the problem, and a detailed network of reliable sources outside the top levels of officialdom, could risk questioning other people. Only NBC gave air time to one of the dissenting voices to the swine flu program—Dr. J. Anthony Morris, a virologist, formerly with the Bureau of Biologics. None of the networks probed deeply into the background of immunization, swine flu vaccine, or swine flu itself...It is fair to call the bulk of press coverage, unimaginative, predictable, superficial, and unfortunately, typical.

As far as the level of cooperation between the media and CDC, reporters said they were treated in a haughty manner by public relations people. One reporter who got through to Dr. Millar said Millar had been “abrasive, pompous and antagonistic, while another said CDC was the most offensive” of all government agencies with

which he had dealings. Dolores Frederick, science and medical writer for the Pittsburgh Press, said that one local P.R. aide told her, "I'm tired of running around getting information for the Pittsburgh Press."

Rubin correctly states that the swine flu inoculation program was undoubtedly a painful lesson in public relations for CDC, but it should also have taught journalists a few things about improving the quality of coverage of public health and medical news. Reporter Thomas O'Toole of The Washington Post, gloomily predicted that people may never again accept the word of government in a matter of public health, but Rubin thinks that is "unnecessarily pessimistic. It is more likely that both the public and the press are still prepared to accept the word of public health officials where lives may be at stake. But the credibility of both institutions cannot stand too many more such fiascos."

I would suggest that David Rubin, who wrote a splendid article, get a copy of Ivan Illich's excellent *Medical Nemesis*, in which the author over and over again explains to people that they would be far better off "HEALING THEMSELVES."

What bothered me was that the media caved in after Theodore Cooper (who has since been relieved of his services) criticized them for their 'tendency to get carried away by a 'body count' mentality.'" Not a single member of the media, outside of yours truly, took issue with that and special criteria (set up to suit CDC, HEW, USPHS and Gerald Ford). Only those people who died within 48 hours after inoculation would be shown as "Swine Flu Vaccine Casualties." Anyone who died 49 hours following injection was ruled out...It was done deliberately so that people would think they had no right to sue—"they would have died anyway." These insane bureaucrats set themselves up as judge, jury and God!

THE SELLING OF A RACKET. Ford, Mathews, Sencer, Cooper and company could never have pulled off their fiasco without the assist of the media. HEW had signed a \$170,000 contract in July 76 with Advertising Council to con the public into accepting this treacherous program.

WHY WAS IT NECESSARY TO SELL THE PUBLIC—USING TAXPAYERS TO PURCHASE THE VACCINE-TO PAY FOR INDEMNIFICATION—TO CON THE PUBLIC—IT IS OBVIOUS —THE ADMINISTRATION WASN'T TAKING CHANCES—THEY HAD TO STRONG-ARM EVERYONE.

For some mysterious reason, according to Advertising Age, the contract with Advertising Council went sour, and HEW hired some Grey North staff on a per diem basis. "They needed the help that good creative types from an agency can offer," to prepare the gullible public into accepting this hazardous program.

It is still a mystery to me why so many Americans naively accepted a high pressure campaign, without asking serious questions from the perpetrators. It was public knowledge that 6 British volunteers were deliberately exposed to swine flu virus— and nothing happened—the men didn't become infected. In what other country would people 'roll up their sleeves' for paralysis, blindness, impotency, brain damage, and even death without questioning WHY? Is it patriotic fever to blindly follow the edict of an individual who was so anxious to get re-elected that he sacrificed millions of people who blindly trusted in him (CDC is finally putting together statistics on swine flu vaccine symptoms and there are many).

WHAT WAS IN FORD'S SHOT In order to bolster up confidence in his waning flu folly, Ford's personal physician is pictured giving Ford a swine flu shot. This came at a time when a number of people had

collapsed at the Swine Flu Clinics and some had dropped dead. The entire scenario reeked to the high heavens, and inspired the following telegram (to which he never replied):

PRESIDENT GERALD FORD, WHITE HOUSE, WASHINGTON, D.C.

“HOW MANY MORE DEATHS WILL IT TAKE FROM YOUR POLITICAL SWINE FLU INOCULATIONS BEFORE YOU ADMIT MAKING A HORRENDOUS MISTAKE? WHAT WAS IN YOUR SHOT? WHY WASN'T IT GIVEN TO YOU WITH A JET GUN AT AN INOCULATION CLINIC, INSTEAD OF IN THE PRIVACY OF YOUR IVORY TOWER? WHO GAVE YOU EXECUTIVE POWER OVER SENIOR CITIZENS AND CHRONICALLY ILL? YOU ARE BEING HELD RESPONSIBLE FOR EVERY DEATH INFLICTED WITH YOUR SWINE FLU VACCINE. THOSE DEATHS REST ON YOUR HEAD. SLEEP WELL, RSVP.”

IDA HONOROF, Chairperson
People Against Political Vaccinations,
P.O. Box 5449, Sherman Oaks, Ca. 91403

In the face of dozens of deaths, it would seem preposterous for any rational person to take a shot of the same deadly vaccine that had killed so many persons—Gerald Ford was panic stricken, his plan was tottering. With a tremendous flourish, amidst an array of photographers, he showed the world that he dared. Nobody, except his private physician, Rear Admiral William Lukash, will ever know what was in that hypo. For the Chief of State to expose himself to anything other than a 'saline solution would have been sheer insanity—and if that's Ford's mentality, it is a good thing he wasn't re-elected. We also wonder why he didn't stand waiting in line like cattle at a Swine Flu

Clinic with other seniors—and why the shot wasn't given to him with a Jet Gun, which penetrates through the skin, exploding with 1200 pounds of pressure, through the tissue, into the lymph glands, into the bone, and into the bloodstream, and many times, heads straight to the heart. Is it any wonder so many seniors dropped dead right at the clinics?

SUT FILED TO HALT SWINE FLU IMMUNIZATION PROGRAM

Early in September I learned that a man in San Diego had filed suit to halt the swine flu program. I phoned the San Diego Union and obtained Lewis Cook's phone and address, and immediately contacted him. He had done exhaustive research and was determined that the swine flu vaccination program must be halted. We agreed! I contacted Charles Crecelius, President of the National Health Federation in Monrovia, and we decided we would also file suit (proper), in Los Angeles, which we did on Sept. 23rd...

A civil action to enjoin the expenditures of federal funds, pursuant to Article I, Section 8 of the United States Constitution of the First Amendment of the Constitution of the United States by promoting and carrying out a nationwide program for the vaccination and inoculation of the population of the United States against the so-called "Swine Flu," unless and until the grave doubts and hazards associates with this massive program are disclosed and fully made known to the public.

We filed our suit against GERALD FORD, President of the United States; DAVID MATHEWS, Secretary of Health, Education and Welfare; THEODORE COOPER, Assistant Secretary of H.E.W., and DAVID SENCER, Director, Center for Disease Control. The following is from our original brief:

EXHIBIT A CIRCUMSTANCES OF THIS CASE

On March 25, 1976, the President of the United States submitted to the Congress of the United States a message requesting the appropriation of additional funds by the Congress “to combat Swine Influenza.” In the course of such message, the President stated that he had directed the defendants, MATHEWS and COOPER, “to develop and implement plans that will make this vaccine available to all Americans” and that he was asking each and every American to make certain that he or she receives the vaccine this fall. Nothing in the message explained either directly or by implication that the administration of vaccines on such a scale is of doubtful merit and of necessity is fraught with hazards to the life and health of many of the recipients.

At brief Congressional hearings the defendant, COOPER, testified in part 'Since there is a real possibility that there will be no swine influenza pandemic, the program we propose is a bold one.

On information and belief, the sole basis of the foregoing action by the President was the appearance at Fort Dix, New Jersey early in February 1976 of an influenza-like illness, and the isolation from four soldiers stationed at that base of viral isolates of a virus reported to be similar to the Swine influenza virus; no other case of this disease has been reported since that time anywhere in the United States nor elsewhere in the world, not even in Philadelphia.

On April 15, 1976, the Congress of the United States passed and sent to the President as a part of Public Law 94-266 a supplemental appropriation for the Center for Disease Control of the Department of Health, Education and Welfare to be expended for a comprehensive nationwide influenza immunization program, the sum of

\$135,064,000.00 with the provision that vaccines may be supplied to state and local health agencies without charge.

Since the foregoing actions were taken by the defendants they and other agencies and representatives of the United States Government have engaged in a systematic, comprehensive, nationwide program to advertise, mobilize public support for and implement the swine influenza immunization program, featured by news reports and articles in all of the media. On information and belief, the defendants have recruited federal agencies and state, county and municipal public health offices to inform the public of the plans for immunization and to convince the public to request and receive inoculation with the swine flu vaccine.

There has been no meticulous study and careful deliberation on the Swine Flu vaccine. Education and Welfare heads and members of Congressional Health Subcommittees failed to call on opposing views regarding this mass inoculation. Although the usefulness of flu immunization is controversial no dissenting views were sought or permitted. Dr. J. Anthony Morris, FDA's leading authority on influenza trends, vaccine and latent effects was fired by the Food and Drug Commissioner, Alexander Schmidt, in mid-July for expressing concern about the effectiveness and risks associated with this new swine flu vaccine. Following this, all of his test animals in four laboratory rooms were ruthlessly destroyed. Dr. Morris' study showed that a flu vaccine when inhaled by laboratory animals "tended to enhance cancerous tumors."

In 1972 Senator Abraham Ribicoff held hearings on the laxness of the Bureau of Biologic Standards (then part of National Institute of Health). Expert testimony proved that many of the vaccines licensed by said Bureau of Biologic Standards were substandard, of low potency, and ineffective. As a result this Bureau was transferred to the

Food and Drug Administration and renamed Bureau of Biologics. At many Congressional Hearings, three of the four manufacturers (presently manufacturing the swine flu vaccine) were consistently revealed in a poor light, such as 'failing to report serious and even fatal side effects of their drugs' to the Food and Drug Administration and to physicians. Case in point: Chloromycetin, Mer 29, Indocin, and Thalidomide. Were it not for the dedication and caution exercised by Dr. Kelsey, Thalidomide would have been approved in the United States and we would have thousands of children victims of that drug. Such records do not inspire confidence.

In or about the month of July 1976 it became known through the media that the casualty and liability insurance industry had refused and would continue to refuse to write or carry liability policies insuring the manufacturers of the swine influenza vaccine against liability for damages on account of the administration thereof. The insurance companies were obviously aware of the true hazards and refused to provide insurance at any price. These hazards have not been revealed to the American public. Thereupon, as a result thereof, legislation was introduced in the Congress of the United States, which was ultimately adopted on August 12, 1976, authorizing the government of the United States to indemnify manufacturers held liable for damages resulting from the administration of the vaccine.

According to the plans of the defendants, actual administration of the vaccine under the mass immunization program is to begin early in the month of September 1976 and continue through November. Contradictory information comes from defendant THEODORE COOPER, who publicly stated (in April 1976) that the mass inoculation must be started in July and in full operation during August and September, and that 'any delay beyond this timetable would doom the effort to failure. Upon his own admission, the program is already 'doomed to failure,' and if implemented at this time would be

hazardous and ineffective.

SERIOUS DOUBTS ABOUT THE PROGRAM AND ITS DANGERS TO HEALTH NOT DISCLOSED BY DEFENDANTS

Notwithstanding all of the foregoing, on information and belief it has not been conclusively established that the swine flu virus is a virulent type of influenza virus or that it even exists in man; responsible opinion in Great Britain holds that the Fort Dix cases may have been only an isolated event. *Lancet*, the respected British Medical Journal, has been highly articulate in its amazement and disbelief that such an irresponsible plan would be proposed and carried out by the United States government. On information and belief, there has not been a single case of contagious swine flu reported anywhere in the world since the four cases at Fort Dix in February 1976; in the past no pandemic of influenza has ever occurred without being preceded by several local outbreaks in various parts of the world. On information and belief, influenza vaccines in general and swine flu vaccine specifically are not consistently effective in protecting recipients from the disease nor even in causing a rise in flu resistant antibodies. Dr. Anthony Morris states that the flu vaccine now being manufactured 'produces the wrong kind of immunity.' It elicits systemic antibody that can be measured in the blood, but does not produce the local antibody, in the lungs and nose, needed to protect against infection by the flu virus.

On information and belief, the risks to life and health from the high incidence of fever and other side effects of the vaccine are substantial. Public health experts in the United States estimate that approximately 1590 of those persons inoculated with the swine flu vaccine will suffer disabling illness. Arnold Chanin, M.D. states that most children should not be given influenza injections. The American Academy of Pediatrics has never recommended immunizing children routinely.

The cumulative effects of repeated flu injections is not known and may not be known for decades. Therefore, many school children without chronic respiratory disease will be unnecessarily immunized against the 1918-A-N.J. virus.' Competent United States medical opinion believes that the major flu type disease to be expected in this country this winter is not swine flu, but swine flu-vaccine disease.

No other country in the world has adopted a mass immunization program against the Swine flu, like that promoted by the defendants as alleged above. In those countries which have taken action at all, the action has been limited to preparing vaccines for stockpiling, for use in the event of an outbreak, or for administration to high risk persons, such as those with respiratory or cardiovascular ailments and the immobile elderly.

VIOLATION OF THE PEOPLE'S RIGHT TO KNOW. All of the facts set forth in paragraphs above preceding are known to the defendants. None of these facts have been disclosed by the defendants to the public nor released and made known by them to the information media. The defendants and those associated with them have effectively concealed from the people of the United States the existence of these grave questions and hazards inherent in this mass inoculation program.

The expenditure of federal funds by the defendants for the implementation and publicizing of the said program, without at the same time informing or allowing the public to know of the serious doubts and hazards involved constitutes a violation of the people's right to know as secured by the First Amendment to the Constitution of the United States.

By reason of the facts alleged in the above paragraphs, the government of the United States has become an active participant in

the dissemination of propaganda and the promulgation, promotion and administration of the Swine flu mass immunization program.

Said program has been and is advertised to be a voluntary program available to residents of the United States solely as a matter of individual choice. By reason of the facts herein above alleged, however, the population of the United States is not and will not be in a position to make an informed choice or give informed consent to inoculation because the public has not been informed either adequately or at all of the doubts and dangers involved as alleged in paragraphs above.

In August, 1976, a national commission told a federal agency (Center for Disease Control) that more than 60 million forms printed for the Swine flu program should be thrown out because they had failed to explain adequately the possible risks of immunization. The flu immunization forms, printed for participants to sign, were identified as 'Registration Forms' rather than "Consent Forms." The word "Consent" is NOT used, and the patient is not told he is giving his permission for injection of the Swine flu vaccination.

Plaintiff has no plain, speedy or adequate remedy at law, and unless the relief requested herein be granted plaintiff and other taxpayers and residents of the United States will be irreparably injured.

WHEREFORE, plaintiff prays for a preliminary and permanent injunction enjoining and restraining the defendants and all persons acting in concert with them from continuing to expend funds appropriated by the Congress under Public Law 94266 for the the swine flu immunization program unless and until the defendants have taken immediate, reasonable and effective steps to disseminate information respecting the dangers and questions concerning the program on the same scale and with the same urgency as they have

released and disseminated information in support of the program; and for such other and further relief as the court may deem just.

Bid to Halt Flu Funds Fails

SOUTHLAND

A suit by consumer activist Ida Honorof seeking to halt the federal government's swine flu inoculation program was dismissed in Los Angeles by U.S. Dist. Judge Robert M. Takasugi. The judge granted the motion by the federal government to dismiss the action on grounds that Mrs. Honorof and Charles I. Crecelius had no standing to bring the suit. The pair maintained that research regarding possible negative effects of the flu vaccine had been hidden by scientists at the Food and Drug Administration and that the program should be halted until all research has been made public.

An attempt to halt federal spending of \$135 million for the nationwide swine flu inoculation program was turned aside by U.S. Dist. Judge Robert Takasugi in Los Angeles. The judge refused to grant a preliminary injunction requested in a suit filed by antifuoridation advocate Ida Honorof and Charles I. Crecelius of Monrovia, president of a group called the National Health Federation. Takasugi said there was no proof the plaintiffs had proper standing to file the action. Defendants in the suit included President Ford and Secretary of Health, Education and Welfare David Mathews.

Both Lewis in San Diego, and we in Los Angeles fought this thing out, hoping to be able to halt the program and save the lives of naive but innocent people. We all worked together, supplying each other with material. Lewis traveled down to Los Angeles a number of times to assist us. There were interrogatories—amended complaints,

rebuttals, etc., etc...all to no avail the laws are written FOR THE PERPETRATOR'S OF CRIME NOT FOR THE INNOCENT...We didn't have 'standing' to sue!

When asked how we could get 'standing, we were told that “if you took a shot and dropped dead, that would give you standing.” That was too dear of a price to pay! This is another area that needs changing—laws were written for the perpetrators of crime—including this law. How many years will it take before the people take back their country and run it for the benefit of the people, instead of for the benefit of the fat cats? It was a race against death—we exhausted every avenue we possibly could, and of course were assisted by Lewis Cook.

People were dropping like flies—some of the “clinics” closed down—but the push continued—until reports came in that there was a high rate of Guillain-Barre syndrome among people who had gotten their shot...and while the phony investigation was held to determine if there was a “relationship,” the shooting continued. But the lines were thinning out—people were beginning to use their brain. There is no swine flu problem, why the devil should we jeopardize our life?” **They were actually thinking instead of letting Big Brother think for them!**

Let's backtrack a little and pick up on how Congress was shafted (and of course that means we were shafted). If you recall, the entire program was being held up because the insurance companies refused to indemnify the drug companies—justifiably so-the risk was just too great. Business Week, 5-3-1976, reported that “Swine Flu Vaccine Liabilities May Exterminate Suppliers...”

“Swine flu vaccine may create more health problems than it is supposed to prevent. The potential claims arising from unforeseen

side effects from the Swine flu vaccine could wipe out the pharmaceutical manufacturers of the vaccine, according to the underwriters (Federal Insurance, primary underwriter for Merck & Co., Inc., and others)...not only the product liability exposure, but the administrative tangles expected with a program of vaccinating upwards of 200 million people in the space of a few months, makes the risk uninsurable...Though Merck has done business with Federal for some 30 years and carries a deductible of an estimated \$10 million on its liability policy, the underwriter felt it was 'not convinced Merck has had time to test the vaccine for side effects' (and that's not the only problem)...one Scientist had gone so far as to predict that the vaccine can actually cause serious illness in a large proportion of the children and elderly who are inoculated." (Ironically that's why Sir Crocodile Ford was initiating the program)

"The whole program is being pushed too fast", a spokesman for Federal told Business Insurance. "It should be the federal government's responsibility to bear the risk of liability for possible side effects from the vaccine. Attorneys for the 4 drug manufacturers are currently negotiating with H.E.W. to devise contract language to insulate the drug manufacturers from liability. Pharmaceutical Manufacturers Assn. asked congress to include limited immunity for the drug manufacturers in the area of product liability. In a letter to HEW, Merck stated, "Our own insurance carrier is willing to insure us only against negligence or fault on our part...because of the massive number of people involved the insurance carrier considers it not feasible to place any broader coverage in the existing world market at virtually any price...A reinsurance company approached by Federal refused to cover Merck even for negligence in developing the vaccine...What worries me (said a spokesman for Federal) is the claims that could arise in the year 2000 as a result of side effects we have no way of knowing about in 1976." (Report to the Consumer #127, June 1976)

The insurance companies were holding out. They knew this vaccine would wipe them out, it was hazardous, and the entire “show” was up for grabs if Congress didn't indemnify...A number of Congressmen were up in arms—especially Congressman Henry Waxman (Los Angeles, Calif.). In no uncertain terms he condemned the entire idea of indemnifying drug companies. “It would set the most dangerous precedent” and he refused to budge an inch. Then manna from heaven—along came the Philadelphia Legionnaire's incident in early August—and even though there was absolutely no connection with the deaths in Philadelphia and Swine Flu—it was sufficient to push the panic button and the Congressmen fell hook-line-and-sinker—and the indemnification was settled—on your back—always on your back! You were already paying for the vaccine (a \$100 million gift to the drug companies)—now you were picking up the insurance tab whether you liked it or not—next you'll be able to sue yourself if you suffer adversely or die—if the DEPARTMENT OF DEFENSE WILL ALLOW IT (more on that later).

I met with Congressman Waxman on July 29th, and we discussed the indemnification rip off, and Waxman stated, “I claimed that the hysterical move by the Ford Administration in using the Legionnaires' Disease to get Congress to adopt the indemnification of the drug manufacturers for liability as a result of the swine flu vaccine, was equivalent to the Gulf of Tonkin incident being used to panic Congress to adopt a Resolution in support of the war in Vietnam.”

Waxman was determined to pursue 'indemnification" even further, because he knew that the worst precedent had been established. He approached Congressman Paul Rogers, asking for a G.A.O. investigation, and Rogers gave him the cold shoulder. He then went to Congressman John Moss, and Moss was anxious to go ahead with the investigation. When Rogers got wind of Moss' interest he promised

that he would get the investigation Started—and that's where it stands now—out in the cold. We could start a campaign to get a thorough investigation going and expose this entire indemnification ripoff. Otherwise our children, grandchildren, and great great grandchildren will be shelling out the money to pay for the mistakes made by HEW! If we continue taking the vaccinations there won't be many of us around much longer!

As of August 5, 1977 there have been claims totalling \$1,334,463,319. Of these, 62 were for wrongful death totalling \$1,028,121. (The family of one man in Castro Valley, California, sued for \$1 billion, but the Department of Justice refuses to give us the name of either the deceased or the family, because “The Privacy Act” forbids him to do so. I've challenged him under “The Freedom of Information Act”, because I'm aware that claims will be settled secretly and their guilt will be swept under the rug. It will be interesting to watch the outcome of this battle, 207 people filed claim for paralysis (Guillain-Barre)—\$170,258,656. Then there's the other small matter of 675 claims for Personal Injury (which includes blindness, impotency, brain damage, etc., etc.) for \$305,835,064. I've just finished urging Dr. Penzell's wife to get her husband to sue. There must be literally hundreds of thousands of people who should sue for damages, but they don't know they can sue, so again, I will repeat the information I carried in Report to the Consumer. Write to the U.S. Public Health Service Claims Office, Parklawn Building 5600 Fishers Lane, Rockville, Md. 20852, and request a claim form. The Department of Justice expects to be busy for 10 years just processing claims—

FORD'S FLU FOLLY WAS A RIP-SNORTING AFFAIR FOR DOCTORS, INSURANCE MEN, LAWYERS, THE PHARMACEUTICAL INDUSTRY—THE WHOLE MEDICAL INDUSTRIAL COMPLEX—THE ONLY ONES WHO LOST OUT

WERE TAXPAYERS, AND PEOPLE WHO FELL FOR THE HARD SELL CAMPAIGN.

We warned people that the following would take place. The Center for Disease Control (CDC) is stuck with 80 million doses of the highly dangerous swine flu vaccine, and the latest word (8-8-1977) is that they are once again renewing their campaign to con people into being vaccinated with this toxin, despite the fact that the vaccine was banned in January because it had caused a high rate of paralysis, blindness, impotency, brain damage and death. Beware of this latest scheme.

CHILDREN CONVULSE IN HUMAN GUINEA PG EXPERIMENTS AFTER GETTING SWINE FLU SHOT

The National influenza Workshop (held March 25, 1976) revealed some interesting highlights. Dr. Karzon reported, “In 2 children of 16, under the age of 3, we had FRANK HARD CONVULSIONS ACCOMPANYING TEMPERATURE OF 103 and 104, each of them exactly at 6.5 hours. These children had not had convulsions before...We concluded that the cutoff point of this phenomenon of high fever accompanied occasionally by convulsion may be restricted to the under 3 group.” Then Dr. Karzon referred to another study: “They had 9 of 13 children with a very high fever. Their 13th child had a convulsion and they stopped their experiment at this point. There are 29 children and 3 episodes of convulsions—a rate of 10%.”

Another Panel member, Dr. Sam Katz, stated: “There are 9 million kids under 3 years of age...If 10% of them have a seizure after vaccine, that is 900,000 seizures. If 1%, it is 90,000 kids with seizures you know. I don't want to see it all happening on, you know, Sunday, September whatever it is. So we are running scared and the idea of making the formulation more complicated just makes it that much less

possible to come up with any of the answers in advance. (p. 86) (From report to the consumer)

Addressing the 2nd National Immunization Conference, 4-4-1977, Dr. Dickson (Acting Assistant Secretary of health) informed the assemblage that HEW is now developing “plans for a National Childhood immunization initiative, an effort that will seek to close the serious and widening gaps in present efforts to protect the children of this country against preventable diseases.” Another speaker at this same Conference, Dr. Lepow, in a discussion on meningitis, suggested that they must start “an effective and safe means of working with young volunteers—children under the age of two...” Your children will be used as guinea pigs if you allow it!

The drive to immunize our children continues, despite the dangers. The question of giving children shots for measles has been frowned upon by most pediatricians, yet during the swine flu fiasco, all kinds of pressures were exerted to get pediatricians to inoculate their child patients. Some didn't need much pressure, as an example, Dr. Bernard Portnoy at USC Children's Hospital received 250 doses of vaccine (even before the program officially started)—and he immediately starting “shooting” patients.

I raised the alarm at a Board of Supervisors meeting, and he called a halt...His alibi was that the shipment came in and he geared up. His patients were children with “chronic” disease—considered “high risk” suffering from pulmonary, heart, diabetes, kidney, cancer, leukemia, etc. Children whose bodies are already weakened by their condition. These shots are all that was necessary to push them over the brink. Portnoy was convinced that it was perfectly “safe” to give them the shots even before he was officially authorized to do so...If they “weren't safe, CDC would never have released them.” Some doctors have been so brainwashed—it's a crime that they're the “keepers” of

human life.

Throughout the world dedicated doctors and public officials are challenging the atrocities committed in the name of “preventive medicine.” Earlier this year the Honorable Jack Ashley, a member of Parliament's British Labor Party, stated: "The human toll from vaccinations is far too great...Over a 25 year period, 300 children in Britain have been deafened, blinded, or suffered permanent brain damage after immunization against whooping cough, diphtheria, and tetanus...Happy, healthy children have been turned into cabbages within a few days.” Ashley wrote to the government ombudsman, Sir Idwal Pugh, requesting a full inquiry, while parents of the vaccine damaged children are seeking “millions of pounds in restitution from the British government for the injuries caused their children.” Even though vaccinations are not compulsory in Britain, parents fall prey to the same scare tactics used in the U.S.—then they suffer the pain of deformed and damaged children. Vaccinations for D.T.P. (diphtheria, tetanus and pertussis whooping cough) are routinely administered in the U.S. despite the known dangers associated with these deadly toxins. We are also calling for a full scale investigation into this insane practice.

DISEASE AND DEATH CAUSED BY INOCULATION AMONG ARMED FORCES

For years the Department of Defense has violated every Civil Right in the books—the military were treated as guinea pigs, and they could do very little about it. One of my subscribers (to Report to the Consumer) wrote me a while back. “I remember while a member of the U.S. Marine Corps, as an NCO in Vietnam a few years ago, we were needlessly and forcefully subjected to a multitude of injections of relatively high dosages. All in all, over 40 such injections during the course of the 4-year enlistment. I believe the military to be

particularly guilty of these forced injections, and the bulk of which aren't needed for international travel, which is the basic purpose of the program in the first place. MILITARY-ARISE-THESE VACCINES CAUSE DISEASE—THEY DO NOT PREVENT DISEASE. There are a few Senators and Congressmen who really care about our military personnel—perhaps we should start a campaign to awaken them. There is absolutely no reason for the forced inoculation program in the military. If any member of the Armed Forces insists on getting his “shot”—so be it, but not the entire Armed Forces.

In February after I learned that 2 Navy men were facing court martial for refusing to take the shot, I submitted the following article to a number of newspapers and magazines. *Let's Live* printed it in June...

TWO NAVY MEN STRIKE A BLOW FOR SANITY

In November, 1976, two Navy men at the Key West Boca Chica Naval Air Station refused to be vaccinated against Swine flu or to produce a doctor's letter explaining why they shouldn't receive the injection. Petty Officer Robert B. Allen (of the Moslem religion—his legal name is Kaleeq Kashief) and Airman Ricky L. Gardner were threatened with court martial, and if convicted could have been sentenced to 6-months confinement at hard labor. During that period of confinement they would forfeit 2/3 of their pay, in addition to receiving a bad conduct discharge.

These two men were aware of the hazards of the swine flu shot—they knew of the hundreds of deaths and paralysis suffered by persons who had 'rolled up their sleeves,' and they refused to allow the toxic serum to be injected into their bodies.

On Thursday (2-9-1977) they faced their accusers at the court martial trial, and won a precedent setting victory...a “verbal reprimand” and

the charges will not appear on their records!

When we (People Against Political Vaccinations) mounted our campaign to halt Ford's Flu Folly, we received a number of letters from military personnel requesting guidance in combatting the swine flu inoculation which was “voluntary” for civilians, but mandatory for all military throughout the U.S., Virgin Islands, Puerto Rico, Wake and Midway Islands, etc.

CASE-BY-CASE. I drove to the March Air Force Base in Moreno, Calif. on Oct. 4, 1976, and met Hospital Commander Colonel Smith. I was assigned to Major Daly (Office of Information) and was told, “If the air person refused to take the swine flu shot, we'd have to address each case, on a case-by-case basis, and we'd have to consider what actions to take at the appropriate time.” Daly refused to respond to my question as to whether the military persons would be faced with court martial proceedings if they refused inoculation.

The “voluntary” nationwide swine flu inoculation program began, officially, in October 1976, but was suspended after a number of elderly people died after getting their shots. The suspension was lifted, and despite reports of dozens of cases of paralysis, and hundreds of deaths, the program continued, until December, when Health, Education and Welfare and Center for Disease Control, could not longer suppress the information that the rate of Guillain-Barre paralysis was far greater among persons getting the swine flu shot, than it was among the unvaccinated. In early February, our new Health, Education and Welfare Secretary, Joseph Califano, reinstated the program and ordered that bivalent flu shots be made available for the “elderly and chronically ill,” because of the threat of “A-Victoria” flu...and, as he put it, “A-Victoria flu to the high risk group far outweighs the danger of a paralytic ailment associated with the vaccine.”

REIMMUNIZATION

There is no information coming from the military at present. We do know that there is far more disease and death caused by vaccination among the military than from the disease it is supposed to prevent. And each year the military is reimmunized—shot full of an array of vaccines—typhoid, tetanus, and diphtheria toxoid, poliovirus vaccine live oral, trivalent I, III and III), yellow fever, influenza, cholera, plague, adenovirus, meningococcal and several others. Immunization also applies to all children on the various bases.

One (phone) caller advised me that when her husband refused the shots in 1975, he was “jumped by 3 Military Police” and shot “so full of vaccine, that he spent a whole week in the hospital, deathly sick.” Once you get into the armed services, your body becomes the property of the military, and the dosage shot into bodies is far greater than civilians.

In the Regulations for Immunization Requirements and Procedures, issued by the Department of the Army, the Navy, the Air Force and Transportation, dated March 22, 1974, they list the 'Dosage Schedules for Basic Series and Reimmunizations for Adults.'

It is interesting that under Vaccine doses, schedules and specific geographic requirements notes it reads: “The schedules and dosages contained in this document shall be adhered to *regardless of the schedules and/or dosages contained in the manufacturer’s package insert unless otherwise noted.*” (Italics mine.)

DANGEROUS VACCINES

Dr. Anthony Morris (Former chief of Slow Latent and Temperate

Virus Vaccines, with H.E.W.) stated that at no point were the flu vaccines effective. Yet the military is still inoculated with these ineffective and dangerous vaccines.

Even though there have been no cases of virus reported, such as smallpox, the armed Forces continues vaccinations. When I spoke to Major Gerald D. Gantt at the Fort Knox, Kentucky installation (Dept/Army-Hidats U.A. Army Armor Center at Fort Knox), after 66 men were admitted to the hospital with high temperatures, he advised and confirmed by personal letter (dated 10-14-76) that the soldiers had been given 3 different flu vaccines—Hong Kong, Victoria and Swine types, in addition to tetanus, diphtheria and typhoid.

Perhaps some of our intelligent and honest public servants will soon start an investigation into the armed services practices of indiscretionary vaccinations of the military. The problem is that the military withholds information about illness due to vaccinations, and when there is death, which is caused by vaccinations—it is either covered-up or termed some 'vague' disease. There is no record of the chronic diseases the military suffer from, of times due to being vaccinated with these potent poisons.

—Ida Honorof

Lawrence Holliday Fink, M.D. Asst/Chief of Neurosurgery, Natl Naval Medical Center, wrote a very interesting letter to the Washington Post (12-28-1976) in Letters to the Editor.

“SWINE FLU: THE LESSONS NOT LEARNED. Recent developments in the swine flu immunization program should serve to underscore, once again, the potentially disastrous consequences of the politicization of medicine. As an honorable profession medicine has maintained its ethic and its effectiveness only by remaining above and

beyond the reach of politics.

“Now, for what is probably the first time in American medicine, the political concerns and campaign rhetoric of the federal executive have conspired to launch a poorly conceived and virtually untested mass immunization program, the unfortunate consequences of which are now becoming apparent, as in the development of Guillain-Barre syndrome. There are ample indications that the government did not fully consider all the available evidence and, indeed, chose to ignore contrary advice that such a program was ill-advised. It is truly remarkable to consider that, whereas it takes years of carefully controlled investigation to introduce any new drug in the United States, despite the fact that such a drug may have been successfully used in other Western nations, the swine flu program was put together in a few short months, to meet a political deadline, based only on the mere speculation that an outbreak of swine flu might occur in this country.

“In a campaign of terror, the government likened the potential of swine flu to the influenza pandemic of 1918, which claimed millions of lives worldwide, and chose to ignore, entirely, the fact that the vast majority of those deaths occurred as the result of secondary complications that could be readily treated today with common agents not then available, such as antibiotics and intravenous solutions, to name two.

“Notwithstanding the fact that less than five documented cases of swine flu had occurred in a population of over 200 million, the government demanded a mass immunization program, the complications of which, already known and yet to be discovered, probably exceed the risk of the disease itself. And, with the most craven disregard for the fundamental rights of its citizens, the Department of Defense made this immunization mandatory for all

military personnel. Indeed, without any foundation whatsoever, DOD attempted to require double dose injections for the military and were deterred, not by medical considerations, but only by the fact that the double dose was impractical in the auto injector selected for use. To the credit of many physicians, civilian and military alike, they refused to be stampeded into taking the injection themselves or advising their patients to do so.

“In this era of costly congressional investigations of remote events, the American public certainly deserves a full scale investigation into the negligence of the White House, HEW and CDC in advocating and DOD in requiring this ill-conceived and exceedingly risky program, the need for which was never demonstrated and the complications of which were never appreciated or admitted.”

Perhaps the military is also awakening. I have dozens of letters from military persons who asked for advice as to what they can do to avoid taking this political vaccination. The suggestion of an investigation is excellent but a Congressional investigation would be like Nixon investigating Watergate!

DEMAND THE REINSTATEMENT OF DR. ANTHONY MORRIS

I come now to one of the most important reasons for this book...There was One man in all of the United States who challenged the CDC and the FDA where it hurt...His tests proved that the Swine flu vaccine was hazardous. We may not agree with him entirely, but the fact remains that as long as Big Brother is allowed to brainwash people with false concepts, we need people like Dr. Anthony Morris. The following was my immediate reaction when I heard of the carnage perpetrated by the FDA THE BIG PUSH IS ON. With the 'insurance problem' tucked away, it is expected that daily (starting mid-Sept.) millions of Americans will meekly submit to Ford's Flu Folly. We are

willfully deceived into believing that, except for Dr. Albert Sabin's 'drafting of a letter to Ford asking that the nationwide inoculation program be delayed until it is determined that an epidemic actually exists,' all is quiet, NOTHING COULD BE FURTHER FROM THE TRUTH!

On July 13th, Dr. Anthony Morris (once the chief vaccine control officer—see RTC #5-#127), Director of FDA's Slow Latent and Temperate Virus Branch was QUIETLY FIRED and ordered by FDA Comm. Schmidt to be out of the building by Friday, July 16! All evidence irrefutably proving the hazards of the flu program had to be destroyed! What followed would put Hitler's book burning rampage to shame TEST ANIMALS IN 4 LABORATORY ROOMS WERE RUTHLESSLY DESTROYED it will take from 2 to 3 years to repeat the influenza studies destroyed by the FDA in their mad stormtrooper frenzy to cover up the truth, so that millions of Americans can be duped into blindly following the demagogic tyrants and meekly allowing this UNDER developed and UNDER tested vaccine to be injected into their bodies. The insurance companies knew full well how hazardous the vaccine was, now taxpayers will be allowed to sue themselves if they suffer illness or death. OPERATION OINK MUST BE EXPOSED TO PUBLIC VIEW!

"Five of the 7 employees working under Dr. Morris have been detailed to other jobs. The other 2 do not yet know their fate, but (they) have been stripped of all their research records and equipment and told to get rid of their vaccine cultures," writes Aurora K. Reich* a syndicated columnist) in the Indianapolis Star. New locks were installed on all (Dr. Morris') laboratory doors. Special permission is needed by the 2 men, yet to be detailed elsewhere, to view even their personal papers. One employe was detailed to inventory all the iceboxes and walk-in freezers used over the years by Dr. Morris and his staff for the storage of vaccines and cultures. The government

wasted no time in destroying hundreds of mice and dozens of guinea pigs, hamsters, ducks and chickens that had been on longterm studies to determine the hazards of vaccines. One of these involved hundreds of mice on hypersensitivity studies with influenza viruses.

For years Dr. Morris had been telling government officials that followup studies on influenza vaccine were essential—especially hypersensitivity studies. Hypersensitivity means that if a person gets a flu shot and then is later exposed to the flu, he will come down with an even severer case than he would have gotten had he NOT taken the flu shot. This could mean that insurance companies could be faced with millions, even billions, of dollars in claims for years to come. In one 1968 study alone, 54% of those getting a flu shot came down with severe cases of influenza during the next flu epidemic, while only 25% of those not taking the flu shot got the flu. Another study in a small group of industrial workers showed similar results—55% of the immunized group got the flu, while 26% of the UNimmunized got flu.

Government officials did not permit Morris to do followup studies on influenza—they even prevented him from buying the necessary materials to do so." On Jan. 1, 1975, Dr. Morris filed a grievance with the government (which he won) only to have the decision of the Grievance Hearing Examiners overruled by Alexander Schmidt, a few days prior to his handing in his own resignation as FDA Commissioner. He had served his masters well—but it had gotten too hot in the kitchen and Alexander Schmidt had abdicated the throne to return to Univ/Ill. The recent exposure, “Pressure from the drug industry exerted to get approval of dangerous drugs—some of them on the U.S. market as well as throughout the world—top echelon within the FDA catering to the powerful pharmaceutical industry—files pilfered and memorandums changed—scientific testimony altered”, etc. The expose was a bit too much for The Second Coming...Farewell to Schmidt whom will the drug, chemical and food

manufacturing cartels surprise us with, to head the FDA on Dec. 1, 1976?

We are reminded by Reich that, "For more than 3 decades Americans have faithfully taken their flu shots each season yet our track record for conquering influenza is not good. Government figures show that during the 1968 Hong Kong epidemic alone, nearly 30,000 persons died of the 50 million who came down with it—in spite of a readily available vaccine. According to government reports this epidemic alone cost our nation an estimated \$4 billion. Aurora Reich explores the risks associated with killed virus vaccine.

“First, serious reactions—including fatalities—have occurred in individuals sensitive to the chicken egg protein in which the vaccine virus is grown. The egg protein contains blood group substances which induce antibody against these substances. This could pose a serious threat of fetal damage to women who might later become pregnant. Recognition of this possibility led the Public Health Service (PHS) to remove pregnant women from their 'high risk group' list to get the vaccine in 1963, after being on the preferred list since 1962 along with the elderly and informed. Last year PHS recommendations stated that "Pregnancy is not an indication for or against influenza vaccination.

"Second, the virus itself has toxic properties, even after it's killed which can cause fever and convulsions, especially in children. January's *Journal of Pediatrics* carried the research of doctors at Atlanta and Sheffield, England, working together testing a purified killed influenza vaccine. They concluded that even the purified vaccine is too toxic to be given to children 2 years or younger. This study showed 69% of the infants ran high fevers 6 to 12 hours after vaccination, and 1 infant had a convulsion. Other Studies show similar results. One doctor pointed out that there are 9 million kids less than 3

years of age. If 10% of them had convulsions, that's 900,000 kids with convulsions...The routine vaccination of infants and children with killed flu vaccine has not been recommended by PHS for several years.

"Third, there are an unpredictable and unknown number of people who will develop what is called "hypersensitivity" to the flu vaccine—be it the New Jersey swine strain or some other flu strain. The recent trials conducted at Atlanta on 140 human guinea pigs showed some 3 to 5% adverse reactions. Assuming the same dose is given, this extrapolates out to some 6 to 10 million adverse reactions in 215 million Americans from the New Jersey swine flu vaccine—*not counting hypersensitivity.*

“What risks are we taking by aiming to vaccinate some 215 million Americans with a flu vaccine not yet fully developed and tested?” asks Aurora Reich. “The truth is, WE CANNOT MAKE A SAFE AND EFFECTIVE FLU V ACCINE...But perhaps the American people may have already pondered this. A recent government poll revealed that only 16% of those polled were willing to take a flu shot this fall. At an Influenza Workshop in February, Dr. Maurice Hilleman of Merck, stated, “The fifth freedom is freedom from vaccination. You can't force anybody to take it...It's going to take time to get the pig virus worked up.” (REPRINTED FROM RTC SEPT. 1976)

(*Aurora Reich was former Director/Office of Scientific Communications, in the Div/ Biologics Standards, under National Institutes of Health)

Dr. Morris had been with the Division of Biologics (DOB) since 1940. After learning some disturbing facts about DOB, Senator Abraham Ribicoff in 1971 requested that the General Accounting Office investigate the regulation of vaccines As a result, DOB was taken out

of the jurisdiction of N.I.H. and transferred to FDA. The name was changed to Bureau of Biologics, but nothing else changed. Scientists who stand their ground against the chemical industry are still harassed—the same conflict of interest exists—proof the swine flu fiasco. There must be an immediate investigation not only into the swine flu program—the indemnification coverup—but into the entire INSANE PRACTICE OF SHOOTING TOXINS INTO PEOPLE AND LEADING THEM TO BELIEVE IT WILL RESTORE THEIR HEALTH!

Equally important, so long as we must contend with immunization programs, we need dedicated scientists to watch over the efficacy and toxicity, for those persons who are still living in the dark ages.

Therefore we must mount a MASS CAMPAIGN and DEMAND THAT DR. MORRIS BE REINSTATED TO HIS FORMER POSITION AND HE BE GIVEN A PUBLIC AND FORMAL APOLOGY FOR THE INDIGNITY OF ALEXANDER SCHMIDT'S ACTION.

Every day more truth is allowed to see the light. The following incident:

RABIES IMPLANTED IN RESEARCHER

On April 14, 1977, Dr. Jerome Andrulonis, a 32 year old researcher working in the rabies laboratory of the New York State Department of Health (completely immunized) contracted rabies “by inhaling a rabies vaccine he was experimenting with.” Andrulonis, according to the Associated Press, “was fully immunized and had antibodies for the disease, was hospitalized in a serious condition.”

The Center for Disease Control Morbidity and Mortality Report (6-3-

77), "On April 21, the patient fell into deep coma...between April 22 and May 3, remained in deep coma...Since May 4, patient has shown gradual but noticeable improvement. Although he is unable to respond to verbal command or to communicate with those caring for him, he no longer requires respiratory assistance...is demonstrating purposeful movement." Despite constant pre-immunizations against rabies...he was fully immunized and had antibodies for the disease, he still contracted rabies

Andrulonis, a senior researcher for the State Health Dept. had been researching methods to immunize wild animals against rabies. He was working on a new oral rabies vaccine, virus in a pharmaceutical machine onto sugar particles, which were to be put in meat that would be left for animals. Despite the fact that Andrulonis was wearing protective gear (face mask and gloves) during his research work, he probably inhaled an unknown quantity. His condition continued to deteriorate and he was diagnosed as suffering from encephalitis or inflammation of the brain. He spent several weeks in the clutches of death, sometimes in a coma. He definitely suffered partial paralysis, again, despite the fact that Andrulonis received continual immunization boosters, as well as blood tests required by the department, which confirmed "adequate antibodies against the disease" CDC, PHS and HEW suffer from derangement, they simply refuse to admit that the disease was implanted in Andrulonis during inoculation. (In a future book we will pursue the Rabies vaccine, and its hazards. Eleanor McBean in *VACCINATION CONDEMNED* explores the Rabies scene.

CDC AGAIN VIOLATES LABEL WARNING

For the past few years the Center for Disease Control has Wrongly been advising inoculating pregnant women for measles, contrary to the insert warnings. On 7-7-1977 they awakened to the fact that they

were violating their own rules. (What else is new?) Merck, Sharpe & Dohme specifically warns that "Women of childbearing age should not be considered for vaccination unless there is no possibility of pregnancy in the next 3 months...because of the potential risk of vaccination in pregnancy, and because significant congenital anomalies occur regularly in approximately 3% of all births and their fortuitous appearance after vaccine has been given during pregnancy could lead to serious misinterpretation." That isn't the true reason—the vaccine has been known to penetrate through the placental barrier—and the baby was born deformed—but to get Merck to admit it is another story...The vaccinations are DANGEROUS FOR ALL—LET ALONE FOR THE UNBORN (fetus) child. They are shot down before they even emerge into this world.

SWINE FLU PROGRAM WAS ILLEGAL

In February 1977 Secretary CALIFANO stated that the Swine Flu cannot be given legally, unless those receiving shots sign a CONSENT FORM. Ever since the Swine Flu program started, people have been signing a 'Registration Form' which simply means the entire program has been conducted ILLEGALLY. The form has now been rewritten to include the fact that the shots may increase the risk of contracting Guillain-Barre syndrome. The form now reads:

VOLUNTARY CONSENT FORM IMPORTANT INFORMATION ABOUT SWINE AND VICTORIA INFLUENZA (FLU) VACCINE

After reading the following paragraphs warning you that you might be paralyzed from vaccine, would you still take your shot?

GUILLAIN-BARRE

As mentioned, there is recent evidence that Guillain-Barre appears in

some people after vaccination. When it appears, it generally does so within a few weeks of vaccination. Information collected for the purposes of the flu immunization program to date shows that among persons who have not taken flu vaccine, slightly more than one in a million get Guillain-Barre during any eight week period. However, during the period of eight weeks after vaccination, about ten out of every million persons vaccinated have suffered Guillain-Barre. Thus, while the risk is not high, evidence suggests that persons who are vaccinated are approximately ten times more likely to get Guillain-Barre than those who are not vaccinated.

Guillain-Barre can be relatively mild to very severe. It causes a paralysis, usually of the legs and arms. In most cases the paralysis disappears and the recovery is complete. Recent statistics indicate, however, that in about 5% of the cases the patient dies, and in about 10% of the cases some muscles will be weak for a long time or permanently. Thus, *the risk of death from Guillain-Barre for persons of all age groups who are vaccinated is approximately 1/2,000,000 (1 in 2 million, or 0.00005%). For elderly and chronically ill persons the risk of death from Guillain-Barre is approximately one out of every million persons vaccinated.*

Any person who suffered adversely can file a claim—the handwriting is on the wall—Ford outsmarted himself—he was in such a hurry to get the program started.

The section dealing with women has also been changed but not sufficiently. It does not say that the vaccine penetrates the placental barrier—which it does—and is unsafe for pregnant women—and for every living thing on this earth.

PREGNANCY

Many people ask about the risks of flu vaccination during pregnancy. There is not now any specific data on whether the risks are the same or different from what they are for the general population. For this reason a pregnant woman should be advised by a doctor on the benefits and risks for her or her offspring.

Never a dull moment. The following releases should be of great interest—we beg your indulgence. We have met with a number of elected officials and there should be some action in Washington. We ask you to also start the ball rolling in the area in which you live.

LOS ANGELES (CNS)—IDA HONOROF, THE CONSUMER ADVOCATE WHO BROUGHT SUIT LAST SEPTEMBER TO HALT THE SWINE FLU INOCULATION PROGRAM, TODAY ACCUSED THE ADMINISTERING AGENCIES OF VIOLATING THE FREEDOM OF INFORMATION ACT.

THE ACTIVIST ALLEGED THE CENTER FOR DISEASE CONTROL; THE DEPARTMENT OF HEALTH EDUCATION AND WELFARE THE PUBLIC HEALTH SERVICE; AND THE DEPARTMENT OF JUSTICE WITH FAILING TO REVEAL THE TRUE HAZARDS OF THE SWINE FLU VACCINE.

“AS A RESULT,” MS. HONOROF SAID, “PEOPLE WERE CONNED INTO ALLOWING THIS PUTRID POISON TO CONTAMINATE THEIR BLOODSTREAMS. THE GOVERNMENT, IN THE WAKE OF A REPORTED \$1.3 BILLION IN LAWSUITS RESULTING FROM THE PURPORTED SIDE EFFECTS OF THE FLU SHOTS, IS “HIDING BEHND THE CLOAK OF PRIVACY SO THAT IT CAN SETTLE THE CLAIMS PRIVATELY WITHOUT ADMITTING GUILT. AND SWEEP UNDER THE RUG THE TRUE HAZARDS OF THEIR WHOLE INOCULATION PROGRAMS.”

AS OF JULY 8, 1977, SHE CLAIMED, 55 SUITS FOR WRONGFUL DEATHS, 175 FOR PARALYSIS, 15 FOR BLINDNESS, 2 FOR IMPOTENCY, AND A NUMBER FOR BRAN DAMAGE HAD BEEN FILED AGAINST THE GOVERNMENT.

TERMING THE ACTIONS OF THE AGENCIES INVOLVED AS "WATERGATE MAGNIFIED," MS. HONOROF STATED THAT "THE PEOPLE ARE ENTITLED TO THE FULL FACTS. THIS IS THE ESSENCE OF THE FREEDOM OF INFORMATION ACT."

HONOROF TOLD REPORTERS SHE WOULD BE MEETING WITH REP. HENRY WAXMAN (D-LOS ANGELES) AND OTHER OFFICIALS TO SEARCH FOR REMOVAL OF LEGISLATIVE BARRIERS TO GETTING THE INFORMATION.

SHE SAID THAT RESORTING TO A COURT SUIT COULD BE NO GOOD BECAUSE SHE DOES NOT HAVE THE LEGAL STANDING TO GET THE INFORMATION.

THE INFORMATION WAS AVAILABLE IN 1966, SHE ASSERTED, THAT ANY FORM OF VACCINATION WOULD CAUSE THE PARALYZING GUILLAIN-BARRE SYNDROME. BUT THAT THE GOVERNMENT IGNORED SUCH WARNINGS.

Consumer Activist Ida Honorof, chairperson of PEOPLE AGAINST POLITICAL VACCINATIONS, who filed suit last September to halt the swine flu program, and last week condemned the Department of Justice, Health, Education and Welfare, Center for Disease Control, and Public Health Services for VIOLATING THE FREEDOM OF INFORMATION ACT, today charged the Department of Defense, specifically, The Armed Forces Institute of Pathology (AFIP) with being guilty of CONFLICT OF INTEREST

The Armed Forces Institute of Pathology makes the final determination as to which claim shall be considered or denied, despite the fact that for many years the Department of Defense has deliberately concealed the hundreds of thousands of illnesses and deaths among military personnel (within the Armed Services) who are routinely shot full of putrid and deadly toxins against their will, “How can any agency who forces people under their command to take vaccinations, be fair in judging claims?”

Even though the swine flu inoculation program was supposedly voluntary among the civilian population who were intimidated by the high powered Public Relations scare tactics, the military were forced to “roll up their sleeves against their will. The military suffers adversely, but that information continues to remain “top secret.”

WE ASK FOR A CONGRESSIONAL INVESTIGATION INTO THESE “TOP SECRETS” THAT ARE DESTROYING OUR YOUNG MEN AND WOMEN WITH IN THE ARMED FORCES.

This book, **VACCINATION—THE SILENT KILLER—A CLEAR AND PRESENT DANGER—MUST BE** circulated to your friends who are still confused about vaccinations—to everyone of your elected, Federal, State, County and City officials.

Purchase a bundle of books, please write us for volume price.

FORD WILL CARRY THIS TO HIS GRAVE

The President's Message to the Congress Requesting a Special

Supplemental

Appropriation for the Production of Vaccine, March 25, 1976

To the Congress of the United States:

The nation faces a serious potential public health threat this winter from a strain of virus known as swine influenza.

One month ago this strain of influenza was discovered and isolated among Army recruits at Fort Dix, New Jersey. The appearance of this strain has caused concern within the medical community because this virus is very similar to the one that caused a widespread and very deadly flu epidemic late in 1918-19. Some Americans will recall that 548,000 people died in this country during that tragic period—and 20 million people worldwide.

I have consulted with members of my Administration, leading members of the health community and public officials about the implications of this new appearance of Swine flu. I have been advised that there is a very real possibility that unless we take effective counteraction, there could be an epidemic of this dangerous disease next fall and winter here in the United States.

The facts that have been presented to me in the last few days have come from many of the best medical authorities in this country. These facts do not suggest there is any cause for alarm. The scientific community understands what we are dealing with and they have developed a vaccine that will be effective in combatting it. The facts do suggest, however, that there is a need for action now—action by the Government, action by industry and the medical community, and most importantly, action by all of our citizens.

Although no one knows at this time exactly how serious this threat could be, we cannot afford to take chances with the health of our people. Accordingly, I am taking the following action.

I am asking the Congress for a special supplemental appropriation of \$135 million—prior to their April recess—to insure the production of sufficient vaccine to inoculate every man, woman and child in the United States.

I have directed HEW Secretary David Mathews, and the Assistant Secretary for Health, Dr. Theodore Cooper, to develop and implement plans that will make this vaccine available to all Americans.

Finally, I am asking each and every American to make certain he or she receives the vaccine this fall. Inoculations are to be available at schools, hospitals, physicians' offices, and public health facilities.

Extraordinary measures are necessary because of the short time period available to assure adequate vaccine production and to mobilize the nation's health care delivery system. An extensive immunization program must be in full scale operation by the beginning of September and should be completed by the end of November, 1976.

I urge the Congress to act immediately to pass this special supplemental appropriation separately. This \$135 million appropriation, if acted on promptly, will be a key factor in putting this threat behind us before next winter.

The White House, March 25, 1976
GERALD R. FORD

PRESIDENTIAL DOCUMENTS: GERALD FORD, 1976 SWINE
FLU IMMUNIZATION PROGRAM

The President's Letter to the Speaker of the House and to the Majority Leader Liability Protection Against Untoward Reactions to the Swine Flu vaccine. August 4, 1976

Dear Mr. Speaker: (Dear Senator Mansfield:)

On March 24, 1976, after meeting with a distinguished group of physicians, scientists and public health experts, I asked the Congress to appropriate \$135 million for the production of sufficient swine flu vaccine to inoculate every man, woman and child in the United States. I also directed the Secretary of Health, Education and Welfare to develop plans that would make appropriation request, and I was pleased to sign it into law April 15.

Since that time HEW, working with the medical profession, State and local health officials, vaccine manufacturers, and other groups, have developed able to all Americans can be met.

We continue to be faced, however, with a major problem in meeting our goal. Although experience indicates that there is a very low risk of untoward reactions to the vaccine, the drug manufacturers producing this vaccine for HEW need some form of appropriate liability protection.

On June 16, in anticipation of this situation, I directed HEW Secretary Mathews to immediately submit legislation to the Congress to enable the government to assume a proper share of risks so that this important program might move ahead.

This morning I received a report from the Secretary that after seven weeks of discussions and negotiations, the Health and Environment Subcommittee of the House Interstate and Foreign Commerce Committee acted last night to report legislation that would, if enacted

by the House and Senate, correct this problem, which has unnecessarily delayed this vital program.

I am writing to you this afternoon to urge that the House of Representatives (Senate) move quickly to enact this legislation so that the vaccine can be made available without further delay.

In conclusion, let me reiterate a point that I made in March and again to Chairman Paul Rogers on July 23: The threat of swine flu is genuine. Data from both the scientific and medical communities support the need for an inoculation program. Clinical tests conducted to date show that the vaccine is both safe and effective. There is no excuse now to let this program—a program that could affect the lives of many, many Americans—be delayed any longer.

—Gerald R. Ford

Following is a partial list of claims filed with D/HEW, PHS, CDC, Nat'l Influenza Immunization Program/Surveillance & Assessment, Atlanta, Ga. 30333.

All claims are for blindness caused by Swine flu vaccine. In all cases the names had been blanked out.

62 year old male—resides in Marion, No. Car. SF Vaccine administered 10-1276. Mfr. by Parke-Davis. Diagnosis: “Optic Neuritis”

Male—(age was blanked out), resides in Merryville, Ind. SF Vaccine administered 11-22-76. Mfr. by Richardson, Merrill. Diagnosis: “Optic Neuritis”

30 year old male—resides in New York City. SF Vaccine administered

10-16-76. Mfr. Richardson, Merrill. Diagnosis: "Conjunctivitis 360.0"

27 year old male—resides in Boston, Mass. SF Vaccine administered 11-22-76 at employee Health Clinic (no mfr shown). Diagnosis: "Optic Neuritis, iridacyclitis (?) 367.0"

71 year old male—resides in Dade County, Fla. SF Vaccine administered "late Oct." (No mfr. shown.) Diagnosis: "367.0"

Female (age blanked out)—resides in Warwick City, R.I. SF Vaccine administered 11-19-76. Mfr. Merrell Natl. Diagnosis: "Unilateral Retro Bulbar Neuritis 367.0"

50 year old female—resides in New York City. SF Vaccine administered 10-15-76. Mfr. Richardson-Merrill. Diagnosis: "Retro bulbar neuritis"

Male (age blanked out)—resides in Middletown, R.I. SF Vaccine administered 12-5-1976 (in this case they went to patient's home—shown as Mr. Nelson's home). Mfr. Merck, Sharpe, Dohme. Diagnosis: "Possible Optic neuritis R/O M.S."

31 year old female—resides in Elizabeth, N.J. SF Vaccine administered 10-27-76. Mfr. not shown, Lot #1498F. Diagnosis: "Optic Neuritis 367"

Female—age blanked out—resides in San Joaquin area (info blanked out). Person completing report was Jack J. Williams, M.D. Stockton, Ca. 95201. SF Vaccine administered 11-16-1976. Mfr. Merck, Sharpe, Dohme. Diagnosis: "Reportedly optic neuritis (right eye) 367.0"

Female, 66 years—resides in St. Louis, Mo. SF Vaccine administered 10-27-76. Mfr. Merck, Sharpe, Dohme. Diagnosis: "379.3"

20 year old male (race: black) (Didn't use std. form) SF Vaccine administered 11-10-76. Merrill Natl. No diagnosis is shown—patient's right eye was sore, itching, swollen.

68 year old female-patients initials M.L.T. (This seems to be a military report form. SF Vaccine administered 11-26-1976 (looks as if she also received another drug at same time)—"serious retina"—difficult to read this report.

White female, resides in Temple, Texas. Report date 10-13-1976 (S. Hunt, M.D.). Rec'd Parke-Davis vaccine. "Edema under eye and lower eyelids"

68 year old female-resides in San Antonio, Texas. SF Vaccine administered 11-21-1976 at Army Med Center. Diagnosis: "Bilateral Central Serious Retinopathy—377.0"

In addition to the above, Mrs. Emily Spruell, of Clayton, Okla. (918) 569-7620, has sued for \$6,200,000 through her attorney, Gene Stipes, McAllister, Okla. (918) 423-0421 (office), residence: (918) 423-6368. Article appeared in the National Enquirer.

Contacted also by brother of Marie Pickens (61) who resides in Lake Odessa, Mich., at age of 61 she was very active, church-activist, bowled regularly, played golf, took care of invalid husband and an 88-year-old mother. Now has less than 50% vision remaining in her "good eye"—lost total vision in other eye. Have a taped interview with brother who lives in Calif.

Also, there were 2 cases of impotency caused by swine flu vaccine that were called to my attention. One of the claimants filed suit for \$5 million.

In addition there were a number of cases for brain damage caused by swine flu vaccine.

Part II of VACCINATION—THE SILENT KILLER—A CLEAR AND PRESENT

DANGER has concentrated almost entirely on exposing the dangers of vaccinations. In doing so I hope that I've proven that vaccinations, immunizations, inoculations, are nothing more than medical witchcraft which originated in the dark days of Superstitious yore.

There have been too many atrocities committed in the name of preventive medicine by the Medical and Chemical Industrial Complex and it is high time to call a halt. Where it concerns vaccinations, statistics prove that nearly 90% of the total decline in mortality for scarlet fever, diphtheria, whooping cough and measles among children up to 15, occurred before the introduction of antibiotics and widespread immunization...in part attributed to improved housing and to a decrease in the virulence of microorganisms, but by far the most important factor was a higher host resistance due to better nutrition.

“After a pursuit of medical utopia, and contrary to current conventional wisdom, medical services have not been important in producing the changes in life expectancy that has occurred. A vast amount of contemporary clinical care is incidental to the curing of disease, but the damage done by medicine to the health of individuals is very significant. These facts are obvious, well documented and well repressed. An expanding proportion of the new burden of disease of the last 15 years is itself the result of medical intervention, in favor of people who are or might become sick. It is doctor made or iatrogenic.”
—Ivan Ilyich, *Medical Nemesis*

The injection of vaccines consisting of foreign diseased protein matter

and toxic drugs (including formaldehyde a proven carcinogen), thimerosal (a mercury derivative) or streptomycin, neomycin, etc.) is in itself a poisoning practice. The preceding chapters have documented that. It is the fantasy of a deranged mind!

Good sound logic proves that the normal healthy organism is naturally immune from all forms of disease, since health is the exact opposite of dis-ease. Immunity can never be artificially introduced. Dis-ease (dis, “deprived of”; ease, “free of pain”) is a condition which develops within the body due to abuses, which show up as symptoms when the abuse and accumulated toxemia reach intolerable heights. Vaccinations can never produce 'immunity' because the vaccine is additional poison heaped upon an already overburdened, inharmonious burden within the body.

We are calling for a full scale Congressional Investigation into the entire insane practice of immunization—but not a “fox watching the chicken investigation”—there must be people on the Investigation Panel who have proven their dedication to humanity—doctors who practice drugless medicine, nutritionists, and dedicated and knowledgeable researchers such as E. McBean and I, a many-time award winning consumer activist.

Researching the material for this book has been an eyeopener and an education which cannot be obtained in any school. There is no way all of the material I’ve accumulated could go into this book, and in the near future I plan to do a larger—more in depth look at vaccinations—a clear and present danger.

VACCINATION—THE SILENT KILLER—A CLEAR AND PRESENT DANGER SHOULD BE CIRCULATED INTO EVERY HOME—TO EVERY ELECTED OFFICIAL—Purchase a bundle order. Write us for price on orders:

Ida Honorof: "A Report to the Consumer"

The combined probing and pressure of the United Farmworkers Union and consumer advocate Ida Honorof forced disclosures of illegal residues of Monitor-4 and Phosdrin in head lettuce throughout the US. Since then, the Department of Agriculture has admitted finding additional residues of Parathion, Lannate, Thiodan, Cycon and oth-

er toxic chemicals in lettuce. Most of our fields and orchards are heavily contaminated. Agribusiness continues to boost the soil with synthetic high-powered stimulants and poisonous sprays, robbing the soil of the valuable micro-organisms, destroying natural soil fertility and life. How do you grow life-giving food on dead soil?

Alexander Auerbach, in the March 20 Los Angeles *Times* writes: "Mrs. Honorof has waged a continuing battle against the use of chemicals in foods—she was among the first to campaign to halt the use of the chemical DES in meat—she was aware that organophosphates are a type of pesticide used to replace DDT. They can be lethal..." The story of lettuce contaminated with the organophosphate Monitor-4 was aired February 1 on KPFK, and it "might have died there, known only to KPFK's relatively small audience, if Mrs. Honorof hadn't turned her energy toward the major media...where she was greeted with the traditional journalistic skepticism...but a Chicago press conference with (Cesar) Chavez (United Farmworkers Union) got national attention..." The rest is history.

"PREVENTIVE MEDICINE"!!!!

Ida Honorof

Ida Honorof is the publisher/editor of Report to the Consumer, read worldwide. She is the recipient of many awards for her 'untiring and relentless effort to protect the consumer.' She served for 5 years as volunteer Consumer Advocate on radio station KPFK-90.7 FM (and will be resuming that function this September). She currently hosts. The Conquering Consumer on radio station KCSN-88.5 FM, at the California State University/ Northridge. Both stations are in Southern California.

Ida Honorof is the co-Chairperson of D.O.O.M. (Committee to get DRUGS OUT OF MEAT)—the Founder of CITIZENS CONCERN WITH TOXIC PESTICIDES; founder of C.H.A.M.P. (Consumer Health Against Monopolistic Profiteering); Organizer of

COMMITTEE AGAINST HOME FRONT CHEMICAL WARFARE; one of the leading figures in the Los Angeles Anti-Fluoridation victory; is credited with savings thousands of lives in Los Angeles County during the battle to expose Ford's Swine Flu Fiasco.

She is the winner of National Health Federation's Media Award, the winner of A.P.'s First Prize Award for Investigative Reporting. Capra News Editor Cal Werner wrote, "Mrs. Honorof continues to take on government agencies—and anything else—in her partisan fight for the consumer." Alexander Auerbach (L.A. Times Business & Finance writer) on 3/20/1973 reported, "Mrs. Honor of has waged a continuing battle against the use of chemicals in foods—she was among the first to campaign to halt the use of the chemical DES (diethylstilbestrol in meat—and she was aware and warned of the organophosphates used to replace DDT. They can be lethal; the amounts required to kill an adult are measured in tiny fractions of an ounce.

Frederick I. Scott, Editor of American Laboratory, extolled Ms. Honor of as a "highly respected medical and scientific researcher..." David Rorvik, renowned journalist, winner of Alicia Patterson Foundation Award, writes: "Ida Honorof, a feisty lady—a consumer protectionist tough enough, in my view, to loom as the female Ralph Nader—credited by the L.A. Times and other publications with breaking some of the biggest horror stories of our time."

The Center for Disease Control (CDC) has again created a climate of fear in an attempt to scare people with Legionnaires Disease...A dread

killer is once again sweeping the country...Legionnaire Disease will strike 35,000 Americans and kill as many as 6,000 annually." Backed against the wall CDC experts admit they've exaggerated.

Interviewed by National Inquirer, Dr. Anthony Morris, top U.S. virologist who warned against the swine flu program, stated: "It's the swine flu fiasco all over again...to magnify their own importance CDC allowed a climate of fear..."

In order to distract people away from the swine flu fiasco, which took a severe beating, and to re-establish identity, CDC, in another face-saving device, on 12-15-1977 announced that "a distant cousin" of swine flu virus has been discovered in the Soviet Union and Hong Kong, and since CDC had evidence that "the virus is spreading and will soon reach the U.S." they are busily preparing a vaccine. What a golden opportunity to unload, despite the fact that the Soviet's Minister of Health informed W.H.O. that they had no intention of panicking since the outbreak is of "moderate clinical severity," but CDC is determined to prove their mettle, thereby enabling them to get bigger and better funding.

Dr. Edwin Kilbourne (Mt. Sinai School/Medicine,) #2 chief architect of the 1976—The infamous Disabler/Killer Swine Flu Vaccine, urged that the "Russian Flu' vaccine be manufactured in quantity as soon as possible. "I hope we won't be frozen into immobility by memories of 1976...What confounded the situation last year was the absence of the disease..." (Brilliant doctor!)

—Ida Honorof
December 20, 1977

WHAT PRICE GULLIBILITY?

At this point, no one with one-pennies worth of gray matter will deny that Ford's Swine Flu Folly was a total medical fiasco, and in addition to causing death, paralysis, blindness, impotency, and a lifetime of suffering for Mafia will cost taxpayers millions of dollars in damage payments. Countless Americans who were paralyzed, and many families of those who died after gullibly falling for our government's hucksterism, will not be compensated, since HEW deliberately halted monitoring vaccine recipients ten weeks after inoculation, and it may be difficult to provide 'expert' testimony to prove that illness or death was directly due to the inoculation.

As of March 23, 1979, 3,687 claims were filed for personal injury, totalling \$3,351,065,779. Of these 304 (totalling \$344,908,244) were for wrongful death, and 1,045 (totalling \$952,549,317) were for Guillain-Barre paralysis. This for immunization against a phantom virus, that was to have cost us a mere \$135 million.

According to HEW's report of April 12, 1979, there were 25 claims settled for \$320,483. Of these, one (for \$30,000) for wrongful death, and 14 (for \$274,200) for Guillain-Barré. There were 603 claims totalling \$260,220,212 denied. \$226,668,429 for 551 claims for personal injury, including 45— totalling \$33,551,633 for death.

It's truly ironic—first HEW/PHS FDA CDC, and the entire Medical Industrial Complex, con people into taking the shot—literally frightening them out of their wits—now they will have to hire an attorney to seek justice from the "Justice" Department! Close to 500 lawsuits have been filed to date—and as claims are denied, the number will swell. There will be many persons who deserve compensation, who will be denied—by our government who was so quick to shoot them full of poisons!

Many persons who were paralyzed could have been spared had the Center for Disease Control and Health Education & Welfare released the information they were sitting on—"that neurologic signs would follow the use of the vaccine," yet CDC lied to the public and denied they had this information. Michael Hattwick, M.D. admitted that "the risk of developing Guillain-Barre syndrome seemed to be eleven times greater with vaccination than without...the public problem posed by Guillain-Barre syndrome— inability to state the risk for a consent form—need not have taken anyone unawares The Swine Flu Affair- Decision-Making on a Slippery Disease \$100,000 of our tax money was paid to the authors, Drs. Richard Neustadt and Harvey Feinberg (both Harvard men) to bring us this gem. (See Report to the Consumer No. 190.)

More than 80 million doses of the swine flu vaccine are still hanging around in public health' warehouses throughout the country—and their "shelf life" has long run out—Beware of another con job—to unload those toxins onto you.

To people in Public Health (Disease) Service, preventive medicine means two things— fluoridation and immunization. In all of the transcripts on immunization, I have yet to hear our public servants expound the need for good nutrition. Money is being appropriated for immunization purposes, but not a single penny is being spent by HEW to educate parents and children of the importance of GOOD NUTRITION.

"Supplemental grant funds of \$4 million were appropriated in fiscal year 1977, for a total of \$17 million, to begin carrying out an initiative. In fiscal year 1978, \$23 million or grants is included..." (National Child Immunization Programs—95th Congress—8-31-1977). In his statement before the Subcommittee on Oversight/Investigations, Committee on Interstate/Foreign Commerce,

held in Los Angeles, William Foege, M.D., Director of Center for Disease Control stated that "25 million will be sufficient for 1978," but for fiscal 1979, they will be asking for additional money. When questioned by Cong. Henry Waxman about the fact that "some children who were vaccinated against measles, are still getting measles," Dr. Foege replied that "...the vaccine was given at an early age. We now know that, prior to 12 months of age, there is a decreased incidence of takes because of antibodies in the child...measles vaccination is a lifelong procedure."

What Foege failed to tell Congressman Waxman was that "there are millions of children, who after having been vaccinated, are now (5-to-10 years later) more susceptible to measles than if they had never vaccinated. Those children who had NATURAL measles, after they get the measles vaccination get DEATHLY SICK, yet knowing all this and after it has been known for years—Meyers (Dir/Bureau of Biologics) approved the inactivated measles for inoculation of children. In the ensuing years, if these children come in contact with 'wild measles they come down with a form of measles that is far more severe (a more severe rash and severe fever) than ever occurs in children who have never been vaccinated." (Quotes are from a live interview with Dr. Anthony Morris, bacteriologist, who is certainly in a perfect position to know, since he was employed by the Bureau of Biologics (BoB) for 40 years, fired in July 76 for opposing the Swine Flu Program. The entire interview was aired on KPFK-90.7fm on Jan. 22, 5 PM.)

"What about the live measles virus vaccine which causes encephalitis...It's absolutely inexcusable, to give a child, who has had measles, any measles vaccine. This has a natural immunity...as a result of having had measles naturally, he has lifetime protection. There is sufficient evidence, and CDC is well aware of it—that children who have had natural measles—during the first few years of their life—if

they are vaccinated (because it is required to get into school) many these children develop Subacute Sclerosing Pan Encephalitis (SSPE), a disease involving the brain, which is invariably fatal."

This isn't what Foege wanted the committee to hear. Neither did he want them to know that Robert S. Mendelsohn, M.D. reports:

"Measles vaccine is designed primarily to prevent measles encephalitis which is said to occur in 1-out-of-1,000 cases of measles. Any of us who has had decades of experience with measles must question this statistic. The incidence of 1/1000 may be accurate for children who live in conditions of poverty and malnutrition, but in the middle and upper classes, if one excludes simple sleepiness from the measles itself, the incidence of true encephalitis probably is more like 1/10,000 or 1/100,000. Meanwhile, the vaccine itself is associated with encephalopathy in 1 case per million and with a series of other complications such as SSPE. Other neurologic and sometimes fatal conditions associated with the measles vaccine include ataxia (inability to coordinate muscle movements), retardation, learning disability of hyperactivity, aseptic meningitis, seizure disorders and hemiparesis (paralysis affecting one side of the body)." —*The People's Doctor*, Medical Newsletter for Consumers

Mendelsohn wonders whether the current epidemic of hyperactivity in children may have its origin, at least in part, in the measles vaccine.

One of the important things that must be remembered is that Measles is one of the natural cleansing processes the child's body is detoxifying itself, expelling—ridding itself of poisons. For 9 months the baby survived on one of the most concentrated proteins—mother's blood—once the baby emerges into the world, it ingests other toxins, and measles is the most natural way of expelling the

excess protein and toxins. To immunize the child to push these toxins back into the body is a crime against nature. I had measles—my mother put me into a warm bath with baking soda, then put me to bed, drew the shades) until I expelled the toxins. Left alone, without medical (witchcraft) interference, the entire world's population would be far healthier than it is today. All Chronic and many acute diseases are caused by modern medical practices

Please remember IMMUNITY AGAINST DISEASE begins with what you grow in your garden—and what you cook in your kitchen—Immunity starts with Proper Nutrition—Avoid all processed and convenience "foods"—as if they were the plague.

\$3.95

UPDATED

VACCINATION IS ILLEGAL AND UNCONSTITUTIONAL

Compulsory vaccination or any tax supported vaccine program violates the DECLARATION OF INDEPENDENCE, THE U.S. CONSTITUTION, Article IX and X, 1780, and the Preamble, and ARTICLE SIX of the BILL OF RIGHTS.

Our U.S. *Declaration of Independence* promises us that, "All men are endowed by their Creator with certain unalienable rights, among which are Life, Liberty, and the pursuit of Happiness." Enforced vaccine-poisoning violates all of these three rights.

The *Sixth Article of the Bill of Rights* promises, "The right of the people to be secure in their persons . . . shall not be violated." Enforced medication (vaccination) violates their right.

Blackstone, one of the most renowned lawyers of Gr. Britain stated, "No laws are binding upon the human subject which assault the body or violate the conscience."

Judge Cooley, of the U.S. Supreme Court, said, "No right is held more sacred or is more carefully guarded by the common law, than the right of every individual to the possession and control of his own person."

Thomas Jefferson, writer of our U.S. Constitution, taught that "Liberty in all essential needs, is not a privilege granted by Government, but an inherent right possessed by all men." Thus, the chief function of all governments is to secure and enforce these human rights, not to invade or violate them to satisfy medical dogmas or other oppressive, dangerous, and illegal theories.

Government sponsored vaccination drives violate these human rights.

CHAPTER 22: Polio was a Manmade Disease

PART III: POLIO WAS A MANMADE DISEASE

Various sources

www.whale.to

"Polio is NOT even contagious or infectious (never proven to be). There is NO proof Polio is caused by a virus. There is NO evidence that anyone caught polio from another person in the family. There is NO evidence that any nurse or doctor caught polio from a patient." —Sheri Nakken, RN, MA

The polio death rate was decreasing on its own before the vaccine was introduced, and there is no credible scientific evidence that the vaccine caused polio to disappear. Cases of polio increased after mass inoculations.

The United States Centre for Disease Control (CDC) admitted that the vaccine has become the dominant cause of polio in the US today, with 87% of cases between 1973 and 1983 caused by the vaccine. More recently, 1980-1989, every case of polio in the US was caused by the vaccine. Doctors and scientists on the staff of the National Institute of Health during the 1950's were well aware that the Salk vaccine was ineffective and deadly. Some frankly stated that it was "worthless as a preventative and dangerous to take". The Salk "inactivated" or "killed-virus" was actually regulated to permit 5,000 live viruses per million doses.

A large vaccine trial in 1955 showed a total failure of the Salk vaccine to protect against poliomyelitis. During a 1959 epidemic in Massachusetts, 77.5% of the paralytic cases had received three or more doses of the inactivated vaccine.

In 1956 with the infamous Francis Field Trials they discovered large numbers of children contracted polio after receiving the vaccine. Instead of removing the vaccine from the market, they decided to exclude from the statistics all cases of polio that occurred within 30 days after vaccination on the pretext that such cases were "pre-existing".

In 1958 mass vaccination triggered a disastrous increase in polio, the highest being 700% in Ottawa, Canada. The highest incidence in the USA occurred in those states which had been induced to adopt compulsory polio shots (1).

Four of the five Salk vaccine companies ceased producing this vaccine due to its failure, and because of the lawsuits against them.

"Use of either Salk or Sabin vaccine will increase the possibility that your child will contact the disease. It appears that the most effective way to protect your child from polio is to make sure that he doesn't get the vaccine " —Dr Mendelsohn MD, 1984

Where polio vaccination programs have been instituted worldwide, reported polio infections show a 700% increase as a result of compulsory vaccination.

POLIO DEFINITION FRAUD:

Statistics on polio were manipulated. One such way was to redefine the disease, renaming it "viral or aseptic meningitis" or "coxsackie virus". In one US county, for example, in July 1955 there were 273 cases of polio reported for 50 cases of aseptic meningitis, compared to 5 cases of polio in 1966 and 256 cases of aseptic meningitis. These new diagnostic guideline's were issued by the CDC. If you object to polio vaccination, and you get polio—it is usually called "polio." If you have been vaccinated and you get "polio", it is called meningitis(2).

Coxsackievirus and echoviruses can cause paralytic syndromes that are clinically indistinguishable from paralytic poliomyelitis. (John H. Menkes, Textbook Of Child Neurology, 5th ed., page 420)

"Dr. Thomas Francis did not mention in his key evaluation of the 1954 Salk field trials that those who contracted polio after their first inoculation and before their second inoculation were placed in the "not inoculated" list.' (Maurice B. Bayly, The Story Of The Salk Anti-poliomyelitis Vaccine, 1956).

Dr. Buchwald responds that prior to the introduction of polio vaccinations in Germany, anyone was counted as having polio, even if they only had the virus in

their feces. It is known, he goes on, that there are people who are healthy but who evacuate polio viruses when they go to the bathroom. Based on this criteria, the number of cases was approximately 4,000 per year. After the introduction of the vaccine, statistics included only those polio cases of people who were paralyzed for at least six weeks. —Testimony of Dr. Gerhard Buchwald, MD

A former public health officer, Dr Ratner, reported that just before the introduction of the first polio vaccine the National Foundation For Infant Paralysis was paying physicians \$25 for each reported diagnosis. "A patient would walk into a doctors office with a limp from an accident. He'd say he had a fever a few days ago...and guess what the diagnosis would be?" It was well known Paralytic polio cured itself 50% of the time within 60 days. After the Salk vaccine was introduced, the definition of polio was changed by the CDC. Now, in order to have paralytic polio, you had to have it longer than 60 days (16).

Because the Salk vaccine was promoted as being incapable of causing polio, cases that occurred following administration of the vaccine were denied, and excluded from the Vaccine injury table (4).

Many doctors refuse to report vaccine reaction, and I worked out that of over 200 families of vaccine damaged children contacting JABS, the support group, only about 3% had been reported damaged by their doctor. In the USA the FDA admits that 90% of vaccine damage cases go unreported (4).

Dr. Bernard Greenberg, a biostatistics expert, was chairman of the Committee on Evaluation and Standards of the American Public Health Association during the 1950s. He testified at a panel discussion that was used as evidence for the congressional hearings on polio vaccine in 1962. During these hearings he elaborated on the problems associated with polio statistics and disputed claims for the vaccine's effectiveness. He attributed the dramatic decline in polio cases to a change in reporting practices by physicians. Less cases were identified as polio after the vaccination for very specific reasons.

"Prior to 1954 any physician who reported paralytic poliomyelitis was doing his patient a service by way of subsidizing the cost of hospitalization and was being community minded in reporting a communicable disease. The criterion of diagnosis at that time in most health departments followed the World Health

Organization definition: "Spinal paralytic poliomyelitis: signs and symptoms of non-paralytic poliomyelitis with the addition of partial or complete paralysis of one or more muscle groups, detected on two examinations at least 24 hours apart."

Note that "two examinations at least 24 hours apart" was all that was required. Laboratory confirmation and presence of residual paralysis was not required. In 1955 the criteria were changed to conform more closely to the definition used in the 1954 field trials: residual paralysis was determined 10 to 20 days after onset of illness and again 50 to 70 days after onset....This change in definition meant that in 1955 we started reporting a new disease, namely, paralytic poliomyelitis with a longer lasting paralysis. Furthermore, diagnostic procedures have continued to be refined. Coxsackie virus infections and aseptic meningitis have been distinguished from paralytic poliomyelitis. Prior to 1954 large numbers of these cases undoubtedly were mislabeled as paralytic poliomyelitis. Thus, simply by changes in diagnostic criteria, the number of paralytic cases was predetermined to decrease in 1955-1957, whether or not any vaccine was used.

"Official data shows that large scale vaccination has failed to obtain any significant improvement of the diseases against which they were supposed to provide protection." —Dr Sabin, developer of Polio vaccine.

Health officials convinced the Chinese to rename the bulk of their polio to Guillain- Barre Syndrome (GBS). A study found that the new disorder (Chinese Paralytic syndrome) and the GBS was really polio (41). After mass vaccination in 1971, reports of polio went down but GBS increased about 10 fold.

"In the WHO polio vaccine eradication in the Americas, there were 930 cases of paralytic disease—all called polio. Five years later, at the end of the campaign, roughly 2000 cases of paralytic disease occurred—but only 6 of them were called polio (41). The rate of paralytic disease doubled, but the disease definition changed so drastically that hardly any of it was called polio any more." —Greg Beattie

"They started vaccinating in 1985 (in the Americas). Within 4 months they had 350 cases...They caused a substantial, huge outbreak of polio but they started 'discarding' most of the cases (put as flaccid paralysis)." —Dr. Viera Scheibner,

PhD (42).

Chronic Fatigue: A polio by another name

CHRONIC FATIGUE SYNDROME: THE HIDDEN POLIO EPIDEMIC by Dr. William Campbell Douglas

Bruno RL, et al. Parallels between post-polio fatigue and chronic fatigue syndrome: a common pathophysiology? *Am J Med.* 1998 Sep 28;105(3A):66S-73S. PMID: 9790485; UI: 99005146.

POLIO VACCINE CONTAMINATION: AIDS, CANCER, GUILLAIN-BARRE SYNDROME & LEUKEMIA

"All vaccination has the effect of directing the three values of the blood into or toward the zone characteristics of cancer and leukaemia...Vaccines do predispose to cancer and leukaemia." —Professor L. Vincent, founder of Bioelectronics.

During the 1950's and 60's millions of people were contaminated with a cancer causing monkey viruses called SV1 to SV40 (simian virus) from the polio vaccines due to using kidneys from the Rhesus macaques monkey to make the vaccines. Of these SV40 (the 40th one found!) was the most researched. It is commonly used by scientists to induce genetic changes in other viruses. In animals it causes large numbers to develop sarcomas (cancer), and decreases protein production leading to muscle wasting—symptoms of AIDS. The administration of Salk vaccine, in New Zealand (1956-66), with SV40 was related to the appearance of SSPE, 100 times greater than expected (1).

A study of 58,000 women who had received the IPV (killed virus) during the time that SV40 contaminated the vaccine (1959-1965) showed a thirteen fold increased risk of brain tumours in their children.

Another virus from monkeys—respiratory syncytial (RS) was found in the polio vaccine in 1956, where a relationship was found to respiratory tract illness.

That monkey viruses can be deadly was demonstrated when over 10 vaccine researchers died, after being bitten by monkeys, from monkey B virus—a herpes virus. One of these was a colleague of Sabin in 1932.

In 1976 researchers at the US bureau of Biologics found that 3 samples of Lederle polio vaccine contained between 1,000 and 100,000 simian viruses per ml. of vaccine, a much higher concentration than later safety regulations allowed (Kyle, 1992).

Not forgetting the slaughter of thousands of monkeys to make these vaccines. A mass polio vaccination in Finland (1985) resulted in a higher incidence of Guillain-Barre (GBS) cases in the first two quarters (16 total) compared to a mean incidence of GBS in the population of 3 cases per quarter during a 6 year surveillance period, 1981-1986. Ten of these were diagnosed within 10 weeks after vaccination with OPV. The Vaccine Safety Committee has acknowledged that OPV causes both paralytic polio and Guillain-Barre syndrome.

Louis Pascal has demonstrated that AIDS originated in the Belgian Congo as a direct result of mass oral polio vaccination which was contaminated with another monkey virus—the simian immunodeficiency virus (SIV) and bovine retrovirus, again as a result of using African Green monkey and calves kidneys to make vaccines. If the green monkey had anything to do with AIDS it was through generously "donating" it's kidneys (1).

The AIDS virus is called Human T-Cell lymphoma/leukemia virus 3, or HTLV 3, since changed to HIV. Very similar to the monkey leukemia virus HTLV 4 (SIV), and almost identical to Visna sheep virus and Bovine Leukemia virus (BLV). Human Leukemia virus is HTLV 1, which looks like BLV and causes the same kind of disease in humans as it does in cattle, and is also virtually identical to STLV 1, another monkey virus(12). Myers et al (1992) asked whether HIV might simply be SIV adapting to a human host (1).

It doesn't take much to see how the polio vaccine can cause leukemia in children. "Many here voice a silent view that the Salk and Sabin vaccine, being made of monkey kidney tissue...has been directly responsible for the major increase in leukemia in this country." —Dr. Klenner, M.D.(19)

"Within a few years of the polio vaccine we started seeing some strange phenomena like the year before the first 300,000 does were given in the United States childhood leukaemia had never struck in children under the age of two. One year after the first onslaught they had the first cases of children under the

age of two that died of leukaemia..Dr Herbert Radnor observed that in a small area of this little town, in an area where no cases of leukaemia had been expected or at the most one in 4 years according to previous statistics, they suddenly had a rash like an epidemic within a few blocks.” —Dr Snead

Leukemia also has a mercury component, also found in the DPT, Hib, & Hep B vaccines with the mercury solution Thimerosal. A dentist, Dr Pinto, cured a girl of Leukemia by removing her mercury amalgam fillings. To prove his point, to her sceptical doctor, he replaced the amalgam, and the leukemia came back. He removed them again and the Leukemia went away again (17).

Mercury is used in laboratories to induce autoimmune disease in animals (17). Formaldehyde, found in the polio, HepB, and DPT vaccines is a known carcinogen. The DTP also contains sodium chloride, sodium hydroxide, hydrochloric acid and aluminium. The MMR contains neomycin, an antibiotic. The Hib also contains saccharides, sodium chloride & aluminium hydroxide. The Hep B also contains aluminium hydrochloride and sodium chloride (4).

"Thimerosal is the preservative in immunisation shots, so anytime you get an immunisation shot you are undergoing the same procedure that in the University Lab that we used to give animals autoimmune disease—give a little tiny injection of mercury. And when you get an immunisation shot you are getting a little tiny dose of mercury there." —Dr. Hall Huggins, DDS

Three shots of these chemicals and metals plus bacteria and viruses: diphtheria, pertussis, tetanus, influenza type b, (plus hepatitis B in America), & 3 types of polio with the DPT, Hib, and Polio vaccines into babies before 4 months of age! Then the MMR at 12-18 months. Then again at 4 years. Twenty one vaccine mixtures before 5 years.

"Even to this day, the government, the FDA is refusing to use the sophisticated biotechnology to evaluate the contaminants in the vaccines such as the polio vaccines that they are administering. I think (people) would be appalled that some of the vaccines that are being currently being used are still laced with viruses,"—Leonard Horowitz., D.M.D., M.A., M.P.H.

POLIO VACCINE DAMAGE:

In Polio Network News, 1992, it was reported that 4,236 petitions have been filed with the US Claims Court for injuries and deaths caused by polio vaccination(18).

One woman in New Zealand in 1983 had both legs amputated after a "dirty" polio shot containing SV40 was administered. This was after 10 years of suffering (14).

The FDA recently permitted the live polio vaccine to be released for use even though it did not meet existing safety standards. After losing a court case they rewrote their rules so these previously unacceptable safety measures would be allowable (4).

To add insult to injury the UK government will take you through hell before they admit liability, and then offer derisory amounts, and then only if you are over 80% damaged! All the "expert witnesses" are members of the allopathic medical profession; as vaccination (and the companies who make the vaccines) is one of the pillars of allopathy they are not exactly impartial.

The Wellcome company recently gave up making vaccines as "there was too much litigation and too little profit".

In the US from 1990-1993 (3yrs) the FDA counted 54,072 adverse reactions following vaccination. They admit only 10% are reported which puts the real figure at over 500,000. A comparative figure for the UK would be 45,000 per year, although we would be less as we have not mandated vaccines (4).

The Polio Connection of America & Polio vaccine victims:

Considering deaths alone we now had an estimate of over 3000 individuals from 1961.

Our curiosity thus was aroused and the net result is that we began our own investigation. We commissioned an OPV Vaccine Report and started making all kinds of other inquires. The OPV Vaccine report that we received was a shocking report. It covered a recent period a little less than 5 years and the following is the summary for that period: The number of Vaccine Associated

events that occurred: 13,641.

-The number of events requiring emergency room visits: 6,364

-The number of life threatening events: 236

-The number of events requiring hospitalization: 1726

-The number of events with unknown recovery status: 1695

-The number of events resulting in permanent disability: 133

-The number of events resulting in death: 540

It now seems we have discovered a Second Polio Deception and it is not Splendid! It seems we have exposed this nonsense of 8-10 cases of vaccine associated Poliomyelitis (VAP) each year' for what it is and as the saying goes we seem to have opened Pandora's Box. We also wonder how a figure of 8-10 VAP per year can be arrived at when there are in a full 5 years over 1,695 events (330 events per year) with unknown recovery status. How can any figure be valid with so many unknowns?

Polio vaccine adverse reactions.

CAUSE OR CO-FACTORS OF POLIO

1) Diet: Stephen Cooter found that the description of an acute polio virus infection is almost identical to vitamin B1 deficiency caused damage, Beri Beri. This is commonly caused by dextrose and alcohol as well as eating white rice.

Klenner, Southern Medicine & Surgery, April, 1951

"...reviewing the findings of McCormick in 50 confirmed cases of poliomyelitis in and around Toronto, Canada, during the epidemic of 1949...families eating brown bread who came down with poliomyelitis did not develop paralysis; whereas in those families eating white bread many of the children having poliomyelitis did develop paralysis. The point here is that brown bread has 28

times more vitamin B1 than does white bread. Obviously, then, the paralysis which complicates acute poliomyelitis appears to be due to a B1 avitaminosis."

Dr Sandler in 1949 warned the residents of North Carolina to decrease consumption of ice cream, soda pop, and artificially sweetened products in hot weather. The incidence of polio dropped by 90% (20).

"Intensive research during the past twelve years on the relationship between diet and susceptibility to infection, not only in polio but also in common respiratory infections and tuberculosis, has convinced me that the human organism can protect itself against infection virtually completely by proper nutrition." —Dr Sandler 1952

Dr McCormick pointed out that the first case of polio was reported in Vienna one year after roller-mill white flour was first sold there. He calls polio the form of beriberi that follows the use of de-germinated flour (2).

Another factor is the protection provided by human milk. Vaccination could not be successfully administered to breast fed babies.

Dr George Starr claimed that "every case of infantile paralysis he had been able to check up on had been the victim of denatured (pasteurised) milk", and his observation that, "a child has never been known to have infantile paralysis if the nursing mother took fruit juice in the place of milk and that, similarly, no child was ever known to have infantile paralysis if fed on fruit juice instead of milk".

"The milling of wheat destroys 40% of the chromium, 86% of the cobalt, 68% of the copper, 78% of the zinc, and 48% of the molybdenum. By the time it is completely refined it has lost most of its phosphorus, iron and riboflavin, as well most fiber. Wheat flour has been plundered of most of its vitamin E, important oils and amino acids. White bread also turns to glucose as quick as white sugar (This is the staple diet of the majority).

Enriched and vitamin fortified foods are an outlandish ripoff...after enrichment white flour has less than half the calcium, a third the phosphorous and potassium. In one experiment 2/3rds of the rats kept on a 90 day diet of enriched bread died before the experiment was finished!. The 8 vitamins sprayed on most

"fortified" breakfast cereals represent only a small portion of the nutrients originally present—not to mention fibre which has been removed almost entirely." —Paul Stitt (food scientist).

Dr Melvin Page D.D.S. found that when he was able to get patients to achieve a calcium level 2 1/2 times that of phosphorus, degenerative diseases disappeared. The prime agents to cause an imbalance in the phosphorus calcium ratio are animal products (meat has a 20-1 ratio) sugar and soft drinks. (The average yearly sugar intake is 110 lbs. Average soft drink intake in the USA is 1-2 cans. Soft drinks are highly acidic, about 2.5 pH. It would take 32 glasses of alkaline water of pH 10 to neutralise one glass of cola.)

Dr Hal Higgins D.D.S states that pasteurised milk will rot your teeth at twice the rate of sugar.

"Pasturised milk is dangerous and destructive. It causes disease. It has not one redeeming quality. All it does is mask spoiled milk so that big business can make big money." —H. Diamond, nutritionist.

Dr. Gordon Stewart, Prof of Epidemiology and Pathology, states that polio and other viruses can be carried for months, even years with no effect. According to Dr Dennis Geffen, of every 100 people who contract polio virus, 90% remain symptomless; 9% only develop slight signs of the illness such as a stiff neck or sore throat, whilst only 1% develop definite paralysis.

"Viruses and bacteria are not the sole cause of infectious disease, there is something else". —Prof Rene Dubois.

2) Provocation polio from vaccines, antibiotics & pesticides such as DDT

"The oral polio vaccine is not a deep puncture wound, but the magnitude of the assault of the vaccine strain of virus (ironically more virulent than the wild virus) with the accompanying toxins and the interference with the gut flora, i.e. still harming the outer levels of defence, still appears to have a sensitisation effect. Further, when you realise that we needed vaccination to provoke polio in the first place, with the first known outbreak not occurring until mass smallpox vaccination 100 years ago, well then you realise that avoiding the administration

of the other vaccines almost entirely removes any threat of polio anyway." —
Bronwyn Hancock

Not only did the polio vaccine have nothing to do with the decline of paralytic polio (or polio in general), evidence shows that vaccinations for this and other diseases, notably diphtheria, triple antigen (diphtheria, pertussis and tetanus) and smallpox were responsible for its increase. The decline of cases not caused by vaccination began to disappear in the West with improvements in hygiene and sanitation and most of the decline occurred well before the widespread use of polio vaccination.

The following information by the National Anti-Vivisection Society (UK) gives some insight into the relationship between the diphtheria and triple antigen vaccines and paralytic polio:

"The early triple vaccine against diphtheria, whooping cough and tetanus had also been shown beyond doubt to cause paralytic polio in some children to whom it was administered. The incidence of polio in children recently vaccinated against diphtheria was statistically greater than in unvaccinated children, symptoms showing in the vaccinated limb with 28 days of the initial injection. This scandal broke in Britain during 1949, an epidemic year for polio, other reports soon following from Australia. Papers dealing with this topic are plentiful.

One, British, gives details of 17 cases of polio which followed 28 days or less after various injections.

Another, Australian, gives details of 340 cases of polio, 211 of which had been previously vaccinated against whooping cough and/or diphtheria. Of these, 35 had been vaccinated within the preceding 3 months and a further 30 within the previous year. Dr Geffen reported similar findings from the London borough of St Pancras, where 30 children under the age of 5 developed polio within four weeks of being immunised against diphtheria or whooping cough or both, the paralysis affecting, in particular, the limb of injection. Two medical statisticians at the London School of Hygiene and Tropical Medicine examined these reports and concluded that:

"In the 1949 epidemic of poliomyelitis in this country cases of paralysis were occurring which were associated with inoculation procedures carried out within the month preceding the recorded date of onset of the illness."

Dr Arthur Gale of the Ministry of Health reported 65 cases from the Midlands, where paralysis followed about two weeks after an injection: in 49 of these, paralysis occurred in the injected limb. Then it was reported that of 112 cases of paralysis admitted to the Park Hospital, London, during 1947-1949, 14 were paralyzed in the limb which had received one or more of a course of immunising injections within the previous two months. In the majority of cases, the interval between the last injection and the onset of paralysis was between 9 and 14 days. Again, combined whooping cough, diphtheria and tetanus injections were involved.

This outbreak of polio followed an intensive immunisation campaign during that time, 1947-49. Following these findings, the Ministry of Health recommended that diphtheria and triple vaccines should not be used in areas where polio was naturally present. "From that time onwards, the incidence of paralytic polio decreased rapidly in Britain, even prior to the advent of Salk vaccination..."

"Provocation polio. That is the truth about those outbreaks of polio. And I offer a well considered personal opinion that polio is a man made disease." —Viera Scheibner (42).

A recent Romanian study demonstrated that injections of antibiotics following polio vaccination could cause polio. The researchers suggested the rate of "vaccine-induced polio" in Romania could be reduced from 10.3 per year to 1.4 per year, if antibiotic injections were avoided for 30 days following polio vaccination (41).

Correlations with the injections of antibiotics were found: a single injection within one month of vaccination raised the risk of polio 8 times, 2 to 9 injections raised the risk 27-fold, and 10 injections or more raised the risk 182 times (Washington Post, Feb 22, 1995). Study Associates Polio Increase With (antibiotic) Injections.

A study in India suggested that 3/4 of cases of paralytic polio in the past decade

were caused or made more severe by unnecessary injections (41) (The Lancet vol 341)).

Provocation polio

POLIO from diphtheria, tetanus, pertussis, and pesticides

Pesticides:

Today, various other forms of the the word "polio" are still used to describe the effects of poisoning, though usually with regard to paralysis in animals. A search of Medline ("polio" and "poison") finds about 45 contemporary articles where poisoning causality is attributed to polio. The terminology found was:

"polioencephalomalacia", "poliomyelomalacia", "polyradiculoneuritis", "neurological picture similar to that of poliomyelitis",

"polioencephalomyelomalacia", "lumbal poliomyelomalacia", "cerebrocortical necrosis (polioencephalomalacia)", "Lead poisoning in grey-headed fruit bats (*Pteropus poliocephalus*)", "multifocal-poliomyelomalacia", "spinal poliomalacia", "Polio and high-sulfate diets", "Atypical porcine enterovirus encephalomyelitis: possible interaction between enteroviruses and arsenicals", "Polioencephalomalacia and photosensitization associated with *Kochia scoparia* consumption in range cattle", "bovine polioencephalomalacia. —Jim West,

Health and

Research Publications

"When the population is exposed to a chemical agent known to produce in animals lesions in the spinal cord resembling those in human polio, and thereafter the latter disease increases sharply in incidence and maintains its epidemic character year after year, is it unreasonable to suspect an etiologic relationship?" —Biskind

"Since the end of combat in the Philippines, poliomyelitis has been among the leading causes of death in American troops. Even though only the paralytic cases are reported from there, the incidence of poliomyelitis in American troops in the Philippines has been at least ten times as high as in the Army within the continental limits of the U.S. during the past two years. Actually, I believe that it is even higher because hundreds of cases which would have been diagnosed as

dengue-like or sandfly-like fevers...under conditions which , in my opinion, would preclude the occurrence of both dengue and sandfly fever. And yet checks of the surrounding native population revealed no outbreaks of poliomyelitis." — Albert Sabin (Clinical Intoxication from DDT)
Citation with OPs as risk factor for GBS/polio

Third of ME cases are pesticide related

First polio epidemic—1887 Sweden. Patent of first pesticide sprayer—1873.

3) Tonsillectomy: Doctor's are starting to think that the polio epidemics of the 1940's and 1950's may have been caused by the high number of tonsillectomies done in the 1920', 30's and 40's. They have discovered that the only area of the body that can synthesize the antibody to poliomyelitis is the tonsils. If you don't have tonsils you can't fight off polio.

"During the polio epidemics it was found that people who had their tonsils removed were 3-5 times more likely to develop paralysis...There were many at that time that suggested that polio was an iatrogenic disease...we caused thousands of cases of paralysis. We did not cause the polio , but we converted people who would have recovered from a vial illness into people with a paralytic illness." —Dr mark Donohue (41)

The paralysis associated with tonsillectomy was a type called 'bulbar'—the worst, involving the lungs (41).

4) Hygiene. In an outbreak in Taiwan of 1.031 cases in 1982 they found children were 5 times more likely to contract polio if they received non-municipal water rather than municipal water.

POLIO CURED:

Within 2 years after the discovery of ascorbic acid, Jungeblut showed it would inactivate the virus of poliomyelitis. This was pre-Salk. In 1949 Dr Klenner described his successful treatment of polio using Vitamin C, with many dramatic case histories (5).

-97-100% recovered under correct Hygienic treatment

-91%-100% recovered under certain chiropractic care
Polio poster girl cured

-72% recovered under Nurse Kenny treatment

-35% recovered with no professional care

-17% recovered under medical care(8)! (Except for Klenner, who is really Nutritional/Orthomolecular/Metabolic Medicine) Vitamin C in Acute Poliomyelitis: Greer, Medical Times, November 1955 "Large doses of vitamin C have proven beneficial in the management of five serious cases of acute poliomyelitis."

The Treatment of Poliomyelitis and Other Virus Diseases with Vitamin C: Klenner, Southern Medicine & Surgery, July, 1949 "The treatment employed [in the poliomyelitis epidemic in North Carolina in 1948, 60 cases] was vitamin C in massive doses...given like any other antibiotic every two to four hours. The initial dose was 1000 to 2000 mg., depending on age. Children up to four years received the injections intramuscularly...For patients treated in the home the dose schedule was 2000 mg. by needle every six hours, supplemented by 1000 to 2000 mg. every two hours by mouth...dissolved in fruit juice...All patients were clinically well after 72 hours. Where spinal taps were performed, it was the rule to find a reversion of the fluid to normal after the second day of treatment.

Another legacy of vaccines is the suppression of cures such as vitamin C and the suppression of the nutritional cause and prevention of polio. Of course, an easily cured disease would threaten the billion pound vaccine industry (and food processing & sugar industries) as well as show people the true cause of disease: germs arise through pleomorphism (form changing) of cells into bacteria, viruses, and fungi from a diseased/toxic condition. Disease creates germs, not germs create disease. Flies do not create garbage, they just arrive to clear up the mess, like germs. Of course if your body is polluted/diseased or what is called toxic then it is just the place for any germs from another diseased body to jump ship and tuck in. The immune system will also be in a depleted state due to the toxemia of waste products from cell breakdown. "There are no specific

diseases only specific disease conditions." —Florence Nightingale.

Witness the recent cases of TB in "down and outs". One source of TB infection was traced to a man who drank 18 pints of lager every night (30/31/14).

Acceptance of the theory of contagion is contingent upon the germ theory of disease—that specific bacteria and "viruses" produce specific disease symptoms. This theory has been repeatedly demonstrated as incorrect in the scientific field, and was even admitted by Pasteur as incorrect.

Nevertheless, the germ theory and the belief of contagion is difficult to overcome since almost everyones mind has similarly been "infected" by exploitive "health care" industries that have a vested interest in disease and suffering and in perpetuating such erroneous beliefs. Basically the populace believes what the medical establishment wants it to. These false theories maintain demand for drugs, medical and hospital practices, and they are the only ones that teach that health is recovered by administrating poisonous drugs. If germs play any role in the causation of disease, it is never a primary one but is always secondary to those causes that lower our resistance or impair health. (A.Baker, M.A.)

"Diseases are crises of purification, of toxic elimination." —Hippocrates(10).

"There is but one cause of disease, poison toxemia, most of which is created in the body by faulty living habits and faulty elimination." —Sir A. Lane, 80 years ago(10).

The germ theory came from Louis Pasteur, a chemist, who has been found to be a fraud, and plagiarist of Prof Antoine Bechamp (erased from the history books) a genius contemporary of his who discovered the true theory of disease. Even Pasteur on his death bed admitted "the terrain is everything". It was a tragedy for the man in the street that Pasteur's theory became the dogma, but very fruitful to the medical establishment who have frightened him rigid with germs ever since while fleecing him in the process.

"To believe that sickness results solely from the visitation of some itinerant germ or virus and to accept treatment by some poisonous drug is to be found guilty of

the most naive superstition". —Dr D. Phillips

"I have myself, through Natural Hygiene, over 16 years, treated all forms and hundreds of cases of typhus and typhoid fevers, pneumonia's, measles and dysentery's, and have not lost a single patient. The same is true of scarlet and other fevers. No medicine whatever was given". —Dr. Trall, 1860

THE DISAPPEARANCE OF POLIO

[2012] Polio programme: let us declare victory and move on while India has been polio free for a year, there has been a huge increase in non-polio acute flaccid paralysis (NPAFP). In 2011, there were an extra 47,500 new cases of NPAFP. Clinically indistinguishable from polio paralysis but twice as deadly, the incidence of NPAFP was directly proportional to doses of oral polio received. Though this data was collected within the polio surveillance system, it was not investigated. The principle of *primum-non-nocere* was violated.

[2012 April] Rise in paralysis cases after polio vaccine a definite co-relation between the increase in the number AFP and the irrational administration of OPV. Normally, he said, the chances of children under the age of 15 getting affected by non-polio AFP are 1-2 per 100,000. But, the rate of non-polio AFP nationally "is now 12 times higher than expected." In 2011, an additional 47,500 children were newly paralyzed, over and above the standard rate of 2 children per 100,000 non-polio AFP cases, says the paper in the journal.

[2011 May] Polio and lemmings by Hilary Butler Polio has not been eradicated at all. And will not be eradicated. Polio has been renamed...Why have Acute Flaccid Paralysis and Polio been put together? Because Acute Flaccid Paralysis is a catch-all name for what looks like polio, and what you call polio when the crucial polio viral tests don't show polio VIRUSES at all...While the cases of "polio" have gone down, cases of polio which didn't return a positive virus test, and which are now called "Acute Flaccid Paralysis" have skyrocketed. Nice little bit of magicians' sleight of hand...?! A parent who saw that WHO website page, wouldn't know that Acute Flaccid Paralysis was simply polio of old, which covered the same syndromes and symptoms, caused by a large variety of viruses, as well as various toxins. A parent looking at the WHO website, would think to

themselves, "Acute Flaccid Paralysis must be some other "valid" disease in it's own right"...All the kids who used to be on clumsy iron lungs, are now on high tech iron lungs and renamed under the autoimmune moniker called Transverse Myelitis and no doubt other creative titles to spread the decoys around...

All the kids who used to be on clumsy iron lungs, are now on high tech iron lungs and renamed under the autoimmune moniker called Transverse Myelitis and no doubt other creative titles to spread the decoys around. And here is your proof. Hidden away in the forward of a book, by a specialist doctor. Of course, paralyzed cases of transverse myelitis on modern iron lungs isn't something either the media, or WHO will shout from the rooftops. So today, instead of kids with polio in callipers and iron lungs, we have lots of kids with autoimmunity, and...widespread chronic diseases.

As a faculty neurologist and neuroscientist at the Johns Hopkins Hospital in Baltimore Maryland, I have spent the last decade evaluating and treating patients with autoimmune disorders of the nervous system. I founded and continue to direct the Johns Hopkins Transverse Myelitis (TM) Center, the only center in the world dedicated to developing new therapies for this paralyzing autoimmune disorder. Increasingly, I see that more and more patients are being felled by this devastating disorder. Infants as young as five months old can get TM and some are left permanently paralyzed and dependent upon a ventilator to breathe. But this is supposed to be a rare disorder, reportedly affecting only one in a million people. Prior to the 1950s, there were a grand total of four cases reported in the medical literature. Currently, my colleagues at the Johns Hopkins Hospital and I hear about or treat hundreds of new cases every year. In the multiple sclerosis clinic, where I also see patients, the number of cases likewise continues to climb.
—Douglas Kerr, MD, PhD

[2009 Aug] LITTLE KNOWN FACTS ABOUT POLIOMYELITIS

VACCINATIONS by Dr. Viera Scheibner. These days, when a vaccinee develops poliomyelitis, it may not be called poliomyelitis; instead, it may be called viral or aseptic meningitis, ascending paralysis (Guillain-Barre syndrome), cerebral palsy (over 75 per cent of cases are not diagnosed at birth but after six months) or other such names. According to MMWR (1997; 32[29]: 384-385), there are 30,000 to 50,000 cases of aseptic meningitis every year in the United States. Considering that the vast majority (99 per cent) of the reported cases in the pre-vaccine era were non-paralytic and would have corresponded to aseptic or a viral

meningitis, then vaccination has actually increased the incidence of poliomyelitis. In the pre-vaccine era, such high numbers only occurred in some epidemics. Now, such numbers occur every year, year by year.

Jim West, Health and Research Publications:

Polio has not been eradicated by vaccination, it is lurking behind a redefinition and new diagnostic names like viral or aseptic meningitis. According to one of the 1997 issues of the MMWR, there are some 30,000 to 50,000 cases of viral meningitis per year in the United States alone. That's where all those 30,000 - 50,000 cases of polio disappeared after the introduction of mass vaccination"—Viera Scheibner

"Today, various other forms of the the word "polio" are still used to describe the effects of poisoning, though usually with regard to paralysis in animals. A search of Medline ("polio" and "poison") finds about 45 contemporary articles where poisoning causality is attributed to polio. The terminology found was: "polioencephalomalacia", "poliomyelomalacia", "polyradiculoneuritis", "neurological picture similar to that of poliomyelitis", "polioencephalomyelomalacia", "lumbal poliomyelomalacia", "cerebrocortical necrosis (polioencephalomalacia)", "Lead poisoning in grey headed fruit bats (*Pteropus poliocephalus*)", "multifocal-poliomyelomalacia", "spinal poliomalacia", "Polio and high-sulfate diets", "Atypical porcine enterovirus encephalomyelitis: possible interaction between enteroviruses and arsenicals", "Polioencephalomalacia and photosensitization associated with *Kochia scoparia* consumption in range cattle", "bovine polioencephalomalacia.

"The United States Public Health Bureau is extremely reticent about reporting diseases caused by vaccination but the report from 1922 to 1931 admitted that there had been 85 cases of post-vaccinal encephalitis, which DeKruif states "is the twin of infantile paralysis." —Eleanor McBean, PhD, ND

In 1958, the CDC formally adopted the “Best available paralytic poliomyelitis case count” or BAPPCC:

“Cases must be clinically and epidemiologically compatible with poliomyelitis, must have resulted in paralysis, and must have a residual neurological deficit 60 days after onset of initial symptoms...the BAPPCC does not include cases of

non-paralytic poliomyelitis, of those in which paralysis is more transient. The original purpose of developing these criteria was to omit cases possibly due to enteroviruses other than polioviruses.” People who showed polio like symptoms that previously would have been diagnosed as Polio were now being diagnosed as: Acute Flaccid Paralysis (AFP), Transverse Myelitis, Viral or Aseptic Meningitis, Guillain-Barre Syndrome (GBS), Chinese Paralytic Syndrome, Chronic Fatigue Syndrome, Epidemic Cholera, Cholera Morbus, Spinal Meningitis, Spinal Apoplexy, Inhibitory Palsy, Intermittent Fever, Famine Fever, Worm Fever, Bilious Remittent Fever, Ergotism, ME, Post-Polio Syndrome aka GBS. Coxsackie virus and echo viruses can cause paralytic syndromes that are clinically indistinguishable from paralytic poliomyelitis.

"Paralytic cases were not distinguished from non-paralytic cases until a recommendation was made by the Dominion Council of Health in 1949—The LCDC figures provided from 1952 and onward represent this administrative change: recording only those cases adhering to the requirements for a diagnosis of paralytic poliomyelitis. In a report released in June of 1959, another administrative change was recommended by the Dominion Council of Health, further altering the way in which apparent cases of poliomyelitis would be reported. All non-paralytic cases of poliomyelitis were to be henceforth recorded as "meningitis, viral or aseptic," a disease which itself only became reportable in 1952." These two administrative changes effectively reduced the apparent incidence of poliomyelitis. In particular, since the latter change is temporally correlative to the introduction of the polio vaccines, the vaccines appear to have been responsible for a reduction in poliomyelitis cases when it is entirely possible that the administrative changes are primarily responsible." —Catherine Diodati, MA, “Immunization History, Ethics, Law and Health”, p.116)

Statistics on polio were manipulated. One such way was to redefine the disease, renaming it "viral or aseptic meningitis" or "coxsackie virus". In one US county, for example, in July 1955 there were 273 cases of polio reported for 50 cases of aseptic meningitis, compared to 5 cases of polio in 1966 and 256 cases of aseptic meningitis. These new diagnostic guideline's were issued by the CDC. If you object to polio vaccination, and you get polio—it is usually called "polio." If you have been vaccinated and you get "polio", it is called meningitis.

Beddow Bayly, author of the book “The Case Against Vaccination” said: “After

vaccination was introduced, cases of aseptic meningitis were more often reported as a separate disease from polio, but such cases were counted as polio before the vaccine was introduced. The Ministry of Health admitted that the vaccine status of the individual is a guiding factor in diagnosis. If a person who is vaccinated contracts the disease, the disease is simply recorded under a different name.”

Coxsackievirus and echoviruses can cause paralytic syndromes that are clinically indistinguishable from paralytic poliomyelitis. (John H. Menkes, Textbook Of Child Neurology, 5th ed., page 420)

The definition of 'epidemic' was changed from 20 cases/1000,000 to 35 cases/100,000. Pre-vaccination, coxsackie virus and aseptic meningitis were classified as polio; post-vaccination they were classified separately. In addition, non-paralytic polio cases were now reported as viral or aseptic meningitis.

"Ralf R. Scobey, M.D., president of the Poliomyelitis Research Institute. Inc. Syracuse, New York (in the Archives of Pediatrics, Sept. 1950) lists 170 diseases of polio-like symptoms and effects but with different names such as: epidemic cholera, cholera morbus, spinal meningitis, spinal apoplexy, inhibitory palsy, intermittent fever, famine fever, worm fever, bilious remittent fever, ergotism, etc. There are also such common nutritional deficiency diseases as beriberi, scurvy, Asiatic plague, pellagra, prison edema, acidosis etc." —Dr. Eleanor McBean, PhD, ND

"Dr. Thomas Francis did not mention in his key evaluation of the 1954 Salk field trials that those who contracted polio after their first inoculation and before their second inoculation were placed in the "not-inoculated" list.' (Maurice B. Bayly, The Story Of The Salk Anti-poliomyelitis Vaccine, 1956).

Dr. Buchwald responds that prior to the introduction of polio vaccinations in Germany, anyone was counted as having polio, even if they only had the virus in their feces. It is known, he goes on, that there are people who are healthy but who evacuate polio viruses when they go to the bathroom. Based on this criteria, the number of cases was approximately 4,000 per year. After the introduction of the vaccine, statistics included only those polio cases of people who were paralyzed for at least six weeks.—Testimony of Dr. Gerhard Buchwald, MD

A former public health officer, Dr Ratner, reported that just before the introduction of the first polio vaccine the National Foundation For Infant Paralysis was paying physicians \$25 for each reported diagnosis. "A patient would walk into a doctors office with a limp from an accident. He'd say he had a fever a few days ago...and guess what the diagnosis would be?" It was well known Paralytic polio cured itself 50% of the time within 60 days. After the Salk vaccine was introduced, the definition of polio was changed by the CDC. Now, in order to have paralytic polio, you had to have it longer than 60 days.

Because the Salk vaccine was promoted as being incapable of causing polio, cases that occurred following administration of the vaccine were denied, and excluded from the Vaccine injury table.

Dr. Bernard Greenberg, a biostatistics expert, was chairman of the Committee on Evaluation and Standards of the American Public Health Association during the 1950s. He testified at a panel discussion that was used as evidence for the congressional hearings on polio vaccine in 1962. During these hearings he elaborated on the problems associated with polio statistics and disputed claims for the vaccine's effectiveness. He attributed the dramatic decline in polio cases to a change in reporting practices by physicians. Less cases were identified as polio after the vaccination for very specific reasons.

"Prior to 1954 any physician who reported paralytic poliomyelitis was doing his patient a service by way of subsidizing the cost of hospitalization and was being community minded in reporting a communicable disease. The criterion of diagnosis at that time in most health departments followed the World Health Organization definition: "Spinal paralytic poliomyelitis: signs and symptoms of non-paralytic poliomyelitis with the addition of partial or complete paralysis of one or more muscle groups, detected on two examinations at least 24 hours apart." Note that "two examinations at least 24 hours apart" was all that was required. Laboratory confirmation and presence of residual paralysis was not required.

In 1955 the criteria were changed to conform more closely to the definition used in the 1954 field trials: residual paralysis was determined 10 to 20 days after onset of illness and again 50 to 70 days after onset....This change in definition

meant that in 1955 we started reporting a new disease, namely, paralytic poliomyelitis with a longer lasting paralysis. Furthermore, diagnostic procedures have continued to be refined. Coxsackie virus infections and aseptic meningitis have been distinguished from paralytic poliomyelitis. Prior to 1954 large numbers of these cases undoubtedly were mislabeled as paralytic poliomyelitis. Thus, simply by changes in diagnostic criteria, the number of paralytic cases was predetermined to decrease in 1955-1957, whether or not any vaccine was used.

Health officials convinced the Chinese to rename the bulk of their polio to Guillain- Barre Syndrome (GBS). A study found that the new disorder (Chinese Paralytic syndrome) and the GBS was really polio . After mass vaccination in 1971, reports of polio went down but GBS increased about 10 fold...In the WHO polio vaccine eradication in the Americas, there were 930 cases of paralytic disease—all called polio. Five years later, at the end of the campaign, roughly 2000 cases of paralytic disease occurred—but only 6 of them were called polio (41). The rate of paralytic disease doubled, but the disease definition changed so drastically that hardly any of it was called polio any more." —Greg Beattie

"They started vaccinating in 1985 (in the Americas). Within 4 months they had 350 cases...They caused a substantial, huge outbreak of polio but they started 'discarding' most of the cases (put as flaccid paralysis)." —Dr. Viera Scheibner, PhD
